Made in Canada

Hart Mower Files

Are needed now. You can make good sales in this season of growing and mowing.

These superior Mower Files are the outcome of 34 years' experience in the manufacture of abrasives; of 34 years' constant vigilance to discover and adopt every improvement that modern progress and science can discover.

They have the selling points to convince your customers. Yet the customers know you have them by making attention compelling displays. Put Hart Mower Files in the windows with your garden tools and agricultural implements.

There Is No Troublesome Bother About Fitting

"KASEMENT"

Screen Doors

"Kasement" Screen Doors are not only made better than ordinary screen doors, but everything is done to make it simple for the busy householder to put them up easily and quickly. They are made oversize, fitting **against** the door frame not in between. Even the three holes for hinges are bored in each stile. All the hardware comes with them, and is made simple and easy to adjust. Kasement Doors can easily be hung in ten minutes, or taken down in a jiffy. They are made with 26 mortise and tenon joints, so that they cannot sag or pull apart. Call, and let us show you how Kasement Screen Doors simplify your summer equipment for the house.

A Hardware Store

156 West St., Phone No. 456
Easternton, N.S.

We Gladly Help to Make Your Space in Newspapers Pay

Your advertising space in local newspapers is only blank space when you buy it. It becomes anything from zero to 100% efficient according to what you put in it.

"It Pays to Advertise," but lots of stuff printed in advertising space is not Advertising and doesn't pay. Good typography, illustration, layouts, and copy that shows the "reason why," must be used to get results.

You will find these two suggestions effective. They are for single newspaper column, 63 lines (4½") deep.

Write today for details

Kasement

Skrene Dore Co., Limited
269 Richmond St.
Toronto - Canada

Holes Already Bored For Hinges — Everything Made Easy for You With

"KASEMENT"

Screen Doors

Those holes for hinges are characteristic of the forethought given to Kasement Screen Doors. Beside being better made, and more durable and substantial than ordinary doors, Kasement Screen Doors have been made exceptionally easy to hang.

Drop into the store and let us show you how well-made and easily hung these better screen doors are. Let us show you the 26 mortise and tenon joints that prevent sagging, or pulling apart. You can hang a Kasement Screen Door in 10 minutes and take it down in 10 seconds. All the hardware comes with them. It's the easiest way to equip your home with Screen Doors.

Bien Fait, Que.

NORCROSS

GARDEN CULTIVATORS

are growing in demand every day. Over a Million are now in use. Sell one to a customer and you get his next door neighbor. Every Farmer and Gardener is a prospect. The Norcross comes in (3) sizes, 5-Prong, 3-Prong and Midget, suited to both men and women. A Norcross bears a Distinctiveness of Quality—Class and Finish that quickly appeals to buyers. Well made—Durable—Handsome in appearance, they sell readily at a good profit and you can confidently recommend them. Ask your jobber for Norcross Goods.

C. S. NORCROSS & SONS
Sole Mfrs. BUSHNELL, ILL.

A Proposition To the Trade

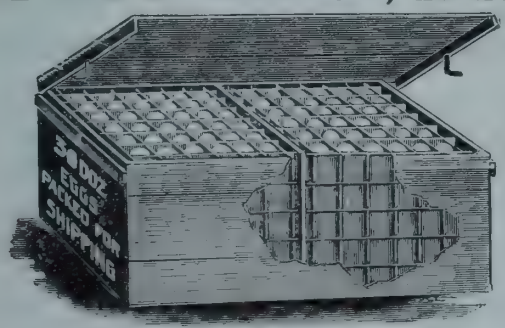
If a customer enters your store complaining of engine trouble—caused by a carbonized engine—how would you like to say, "Take a can of

D-B CARBON REMOVER

and try it on your engine; it will not cost you a cent for the trial if it proves unsatisfactory?"

If the customer **DOES** return the can as unsatisfactory, WE WILL PAY YOU FOR THE RETAIL VALUE. Therefore, Mr. Dealer, you cannot lose anything, and have lots to gain by stocking up on D-B Carbon Remover.

We will take the chance, because we have absolute confidence in D-B Carbon Remover. All you need to do to get the large profits is to give the can to your customers.



Write us for more particulars.

Auto Jack says:

D-B Carbon Remover is not injurious to the metal, it pulverizes the carbon at the first explosion and forces it out through the exhaust.

Instructive Advertisements

"I think the advertisements are good and I read them all the time. If it were not for the ads. I would not be able to keep up-to-date on new equipment. It is the only way we learn about anything new, as circulars are mostly kept in the offices," writes a Hamilton reader.

Double Moral—Read the Advertisements.
Use Hardware and Metal for Advertising.

Who Wants the *Westco* Tankless Water System?

For the information of all Westco dealers and prospective dealers, here is a list of uses to which the Westco Tankless Water System can be put:

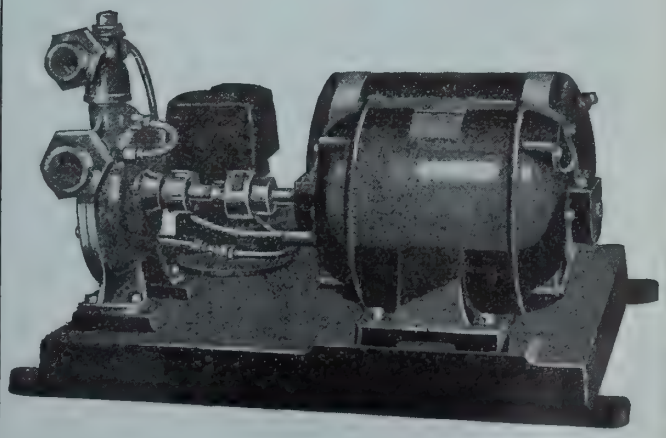
Farms and Suburban Homes.
Pressure water supply service, and pumps for general pumping duty.

For City Homes.
Water supply systems where city pressure is inadequate and where soft water is desired.

For Schools.
For distributing drinking water, and sanitary arrangements.
Boiler feed pumps.
Fire protection, etc.

For Hotels.
Booster service pumps.
General water supply service.
Ice water supply.
Fire protection.
Auxiliary heating plant service, etc.

For Group Service.
Groups of summer cottages.
Sub-Divisions.



Rural Communities.
Wherever water supply systems are used for general pumping and fire protection.

For Public and Private Institutions.
Orphanages, Dormitories, Fraternal Homes, Religious Institutions, Gymnasiums, Sanatoriums, Hospitals and all Public Institutions.

The Westco Tankless Water Systems now going on the market have new features that make them a very attractive line to handle.

Write us for full particulars of dealers' discounts, and co-operative plan.

THE SPECIALTY MFG. CO.
St. Paul, Minn., U.S.A.

Star W-X Shock Absorber FOR FORD CARS

Star W-X Shock Absorber for Ford Cars. Simple and easy to attach without extra tools; merely put in place of the removed shackles. Rigid against end or fore-and-aft movement, but offers no interference with regular Ford spring mountings.

Gives a greater flexibility of action from normal to full load because of changing fulcrum of levers. This, together with two high-grade compression springs at each corner of the car, insures easy riding and prevents breakage.

Prices within reach of every Ford owner, and the device is easily installed by owner.

Canadian Representative: T. MORTIMER, 64 Wellington St. W., Toronto

Star Specialty Manufacturing Company
227-233 West Erie Street **Chicago, Illinois**

Subscription price of HARDWARE AND METAL is $4.00 per year or less than 6 cents per issue.

Have You a Plumbing or Furnace Department ?

YOU need SANITARY ENGINEER, PLUMBER AND STEAMFITTER, the recognized authority in plumbing, steamfitting and furnace work.

For definite market information, for new ways of building business—new solutions for old problems, and up-to-date methods, SANITARY ENGINEER will help you to make more money in your business. Two features alone, in SANITARY ENGINEER, brings ten times the money than the enrolment price for a year's reading.

Practical sheet metal work is a practical series of articles which is worth a good deal more to you than the price of a year's subscription. *Sewage disposals for small communities* will assist you in installing systems and make money out of their installation. In addition SANITARY ENGINEER contains feature articles on advertising, on window display, on follow-up letters, articles on figuring costs, how to make up daily or monthly cost estimates, how to figure costs where both hand and machine work are employed. How to find cost by job, by contract, etc., how to check incoming and outgoing material, how to keep a perpetual inventory. How to find selling costs, how to charge expenses, advertising, how to handle general expenses, how to handle general expenses, how to standardize costs records, how to devise schemes for going after new business.

Please remember SANITARY ENGINEER is not designed to entertain or amuse, but to show you how to get after business more effectively, to prove the accuracy of your costs, and by reducing expenses to make more money and added profits out of your business. Will you fill in the card to-day and prove for yourself what value in this bi-monthly readings can be for you in your plumbing business?

WHEN EVERY PUBLISHER has a complete and efficient system of record and knows positively the facts regarding the circulation of his paper—

And when every publisher is willing to give these facts to advertisers without dissimulation—

It will be because every publisher is a member of the Audit Bureau of Circulations.

But all publishers have not an efficient system of records and all are not guileless.

To protect themselves against unfair competition and to inform advertisers in regard to their business methods, "above board" publishers join the Audit Bureau of Circulations. Advertisers know that no unfair publication can qualify for membership.

Every straightforward paper may belong to the A.B.C.

Most of them do belong.

Hardware and Metal is one of them.

If interested tear out this page and place with letters to be answered.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

Have you any small needs?

Do you want to sell anything?

If so, advertise on this page and watch results.

Practically all big buyers of hardware in Canada are readers of HARDWARE AND METAL.

TWO Taylor Safes FOR SALE

One J. & J. Taylor Safe, inside dimensions 15″ deep by 2′ 6″ wide by 3′ 11½″ high, and fitted with a built-in compartment. Price, $200.

One J. & J. Taylor Safe, inside dimensions 18″ deep by 2′ 9″ wide by 4′ 5″ high, and fitted with a steel compartment. Price, $250.

Both these safes are in first-class condition, and the prices quoted above are considerably less than half what similar safes are selling for to-day.

We are offering these for sale as we have installed larger vault accommodation.

Any firms requiring a safe would do well to communicate at once with Box 22, The MacLean Publishing Company, 143 University Ave., Toronto.

HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

Metal Stamping and Press Work to Order

Also name plates, embossed trade checks, time checks, badges, steel stamps and stencils or anything in steel or brass lettered or embossed to order.

Face Facts On Your Plier Business!

SILVER-TONGUED salesmen to the contrary—every hardware dealer knows he can't stock half a dozen lines of pliers and show a profit.

In these days of readjustment, leading hardware dealers are cutting their plier lines to one "quality line" and a line or two lower in price for general demand.

The "Klein line" has been built out of the experience of over half a century of supplying the quality trade—every tool is right and the line is cut to the few patterns and sizes in demand.

There are no left-overs to sell at a sacrifice and a complete stock can be carried at a very small initial cost.

The finest of materials and workmanship go into every Klein plier—and they sell to a well established trade, the growth of over fifty years of good will.

We back you with the right kind of advertising helps—counter display—window displays and enameled signs.

Put "Klein Pliers" in as your **quality line**—write for our new proposition to-day!

DAYTON ANNOUNCEMENT

Word Contest Prize Winners

Dayton Scales quickly save for Canadian merchants sums far exceeding those we are giving in prizes.

TO THE PUBLIC:

We take pleasure in announcing to the thousands of competitors and their friends, all over Canada, the results of the Big $2,500 Dayton Scales Word Contest.

After several busy weeks, the task of checking up carefully every list sent in has been completed by the capable and impartial committee appointed for this purpose, and the keen interest displayed everywhere in the contest; the vast number of replies received and the many evidences they give of resource and initiative are all gratifying to us. We have every hope that our satisfaction over the outcome of this clean-cut, wholesome contest will be shared by our patrons and the general public.

Prize List Leaders

H. F. PRELIPP
Winner of First Prize

FIRST PRIZE—$300
H. F. Prelipp—Hamilton Hardware Co.,
316 King St. West, Hamilton, Ont.

SECOND PRIZE—$200
J. Robinson—Robinson Hardware Co., 195 Royce Ave., Toronto, Ont.

THIRD PRIZE—$100
A. D. McIntyre—A. D. McIntyre, Hardware Dealer, Woodville, Ont.

FOURTH PRIZE—$75
W. Spooner—Spooner's Grocery, 10128 124th St., Edmonton, Alta.

FIFTH PRIZE—$50
Miss A. R. Manning—J. E. Manning's Grocery,
493 Sargent Ave., Winnipeg, Man.

SIXTH PRIZE—$20
J. E. Manning—J. E. Manning's Grocery,
493 Sargent Ave., Winnipeg, Man.

In all, 372 Cash Prizes, aggregating $2,500, are being awarded.

A LESSON FROM THE CONTEST

The Dayton Scales word contest proves that Canadian retail merchants and their clerks are systematic.

A glance at the lists of words sent in shows that the great majority did not tackle their problem in haphazard fashion—but built up their lists to surprising totals by well-ordered, systematic research.

The lesson is:

The systematic merchant and the systematic clerk should insist on store equipment which will promote system in doing business.

The store equipped with Dayton Scales is the store which employs SYSTEM to save time and money for both buyer and seller.

Thos. Shubrook,
Heward, Sask.
master painter, says—

"ELEPHANT BRAND
Genuine White Lead
is the finest I have used"

A CANADIAN PRODUCT

Mr. Shubrook's words express the opinion of the best painters everywhere concerning Elephant Brand Genuine White Lead. Its beautiful snowy whiteness, its unequalled smoothness of texture, its quality—**guaranteed** by the Government label on the back of every can—these are some of the reasons why Elephant Brand is rightly regarded as the standard of goodness in Canadian White Leads.

Elephant Brand Genuine White Lead is but one of the many Canada Paint Products that so many dealers are featuring to excellent advantage. Paints, Stains, Varnishes, Dry Colors, Insecticides—the best of their kind—are all included in the Canada Paint line.

ELEPHANT BRAND PURE PUTTY

The unusual popularity of this putty is due to the high standard of quality that is maintained. As is the case with Elephant Brand White Lead and all other Canada Paint Products only the finest of selected raw materials are used. It never fails to please the painter and glazier.

Would you like to receive particulars of the C. P. Agency proposition?

You Should Sell the Puritan Oil Stove

THE Puritan Stove is recognized as the most effective short chimney Stove ever made. Distinctive improvements have been made over all other stoves of this type.

The announcement made a short time ago that we had obtained the exclusive rights to sell Puritan Stoves in Canada has been greeted with enthusiasm. The first orders received are an excellent indication of the future popularity of this oil burning stove.

Easy To Light—The wick can be set for burning and lit with absolutely no fear of it creeping; an indicator on every burner makes it convenient for adjusting the flame—low, medium or high. The wick stop device prevents the wick from being turned too high, and as a result of complete combustion there are no black pots. The utensils sit in a clean hot flame, which comes up through the grate like gas.

The inner combustion tube is *guaranteed* against burning out for *five years*.

The reversible glass oil reservoir makes refilling easy—no need for the hands to get oily.

Puritan Stoves can be had in 2, 3 and 4 burner sizes. If you have not already had prices, discounts, etc., get in touch with your jobber, or write us direct. Include one or more of these Stoves when ordering enameled ware.

"America"
Trolley Hangers
The Dealers' Friend

Steel Trolley Track
The "America" operates in the Hatch Trolley track—the only track supported by the famous corrugated track brackets. These brackets are, naturally, much stronger and better than ordinary plain track brackets.

The Largest Sales of any Trolley Hanger in the Dominion

If you are not now sharing in the sales of this "best seller" and others of the popular Canada Steel Goods Line, you are overlooking an opportunity for constant, profitable sales.

"America" is for warehouse, factory, garage and barn doors. It has tandem trucks, hardened roller bearings and an apron 6 in. long, 3¼ in. wide. This hanger appeals to customers because of the simple adjustments, anti-friction forged steel yokes and ability to stand hard usage.

Its popularity with consumers and its great demand are well founded—on merit.

With each pair of Hangers are included two End Caps, Bolts for Hangers and Lag Screws for Brackets.

Packed one pair in a box complete with Screws and Bolts.

Weight per dozen pairs, without Brackets, 95 pounds.

JEWEL STOVES AND RANGES

Are Better Stoves

When this institution was founded in the year 1864, a real stove service was begun. Long experience in stove manufacturing and selling has made us realize that the essential thing to the buyer is genuine service. Our business has extended steadily and surely until to-day it is one of the largest of its kind in Canada. Whatever your needs, whether large or small, we can meet them readily and most satisfactorily. Every well informed man and woman knows something about the celebrated line of JEWEL STOVES.

The JEWEL is built to stand up under the most severe tests

The dealer who would multiply his sales and give his customers a real, serviceable and economical heating and cooking appliance should sell the JEWEL LINE. We can meet your every requirement; no order is too large for our capacity, none too small for our most careful attention. Catalogue and Price List will be mailed on application.

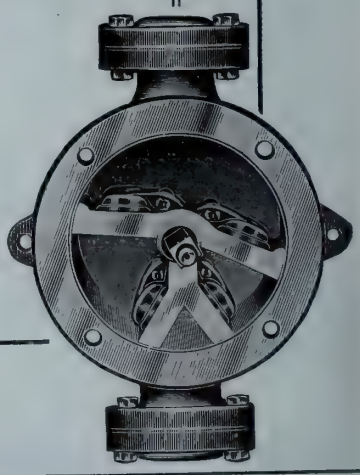
McDougall Oscillating Pumps

McDougall quality built into a line of pumps that have not, until now, been giving the same satisfaction as the original imported articles gave

We do not sacrifice quality for quantity.

By producing pumps in which the leading feature is quality our sales so increase that we are able to manufacture these pumps in very large quantities.

In this way the production cost is cut to a minimum and you benefit by this to the same extent that we do.



McDougall Oscillating Pumps are built; they are not a collection of castings fitted together. Each valve and plunger is numbered and fitted to its proper place in each individual pump. The pump is then finished and tested. This means that the pump is put under 60 lbs. pressure to see that the case is absolutely tight. The pump is then made to force water to a pressure of 40 lbs., so that before it is painted and shipped it must pass a very thorough test.

With each pump goes our guarantee that it is as perfect as any pump can be made. Were it ever necessary we replace any defective parts free of charge.

The demand for these pumps is increasing every day but we still have a good stock and can fill all orders immediately.

Millers Falls

Ford Auger Bits

Solid Center Pattern No. 542

Sizes in sixteenths: 3-4-5-6-7-8-9-10-11-12-13-14-15-16-17-18-19-20-21-22-24. Packed one-half dozen in a paste board box up to and including 24/16 in. Also put up in wooden boxes and canvas roll sets.

The solid center auger bit is popular with most mechanics. This is especially true in its smaller sizes, because its strength is so clearly apparent, and because it is a great improvement over the old style twisted bit in its ability to clear itself.

This type of bit also made in car bits and ship auger car bits.

Single Lip Auger Bit No. 531

Sizes in sixteenths: 3-4-5-6-7-8-9-10-11-12-13-14-15-16-17-18-19-20-21-22-24-26-28-30-32. Packed one-half dozen in a paste board box up to and including 24/16 in., also put up in wooden boxes and canvas roll sets.

In perfecting these bits, we cast aside all tradition of auger bit making and scientifically designed a type of bit that would give the greatest cutting power with the least friction. The concave spiral draws the chips towards the center of the bit, and carries them to the surface, instead of driving them to the sides of the hole where they tend to bind and choke the bit. This feature alone distinguishes this line of bits, for it accomplishes this purpose better than any other bit.

This type also made in car bits, ship auger car bits, ship augers, machine bits and boring machine augers.

Your stock is incomplete without these Ford Bits. Ask your jobber to show them to you.

Let's Be Reasonable

Does any reader of this page believe that **at this time** a re-adjustment of wages and hours in the printing industry involving an increase in labor costs of 36 per cent. is justified?

"Well," the reader asks, "What **are** present wages and hours?"

Toronto printers now have a minimum wage scale of $35.20 per week for 48 hours. This is an increase of 10 per cent. over the scale called for in the agreement now expiring and was granted voluntarily by employers a year ago.

Their demands now are for a wage of $44 per week for 44 hours.

This is an increase of $8.80 per week for four hours less work.

It means an increase in labor costs of 36 per cent.

Toronto employing printers feel that they cannot grant these demands, and they believe that the general public will support them in their opposition to an increase of from 73c per hour to $1.00 per hour to printers, pressmen, bookbinders, and mailers, **at the present time** and in view of business conditions **as they now exist.**

It is understood that International Union officials at Indianapolis have issued orders to local unions that the 44-hour week must be the basis of all new agreements.

In this order, employing printers believe that these Indianapolis officials are out of line with the need which is apparent in every industry for lower cost of production.

This is not a time for saddling any industry with an additional 36 per cent. labor cost, and publishers and job printers feel that they are justified—in the interest of the public—in resisting this unreasonable demand from Indianapolis.

The issue will be decided between now and June 1st. If the union demands of an increased wage of $8.80 per week for 4 hours' less service are not withdrawn, a strike seems inevitable.

Pressure, therefore, must be brought to bear upon the officials at Indianapolis. They must be shown by members of the local union (many of whom feel that they are being forced to make unreasonable demands) that the Canadian public which buys the product of the printing craft, either in the form of advertising or subscription, does not look with favor upon any ruling which would add so heavily to the cost of that product.

Publishers and job printers in Toronto want to be fair. This is indicated by their action in voluntarily raising wages a year ago.

They must, however, in justice to themselves and the public they serve, resist these impossible demands.

Let's Be Reasonable

An expression of opinion of readers of this paper on the Union's proposals, involving an increase of 36% in the labor cost of printed matter, is asked. Will you not write a letter (no for publication) telling him your view of the situation?

This statement is published by and has received the endorsation of Toronto publishers who are members of the

Canadian National Newspapers and Periodicals Association

including Hardware and Metal

This Book

tells why farmers are good customers for screw plates—*Now.*

A book written by farmers, for farmers, about farm uses for taps, dies, reamers and drills is being advertised extensively this month to practically every farmer in the country.

THIS book should be read by every hardware dealer who sells to farmers, not only in strictly agricultural districts, but in all sections where trucks, tractors, autos, or implements of any kind are used.

It will give you an idea of how important the use of taps and dies is becoming in making small, every-day farm repairs. It shows you what tools are saleable for different kinds of jobs. It is a simple guide to establish an entirely new merchandising plan for building up a profitable Screw Plate department in your store.

"How I Fixed It," this new booklet, is not a catalog, but something the farmer will enjoy reading from cover to cover.

It is being sent direct to any inquirer who answers our advertisements in the Saturday Evening Post, Country Gentleman and other mediums—and there is a copy waiting for *you* if you will return the coupon at once.

We also have reserved a few copies for distribution by hardware dealers to their customers where we know they will be used right. Send for the book, and see why farmers, publishers, and county agents have indorsed it, and why it will help your business.

Sell every farmer one or more of these Threading Outfits.

No. 311 Little Giant Screw Plate containing 32 SAE and USS taps and dies from ¼ in. to ¾ in., 2 tap wrenches and 2 die stocks. Price, $56.00.

No. 315 OK Screw Plate contains 28 SAE and USS taps and dies from ¼ in. to ¾ in., with die stock and tap wrench. Price, $42.50.

Assortment A—Pipe Tool Set contains OK stocks and dies cutting from ¼ in. to 1 in., pipe wrench, pipe cutter, pipe vise, oil can and pipe cement. Price, $23.50.

"STERLING"

Oil Stove Ovens

A THOROUGHLY reliable oven, and, on account of the Davidson quality, always a ready seller. This "Sterling" line is made of 26-gauge blued steel, strong and durable. For two burners and is protected by a heavy asbestos lining, which also prevents waste heat. Painted with a rustproof combination which adds to the life of the oven. Cold handles at side and a door knob which locks in three places—heavy panel glass in door. Illustration shows oven closed and open.

Write us for prices. Ask for Booklet No. 2.

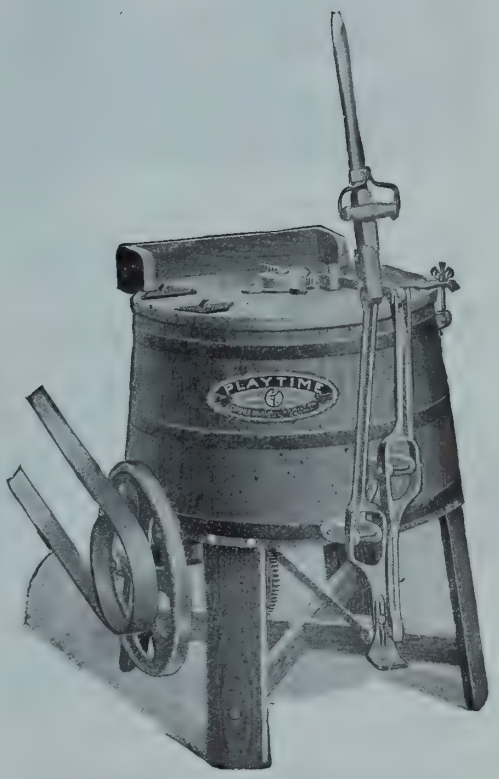
75 Years Successful Manufacturing

If interested tear out this page and place with letters to be answered.



The Playtime

is a dolly-type washer which meets every demand for a combination hand and engine drive machine.

It especially appeals to up-to-date farmers who are not yet prepared to invest in the higher-priced "Seafoam" washing and wringing outfit.

Without alteration it can be belted to the flange fitted on fly-wheel. Should the power stop at any time it is ready for hand use.

The cover can be raised and lowered without removing the belt.

Tub is made of Cypress, corrugated and waterproofed inside, heavily hooped and durably finished. Its reputation has been established for some years.

Remarkably low in price.

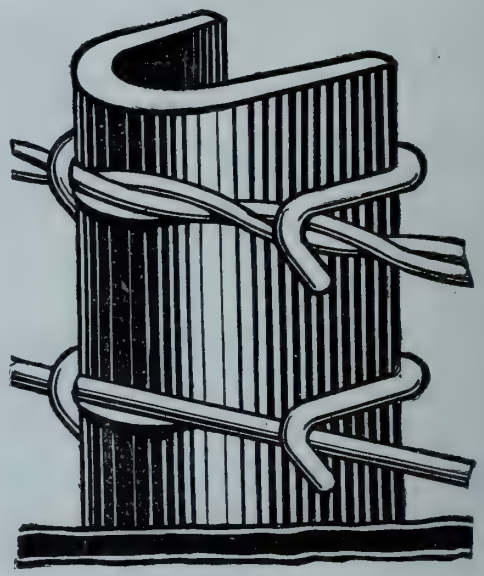
MENDETS
A PATENT PATCH

For Quick Sales— Small Investment



Mendets have appealing points of interest for every hardware merchant. In the first place they sell, literally, by the millions of boxes.

The investment for a stock of Mendets is small. They occupy little space in your store. There is no elaborate demonstration necessary; nothing hard to understand about them. In fact, a display on your counter attracts customers, the simplicity and desirableness of the Mendet idea closes the sale. It works while you are attending to other sales. Why not have the additional money coming in?

Collette Mfg. Company
Collingwood, Ontario

Ask Your Customers What It Costs Them To Dig Post Holes

Aside from the hard work required to dig post holes there is the high cost. Labor to-day is not cheap and the average farm hand can't dig and set more than three cedar posts an hour. You can easily figure it costs real money to put cedar posts up.

"BURLINGTON" STEEL FENCE POSTS

eliminate this unnecessary cost and hard labor. And the fence will be permanent and strong.

These are sales features that make "Burlington" Steel Fence Posts satisfactory for you to handle.

Let us send you details.

Demon Grip

Pump Rod Couplings

The new "Demon Grip" Welded Steel Pump Rod Coupling has many superior features, features that assure the consumer faithful service, and the dealer easily closed sales.

Made of Steel—same as the rod.
Hot Forged—perfect hex.
Welded—makes solid job.
Strongest—over three times as strong as a malleable.
Packing—twenty-five in a box to go on your shelf.
Novel—the above advantages make a novelty of a very staple article. The DEMON GRIP cannot help attracting attention.

Manufactured by

Edward E. Johnson, Inc.
2304 Long Ave., St. Paul, Minn.

"Business was demoralized—I jumped in all the harder"

"In 1894," says Mr. L. S. Starrett, founder and active president of the L. S. Starrett Company, "business was demoralized, manufacturers discouraged and laborers thrown out of employment. I believed that the ebb in business would be followed by a flood tide. Therefore, instead of being discouraged, I 'jumped in all the harder,' and built an addition to my plant."

To-day, as in 1894, the Starrett program is for "jumping in all the harder."

Every hardware dealer today—for his own interest and the national good—should join in the Starrett policy of faith and courage—and "jump in all the harder" to hasten and heighten the tide of business in its returning flood.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

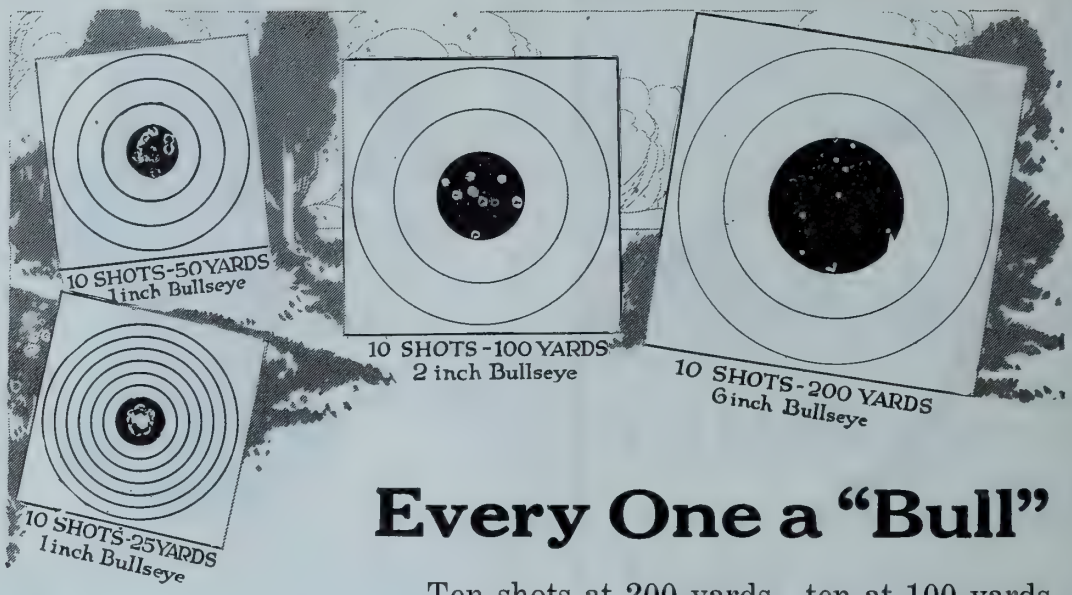
Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.



There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a source of Good Revenue

Important Amendments to Budget

Binder Twine Exempted From Proposed Taxation Which Would Handicap Canadian Manufacturers in Favor of Those of U.S.—Sales Tax Must be Shown Separately on Invoices to Extent of 1½%—Reduce Lumber Tax to Help Building—Importers Make Protests.

A NUMBER of changes in the budget tax proposals have followed the careful investigation which has been made by business men into the various provisions outlined in the original announcement.

Exempt Binder Twine

In presenting the case for the binder twine manufacturers, it was stated that such manufacturers were forced to pay a sales tax of 2½ per cent. on their flax fibre and 3 per cent. on their sales of the finished article. On the other hand manufacturers in the United States were only compelled to pay the sales tax of 4 per cent. on importation. This handicapped the Canadian manufacturer to the extent of 1½ per cent. Sir Henry Drayton agreed that binder twine should be exempted and announced that an Order-in-Council would be passed to that effect, making the exemption retroactive.

Sales Tax to be Shown Separately

The question of showing the sales tax separately on invoices has been debated in the House of Commons since the original resolution was introduced which left it optional with manufacturers and wholesalers as to whether they absorbed this or showed it on invoices as a separate item. This resulted in the amendment proposed by the minister of finance, which provides that the purchaser shall be furnished with a written invoice of any sale stating separately the amount of the tax to at least the extent of 1½ per cent. and such tax must not be included in the manufacturers', producers' or wholesalers' costs on which profit is calculated.

Manufacturer Shows Same Tax as Wholesaler

On being questioned as to why the full amount of the tax should not be shown Sir Henry Drayton explained that the change now proposed would mean a return to the system in vogue last year. A wholesaler when making a sale showed 1½ per cent. only. If a manufacturer made a sale direct to a retailer and if he had to show the full tax he would have to show twice as much tax as was shown by the wholesaler. The manufacturer desired the opportunity of showing the same tax as the wholesaler and that is given him by the new amendment. The amendment was carried.

Reduce Lumber Tax to Help Building

The original resolution provided for an excise duty of three per cent. on lumber. A government amendment alters this tax to two per cent. on lumber sold and delivered by the Canadian manufacturer and three per cent. on imported lumber. No further excise taxes will be made on lumber other than those mentioned. To encourage building and eliminate obstructions from construction are the causes for the change.

Importers Protest Customs Valuation Charge

Importers, chiefly those importing German goods, have been making strong protest to Ottawa concerning the provision that customs valuation shall disregard depreciation in foreign currency below 50 per cent. These importers claim that at least five million dollars worth of German goods are at present en route for Canada and a big decrease in trade is feared if the clause referred to is adopted. The deputation was informed that consideration would be given their protest. It was pointed out that taking a two-cent basis for the value of the German mark at present, this will be increased for customs valuation to twelve cents and upon that basis the importer will pay.

Advance in Import Rates Greater Than Advance in Sales Tax

"Just what effect this taxation will have on general hardware, domestic and imported, we do not know, as we are manufacturers of tools only, but so far as it affects us, we are of the opinion that what little effect it has, will be beneficial as the advance in the rate on imports is slightly greater than the sales tax on domestic manufactures, and we will be benefited to that extent at any rate. The manufacturers will also be benefited by the placing of a tariff on the exchange based on the value of the U. S. dollar," said F. S. Laythe, Ass't. Treasurer, Butterfield & Co., Rock Island, Que., to Hardware and Metal.

"We are entirely satisfied with the way the sales tax has been and will be applied, and we have no suggestion to make regarding the collection of the taxes. We believe that the present method is efficient and entirely satisfactory, and so far as we are concerned, we are entirely willing to let the collection of taxes continue as at present."

Interesting Points in Retailers' Test Case

Recent Hearing of Case to Determine Status of Various Branches of Trade Decided in Favor of Retailers—No Steps to Have Refund Made to Tinsmiths.

THE judgment in the test case which was taken by the Dominion Government against Messrs. Pedrick and Palen, merchant tailors, Bank Street, Ottawa, to compel them to take out a manufacturer's license and pay a sales tax, was rendered in favor of the defendants, and incidentally in favor of thousands of retail merchants throughout Canada, including tinsmiths.

The decision is vastly important, because it settles once and for all the question of what constitutes a retail merchant. It will be a precedent for other courts throughout Canada in settling questions of a like nature. This case was defended by the Retail Merchants' Association of Canada, and it took up a lot of time and attention, but it was well worth both the time and the expense because it practically covers every case that has come up in every section of the retail trade since the War Revenue Act came into operation, and it proves beyond doubt that the association's contention was right. The question of what constitutes a manufacturer, a wholesaler and a retailer has been one that has caused contention and discussion over a period of forty years. Latterly when governments have undertaken to put restrictions on any of these classes, the clerks in the various departments of the government, who are not familiar with commercial conditions, have placed their own interpretation on it. For instance, not so long ago the department of statistics was asked by the department of labor to gather certain facts concerning manufacturers. This department immediately took it upon itself to classify certain retailers as manufacturers, with the result that the retailers in question were put under the inconvenience of filling out forms, which caused them an immense loss of time and much expense. When such cases as these arise in the future there can be only one basis of settlement.

The decision will likewise be a precedent for the other courts when questions arise, such as under what class, in the Assessment Act, a merchant would come. For instance, the assessment in Ontario is 60 per cent. on manufacturers; 70 per cent. on wholesalers and 25 per cent. on retailers. The decision will help the revision and county courts of each province to settle this question, which has been a most contentious one for years.

The Judgment

In referring to the word "manufacturer" the judge states that it is an elementary rule of statutory construction that every word ought to be construed in its ordinary or primary sense, unless a secondary or more limited sense is required by the subject matter of the context. He then goes on to say what is the primary and natural meaning of the word.

"From its etymology the word obviously means to make by hand. Under this primary signification every human being, it must be conceded, is a manufacturer in the sense that, owing to the rigor of the punitive dispensation to which our race was condemned after the fall of Adam, he has to use his hands. But that is not the meaning that is to be attached to this word 'manufacturer' in the present issue. The object of the act cannot be to weld into the class of manufacturer all classes of men who manufacture, who make or do any work, or part thereof, with their hands.

"Apart from any legal rule of construction would it not seem to submit the word to an undue straining, to do violence to the English language to hold for instance a humble seamstress, dressmaker, making a few dresses for consumers, to be a manufacturer—or, as in the present controversy, a humble merchant tailor making suits for consumers to be a manufacturer. If a meeting of manufacturers were called to discuss matters relating to their business, neither dressmakers nor retail merchant tailors would be expected or even allowed to attend such a gathering. There is but one sane conclusion to be arrived at, if one is to be guided by common sense, and that is the retailer is not a manufacturer in the general acceptance of the word."

Costs Large

Commenting on this judgment, E. M. Trowern, secretary of the Retail Merchants' Association of Canada, said: "It is a disagreeable position for any association to take—that of opposing any government legislation, but the case which has just been settled was one of such importance to the retail trade of Canada that we found it could not be settled in any other way. We were forced to take it to the courts. The costs have been large, but the result of the action means that every line of the retail trade will be benefited and the result emphasizes the importance of all retail merchants being united in one big organization, and not divided into separate groups, or separate single lines of trade associations.

"The head office being located in Ottawa, and having the facilities for giving the Act close study when it was first prepared, and following its passage through the House of Commons and the Senate, enabled us to understand its intent and meaning, and we were certainly surprised when we found the Department of Customs and Inland Revenue endeavoring to classify all retail merchants who do a small amount of assembling and manufacturing in almost every line of retail trade as manufacturers.

"We presented our views to the Department and also to the Government, but we secured no redress. We then engaged the best counsel obtainable in Ottawa and explained our case to him, and a suit was commenced in the Exchequer Court. We asked our members not to take out manufacturers' licenses, or to collect or pay a sales tax, pending the result of this suit. A very large number of members in all parts of Canada stood loyally behind us in our request, and by doing so they have been saved considerable annoyance as well as a great expense, which should show them once more the value of being members of one big, united organization such as ours.

"A few of our members, and many who are not members, who took out manufacturers' licenses and paid the sales tax have asked our opinion as to the advisability of their requesting the Government to have the sums so paid returned to them, but we have advised them that we do not feel that we should be called upon to take this matter up with the Government, especially as we requested the retail trade generally not to take out a manufacturer's license or to collect or pay a sales tax.

"There is another suit still pending in another court in Ottawa against retail confectioners, which was instituted by the Government and which is being defended by our association. There is a slight difference between the two cases, as this one involves the question of the luxury tax as well as the question of the sales tax, but we have every reason to believe that we will also succeed in our contention in this matter."

SUGGESTS BETTER LIGHTING FOR DISPLAY WINDOW

Merchants' lack of taste and foresight in window illumination was emphasized by an electrical engineer in a recent address in Toronto. His principal criticism was that the apparent objective of the business man was to create a glare which would outshine that of his neighbor.

He criticized the strong, unprotected nitrogen lamp window illumination as so dazzling as to repel customers. The source of illumination, he said, should not be seen at all, the light being gently reflected on the goods from above.

A Cash Basis Means Better Service

The More Accounts in a Town Which Tries to Get Away as Far As Possible From a Credit Business, the Better it Will Be for The Town, Because Credits From Banks Will Be More Easily Obtained

By C. R. BARNHILL, Amherst, N.S.

THE manufacturer's job can be classified in two parts—to manufacture the goods—to get a good profit. One main factor lies between these two principles, namely, "Distribution." This factor is flexible, can be handled in many ways. The principal or prime factor in handling distribution is the line of "Credit" which is the bugbear of many business houses to-day, is non-essential in a great number of cases, and is certainly the beginning and the end of the sale of manufactured lines.

The Shortest Route to Consumer

The automobile industry to-day is one line of business which ranks high among the world's commercial industries because distribution is worked out the shortest possible way; in other words, the line connecting manufacturer with consumer has no curves, but is followed by the shortest route, and is worked out on the principle that a straight line is the shortest distance between two points.

In many other lines of business the short route is not followed, and it takes time from the distribution to the point where you realize profit. For instance, in a house doing business on a cash basis, the time from distribution to realizing profit is short. A house working distribution on a credit basis may mean months before realizing profit.

If a manufacturer invests $100.00 in raw material, from the time the finished product reaches the dealer to the time it takes a dealer to pay, ranges all the way from thirty days to ninety days, and in a large number of cases even longer. If manufacturer makes 10 per cent. on his investment for ninety days, his profit is $2.50. If he could realize this on a turnover twelve times a year, or paid cash for goods, his margin would be much greater.

Would Seek Credit Elsewhere

If some of the retail merchants were asked to pay cash by their wholesale house, many no doubt would at once cease to buy from that particular house, and would seek credit from some other house. This would happen in the majority of cases where the retailer does not look into this question thoroughly, and if he did so would in order to do as requested have to notify all his customers that he will have to sell for cash, or get after his accounts in earnest, which he is very loath to do because he is afraid of losing trade. Some would say, "No use, I have a good trade, have a few accounts which are only 25 per cent. collectable, but this cannot be helped." Others would say, "Should be doing cash business, but have been es-

FOR JUNE BRIDES AND "SHOWER" GIFTS

June, the bride's month, will be here in a few days and according to prospects there is every indication that the usual spring crop of marriages will be as large as ever, if not more so. For the hardware merchant selling cutlery, cut glass, chinaware, electric washers, vacuum cleaners and many other household adornments or labor-saving equipment, the spring marriage, preceded by numerous "showers" to the bride, provide a good opportunity for business. This year the dollar spent on such gifts will go further than for some time and a little effort to show such prospects that you are really catering to this business will help a good deal. The hardware store offers, perhaps, the most complete assortment of lines suitable for the shower and the wedding gift. Let your customers know this through your display and advertising. Here is a good suggestion for a timely window display of such gift lines.

tablished here for years, and could not, or would not, be advisable to change my business," and still others are afraid to change, while still others are dilatory, able as they are to pay all their accounts, and because of that feeling of safety they let accounts grow; in many cases they lose all, and in larger number of cases collect a few dollars at a time, which means they are banker for some accounts for months and even years.

Can Give Better Service

All the above reasons which retailers give are worthy of serious consideration because of the fact that it would not do to spring all at once, the idea that they intend to work on a cash basis only. The idea would have to be conveyed, would need grading, trimming, building up, and the retail dealer would have to realize the worth of a cash business. To this end the wholesaler can be of great assistance, and not follow the line of least resistance, but seek out a path in his distribution that will give him returns in least possible time, and this would automatically be followed by the retailer, who would have to see to it that his goods must be paid for in a certain time. His customer in turn would realize that his store is in a better position to serve his wants, both in quality and price, as from the manufacturer down to the customer the cash basis would have a tendency to give better service than can be done on a credit basis.

Money Easier and Business Better

The more accounts in a town or community, which tries to get away as far as possible from a credit basis, though they may not all do a cash business, the better it will be for the town or community because of the fact that the nearer an account gets to a cash basis, the easier it is to get credit from his bankers. This would have a tendency to make money easier and business better, and turnover for both manufacturer and buyer is speeded up, which means better times.

The main factor in any business, particularly in this present period, for both wholesaler and retailer, and applies more particularly to the average retailer, is not only to keep his accounts down to the minimum, but to collect his bad and doubtful accounts.

Relation of Collections to Turnover

Profit Does Not Depend So Much Upon the Amount of Money Invested in a Business as it Does Upon the Way in Which That Money is Made to Work—It Should be the Merchant's Chief Occupation to Make His Dollars Work

TURNOVER of stock is the goal of of every business undertaking and frequent turnover is the profitable turnover. An investigator for Armour & Co. has given an analysis of turnover and the essentials that enter into sales and frequent turnover.

To obtain turnover the merchant must make sales. Sales are the life blood of the profitable turnover of working capital. Those two factors are more inter-related than any other two in business. Time was when some manufacturers considered their sale completed when they shipped their goods to the retailer and the retailer considered his sale completed when the transaction across the counter had been closed. But now both of them realize that the sale is not completed until satisfaction has been given, and that satisfaction has not proved until the customer has been brought in again. The sale that every merchant wants in his store is the sale that reproduces itself in repeat business.

Meaning of Turnover

Turnover means the investment of dollars in goods, the sale of those goods, reinvestment, resale—repeating the process often and at a profit. When the merchant invests money in merchandise, then sells the merchandise and extracts his profit, that is one turnover. When he invests again and resells, that is another turnover. The merchant does not turn over goods. He sells goods and that turns over the working capital invested in them. Every merchant should know how many times a year he turns over his invested capital. Profit does not depend so much upon the amount of money invested in a business as it does upon the way in which that money is made to work. Dollars are workmen and the faster they work, the more they accomplish for the merchant. It should be the merchant's chief occupation to make his dollars work, to repeat investment and sale, to get immediate collection of accounts. Turnover is just as definitely connected with collection as salesmanship is with service and satisfaction.

The Essentials of Turnover

Here are the essentials of turnover:

First—The merchant must study the needs of his community. He must anticipate his community's needs.

Second—He must stock the goods, and there should be a variety of products; but too large a variety of brands of each different product is a scattering of investment, that is certain to complicate buying, selling and bookkeeping, with a resultant slowing-up of turnover. Every product selected should be judged as to sale quality. The trade mark should be well known, so that it will not need an introduction. It must be of a quality that will bring repeat calls.

Third—Customers must be given facilities to buy. In other words, the merchant must have adequate space for an attractive display of his goods.

Fourth—Collections must be made promptly. Past due accounts are obligations for the merchant. The moment payment becomes overdue, the merchant ceases to be a merchant giving credit accommodations, but becomes a banker who lends money without interest.

Advertised quality goods make quicker turnover than any other kind. Recently a well known newspaper of national reputation discovered that advertised goods were turning over three or four times faster than those that were not advertised and comparison of advertised and non-advertised goods was made by this newspaper. The amount of capital invested in stock was the same in each case—$10,000. It was assumed that profits were 10% of the sales.

Here are the results:

	Non-Advertised Goods
$10,000	Capital.
40%	Mark-up.
$14,000	Retail value of stock.
3	Number of Turnovers.
$42,000	Total business for the year.
10%	Percentage of net profit.
$4,200	Net profit at end of year.
	Advertised Goods
$10,000	Capital.
20%	Mark-up.
$12,000	Retail value of stock.
6	Number of turnovers.
$72,000	Total business for the year.
10%	Percentage of net profit.
$7,200	Net profit at end of year.

It will be seen that, though the mark-up was twice as large in the case of non-advertised goods, yet they yielded a smaller profit than the advertised. This is due solely to the fact that the turnover of the latter was twice as fast.

STIMULATING SALES OF WIRE

Kingston, Ont.—Local hardware merchants are booming the sale of wire. "You need wire to keep the chicks out of the garden," is the heading of an interesting advertisement one merchant is carrying in the local newspapers. The advertisement also points out that wire is needed in the garden for sweet peas and nasturtiums to climb on. With warm weather the sales are expected to be large.

Will Prices Return to 1914 Levels?

Comment of Manufacturers on This Topic of Current Interest—Four Primary Elements in Cost of Production—Transportation and Labor are Important Items to be Adjusted

DISCUSSING the possibility of a return to 1914 price levels in hardware, or to an even lower scale of prices, as a result of the present tendency toward lower levels, a number of manufacturers and wholesalers have expressed some interesting views.

"It is wonderful what a balloon will do in the way of collapsing if it is properly perforated," said A. T. Enlow, president Dominion Sheet Metal Corporation, Hamilton, Ont., to Hardware and Metal. "When we consider how anxiously everyone is now stewing around to try to determine whether the selling prices will go lower than in pre-war times, it causes one to smile when he thinks of the unanimous decision of all the wise ones that prices would never revert to old figures because standards of living had raised to such an extent that people would never be satisfied to go back to pre-war prices."

Four Elements in Production Costs

"There are four primary elements in the cost of production which can never be dissolved, however much they might be distorted," said a stove manufacturer, when interviewed by Hardware and Metal. "These are: The cost of raw materials; overhead expense; transportation charges, and labor costs."

It was stated that in dealing with a general reduction in the scale of prices, these elements are vitally affected, either separately or collectively. During the war period, a general decline in production efficiency became evident, traceable to the advent of military duties among experienced and mature help, which thus brought the introduction of much "green" or inexperienced labor into many branches of trade. This culminated in a higher plane of overhead and operating expense, which in turn brought its proportionate bearing upon inflation of prices, and owing to the resultant concentration of public attention to items of an overhead nature these have now been cut to a minimum.

Gradual Reductions

It was pointed out that a review of prices during the past few months shows a gradual trend of reductions in numerous hardware commodities. These have naturally been dependent upon material costs, which also show recent slight declines in the raw product markets. The two important factors remaining are transportation and labor charges; which elements, having a retroactive effect, are not only hindering the reduction of raw material prices, but also greatly retard the decrease of prices to a pre-war basis, which might otherwise develop.

While transportation rates are considered to be unusually high, yet a return to 1914 or earlier scales can hardly be expected, either now or in the future, said this manufacturer. Several reasons were given for this, chief among them being high maintenance charges and prohibitive construction costs. These would possibly be minimized in time, but not to the degree which would bring them within reasonable distance of figures belonging to earlier days.

An accurate forecast, or reliable prediction as to the future prices is therefore dependable upon the trend of these factors. Until the transportation and labor elements in production reduce in proportionate scale simultaneously with the efforts made to bring down overhead and raw product charges, the general move will be restricted in a minor way, and confined to only a few lines. By remaining at present levels, transportation and labor factors will automatically combine to govern the trend of prices. Labor in some cases, has already shown a small reduction, but the movement is not yet general.

Factors Are Interdependent

It will be seen that all these four primary elements are interdependent; each apparently waiting for the other to move, and revolving in a circle of counter-effect. But a careful study reveals that a commencement on the downward grade has been made; and with intelligent consideration of the forces operating in this direction, substantial progress towards price reduction will be achieved.

Whether prices will again reach to a pre-war basis generally, or whether they will sink even to a lower level in some cases, is a difficult proposition to determine at this time; depending as it does upon the ratio of future reductions apparent in the contributory elements.

Liquidation of Stocks

But there is also one other important

SATURDAY, MAY 28, 1921

SUCH protest has been made that the proposed firearms legislation will restrict tourist traffic in Canada, that a recent deputation to Ottawa was assured by F. H. Keefer, M.P., that an amendment would likely be made which would eliminate any hardship on tourist traffic. Parliament is anxious to rush legislation to end the present session and it would surprise no one if the suggested amendments re firearms were left over for some time.

* * *

IT HAS been the custom in many cases with those offering premiums to people who sell articles for them to give .22 calibre rifles to boys who win. The Ontario Provincial Police Department have had enquiries as to whether this is against the law. Superintendent Joe Rogers states that no rifle can be given, sold or even loaned to a minor by anyone, as it is contrary to the Act. The provincial officials have been trying to stamp the practice out, especially since there have been several fatal accidents as the result of boys handling rifles. "You had better get rid of those rifles as soon as you can," said Superintendent Rogers to this merchant. "It might go hard with you if your premises were searched and the rifles found there."

Liquor and Collections

COLLECTIONS are reported by wholesale hardware merchants to be fairly good, but in this connection it is noted that some trades are finding collections to be slow, for which a number of interesting reason are given. In Ontario and other provinces which have recently voted for prohibition, it is unfortunately stated that numbers of retail merchants have so tied up their money in securing stocks of liquors, sufficient to last for as much of the "dry" period as possible, that they have been unable to fully meet their obligations. One wholesaler who investigated the situation in Ontario recently is alleged to have found that in many cases the average small retailer had from $500 to $2,500 invested in liquor.

Wholesale hardware merchants either through respect for their trade or more probably as a statement of fact, indicate that this tendency has had little if any effect on their collections. It is pointed out that this would normally have no more effect on collections than would the purchase of automobiles. Taking the province or the country as a whole the opinion was expressed that far more money was invested in cars than in liquor and that this investment did not affect collections unduly. An investment in an automobile is obviously sounder than one in liquor. However, the period of drought has not yet arrived and as the effect would not be felt until the expiration of the usual 30 or 60 days, failure to meet current accounts would hardly yet be noticeable.

Further evidence of the effect of this legislation is seen in the recent report of the head of a large mortgage company who stated that of approximately six hundred mortgages issued during the month of April by one company the mortgagers admitted that at least a portion of the funds were to be used in the purchase of a stock of liquor.

It has been held by many hardware merchants that business has been much better since the liquor business has been curtailed and it is to be hoped that in its dying struggles its efforts to further hamper business at this time will not be far-reaching.

Dollar Will Buy More Hardware

THERE are many factors in the present condition of business which the hardware merchant should be able to turn to good advantage in increasing the sale of hardware in his community. The decline in costs not only of hardware but of other commodities not only enables the customer to get better value for the money spent over the hardware counter, but the decline in groceries, dry goods, etc., should increase the customer's buying power. This point was well illustrated in a sketch which appeared in last week's issue of Hardware and Metal showing the increased buying power of the dollar in groceries. True there has been some reduction in wages to offset this but to date this tendency has become by no means general and champions of a higher standard of living in the community think this would offer little solution.

It is therefore evident that the average customer has more money to spend on hardware than for some time and that this money will have a greater buying power. This combination should be an effective aid for the merchant who will put his shoulder to the wheel in his community to overcome the inertia of those who should be good customers at this time. It is held by some authorities that the slackness evident in some districts is due to a popular sentiment of retrenchment which at present prices has little justification. The retailer is the individual who is in personal touch with the ultimate buyers of hardware and just as he is the man whose co-operation must be secured to successfully market a new line of goods, so he is the man who, by this personal contact, is best able to dissipate the aforementioned sentiment.

Willing To Take Advice

EVEN the critics of the Minister of Finance and his budgets are compelled to admit that Sir Henry Drayton is not above accepting the advice of competent business men and altering regulations to comply with their suggestions. True he was slow to accept the advice of retail merchants concerning the Luxury Tax as outlined in the 1920 budget but that was his first effort along this line and to make radical changes immediately after issuing it would seem to give evidence of weakness or lack of thought. However it was adjusted satisfactorily and Sir Henry still contends publicly that the Luxury Tax served its purpose.

Much the same situation has arisen with the 1921 Budget as recently outlined fully in Hardware and Metal. A number of the obvious difficulties of the first proposals were the subject of vigorous protest and this has resulted in a number of changes being made. The plan to allow wholesalers and manufacturers to absorb the sales tax and not show it separately would lead to great confusion, and it has now been definitely ruled that at least 1 1-2 per cent. will be shown on each invoice from the manufacturer or wholesaler. This was the plan early agreed upon by wholesalers and manufacturers in Toronto. The tax on binder twine has been removed, as it was obviously unfair to handicap the Canadian manufacturer to the extent of 1 1-2 per cent. as compared with the U.S. manufacturer selling on this market. The decrease in the sales tax on lumber should also be of assistance in encouraging construction, or at least in removing additional burden on an industry which requires careful nourishing at this time.

Half Holidays and Daylight Saving

Partial List of Cities and Towns Throughout Canada Showing Half Holidays Being Observed by Merchants and Whether Standard Time or Daylight Saving is in Effect—List Will Be Completed Shortly—Send in Your Report if Not Already Listed

ONTARIO

ACTON.—Wednesday half holiday from 12.30 p.m. May to October. Close 6 p.m. except Friday and Saturday. Standard time.

ALMONTE.—No half holiday. Close 6.15 p.m. except Saturday. Standard time.

ALLISTON.—Friday half holiday, May to September. Close 6 p.m. except Wednesday and Saturday. Standard time.

ARNPRIOR.—Wednesday half holiday July and August. Close 6 p.m. Tuesday and Saturday. Standard time.

ALEXANDRIA.—No half holiday. Close 6.30 p.m. Monday, Wednesday, Friday. Standard time.

BURLINGTON—No half holiday for hardware stores. Close 8 p.m. Standard time.

BURK'S FALLS.—Thursday half holiday from 12 noon June, July, August. Close 6 p.m. except Saturday. Standard time.

BRUCE MINES.—No half holiday. Close 6 p.m. Monday, Wednesday, Friday, all year round. Standard time.

BLIND RIVER. — Wednesday holiday from 12.30 p.m. May 4 to October 5. Close 6 p.m. except Saturday. Standard time.

BRACEBRIDGE.—Thursday half holiday from 1 p.m. from May 1 to October 1. Close 6 p.m. except Saturday and evening prior to holiday. Standard time.

BRANTFORD.—Wednesday holiday from 1 p.m. July and August. Close 6 p.m. except Saturday.

BLENHEIM. — Wednesday holiday from 12 noon in some cases only, from May till October. Close 6 p.m. except Tuesday and Saturday. Standard time.

BRIGHTON.—Wednesday holiday from 12 noon, May to September, inclusive. Close 7 p.m. except Saturday. Standard time.

BELLEVILLE. — Wednesday half holiday from 12 noon, during June, July, August. Close 6 p.m. Standard time.

BARRIE.—Wednesday half holiday from 12 noon from June to September. 6 p.m. closing except Saturday. Standard time.

BRAMPTON.—Wednesday half holiday from 12.30 May to August. Close 6 p.m. except Saturday. Standard time.

COBALT.—Wednesday half holiday May to September inclusive. Early closing at 6 p.m. Saturday 10 p.m. Standard time.

COLBORNE.—Wednesday holiday from 12 noon May 1 to October 1. Open evenings except Wednesday. Standard time.

COBOURG. — Wednesday holiday from 12.30 May to September inclusive. Close 6 p.m. except Saturday. Standard time.

COLLINGWOOD. — Wednesday holiday 12.30 p.m. June to August, inclusive. Close 6.30 p.m. except Saturday. Standard time.

COPPER CLIFF. — Thursday holiday from 12.30 p.m. May to August, inclusive. Close 6 p.m. except Saturday. Daylight saving June 1 to Oct. 15.

CREEMORE.—Thursday holiday from 12.30 noon, May to September. 6 p.m. closing except Wednesday. Standard time.

CAMPBELLFORD. — Friday holiday from 12.30 May to September. Close 6 p.m. except Wednesday and Saturday. Standard time.

CLINTON.—Wednesday holiday from 12.30 p.m. May to September inclusive. Close 6.30 p.m. except before holidays. Standard time.

CHATHAM.—Thursday half holiday from 12.30 p.m. from May to August inclusive. Close 7 p.m. Saturday 10 p.m. Standard time.

CHATSWORTH.—Wednesday half holiday May to September. Close 6 p.m. Standard time.

DUNNVILLE.—Wednesday half holiday from 12.30 p.m. May to October. Close 6 p.m. except Saturday. Standard time.

DUTTON.—Close Wednesday from 12 noon May 1 to October 1. Close 6 p.m. except Saturday. Standard time.

DRAYTON.—Thursday half holiday from 12 o'clock from May 15 to September 15. Close 6 p.m. Monday, Tuesday, Friday. Open Wednesday and Saturday evenings. Standard time.

ELORA.—Wednesday holiday from 12 noon May 1 to Nov. 1. Close 6 p.m. Standard time.

EXETER.—Wednesday holiday from 12.30 p.m. June to August. Close 6 p.m. except Saturday. Standard time.

ELMIRA.—Wednesday holiday from 12.30 p.m. April 1 to Nov. 1. Close 6.15 except Saturday. Standard time.

EMBRUN. — No holiday. Close Monday, Wednesday, Friday, 7 p.m.

FINCH. No half holiday. Close 7 p.m. Monday, Wednesday, Friday. Standard time.

FERGUS.—Wednesday holiday from 12 noon except December. Close 6 p.m. except Saturday. Standard time.

HESPELER.—Wednesday holiday from 1 p.m. all year. Close 6.15 p.m. except Friday and Saturday 10 p.m. Standard time.

HENSALL—Thursday holiday from 12.30 May 1 to October 1. Early closing evenings except Wednesday and Saturday. Standard time.

HAGERSVILLE.—Thursday holiday from 12 noon May to August. Close 6 p.m. except Wednesday and Saturday. Standard time.

HAILEYBURY. — Wednesday holiday from 12 noon, May to September, inclusive. Close 6.30 p.m. Standard time.

HAMILTON. — No general half holiday. No early closing regulations. Some hardware stores close Wednesday afternoon July and August. Standard time.

HARROW.—Thursday half holiday from May to September. Standard time.

News of Western Canada

Hold "Made in Winnipeg" Exhibition

Many Hardware Firms Among Those Exhibiting —Educational Effort to Encourage Use of Goods Manufactured Locally

WINNIPEG.—The Made-in-Winnipeg Exhibition held for a whole week is stated to have been very successful. Crowds thronged the Board of Trade Auditorium throughout the week and the valuable prizes given each day to visitors were an added inducement. Intelligent interest was shown in the various products put on exhibition by Winnipeg manufacturers and wholesalers and it is felt that the affair will help greatly to stir up interest in local products.

The exhibition had considerably over 100 booths. It was opened by the Mayor and during the week three bands provided entertainment. The executive committee has decided on a follow-up campaign. Billboards will be used and other publicity effort made in the surrounding district. Competitions in securing "Made-in-Winnipeg" labels from parcels taken into the home will also be held for children and a "Home Book" setting forth Winnipeg goods procurable is already in course of preparation and will be distributed throughout Winnipeg and suburbs.

The numerous booths all had excellent displays. These included the following hardware firms: D. Ackland & Son, Simmons Ltd., Canadian Insulation Co., J. Pickles, W. H. Whyte Co., Canadian Community Cut Glass, Vulcan Iron Works, G. F. Stephens & Co., Globelite Battery Co., Canada Dry Cells Co., Guarantee Iron & Drop Forgings, Burgess Batteries Ltd., Home Appliances Mfg. Co., Anthes Foundry Co., Guarantee Sheet Metal Co., Eternal Battery Co., Canadian Broom Mfg. Co., North Star Oil Co.

The project had its inception in the mind of Mayor Parnell and arrangements were soon made by a strong executive committee. Among the members of this committee were: L. R. Baker, Burgess Batteries Co.; W. E. Milner, managing secretary Board of Trade; J. M. Davidson, Winnipeg Board of Trade; J. H. Curle, R.M.A.; G. E. Carpenter, C.M.A.

WESTERN NOTES

Kamsack, Sask.—Settlers, Ltd., hardware and garage suffered recent fire loss. Building, stock, fixtures and several automobiles were destroyed.

POSTPONE SASKATCHEWAN R. M. A. CONVENTION

The secretary of the Saskatchewan branch of the R. M. A. writes to Hardware & Metal as follows:

"The sudden decision of the Saskatchewan Government to hold the provincial elections on the 9th of June, has made it necessary for us to postpone our annual convention for one week. The new dates are Tuesday to Thursday inclusive, June 14th, 15th and 16th.

"No change will be necessary in the program and judging from the response we are receiving from our members we do not think the attendance will be affected in any way.

"We are arranging with Bram Thompson, M.A., editor of 'The Canadian Law Times,' to give us a talk on the Bankruptcy Act on the last day, Thursday morning."

VARNISH OUTLOOK IS GOOD

"Business in Canada is improving all the time; in fact, we are away ahead of last year so far," said the general sales manager of a varnish manufacturing firm to Hardware and Metal in discussing the varnish outlook. "I have just completed a trip from Vancouver clear through to Toronto and I find business improving all along the line. There is only one exception and that is down around Lethbridge. However, they were getting good rain when I was there which indicated that they are going to get a crop. If this rain will continue for a while until the seeds take root there is no doubt but what they will get a crop and as you know when they do get one they get a big one, so that will clean up the whole of the Dominion in good shape. The outlook for business is good."

SPECIAL BRUSH WEEK IN VANCOUVER

Special effort to encourage the sale of brushes was concentrated by the representative of the Boeckh Co., Ltd., Toronto, in Vancouver, B.C., by means of a special "Boeckh Week." Twenty-one merchants in Vancouver and New Westminster made brush displays exclusively and three others combined paint and brush displays. Three prizes were offered for the best windows. First prize of $25 was won by W. J. Burr, buyer for T. J. Trapp & Co.; second prize of $10 to W. J. Jefferies, Fraser Hardware Co., and third prize of $5 to A. McCallum, Owen McCallum Hardware Co. Advertisements were run by the company in the company in the local newspapers backing up the effort of the dealers.

OPEN NEW BRANCH OF WESTERN HARDWARE STORE

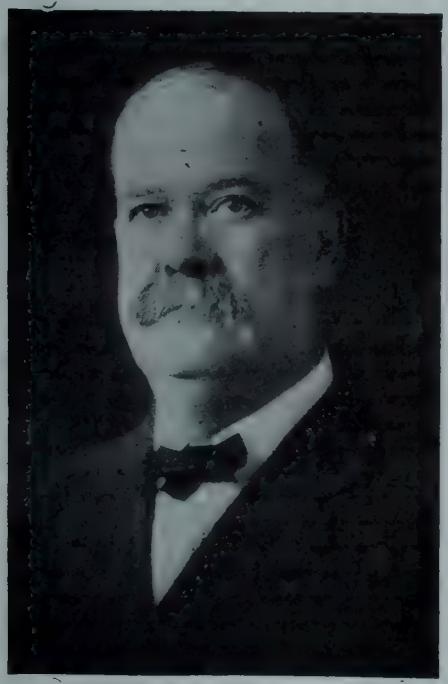
Suffield, Alta.—The executive of the McGregor Hardware Co., Ltd., J. D. McGregor, Hilt McGregor, A. W. McGregor, of Brandon, Man., together with L. A. Leavens, their Alberta representative, have made an inspection of their Alberta branches. They completed arrangements to open a branch store at the new irrigated town of Vauxhall, the new store to be 26 x 60. This firm has stores at Suffield, Retlaw, Travers, and Cluny, and it is their intention to put in a large chain of retail stores in Southern Alberta. They would be pleased to receive particulars from manufacturers of new hardware goods.

WILL PRICES RETURN TO 1914 LEVEL?

Continued from page 39

feature which must be acounted for previous to the bringing of prices back to their old standards, and that is the automatic reduction or liquidation of present stocks. Until stocks on hand, which were accumulated when the pinnacle of high prices prevailed, are not only substantially reduced but can also be replaced at more reasonable cost, dealers and merchants will be reluctant to follow the gradual but sure descent to pre-war levels.

In many cases, the replacement cost is already a little less than it was a year or so ago. But manufacturers cannot afford to produce for stock alone, neither can they endeavor to compete at pre-war price figures on a present-war operating basis.



Sask. R.M.A. Will Have Big Program

Annual Convention on 14th, 15th and 16th of Next Month in Saskatoon Will Have Many Interesting Speakers on Subjects of Vital Importance to the Retailer

THE eighth annual convention of the Saskatchewan Provincial Board, the Retail Merchants' Association of Canada, Inc., will be held in the Regent Pavilion, Twentieth Street, Saskatoon, on the 14th, 15th and 16th of next month, it having been postponed one week on account of the provincial elections taking place on the 9th. The program for the same is as follows:

Tuesday Morning, June 14

Nine o'clock — Registration of delegates. Address of welcome: His Worship the Mayor, Dr. A. McG. Young; Mr.

S. D. McMICKEN,

Events in the Trade

BUSINESS CHANGES

Toronto.—Jones & Co. hardware has been succeeded by the Greenside Hardware.

Prescott, Ont.—W. F. Macpherson has sold hardware business to W. Glassford, of Beaverton, Ont., who will take charge at once.

Sudbury, Ont.—Arthur Goddard, formerly with Cochrane Hardware, Ltd., for eight years and with the Fowler Hardware, Ltd., for the past wo years, has taken over the stock of E. C. Ricard and launched the Goddard Hardware Co. Mr. Ricard is opening up business in Timmins. Goddard Hardware request hardware catalogs and price lists.

NEW FIRMS

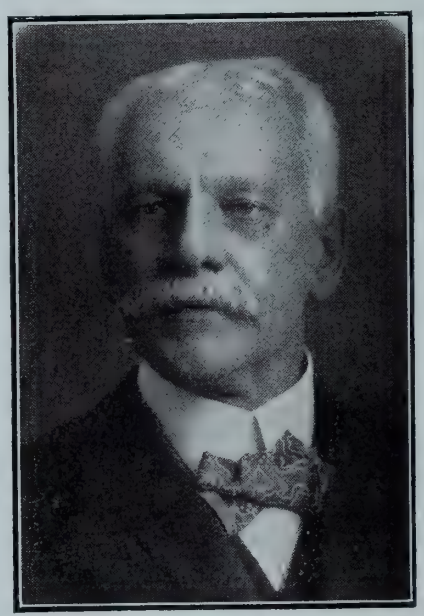
Graydon & Wickham are opening a hardware business at 1466 Danforth Ave., Toronto, on June 1.

OBITUARY

Robert N. Peck, for thirty-eight years with The Stanley Rule and Level Co., and who was elected vice-president of the Stanley Works, New Britain, Conn., when the former company was merged with the latter about a year ago, is dead.

FIRE LOSS

Kingston, Ont.—In the fire which swept a portion of the village of Verona, E. L. Amey, general merchant, suffered a severe loss in oils and paints, gasoline engines and sewing machines. He had quite a large stock on hand. His storehouse, store, mill, and an addition to his store, under construction, were all destroyed with the contents. His loss will reach $20,000 with insurance to the extent of $4,000.



TO TAKE UP PERMANENT SECRETARIAL WORK

W. F. Macpherson, Prescott, Ont., secretary of the Ontario Retail Hardware Association, has disposed of his hardware business in Prescott, Ont., and will be in position to take up the permanent secretarial work of the association by June 1, as outlined in a report of the executive committee meeting in a recent issue of Hardware and Metal.

Kingston, Ont.—Howard Marshall, hardware merchant, had his fine glass front window shattered as the result of an accident when a returned soldier ran his car into the window, having lost control.

Starke-Seybold Ltd. Make Presentation

MONTREAL.—Mr. and Mrs. J. P. Seybold, Montreal, celebrated their golden wedding quietly on Monday of this week with their family. During the day they were presented with a mahogany grandfather's clock by

J. P. SEYBOLD

the firm of Starke-Seybold, Limited, while a number of other gifts were made by their friends.

After the reception and presentation at the family residence Mr. and Mrs. Seybold left in the evening for a second honeymoon to revisit the scenes of Mrs. Seybold's early youth, over half a century ago at St. Catharines, Ont., where they will make a two weeks' holiday.

The children who joined in the celebration included Messrs. H. B. and G. C. Seybold, Mrs. George Ernest Blackburn, E. L. Seybold and Lieut. J. C. Seybold, O.B.E., who served with distinction overseas during the war. There were also present seven grandchildren.

Mr. Seybold is an old-time Montrealer, having been born here on May 15th, 1848, a son of the late Christian Seybold. He was married on May 25th, 1871, exactly 50 years ago, to Miss M. A. Bricker, of Waterloo, Ont.

Mr. Seybold was educated at the Montreal High School, and after graduating joined the Joseph N. Hall Co., of which his father was a partner. On the death of Mr. Hall the firm was re-constructed as Seybold, Son & Co., when J. P. Seybold became a partner in the firm.

On the death of Mr. Christian Seybold some 20 years ago the firm was reorganized as Seybold & Sons Co., continuing in business on St. Paul street until 1907, when they amalgamated with the Starke Hardware Co., with the firm name of Starke-Seybold, Limited, under which name the firm still continues.

Since the reorganization Mr. Seybold retired from active work with the firm, but refused to drop his business activities, carrying on since then as representative of the Independent Cordage Co., which he still holds.

PERSONAL

Frank Moore, who has been with Colin Fingland, hardware merchant, Blyth, Ont., has moved to Goderich.

S. H. Whyte, of the S. H. Whyte Manufacturing Co., Ltd., of Winnipeg, is on a business trip visiting the important centres.

The wedding was solemnized at the Methodist parsonage in Wallaceburg, Ont., of Wilfred Ratz, of Ratz Bros. hardware at Mitchell, Ont., and Miss Mina Wilson.

E. P. Marnell, recently of A. Ramsay & Co., Montreal, has joined the staff of the S. C. Johnson & Co., Brantford and will cover the province of Quebec.

Montreal.—Jno. A. Frazer, sales-manager, Lewis Bros., Limited, was re-elected president of the Montreal Publicity Association at their annual meeting held last week, and was presented with a gavel by the honorary president, F. W. Stewart. H. S. Van Scoyce, Canada Cement Co., was elected first vice-president.

Directors chosen from the hardware field of Montreal include: H. S. Beecher, Gillette Safety Razor Co. of Canada, Ltd.; E. M. Putnam, Dominion Cartridge Co., Ltd.; J. A. Lapres, Canada Cement Co., and W. J. Delaney, Sherwin-Williams Co.

OPEN NEW ELECTRICAL DEPT.

Allins, Ltd., hardware merchants of Lindsay, Ont., recently added to the present store a new department for electrical work. House wiring and contract work will be specialized in. A room at the rear of the store has been fitted as a supply room and is very complete.

WESTERN ONTARIO NEWS

H. Edge, hardware merchant at Seaforth, Ont., has commenced remodelling the Royal Hotel which he purchased recently into a modern store with apartments above.

Fleming & Son, hardware merchants, at Blenheim, Ont., have commenced work on a new store.

Crane, Limited, have secured property on Wellington Street near King William, Hamilton, Ont., and will erect a large building there.

Parsons Fair at Goderich, Ont., purchased the stock of Wesley Walker and put on a special sale this week in connection with the lines secured.

Plans are under way for a large new auto factory in East London for London Motors, Limited, and that work will proceed during the summer. The first car to be manufactured by the firm was turned out in the down-town plant this week.

MERCHANTS OBSERVE HOLIDAY ON JUNE 3.

Kingston.—Local merchants this year decided to remain open on May 24 and to observe June 3 (King's birthday) as a whole holiday. Owing to the fact that the two holidays come so close together, it has been found that the observance of both these days interfered a great deal with business. Until this year it was the custom of the merchants to observe both holidays.

INCORPORATIONS

National Household Appliances, Ltd., has been incorporated at Ottawa with capital of $400,000 and head office in Sackville, N.B., to manufacture and deal in washing machines, wringers, dishwashers, furnaces, stoves, boilers, toilet wares, etc.

Canadian Sanitary Can Co., Ltd., has received Dominion incorporation with headquarters at Toronto and capital stock of $400,000 to manufacture cans, containers, boxes, etc.

Hold-Mar Vacuum Piston Co., Ltd., has received Dominion incorporation with capital stock of $150,000, head office in Montreal, Que., to manufacture and deal in automobiles, bicycles, trucks, motor boats, accessories and parts.

Spiral Nail Co., Ltd., has received Dominion incorporation with capital stock of $100,000, head office in Toronto, to manufacture and deal in nails, screws and other articles of iron, steel or other metals.

CHANGE NAME OF LOUIS McLAIN CO.

Application has been made to Ottawa to change the trade name of the Louis McLain Company, of 2480 Dundas Street W., Toronto, to the Ideal Aluminum Products, Limited. This follows on the withdrawal from this corporation of Louis McLain, which was recently announced in Hardware and Metal.

The branch office of this firm hitherto located at Kitchener, Ont., will be absorbed into the head office and factory at Toronto, and Ontario representatives will make this point their unit base in the future.

It is stated that other branch offices will be installed within the next few weeks at Montreal, Halifax and St. John. According to General Manager E. Roderick, new selling agencies have recently been organized in the United Kingdom, South Africa, Australia, New Zealand, the West Indies, South America and Mexico.

"DOLLAR WEEK" BRINGS GOOD RETURNS

London, Ont. — The "Dollar Week" which the merchants of Wheatley, Ont., put on this week, following the success of their previous "Dollar Day" campaigns, brought out the largest number of buyers in the history of the town. Last week there were such heavy rains that farmers found it impossible to get on the land. This week it was fine enough for them to motor to town but the land was still too wet to plow and seed. Farmers with their wives and families arrived in their motor cars in scores and many of them had long lists of wants to supply. Many of them planned to buy as much as possible while they had the opportunity, realizing that with the coming of warm weather they are going to be very, very busy. This situation was just what the merchants wanted and meant a heavy turn over for them. Hardware merchants did a splendid business in seasonable lines, including considerable quantities of paint. The farmers are prosperous and are looking for an excellent season. This means good business ahead in the opinion of merchants.

HALF HOLIDAYS

Continued from page 41

ST. CATHARINES.—Wednesday half holiday all year except when holiday in same week. Close 6 p.m. except Saturday. Daylight saving till September 30.

ST. MARY'S.—Wednesday holiday from 12:30 p.m. May to September. Close 6 p.m. except Saturday. Standard time.

SUDBURY.—Thursday holiday from 12.30 p.m. May to August. Close 6 p.m. except Saturday. Standard time.

SEAFORTH.—Wednesday holiday 12.30 p.m. June to September. Close 7 p.m. Standard time.

SIMCOE.—Wednesday half holiday from 12 noon June to September. Close 7 p.m. except Saturday. Standard time.

SHELBURNE.—Wednesday half holiday May to September. Close 6 p.m. except Saturday. Standard time.

TORONTO (WEST).—Wednesday half holiday all year round. Daylight saving for summer.

THESSALON.—Wednesday holiday from 12 noon, May to September inclusive. Close 6 p.m. except Saturday all year. Standard time.

TWEED.—Wednesday half holiday from 12.30 p.m. June, July, August. Close 6 p.m. except Saturday. Standard time.

TILLSONBURG—Wednesday holiday from 12 noon May to September. Close 6.30 p.m. except Saturday. Standard time.

TOTTENHAM.—Wednesday holiday from 12 noon May 4 to September 28. Close 6 p.m. Monday, Wednesday, Friday. Standard time.

UXBRIDGE.—No holiday. No early closing.

VANKLEEK HILL.—No half holiday. No early closing regulations. Standard time.

WINCHESTER.—Wednesday half holiday, 12 o'clock, during June, July, August. Close Monday and Friday 6 p.m. Standard time.

WATERLOO.—Wednesday half holiday from 12.30 p.m., May to October. Close 6.15 p.m. except Saturday. Daylight saving. May to October.

WEBBWOOD.—No half holiday. Close 6 p.m.

WHITBY.—Wednesday holiday from 1 p.m. except December. Open till 8 p.m. Standard time.

WINGHAM.—Wednesday half holiday May to October 1. Close 6 p.m. except Saturday. Standard time.

WALLACEBURG. — Thursday half holiday from 12 noon from Feb. 1 to Nov. 1. Close 6 p.m. except Wednesday and Saturday. Standard time.

WIARTON. — Wednesday holiday from 12 noon June to August. Close 6 p.m. except Saturday. Standard time.

WELLAND.—Wednesday half holiday from 12 noon, from May 1 to September 30. Close 6 p.m. except Saturday. Daylight saving May 1 to September 1.

QUEBEC

BUCKINGHAM.—No half holiday. Close 6 p.m. except Saturday.

BLACK LAKE.—No half holiday. Close 7 p.m. except Saturday. Daylight saving till October 1.

COATICOOK. —No half holiday. Close 6 p.m. except Saturday. Daylight saving May to September.

GRAND MERE.—No half holiday. Close 7 p.m. Saturday. Daylight saving May 1 to October 1.

LAKE MEGANTIC.—Close 7 p.m. Tuesday, Wednesday and Thursday. Standard time.

MONTREAL.—No half holiday. Close 7 p.m. Monday, Tuesday, Wednesday and Thursday. Daylight saving May 1 to October 1.

NICOLET.—No half holiday. No early closing regulations.

RIVIERE DU LOUP.—Close 9 p.m. except Saturday. Standard time.

SHAWINIGAN FALLS.—No half holiday. Close 7 p.m. Tuesday, Wednesday and Friday. Daylight saving May 1 to October 1.

SHERBROOKE.—Some observing Saturday half holiday from June to Nov. 1. Close 6 p.m. except Friday. Daylight saving May to October.

THETFORD MINES.—No half holiday. Close 7 p.m. Daylight saving all summer.

VALLEYFIELD. — No half holiday. Close 6.30 p.m. Wednesday, Thursday, Friday. Standard time.

NEW BRUNSWICK

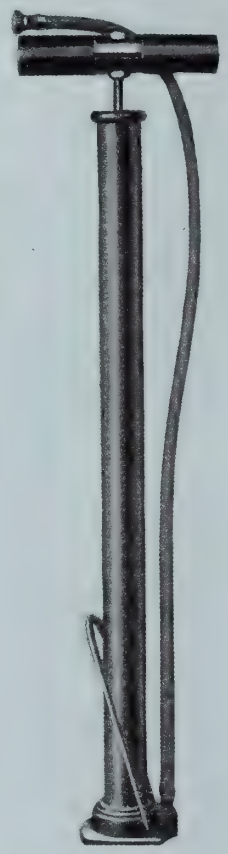
CHATHAM.—Not decided yet. Close 5.30 p.m. except Saturday. Standard time.

DORCHESTER.—Thursday half holiday from 12.30 p.m. May 19 to Sept. 15. Open Tuesday and Saturday night. Standard time.

FREDERICTON. — Thursday half holiday 12 noon, July and August. Close 6 p.m. except Saturday. Daylight saving till Labor Day.

MONCTON. — Saturday half holiday from 1 p.m. June to September inclusive. Open Friday evening till 9 p.m.

SHUBENACADIE.—Wednesday half holiday June to October, from 12 noon. Close 6 p.m. Monday, Wednesday, Friday. Standard time.



MANITOBA

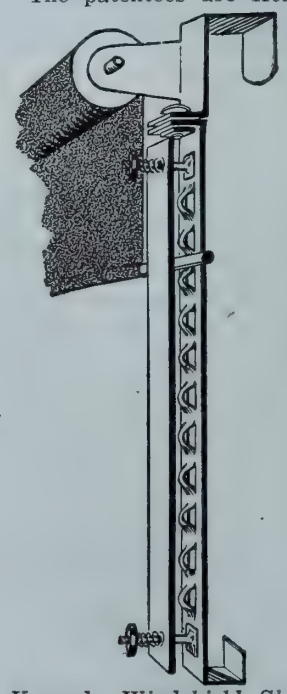
BRANDON.—Thursday half holiday May to September. Close 6 p.m. except Saturday. Standard time.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

COLEMAN TIRE PUMP

The Coleman Lamp Co., Ltd., Toronto, is marketing the Quick-Fill pump. This is a tire pump, and the manufacture of such a line by this company is said to be the outcome of manufacturing pumps for the Coleman lamps. Features of the new pump include the permanent fixing of the handle so that it cannot come unscrewed or jar off in the tool box and lock nut under handle bar to give double strength against pressure. The pump has an ebonized handle, cap and plug, no metal screw cap being used. The barrel of the pump is of brass, nickel plated, and is claimed to be rust-proof. The brass barrel is also said to facilitate pumping. The Quick-Fill plunger is claimed to seat itself directly above the check valve right against the bottom of the barrel so that all the air in the stroke is forced past the check valve, thus eliminating waste compression. The entire base of the pump unscrews from the barrel, leaving the check valve exposed for cleaning and loosening if necessary. The pump has a three-inch base to enable its use in sand or soft dirt and it has a nickel spring foot rest. The hose is attached parallel to the barrel so it will not be cracked when put away. The hose connection is also claimed to be an improvement in preventing loss of air.



DETACHABLE MICA PLUGS

A new feature of the products of the Apollo Plug Mfg. Co., Ltd., of Birmingham, England, and represented in Canada by British Canadian Distributors, Ltd., Ottawa, is the I.D. detachable mica plugs. These detachable mica plugs are said to be specially designed for the heaviest duty purposes and particularly for tractors. They are made in seven different models. The detachable feature of the plug does not mean the fact that the plug can be removed from the engine, for this applies to all, but a plug of which the central electrode may be removed from the body for purposes of cleaning. Mica has been substituted for porcelain as insulating material and is said to be much more satisfactory in service, it being capable of withstanding unlimited heat and the danger of cracking is very remote.

KENNEDY WINDSHIELD SHADE

For the automobile driver a new windshield vision shade, known as the Kennedy shade is shortly to be placed on the market. This device, designed as a glare eliminator and sight protector, has several novel features claimed for it by the makers.

It consists of a Hartshorn roller, blue shade of linen, and a spring ratchet bracket. The device fits on to the inside of the windshield, and is easily adjustable for any position. Other improvements over the customary motor windshield visor are claimed for this innovation. The patentees are Kennedy & Kennedy, of King street, E., Toronto. A four-page folder illustrating the shade is also being distributed.

Kennedy Windshield Shade

"UNIVERSAL" ELECTRIC RANGE

The "Universal" electric range is a new line which is now ready for the market, and the makers, Landers, Frary & Clark, New Britain, Conn., state that it has been designed with the idea of incorporating in a single stove the various selling features usually found only in a wide variety of numbers and types. The Universal electric range is said to be of strong and rigid construction and requires less floor space (27 x 29 in.) than other ranges of equal capacity. The elevated oven, size 14 x 14 x 19 inches, contains two broilers, is stated to be well ventilated and the entire oven equipment can be easily and quickly removed for cleaning. The hot plates, four in number, are of the enclosed type, heating quickly and retaining cooking heat for a long time after current is turned off. Overlapping rims prevent spilled grease or other liquids from running under the plates. Another feature is that body and frame of stove are entirely free from objectionable screw heads which make stoves so difficult to clean. All electrical connections are thoroughly insulated and elements and other parts can be replaced if necessary, it is stated, easily without the aid of a mechanic. Wires and terminals are numbered to prevent errors in reconnecting. Elements are separately fused and fuse plugs placed directly below controlling switch are readily accessible, and the slanting dial switches are easy to read and of the three-heat type. In appearance the "Universal" range is attractive. The body is black enamelled with oven door and back splasher of white enamel with nickel plated trimmings. The weight of stove is 295 pounds.

SASKATCHEWAN R.M.A. WILL HAVE A BIG PROGRAM

(Continued from page 43)

5.00—Election of officers. Adjournment.

Thursday Evening, June 16

8.00—Public meeting:

Address by Prof. W. W. Swanson, University of Saskatchewan, Subject: The contribution of the retail merchant to the community.

Moving picture showing national industries. (Supplied by the Department of Trade and Commerce.)

During the three days' convention, the Department of Agriculture, Ottawa, will demonstrate egg candling methods to all interested delegates.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

THE downward trend of prices is again reflected this week in several reductions of a minor nature. Chief among the declines noted is a substantial reduction in the prices of automobile tires and inner tubes. Gasoline and coal oil are reduced, this being the second decrease shown on these products during the month.

A new price list on scales, showing lower quotations, and a revised discount on radiators are numbered among the reductions. These also include some lines of roofing paper and sheathing, screw hook and strap hinges, also stocks and dies. Range boiler quotations are unsettled, and a new price list is expected shortly.

There is little new business in iron and steel, with prices still unchanged. Lead and zinc products have developed a firm tendency, with solder being maintained at last week's advance. Ingot metal prices remain steady with quotations unchanged on boiler tubes, compression goods, conductor pipe and eavestrough, pipe fittings, corrugated sheets and scrap metals.

Dealers' stocks generally are lower this season and active buying is expected in staple lines. Business in summer lines is good and repeat orders are commencing. Wholesalers and jobbers anticipate a fair volume of trade through the summer and fall seasons. Orders are more numerous but still small and frequent.

Montreal Markets

MONTREAL, May 26.—The trend of a few important lines of hardware is downwards again this week, chief among them being lower prices on some lines of paper and sheathing. Screw, hook and strap hinges also feature, the discount being increased from 15 per cent. to 25 per cent. off list prices. Handled hammers, not including sledge hammers, is another line that shows reduced prices, a decline of 10 per cent. being noticed. To those interested, radiator prices have been lowered through a change in discount.

Other staple commodities, including nails, rope, sheet, pipe and pipe fittings, lead products, bar iron and steel, are holding unchanged and many of these lines are somewhat firmer than they have been in past weeks, more especially in steel and lead products.

Business is now active on summer goods and the first of repeat orders are now coming to the hands of wholesalers and jobbers who expect a good volume of business well through the summer and fall months, as buying on staple, seasonable lines has been comparatively light up to the present, leaving dealers' stocks lower this year than other seasons.

Snow Shovel Net Prices

Montreal.

As announced in last week's issue, a reduction had been made in steel snow shovels. Following are the new net prices: Prince $7.40 doz.; King, $9.90 doz.; Queen, $8.25 doz.; D. handle furnace scoop, $7.40 dozen.

Cross-cut Saws Revised

Montreal.

The Simonds Canada Saw Co. have made revision, with slight reductions on their line of cross-cut saws. Although this is the first change in prices the jobbers have received from saw manufacturers, it is generally thought that saws will be slightly lower for Fall bookings this year.

Bars Are Quiet

Montreal.

Prices are holding unchanged both on local and foreign markets in bar iron and steel, although recent wage reductions in many sources was thought to be an indication of lower prices. Inactivity continues among the wholesalers, and while this condition remains, there seems little chance of much lower quotations as buyers are firm in their opinion that reduced prices would have no effect on stimulating sales. Following are the unchanged quotations:

IRON AND STEEL BARS

Common bar iron, 100 lbs.	3 70
Refined iron	5 20
Iron finished machinery steel	3 75
Mild steel	3 70
Band steel	3 70
Single reeled machinery steel	5 75
Spring steel	5 00
Sleighshoe steel	3 70
Tire steel	3 90
Toe calk steel	4 60
Harrow tooth steel	3 85
Mining tool steel, per lb.	0 23
Black Diamond tool and cast steel	0 23

NOTE.—Refined iron is aproximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

Band steel in scroll bdles., 50c per 100 lbs. extra.

Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

New Prices on Blind Hinges

Montreal.

Blind hinges will now cost less, and following are the new prices announced: No. 1, $2.55 dozen; No. 5, $3.80 dozen pairs.

Hinge Discount Revised

Montreal.

The discount has been increased, thus lowering the prices on screw hook and strap hinges. These are now quoted at 25 per cent. off, formerly being 15 off. List prices will be found on current market pages.

Oil Stoves Big Sellers

Montreal.

Oil stoves are the lines now active in stoves and ranges, with the seasonable demand following the warmer weather of the past few weeks. Although the bookings were lighter than in previous years, the immediate deliveries are emptying the jobbers' warehouses. The combination gas and coal range has proven o good seller during the spring moving period, one manufacturer claiming the sale of these is still good.

Bookings for fall on stoves, ranges and heaters is somewhat less than other years, but the fact that dealers are buying, even if in smaller quantities, seems satisfactory in so far as the manufacturer or jobber is concerned who realizes that the fall trade will be active in these

lines. Prices on stoves, ranges and furnaces were reduced last March and few further changes are expected at present.

Handled Hammers Lower

Montreal.

All handled hammers, including claw and machinists' hammers, of the Whitman & Barnes make show a reduction of approximately 10 per cent.

Cast Stove Dampers

Montreal.

A reduction of about 10 per cent. is made on cast stove pipe dampers.

Sheet Prices Unchanged

Montreal.

A limited demand continues on sheets and plates, and only small orders are being shipped. Quotations are unchanged with the same range of prices noted. While the tendency was to lower prices a few weeks ago, buyers are now of the opinion that reduced prices would not help sales, and conditions and prices on the foreign markets do not warrant lower levels at present. The future of steel products, sheets playing a prominent part, seems doubtful; but with the demand continuing small little change from present prices may be expected. Present nominal quotations follow:

PLATES—		
10 gauge	5 25	6 25
12 gauge	5 30	6 30
14 gauge	5 45	6 45
16 gauge	5 55	6 55
BLACK SHEETS—		
14 gauge	5 45	6 45
16 gauge	5 55	6 55
18-20 gauge	6 15	7 15
22-24 gauge	6 25	7 25
26 gauge	6 35	7 35
28 gauge	6 50	7 50

.. Sheets 36 in. wide, 10c per 100 lbs. extra.

GALVANIZED SHEETS—		
U.S. Standard—		
10¾ oz.	8 75	9 75
28 gauge	8 25	9 25
26 gauge	8 00	9 00
22 to 24 gauge	7 85	8 85
20 gauge	7 65	8 65
18 gauge	7 65	8 65
16 gauge	7 50	8 50
14 gauge	7 50	8 50
12 gauge	7 50	8 50
	Queen Head	Fleur-de-Lis
English Standard—		
28 gauge	10 00	9 25
26 gauge	9 75	9 00
24 gauge	9 15	8 60
22 gauge	8 80	8 15
18 and 20 gauge	8 10	8 00

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Rope Demand Fair

Montreal.

The seasonable demand for rope can only be said to be fair, and sales are not up to those of previous years at this time. Manufacturers and jobbers, however, are hopeful of an active trade in the later summer months as dealer stocks are low, and harvesting time alway creates an increased demand. The opening of navigation brought with it a certain demand, but not up to expectations as yet. Prices are held at the advance of last week.

Radiators Reduced

Montreal.

To those interested, lower prices have been made on radiators, effective May 20th. Hot water radiators are now quoted at 53 per cent. off list prices, steam 54 per cent off. Wall radiators are also lowered from 45 to 50 per cent. off.

Nails Now Sell Well

Montreal.

Although business in wire nails is still being done in small orders the movement is now reported active, merchants throughout the country no doubt experiencing a good seasonable demand. Building construction is still backward in this province, but has opened up considerably during the present month. No change has been made in quotations in recent weeks and wire nails now cost $4.55 base, cut nails $5.10 base.

Light Corrugated in Fair Demand

Montreal.

The 28 gauge corrugated sheets are in fairly active demand at present, while the heavier gauges are still dull. The new prices brought into effect a few weeks ago have not yet stabilized the market, and lower prices than those given below are offered to obtain business. List prices are as follows:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	8 50
No. 26 gauge	9 25
No. 24 gauge	13 00
No. 22 gauge	16 00
No. 20 gauge	18 00
No. 18 gauge	24 00

Less 7½%.

Range Boiler Sales Fair

Montreal.

Business in range boilers is reported fair, but the recent price lowering has had no further stimulating effect as yet. Present prices are considered below the actual value, one manufacturer stating he would not be surprised if a readjustment was made in the near future, bringing prices to where they would show a profit to the maker. It is claimed that present prices do not represent true value, and are the result of recent price-cutting between the different jobbing houses. Following are quotations that were brought into effect two weeks ago:

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	8 75	11 25
35 gallon	11 25	.....
40 gallon	13 50	16 00
52 gallon	20 00	.....
66 gallon	28 00	.....
82 gallon	35 00	.....
100 gallon	45 00	.....
120 gallon	54 00	.....

Wrought Pipe Unchanged

Montreal.

Wrought iron and steel pipe remain unchanged, and are still selling under list No. 51, which will be found on current market pages.

Lead Products are Held

Montreal.

No further advances have been made this week in the quotations on the different lead products, but the firm feeling still exists on the raw materials in the primary markets, and further slight advances would not be surprising within the near future. Lead and tin have not shown an increase but remain strong, while tin advanced slightly again in the last few days. Following are present prices:

Lead pipe	0 12½
Lead waste	0 13½
Note.—Lead pipe is subject to a discount of 10%.	
CouplingsLead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 11
Do., 3 to 3½ lbs. sq. ft., lb.	0 10¾
Do., 4 to 8 lbs.	0 10
Cut sheets ¼c lb. extra and cut sheets to size, ¾c lb. extra.	
Solder, guaranteed, lb.	0 29
Do., strictly, lb.	0 27
Do., commercial, lb.	0 24
Do., wiping, lb.	0 24¾
Do., wire, lb.	0 37½
Zinc sheets, casks	0 13
Do., broken lots	0 13½

Sheathing Prices Lower

Montreal.

The market on roofing and sheathings shows reductions in prices on a few lines, including Cyclone tarred sheathing now quoted at $1.55 per roll. White Monarch sheathing is lowered to $6.75 per hundred pounds; gray to $5.50.

Prepared roofings are unchanged in price, and a seasonable activity is reported from wholesalers, who state the volume of business is still confined to small orders, but are satisfied that a good season is ahead of them. Following are quotations on a standard line of roofing papers.

SHEATHING	
Dreadnought, 1 ply, per roll	2 50
Dreadnought, 2 ply, per roll	2 90
Dreadnought, 3 ply, per roll	3 35
Capitol, 1 ply, per roll	2 30
Capital, 2 ply, per roll	2 60
Capital, 3 ply, per roll	3 10
Favorite, 1 ply, per roll	2 10
Favorite, 2 ply, per roll	2 50
Favorite, 3 ply, per roll	2 95
Frontenac, 1 ply, per roll	1 90
Frontenac, 2 ply, per roll	2 30
Frontenac, 3 ply, per roll	2 75

No Change in Fittings

Montreal.

Pipe fittings are unchanged at present with a general sorting demand experienced on the different lines. Following are the quotations:

PIPE FITTINGS.	
Cast iron fittings	20%
Bushings, cast	30%
Do., malleable	30%
Flanges	27%
Plugs	22½%
Flange Unions	20%
Malleable Unions	40%
Dart Unions, black	29%
Do., galv.	8%
Nipples, ⅛ to 4 in. close and short	40%
Do., long	50%
Do., 4½ to 8 in., close and short	30%
Do., long	40%
Couplings, 4 in. and under	20%
Do., 4½ in. and larger	Net list

Pound goods—	Black	Galv.
Class B	0 20	0 28
Class C	0 13	0 20

Scrap Market Dull

Montreal.

Nominal quotations on scrap metals are held unchanged with little interest being shown on the market. Prices have undergone some recent heavy reductions with little response, and dealers are now satisfied that low prices will not stimulate business but that conditions generally are unfavorable. Until the steel situation both in the United States and the European markets improves, little betterment will be shown for local dealers. Nominal prices are the following:

DEALERS' BUYING PRICES.	
Automobile tires	0 75
Yellow brass	0 05
Red brass	0 08½
Light brass	0 04
Scrap zinc	0 04

Lead, heavy	0 04½
Light copper	0 07¾
Lead, tea	0 02
Heavy copper	0 10½
Wrought iron, R. Rd., No. 1, per gr. ton	10 50
Malleable scrap (ton)	10 50
Pipe scrap (ton)	7 00
Stove plate, per ton	14 50
Heavy melting steel	6 50
No. 2 busheling	4 00
Boiler plate	10 00
No. 1 machinery cast, per gr. ton	22 50

Ingot Prices Firm

Montreal.

The recent fluctuations in ingot metals have resulted in slightly higher prices on most metals on the local market. Present indications are for a quiet market, but on the whole more or less steady. It is thought that the demand will have to increase before any market change will be shown.

TIN.—In spite of the light demand, tin holds fairly steady, with an advance of one-half cent made in local quotations this week, now being quoted at 41 cents.

SPELTER.—Spelter continues easier in the U.S.A., but holds firm in London. If the London market advances much more, American spelter will be on an export basis, which will mean advance on this side. Local price unchanged at 8½ cents.

COPPER.—This metal is quite strong, with considerable buying in New York for export account. Whether the strength will last or not is hard to determine, and a reaction would not be surprising. Local prices advance ¼ cent, quoted at 18¼ for electro and 17¾ for casting.

LEAD.—Although quieter than last week, lead is now steady to firm. This tendency is expected for some little time as the reaction of last week was soon recovered. 7½ cents continues the ruling price.

ANTIMONY.—The market in the East on antimony has been weak, being disappointing as it has not responded to market fluctuations as have the other metals. Local prices, Chinese 7½ cents, high grade English 8¼ cents.

ALUMINUM. — Aluminum continues dull on the market, with price unchanged at 34 cents.

Toronto Markets

TORONTO, May 26.—Price reductions of a minor nature are again evident in the general market quotations this week. Among the declines noted are automobile tires and inner tubes, gasoline, Royalite oil, one line of stocks and dies, and a new price list on Champion scales, giving net quotations, which include stamping.

The reduction in gasoline amounts to 1 cent per gallon and is the second decrease recorded on local markets this month. Discounts on radiators have been revised, showing an approximate decline of 10 per cent. Unsettlement is still very prominent in range boiler quotations, the current list having been withdrawn, due to price-cutting by dealers to a range far below market values. A readjustment of range boiler prices is expected shortly, and a new list will be issued.

Sport goods are in demand, especially golf requisites, baseball goods and fishing outfits. Little new business is evident in iron and steel, and current prices are generally being maintained. The new rope prices announced last week are holding firm and solder is also showing a strong trend at the recent advance.

Prices on other basic products remain unchanged, and the demand in seasonable lines continues good. The gradual trend to lower price levels is now producing effects in more numerous sales although orders are still small and frequent. Conditions are expected to develop favorable improvement during the ensuing months.

Little New Business in Iron and Steel

Toronto.

Sentiment in iron and steel is developing a more cheerful tone, due, however, to an improving outlook rather than to actual new business, which is still reported as light. Reports of cut prices being made on southern markets are not numerous, and at the most they refer to exceptional cases, which would not make the common market.

It is considered in many quarters that the really serious test of stability in the steel and iron trade is still to come. It is felt that better prices cannot be developed until the reduction in wages becomes reflected in values, and also until there is further liquidation evident in freight rates. Some time must elapse before these factors thoroughly materialize, and in the meanwhile present prices have a great deterrent influence on consumption. According to this viewpoint, production in steel is likely to either remain stationary or sink below present levels before showing any considerable improvement.

Demand is expected to be contingent upon prevailing prices subject to governing conditions. The great increase in capacity, operates adversely to the present rate of production, and reduced costs and stimulated activity are the primary elements needed. In this connection, there are persistent rumors on the market that some of the larger independent steel mills in the United States are now considering the advisability of a further wage cut. This is suggested in order to enable them to lower quotations. In some quarters, price-cutting is favored as a means of reviving demand. The report, however, cannot be definitely confirmed, but while no direct admission has been made that such a course is contemplated, yet the feasibility of such action in the future is not denied.

As reported last week, local conditions are unsettled, with no great amount of buying in evidence. More enquiries and the waiting attitude still generally prevails. Current quotations remain unchanged as follows:

STEEL AND IRON		
Mild steel, 3-16 in.	....	4 50
Do., ¼ in. and heavier	....	4 00
Bar iron, 3-16 in.	....	4 50
Do., ¼ in. and heavier	....	3 75
Angle base	....	4 00
Horseshoe iron	....	4 10
Tire Steel	4 70	5 95
Band steel	....	4 50
Spring steel	10 75	12 75
Crucible cast sheet steel	30 00	35 00
Mining drill steel	....	23 00
Cast tool steel	....	20 00
Sleigh shoe steel	4 10	4 50
Norway iron	....	15 00
Toe caulk iron	5 40	6 40
Hoop steel	....	6 00

Sport Goods in Demand

Toronto.

Some lines of sporting goods are reported to be in good demand at this season. Dealers report very favorable activity in orders for baseball outfits of all kinds, as well as numerous sales in golfing requisites, while brisk sales in rods and tackle reflect the fishermen's enthusiasm. The demand for these various lines is said to be even greater than was apparent last year.

Tube Prices Unchanged

Toronto.

Boiler tube quotations still remain at previous levels, with little indication of any marked future changes. The market in this product has shown no improvement, but a better demand is anticipated in the smaller sizes. Following are the current prices:

BOILER TUBES—	Seamless.	Lapweld.
1 inch	$26 00	.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	$25 00
2 inch	29 25	22 00
2¼ inch	33 00	25 00
2½ inch	41 75	27 00
3 inch	49 25	35 00
3½ inch	63 50	40 00
4 inch	85 00	50 25

Coal Oil Prices Down

Toronto.

Royalite coal oil is shown at a reduction of 2 1-2 cents on the previous quotations, and is now selling at 20 1-2 cents per gallon. This is the second revision noted during this month, and corresponds with the further decline in the price of gasoline.

Compression Prices Hold

Toronto.

Prices on compression work still remain at the recently announced readjustment of discount quotations, and no direct change as regards market conditions or demand has, as yet, been experienced. Some improvement is looked for due to these reductions, coupled with the

advent of summer weather. The following quotations remain in effect:

Compression work, standard	37%
Fuller work, standard	30%
Bath cocks, compression	29%
Do., Fuller	25%
Flatway stop and waste cocks, standard	40%
Roundaway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	5%
J.M.T.	20%
J.M.T. C.	25%
J.M.T. Gate Valves	15%
Gate or straightway	16/10%
Jenkins Globe	10/10%
Radiator valves, standard	23%
Do., removable disc	38%
Basin Cocks—	
No. 1 and 1, Fuller pattern	30%
Quick opening No. 3633	37%
Emco J. D. Valves	10%
Emco Check Valves	10%
Webber Gate Valves	15%

Scale List Revised

Toronto.

Quotations on Champion scales have now been reduced; the new prices also include stamping. The revised list is shown on the current market pages.

Eavestrough Quotations Remain Unchanged

Toronto.

A small improvement in demand for conductor pipe, eavestrough and elbows has been noted; but the weather conditions and the holiday are both credited with having some effect in restricting building activities through the week. Price quotations still remain at the new discount levels recently announced, and a slightly better demand for these products is looked for during the summer months. Following are current prices:

TROUGH (Eave)

O. G., Square Bead and half round. Size in girth:

Per 100 ft.		Per 100 ft.	
8-in.	$15 90	15-in.	$28 80
10-in.	17 70	18-in.	36 50
12-in.	21 20		

Less 60 per cent.

PIPE (Conductor)

Plain, round or corrugated.

	Per 100 ft. in 10 ft. lengths.
2 in., in 10-ft. lengths, list	$18 40
3 in., in 10-ft. lengths, list	22 30
4 in., in 10-ft. lengths, list	29 60
5 in., in 10-ft. lengths, list	40 00
6 in., in 10-ft. lengths, list	49 00

Less 60 per cent.

CONDUCTOR ELBOWS—

4 inch, list	10 50
5 inch, list	24 00
6 inch, list	29 00

Less 55 per cent.

Gasoline Price Down One Cent Per Gallon

Toronto.

Another reduction of one cent is announced this week in the price of gasoline. This is the second decrease shown during the present month, and brings the price down to 35 cents per gallon.

Prices on Fittings Remain Steady

Toronto.

No change of any importance has been announced this week in either prices or conditions on pipe fittings. The market demand remains just fair, with the various lines holding steady. Following are the current figures:

PIPE FITTINGS

Cast iron fittings	20%
Plugs, cast iron	27½%
Do., solid	10%
Do., countersunk	net
Bushings	30%
Unions, ¼-in. to 2-in.	40%
Do., ⅛ in., 2½ to 4 in.	35%
Flanged Unions	20%
Dart Unions, blk., ¼ to 2 in.	29%
Do., ⅛ in., 2½ to 4 in.	14%
Do., galvd., add to black	30%
Nipples, blk. and galvd., ⅛ to 4 in., close and short	40%
Do., 4½ in. and larger	30%
Do., long, ⅛ in. to 4 in.	50%
Do., 4½ in. and larger	40%
Do., running thread	20%
Couplings, ¼ in. and under	20%

MALLEABLE FITTINGS

	Black.	Galvanized
Class A	0 60	0 75
Class B.	0 24	0 34
Class C	0 15	0 24

Rope Prices Hold

Toronto.

Following on the increase announced last week in rope and cordage business in this industry has been conservative. The firmer tendency in the market has produced a sorting up demand, but no marked increase in activity is looked for.

Favorable conditions and crop reports have stimulated domestic business in binder twine, but nothing above the normal average is anticipated.

Orders are now moving quietly, and with the strengthened market no further changes are expected.

Copper Market Firmer

Toronto.

With the prevailing tendency to increased quotations on the primary copper markets, a corresponding stiffening in sheet copper conditions is evident. Prices, however, are still maintained at previous levels by local dealers, although any marked demand would tend to promote higher quotations. Present prices follow:

BRASS—	
Sheets, base, per lb.	$0 29
Rods, base, per pound	0 26
Tubing, base, per lb.	0 36
COPPER—	
Rods, base, per pound	0 34
Soft sheets, plain, 16-oz. and heavier, lb.	0 34
Do., plain tinned " " " "	0 40
Do., polished and tinned " " " "	0 45
Tubing	0 39

Pipe Quotations Unchanged

Toronto.

Wrought iron and steel pipe are maintained at List No. 51, which recently came into effect. A sorting movement has been in progress, and stocks are now said to be in good shape. Improvement in conditions, if any, has been very slight, sales being irregular and generally on a small scale.

Lead and Zinc Prices Remain Firm

Toronto.

Bar solders of all grades are maintained at the increased quotations shown last week. The firm tendency in the lead and zinc products still continues, and the opinion is expressed that it would not be surprising if other lines followed on with higher prices ruling in the near future. Lead remains strong on the primary markets, and production is reported as below normal. The tone in zinc is fair and easier. Current local quotations remain unchanged as follows:

LEAD AND ZINC GOODS

Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subject to a discount of 10%.	
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 36½
Do., strictly, lb.	0 26
Do., commercial, lb.	0 24
Do., guaranteed, lb.	0 29
Do., wiping, lb.	0 24
Zinc sheets, per lb.	0 16

Stocks and Dies Reduced

Toronto.

A new discount sheet has been issued for the Butterfield stocks and dies, showing a reduction of approximately 10 per cent. The new quotations are 30 and 5 per cent. off list, with solid bolt dies at 17½ per cent. off.

Corrugated Demand Only Fair

Toronto.

The anticipated tendency to improvement in demand for corrugated sheets failed to materialize to any noticeable extent, and this is attributed to poor weather conditions and the holiday having a combined effect in holding up outside building trade activity. Prices still remain at the recent lower quotations, and seasonable improvement in market conditions is looked for. Present price list follows:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	8 50
No. 26 gauge	9 25
No. 24 gauge	13 00
No. 22 gauge	16 00
No. 20 gauge	18 00
No. 18 gauge	24 00

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Sheet Prices Unchanged; Market Variable

Toronto.

Sheet conditions, which are most directly affected by the automobile demand, reflect the clearest signs of betterment. This corresponds with the material expansion of general operations and the recent improvement evident in the automotive industry. Reports from southern markets indicate that sheet production has recently increased. Coupled with this fact, producers are now receiving more releases, which has enabled the mills to slightly increase their operations.

Local business is still below normal, with orders mainly of the small variety. The average market price trend is in a downward direction, but no changes are reported in current quotations this week. The following prices are generally prevailing:

PLATES

10 gauge	from $5 00 to $6 00
12 gauge	5 05 6 05
14 gauge	5 10 6 10
16 gauge	5 20 6 20

BLACK SHEETS

14 gauge	5 10 to 6 10
16 gauge	5 20 6 20
18-20 gauge	5 75 6 75
22-24 gauge	5 80 6 80
26 gauge	5 85 6 85
28 gauge	6 00 7 00

Prices shown are for full cases. An extra charge of from 25c per 00 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 36 in. wide.

GALVANIZED SHEETS

Premier and Apollo

10¾ oz.	8 40 to 9 40
U. S. 28	8 00 9 00
U. S. 26	7 90 8 90
22 and 24	7 75 8 75
18 and 20	7 60 8 60
16	7 45 8 45
12 and 14	7 40 8 40

An extra 40c per 100 lbs. is charged for Keystone brand copper bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Scrap Markets Show Little Change

Toronto.

The scrap metal market remains about the same as previously described, with no marked improvement in evidence at present. There continues to be a good demand for scrap copper, following on the improved tone of the copper markets; heavy scrap is especially prominent. But the other metals remain practically unchanged, the market conditions being unaltered. Scrap lead is reported to be a shade weaker, while aluminum scrap is very scarce. Brass wastes are as usual and still neglected. On the whole the markets this week are featureless. The following are nominal prices for fair-sized quantities:

WASTE MATERIAL

No. 2 busheling		$13 00
Stove plate, per ton	18 00	19 00
Yellow brass	6 50	7 50
Red Brass		10 00
No. 1 machinery cast	22 50	23 50
Heavy melting steel	13 50	14 50
Heavy Copper	10 50	11 00
Scrap zinc	4 00	4 50
Light brass	4 00	4 50
R.Rd. wrought iron, No. 1, gr. ton	13 50	14 50
Scrap pipe	8 00	9 00
Heavy lead pipe	4 00	4 50
Old rubbers, boots and shoes	3 00	3 50
Overseas lumbermen's rub. boots	2 00	2 50
Auto tires	0 50	1 00
Tea lead	2 00	2 50
Solid tires	0 75	1 25

Boiler Prices Withdrawn

Toronto.

Unsatisfactory conditions are still apparent as regards range boiler prices, and the unsettlement previously referred to in last week's issue of Hardware and Metal remains in evidence. Quotations are reported showing a range far below what the actual value warrants, but the low prices are attributed solely to price cutting among dealers. The 30-gallon boiler is practically the only size moving, and all orders are much smaller when compared with other years. Whether lower prices will tend to stimulate business to any extent seems doubtful, as buying is confined to actual needs. Drastic revisions on a greatly reduced scale, however, are calculated to induce activity in some quarters. The current list has been withdrawn, pending the announcement of a new list.

Auto Tires Reduced

Toronto.

Substantial reductions in prices on automobile tires and inner tubes have been announced. The amount of the decrease varies from 10 to 20 per cent. on the different lines and sizes. The declines have been made with a view to stimulating business in all lines, and the range is noted when compared with prewar values on these commodities. Prices are now lower than at any time during recent years. Following are the new quotations on some of the most popular sizes:

AUTO TIRES—Cord, 30x3½, $28 each; Traction tread, 30x3½, $20 each; Cord, 33x4, $54.50 ch; Fabric, 33x4, $35 each; Cord, 34x4½, $63 ch; Fabric, 34x4½, $37.50 each.

TUBES—30x3½, $2.60 each; 33x4, $4.70 each; 34x4½, $6.05 each.

Hammer Prices Lower

Toronto.

Reductions are announced on maul, ball pein, and engineers' riveting hammers. The decline amounts to 15 per cent.

Radiation Discount Revised

Toronto.

Effective May 20, some lower prices have been announced on radiation. The discount has been increased, which results in an approximate price reduction of 10 per cent. Hot water radiators are now 53 per cent. off list, and steam 54 per cent. off. Wall radiators are now quoted at 50 per cent. less, whereas the previous discount was 45 per cent.

Ingot Metal Quotations Remain Steady

Toronto.

Contrary to recent indications no change in prices is recorded this week in the ingot metal markets. Copper continues to strengthen in tone, due to the prevailing foreign demand, but the upward trend of prices is not yet reflected locally. Quotations on tin have shown signs of fluctuating, but while domestic consumers have apparently been adopting a waiting policy, the foreign demand has continued and prices have been generally maintained.

COPPER.—Foreign demand continues to be the chief support of the copper market, and due to the strengthening tone higher quotations are in evidence. Domestic consumers, however, while making many inquiries, are not buying in any large quantities. A conservative factor in the trade expresses the opinion that the present foreign demand will not remain for any considerable length of time nor develop any market increase over existing levels. The upward trend of prices is reflected in some local circles, but quotations generally remain at 18 cents, with a very firm tone.

TIN—Buying for speculative purposes is reflected in quotations on tin, which have shown signs of fluctuating during the week. Foreign demand is, however, the life of this market, with domestic consumers apparently waiting for further developments. With the recent rise in prices a falling off in business is reported. Local activity still shows lots of room for improvement, with the nominal quotation remaining at 40½ cents.

LEAD.—The lead market has recently developed some slight evidence of unsteadiness, but no changes in price are recorded. Buying in small lots still prevails, and an easier tone is expected. A range in quotations on the southern markets is reported, but local prices still remain at last week's figure of $6.75.

SPELTER.—In spite of the fact that large surplus accumulations are evident in spelter, producers are showing no signs of receding from their previous position of selling only to consumers. Operations, however, have been materially curtailed, but there is little possibility of any shortage developing for some time. Foreign activity has failed to exert any marked influence on prices here, due to the absence of local demand. The price of $7.50 remains unchanged, which includes the recent slight increase.

ANTIMONY.—Judging by the amount of business in antimony during the past few weeks the present quotations are not proving very attractive to buyers. Offerings are free, but very little activity is reported. The present prices are far below the market values in effect at this time last year. Local current prices are maintained at from 8 to 10 cents.

ALUMINUM.—The market in aluminum is unchanged, remaining generally dull as regards domestic demands, but some foreign orders maintained the current market value. The price of 30 cents is still in effect locally.

London Markets

LONDON, May 26.—Hardware prices have generally remained firm again this week, very few changes having been recorded. Linseed oil registered the only advance on the market, the price of 87 cents for raw and 90 cents per gallon for boiled being 2 cents higher than the previous quotation. No change is reported on turpentine prices, but the market maintains a firm tone. The recent advance in rope and cordage served to strengthen this commodity.

Among the reductions, which are of a minor nature, are noted clout nails and tacks, also mop wringers. The movement in seasonable lines is good, with refrigerators, hammocks, ice cream freezers, screen doors and windows, wire cloth, electric fans, and paint products all selling well. Some lines of sporting goods, particularly fishing tackle and baseball goods, are in strong demand. The warmer weather is reflecting an increase in the sale of summer lines, and business locally is showing an improvement, with present prospects of an optimistic nature.

Linseed Oil Prices Advance

London, Ont.

Linseed oil continues to be a feature on the current market quotations, and a further advance of 2 cents per gallon has been noted again this week. The price of raw is now 87 cents, and the quotation on boiled is 90 cents for 1 to 2 barrel lots. The new revisions are as follows:

LINSEED OIL—	Raw	Boiled
1 to 2 barrels, Imp. gal.	0 87	0 90
3 to 5 barrels, Imp. gal.	0 86	0 89
6 to 9 barrels, Imp. gal.	0 84	0 87

Less barrels, add 15 cents per gal.
5 gal. jacketed cans, $1,25 each.

Turpentine Prices Firm

London, Ont.

Quotations on turpentine remain at the recently advanced figures shown last week, and no change is reported on the current market. Some authorities consider that further increases are probable, but a readjustment of values is expected in the future. The higher quotations have not restricted sales to any great extent; and stocks on hand are not heavy. Following are prevailing prices.

TURPENTINE—	
1 barrel lots, Imp. gal.	$1 15
2 to 4 barrel lots, Imp. gal.	1 14
5 gallon lots, Imp. gal.	1 30

White Lead Steady

London, Ont.

Orders for white lead in oil continue to be fairly numerous, and the increases apparent in the oil and lead markets have resulted in a strong tone on white lead in oil. No change in price is reported, however, and the demand is seasonable and well-sustained. Following are the market quotations:

WHITE LEAD IN OIL	Tons.	Less Tons.
Pure, per 100 lbs.	$14 95	15 30
Elephant, per 100 lbs.	15 45	15 80

Putty Demand Fair

London, Ont.

A fair demand for putty is reported locally, and is attributed to annual spring activity. It is considered that building construction would stimulate sales proportionately, but the present movement is well up to normal expectations. The following unchanged quotations prevail:

PUTTY—	Per 100 lbs.
Standard, in 100-lb. drums	7 05
Do., in 25-lb. drums	7 30
Pure, in 100-lb. drums	8 55
Do., in 25-lb. drums	8 80

Cordage Prices Firm

London, Ont.

Rope and cordage are maintained at the recent new prices announced in Hardware and Metal market quotations last week. The firmer tone has resulted in a small sorting movement, but no brisk activity is anticipated at this season of the year. The revised figures are contained on the current market pages.

Lawn Mower Demand Only Fair

London, Ont.

There is evident a fair seasonable demand for lawn mowers, but sales in this line cannot be classed as numerous. Sales, however, are reported better than expected in some quarters. Current prices follow:

LAWN MOWERS—Taylor-Forbes make: Woodyatt and Star, list less 10%; Empress and Daisy, list less 15%. Brockville make: Net list.

Netting Sales Numerous

London, Ont.

Brisk activity is reflected in poultry netting and numerous sales of the Canadian make, 1-inch and 2-inch mesh, are reported. The current price is unchanged at list, plus 10 per cent.

Garden and Harvest Tools Brisk

London, Ont.

A good demand continues to be evident for garden and harvest tools. Sales in these seasonable lines are fairly prominent, with prevailing quotations remaining at list less 50-10 per cent.

Sport Goods Sell Well

London, Ont.

Among the best selling seasonable lines at present are various sporting goods, including fishing rods and tackle, also baseball outfits and sundries. There has been no revision of prices on these commodities, the demand being good and quotations remaining firm.

New Tack Discount

London, Ont.

Net prices on some of the best selling lines of tacks figured at the recent new discount of 70-15 per cent. are shown below:

BLUED CARPET TACKS—6 oz., 49c doz.; 8 oz., 62c; 10 oz., 76c.

TINNED CARPET TACKS—6 oz., 57c doz.; 8 oz., 73c; 10 oz., 90c.

CUT TACKS—1 oz., 20c doz.; 1½ oz., 26c; 2 oz., 28c; 2½ oz., 29c; 3 oz., 33c; 4 oz., 38c; 6 oz., 54c; 8 oz., 68c; 10 oz., 80c; 12 oz., 93c; 14 oz., $1.07; 16 oz., $1.22; 18 oz., $1.36; 20 oz., $1.55.

Clout Nails Revised

London, Ont.

Clout nail prices have been revised as follows:

BLUED CLOUT NAILS—⅝ in., 26c lb.; ½ in., 21c; ⅝ in., 20c; ¾ in., 20c; ⅞ in., 19½c; 1 in. and longer, 19½c.

TINNED CLOUT NAILS—⅜ in., 29c lb.; ½ in., 24½c; ⅝ in., 24c; ¾ in., 24c; ⅞ in., 23c; 1 in. and longer, 23c.

Mop Wringers Revised

London, Ont.

New lower prices are announced on mop wringers, complete with pail. Following are the revised quotations: Domestic, $34.50 per dozen; Standard, $38.50 per dozen; Janitor, $47.50 per dozen.

Washing Machines Steady

London, Ont.

Washing machines and wringers are at present in brisk demand, and satisfactory sales are reported from several quarters in these products. Prices remain unchanged at list, less 25 per cent.

Floor Wax Popular

London, Ont.

With the advent of spring cleaning and combined with the annual clean-up campaign, sales in floor wax are reported distinctly more numerous. Prices prevailing at present are: Johnson, one pound tins, 67 cents; Old English, one pound tins, 67 cents.

Furniture Polishes Seasonable

London, Ont.

A seasonable spring demand has resulted in increased sales in lines of furniture polish and liquid veneer. Following are current prices:

O'CEDAR—4 oz. bottles, $2.40 doz.; 12 oz. bottles, $4.80 doz.; quart cans, $12 doz.; ½ gal. can, $20 doz.; 1 gal. cans. $28 doz.

LIQUID VENEER—4 oz. bottles, $2.40 doz.; 12 oz. bottles, $4.80; 32 oz. cans, $10 doz.; 64 oz. cans, $1.34 each; 128 oz. cans, $2.34 each.

Solder Prices Increase

London, Ont.

Solder.—An advance of 3½ cents per pound is now effective on all lines of solder. The revised quotations center around higher prices on tin and lead, and advices regarding the market in England.

Winnipeg Markets

Linseed Prices Firm

Winnipeg.

No changes have been recorded this week in the quotation on linseed oil. The market, however, remains very firm, and the demand continues to be fairly good in spite of the advanced prices. Nominal prices prevailing are: raw, $1.05 per gallon, and boiled, $1.08.

Sheet Brass Revised

Winnipeg.

A slight reduction has been made on a few sizes of sheet brass and the present quotations are as follows:

SHEET BRASS—¼ in., 50c; 3-16 in., 50c; 10 to 18 ga., 48c; 20 to 24 ga., 50c; 26 ga., 50c; 28 ga., 55c; 30 ga., 60c.

Braziers' Copper Reduced

Winnipeg.

Prices are reduced slightly in braziers' and stencil copper and following are the latest quotations:

BRAZIERS.—28 ga., 52c; 26 ga., 42c; 24 ga., 40c; 12 ga., 36c; 29 ga., 36c; 18 ga., 36c; 14 ga., 36c; 12 ga., 36c; 10 ga., 36c.

STENCIL— 52 x 20 x 24, 52c; 26, 55c; 28, 65c; 30, 70c.

Range Boiler Stands Decline

Winnipeg.

Prices are lower this week on range boiler stands and are quoted as follows:

RANGE BOILER STANDS—12 in., $2.70; 13 in., $2.84; 14 in., $2.93; 16 in., $3.15; 18 in., $3.60; 20 in., $4.15; 22 in., $4.50; 24 in., $4.95.

Wire Rope Clips Reduced

Winnipeg.

A reduction has been made in the prices of wire rope clips and they are now as follows:

WIRE ROPE CLIPS—¼ in., 6c each; 5-16 in., 7c; ⅜ in., 8c; 7-16 in., 10c; ½ in., 12c; 9-16 in., 15c; ⅝ in., 16c; ¾ in., 22c; ⅞ in., 30c; 1 in., 35c; 1⅛ in., 55c; 1¼ in., 68c; 1⅜ in., $1.05; 1½ in., $1.10.

Plaster of Paris Higher

Winnipeg.

The price has been advanced slightly in plaster of Paris this week and is now quoted at $6.75 for "F," $7.00 for "FF," and $7.50 for dental.

Corrugated Now Lower

Winnipeg.

A slight reduction in the prices of

Continued on page 54

Weekly Paint Markets

Montreal

MONTREAL, May 26.—Linseed oil registers the only change in prices on the paint market this week. This is again advanced 3 cents per gallon. The recent range in quotations is now withdrawn; wholesalers who were maintaining the lower prices have now advanced their quotations in line with the flaxseed market. A very strong feeling still exists and further advances would not be surprising in the next few days, flaxseed continuing to show strength on the market. Turpentine is now a little easier than it has been the last few weeks, and while quotations are unchanged at $1.20 per gallon in one-barrel lots, some fluctuations are expected and slightly lower prices are altogether probable in the very near future. The present level is thought to be the ruling prices, however, for some little time, and while the demand remains seasonably heavy, lower quotations will not likely exceed a few cents.

White lead in oil is also unchanged, but remains very firm. The tendency a few weeks ago was thought to be on the downward trend, but with linseed oil continuing firm and pig lead on the primary market also showing very strong the tendency now is upwards rather than any change in the downward direction. Shellacs are maintained at the advance shown last week, with gum shellac remaining very firm. Putty is holding and little change is expected in this product.

No change of importance is reported in the window glass situation, and it continues more or less unsettled.

Paint and varnish manufacturers are still kept busy, due to the seasonable demand for their lines. Prices on all paints, paint specialties and varnishes are holding unchanged, and little change is expected until the fall demand commences. Other years, changes in the paint markets for the fall trade are considered in the summer months; and it was thought in the earlier spring that a change to lower prices would in all probability be made at that time. However, with raw materials holding firm and gaining in price as they have recently, the chances for lower prices are now more remote.

Linseed Oil Price Advances

Montreal.

Linseed oil made a further gain of 3 cents per gallon this week and it is now quoted at 87 cents and 89½ cents in one-barrel lots. In a few quarters oil is maintained at two cents per gallon lower, but this is by no means uniform and the general uniform advance to the higher quotations will in all probability be made within the next few days. The tendency of the market is decidedly firm, and continued so all through the week. In the last two days a gain of 8 points was made in the seed market, and the fact that oil cake has again fallen off will also tend to stiffen prices on the oil product. A continuance of this condition is now thought altogether likely with further advances. The local and Argentine seed markets both report a strong tone, and there is little likelihood of the demand falling off for some time yet. New prices are the following:

LINSEED OIL—	Raw	Boiled
1 to 2 barrels	0 87	0 89½
3 to 4 barrels	0 85	0 87½
Broken lots, add 10c gal.		

Turpentine Prices Hold

Montreal.

Although local quotations are maintained at $1.20 per gallon, it would not be surprising if a decline of a few cents a gallon was made in the following few days, as an easier tone is reported from outside markets.

The European demand, which in recent weeks caused a gain of 30c to be made on the Southern market, has fallen off considerably during the past week, this allowing the market to again depend on the United States and domestic demand. Producers still claim that turpentine cannot be produced at present prices and are holding supplies, awaiting higher levels. Therefore it is anticipated that any spurt in the demand will in all probability again boost prices. However, present prices are expected to hold fairly well, with slight fluctuations, unless some unforeseen happening occurs, such as the above. Following are the quotations:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 20
2 to 4 barrel lots	1 18
Broken lots	1 30

Shellac Prices Hold

Montreal.

Shellacs are holding at the advance of last week, with a firm tone continuing. Wholesalers who had not raised their prices last week have now increased them to the higher levels, and some have even advanced them further than those given below. Gum shellac continues firm, and further slight advances would not be at all surprising. Little change is noted in the demand, it continuing to move steadily in smaller orders than in previous years. Following are the present quotations:

Orange shellac, in barrels, $3.75; in one gal. jugs, $4.05; white, in barrels, or 5 gal. jugs, $4.10; in one gal. jugs, $4.50.

Putty Quotations Firm

Montreal.

Putty quotations remain unchanged and it is decidedly firmer than it was in the earlier months. With linseed oil continuing firm, the chances of lower prices on putty that were thought probable a little while ago are now much more remote. As the spring of the year is not the heavy season for putty, and it is dependent largely on building construction, improvements along these lines will have to be made before any greater activity is shown. Unchanged prices follow:

Standard Putty—	5 ton	1 ton	ton
Bulk barrels, 800 lbs.	$5 00	$5 25	$5 60
Bulk drums, 100 lbs.	6 00	6 25	6 60
Do., or tins, loose, 25 lbs.	6 25	6 50	6 85
Drums or tins, cased, 25 lbs.	7 00	7 25	7 60
1 lb. tins	9 75	10 00	10 35

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices.

White Lead Holds Firm

Montreal.

White lead in oil remains unchanged in price, while the tendency is firmer than ever. The strength of pig lead on the primary market holds; the recent easier showings lasting only a few days were soon recovered and the firmness is again maintained. Linseed oil has again been increased this week, so that with these two raw materials in their present conditions lead can hardly be expected to show any easier prices, although in the earlier months it was thought by some that lower prices would be given for the fall.

Corroders are still very busy keeping stocks parallel with the demand and very little surplus of supplies is carried at present either by the corroders or jobbers. Quotations are $14.00 in 5-ton lots, $14.50 in one-ton lots and $14.85 in less quantities.

Window Glass Unchanged

Montreal.

Locally no change is made in glass quotations, and little change is shown in the demand. Sales are still small and made from prices that vary among the different jobbers and wholesalers. The market is reported somewhat steadier,

however, than it has recently been and a settlement is looked for in the near future.

Shipments of Belgian glass have been received, and wholesalers whose supplies are now replenished are holding quotations at 50 per cent. off Montreal list, and can hardly resell glass at any less and still maintain a profit.

The Belgian market is firm, the franc being now quoted at a higher rate than it has for any time this year.

Toronto

TORONTO, May 26.—No changes are reported this week in the current prices of either turpentine or linseed oil. A steady demand is evident, however, and the firm tone on both products continues. Some shipments of turpentine from southern points arrived during the last few days, and the turpentine situation is consequently a little easier, but local stocks are far from large.

Paint manufacturers and dealers continue to report a very busy season, and present demands for paints and varnishes are expected to be apparent all through the summer months. Following last week's revision in rosin prices local quotations remain unchanged. White lead in oil retains a very firm tone, and with continued strength of lead on the primary markets, coupled with the advance in linseed oil quotations, white lead in oil has reached a much firmer level.

Shellac prices are being well maintained, and a further advance is looked for at any time. Some dealers show a higher range, due to the steady increase apparent in the price of gum shellac. Putty prices are unchanged, and no developments have been recorded in glass markets. The Belgian franc rate is gaining, and glass quotations remain steady.

Paint Demand Active

Toronto.

A seasonable demand continues to keep the paint manufacturers and dealers very busy. Country orders especially indicate that much painting is being done. Paint and paint product prices continue firm, and little change is anticipated until the present season closes. With turpentine and linseed oil holding at higher quotations, and with the lead market producing a firmer tone, the hope of reductions which had been expressed earlier in the season is now very remote.

Although orders are smaller than in previous seasons, they are repeatedly more numerous. A good sorting movement is reported as in progress, with careful foresight being shown by jobbers and merchants as regards stock. The general volume of business is expected to be much greater than the turnover of last season, and smaller requisitions by dealers indicate that the paint movement should continue on a strong basis for several months.

Oil Prices Unchanged

Toronto.

No change is reported this week in linseed oil quotations, and the prices shown of 87 cents for raw, and 90 cents per gallon for boiled in 1 to 2 barrel lots, is still being well maintained. Flax seed is reported as a little higher on the market, but this increase has not yet been reflected in local circles.

Continued strength is evident in the Argentine markets, and a firmer tone is also reported in English oil. Foreign orders are unusually prominent at this time, and it is considered that higher price levels are likely at any moment. Local quotations continue as follows:

LINSEED OIL—	Raw	Boiled
1 to 2 barrels, per gal.	0 87	0 90
3 to 5 barrels, per gal.	0 86	0 89
6 to 9 barrels, per gal.	0 84	0 87
Less barrels, add 15 cents per gal.		

Turpentine Market Easier

Toronto.

The local turpentine situation is somewhat easier, and no further increases in price were recorded during the week. The quotation of $1.15 per gallon on 1 barrel lots is very firm, however, and while higher levels are reported from some quarters, the general tone is stationary at present. Some further shipments have now arrived from the southern markets, but local stocks are still very low, and up to the present there has been no inducement for any revision of prices. The following quotations prevail locally:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 15
2 to 4 barrel lots	1 14
5 gallon lots	1 30

Rosin Prices Steady

Toronto.

A steady tone prevails in the rosin markets, and prices in the south continue to show a firm inclination to advance. The local increases quoted last week, however, are still maintained, and no exceptional revisions are anticipated, unless future ranges develop fluctuations. Prevailing local prices are contained in the current market pages.

White Lead Unchanged

Toronto.

White lead in oil prices are unchanged this week, but the market still retains a very firm tone. The continued strength and advances in pig lead on the primary markets, and the similar development in linseed oil quotations have reflected a decided firmness in white lead in oil. Whether the change is temporary, or indicates an all-round adjustment to higher levels, is too early to determine, but the present demand is well up to expectations. Local prices remain as follows:

WHITE LEAD IN OIL—
$15.30 per 100 lbs. in smaller quantities.
$14.95 per 100 lbs. in ton lots.

Shellac Price Very Firm

Toronto.

Shellac prices quoted at the higher levels recorded last week are being well maintained, and a further advance is looked for at any time. Gum shellac continues very firm, and dealers who have been forced to buy gum shellac at the new higher range are accordingly showing a more substantial advance in the price of shellac. With firms whose stocks were not entirely depleted, however, the increase registered last week continues general. Orange at $3.40 per gallon and white shellac at $3.90 are the average prices prevailing locally.

Glass Prices Unchanged

Toronto.

Practically no change has been reported in the glass situation this week. The Belgian franc rate continues to show improving strength, and a firmer tone in glass products has resulted. Prices on window and plate glass remain at previous levels, with no marked improvement having been noted in the demand. While business is below expectations just at present, brighter activity is anticipated during the summer and fall seasons.

Putty Prices Steady

Toronto.

Putty prices continue to be maintained at previous levels, with a general firm tone developing. While no changes have been recorded, yet it is likely that future revisions would be on an upward trend owing to linseed oil increases. The demand at this season of the year is not expected to show any marked volume, but an improvement is looked for during the summer and fall seasons. Prevailing prices are as follows:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	7 05
Do., 25-lb. irons	7 30
Do., bladders in bbls.	8 30
Do., less quantities	8 55
Pure, in 100-lb. drums	8 55
Do., 25-lb. irons	8 80
Do., bladders in bbls.	9 80

GENERAL MARKETS

Continued from page 52

corrugated iron is recorded this week and they are as follows:

CORRUGATED SHEETS—Galvanized, 28 ga., $8.55; 26 ga., $9.45. Painted—28 ga., $7.20; 26 ga., $8.33.

Shingle Prices Reduced

Winnipeg.

A slight reduction is made in the prices of metallic siding and shingles, and following are the latest quotations:

METALLIC SIDING.—Galvanized, medium, $9; painted, medium, $6.98.

METALLIC SHINGLES—Galvanized, medium, $10.80; painted, medium, $8.55.

No Change in Turpentine

Winnipeg.

The price of turpentine is still holding at the figures quoted last week: $1.20 per gallon in barrel lots, smaller quantities 10 cents per gallon extra, containers 25 cents per gal. extra.

The Brush Department

Protect Brush Stock Against Moths

Brush Drawers or Boxes Should be Lined With Tar Paper for Protection—Keeping the Stock in Good Shape

IT is important that hardware merchants should make a careful inspection of the brushes they have in stock and see that all drawers or boxes are cleaned out and are lined with tar paper to keep the moths out. Flake camphor or moth balls can be used for this purpose, but if so should be replenished occasionally as the strength goes out of same when in the open air very quickly.

Very often new and old stocks of brushes are put in the same drawer and the old brushes may already have moth in them, and if this is the case it will not be long before the new stock will suffer as well.

Often dealers make complaints that brushes have been sent by the manufacturer with moth in them, but in the better and standard grades made by the larger manufacturers this could hardly be the case, as most of the large manufacturers have the bristles thoroughly cleaned out before being made up into brushes and also have a regular and careful system of inspection as well as using moth preventives.

On account of the season starting earlier than usual the danger will probably be greater than usual, and merchants should not lose any time in giving this matter their attention.

One of the big points in selling brushes is to have the stock in good condition, and at this time, when brushes should be moving actively in conjunction with paint sales, and when brushes are being kept more or less exposed, care should be given to curtail the depredations of the moth.

GENERAL MARKETS

Continued from page 54

Chain Quotations Revised

Winnipeg.

Slightly lower prices are quoted this week on cable chain and are as follows:

ELECTRIC WELD—3-16 in., $19.15; ¼ in., $17.65; 5-16 in., $15.20; ⅜ in., $13.20; 7-16 in., $12.80; ½ in., $12.40; ⅝ in., $12.05; ¾ in., $11.85.

B.B. SHORT LINK—⅜ in., $17.75; 7-16 in., $15.30; ½ in., $15.15; 9-16 in., $15.15; ⅝ in., $14.40; ¾ in., $14; ⅞ in., $13.65; 1 in., $13.20.

Eavestrough Prices Lower

Winnipeg.

Lower prices are recorded this week on eavestrough and conductor pipe and are as follows:

EAVESTROUGH—O.G., Square Bead—8 in., $6.53; 10 in., $7.20; 12 in., $8.78; 15 in., $12.15. O.G., Round Bead—8 in., $6.78; 10 in., $7.45; 12 in., $9.03; 15 in., $12.40. Half Round Bead—8 in., $6.84; 10 in., $7.60; 12 in., $9.18; 15 in., $12.78.

CONDUCTOR PIPE—2 in., $7.65; 3 in., $9.45; 4 in., $12.15; 5 in., $17.10.

CONDUCTOR ELBOWS—2 in., $2.34; 3 in., $2.61; 4 in., $4.14; 5 in, $11.70; 6 in., $13.95.

CONDUCTOR SHOES — 2 in., $2.88; 3 in., $3.38; 4 in, $5.04; 5 in., $13.05; 6 in., $15.30.

Bar Iron Reduced

Winnipeg.

A reduction has been made in the prices of bar iron this week. The revised quotations are given below.

ROUNDS AND SQUARES—3-16, ¼ and 5-16, $5.70 base; ⅜ to 2 in., and flats up to and including 1 x 4 in., $5.40 base; 2 in. up to and including 2¾ in., and flats 1 x 4 in. up to 6 in. wide, $6.15 base; rounds over 2¾ in. to 6 in., $6.65 base; band steel, $5.70 base.

Pittsburgh Markets

Pittsburgh, May 26.—Production of steel is declining at a slow rate. Measured by ingot output it was about 31 per cent. of capacity in April and is now a share below 30 per cent., while the indications are that a rate of 25 per cent, or less will be reached by July. That prediction is based on the fact that specifications and orders are coming in at a slightly lower rate now than a few weeks ago.

July is invariably a dull month in the steel market. Even in 1916, an extremely active year, the market was dull in both June and July, and this led to expectations in some quarters that the market would go off permanently, but it took a fresh start in August. Inasmuch as nothing good can be expected in July and we are only a few weeks from July now, it is regarded as certain that no definite improvement can occur in the near future. Predictions of improvement are now centering more definitely around the month of August, when a few weeks ago some predicted August, some September and some October. What is being predicted for later in the year is not a complete revival, but an improvement. Full operation of the steel industry is not expected before next spring at the earliest. It will be seen that if mill operations are 25 per cent. in July and become 50 per cent. in September, the 50 per cent. rate would be a very low one, but on the other hand it would represent a doubling in output, which would look very good. Before the war the steel industry had an idea that no combination of circumstances could put a demand to a point below 50 per cent. of capacity, and as a matter of fact there was never, before the war, an operation under 50 per cent. at any time. The capacity now, of course, is much larger.

Attitude of Steel Mills

A notable fact in the situation, one that does not attract the attention it deserves, is the complaisance with which steel producers view the situation. They are not alarmed or perturbed or even particularly impatient. What is their philosophy? It is one that is common to the majority of business men today, that there must be a general and complete readjustment and that no one can expect real business activity until the adjustment is finished. Indeed, the philosophy goes farther than that, that no one should want a revival in business until the adjustment is completed, because such a revival would represent a false start, on an unsound economic basis, and there would be fresh trouble later.

Of course everyone would be much better satisfied if the readjustment should be completed suddenly, but it is recognized that it cannot be and men therefore are patient. An important point is that business men know, or at least are convinced that they know, just what they are waiting on, and they can read signs from day to day of how the readjustment is proceeding so that they can judge of the progress being made. There are various things needed for completion of the readjustment, but two things are picked out as the hardest and slowest and it is assumed that all the others will come around in ample time for these two, so that they are the ones to be watched.

These two are declines in retail prices commensurate with the declines in wholesale prices, so that the cost of living will be lowered by reasonable amount, and declines in those wage rates that are too high. When the readjustment started no one knew how far prices would decline or how far they ought to decline to produce a safe basis. Now, however, there have been such declines in some commodities and some wage rates that they can be used as a measuring stick for the others. Perhaps some of the prices and wage rates are a little too low now and will advance, but the advance would not be large and the decreases awaited are large. Thus tin, copper, zinc, lead and antimony have lately been below their pre-war averages and possibly that is a little too low.

BOECKH'S FLOOR BROOMS

This beautifully made floor broom is exceptionally high quality. They give exceptional wear—your customers get the service they are looking for and therefore become satisfied customers. High quality that is backed by our guarantee, supported by the whole experience, reputation and prestige of the Boeckh Company, Ltd.

This organization, since its establishment in 1856, has maintained the very highest standards for all its products. Develops Paint Trade Among Artisans

Windows Used to Advantage in Selling Paint to Artisan Class Who Do Much of Their Own Renovating—Drawing Business From Outlying Districts.

AN attractive and seasonable window display of paints and similar products in connection with spring "paint up" activity, is shown in the illustration herewith. This photograph represents one of the weekly business endeavors of May Brothers, hardware merchants, Dundas street, W., Toronto.

When interviewed by HARDWARE & METAL, Mr. May stated that he attributed a large portion of his recently increased paint sales to the incentive in his line of business attained through the display. Especially did this apply to stains, varnish and paint brushes, all of which had been placed to good advantage in the window.

In keeping with the general trend of the paint situation at the present time, is the remark that sales in all these lines are more numerous this year than ever before, and that the final results of the season will not only show an increase in volume of this class of trade, but will also be credited with a record turnover in this department.

Appeal to Artisans

Confidence of this kind, although a decided asset, is being backed up with several practical suggestions for securing and enlarging the paint trade in this vicinity. May Brothers' store is situated in West Toronto, where a large number of artisans reside. A direct appeal was made to this class; and not only were the various lines of suitable coats for house painting purposes presented in an effective manner, but extension ladders were rented to customers for a nominal charge, thus facilitating the active perusal and consummation of the "paint your own home" slogan.

Along with floor finish products were shown polishing mops and handles, waxing brushes, floor wax, and similar commodities. A similar method was employed in grouping special products. Thus, with roofing, was shown tar paper and building paper, and with these products was presented roofing cement. Chicken incubators suggested poultry foods, regulators and disinfectants, as well as leg bands, oyster shell, and so on.

Appeal to Holiday Makers.

Another and more recent adaptation of May's method of concentration was a window display containing a direct appeal to the excursionist and holiday maker. This consisted chiefly of thermos flasks, hot water retainers, picnic baskets, and lunch boxes and motorists' luncheon outfits, in preparation for the holiday and all that the holiday involves. Ordinarily such a day is merely a chance for recreation, but to the progressive hardware merchant, it presents an opportunity for increased sales in special lines. Just prior to the holidays early in the year paint sales are active. This also applies to the week-ends during which the paint up spirit of the office or factory worker has an opportunity for expression.

A bid for a good share of the paint trade of the district is made in this paint display by May Bros., West Toronto, showing varnish stains, brushes, etc. In the background will be noticed a sketch showing the firm's delivery wagon on the way to Weston, Mt. Dennis and other points, thus emphasizing the large rural field covered by this service.

Moore's Paints

"Save the surface and you save all" *Paint & Varnish*

"Save the surface and you save all" *Paint & Varnish*

Sell the Goods that Hold the Trade

Moore's Wagon and Implement Paint is specially prepared for Wagons, Carts, Plows, Mowing Machines, and all other agricultural implements.

Produces a rich gloss, hard-wearing surface for the consumer, and increased business for the dealer. The hardwareman in rural districts has plenty of prospects for this service-giving paint.

This popular, durable, and lustrous enamel renews the appearance of automobiles and makes them look like new.

Easy to apply. Self-levelling and dries overnight.

Made in Black, Oriental Yellow, Auto Gray, Emerald Green, Vermilion, Jockey Red, Wine Color, Cobalt Blue, Brewster Green.

Berry Brothers' Advertising

Throughout Canada a tremendous demand for Berry Brothers Varnishes and Paint Specialties has been created by persistent and attractive advertising in the leading daily newspapers.

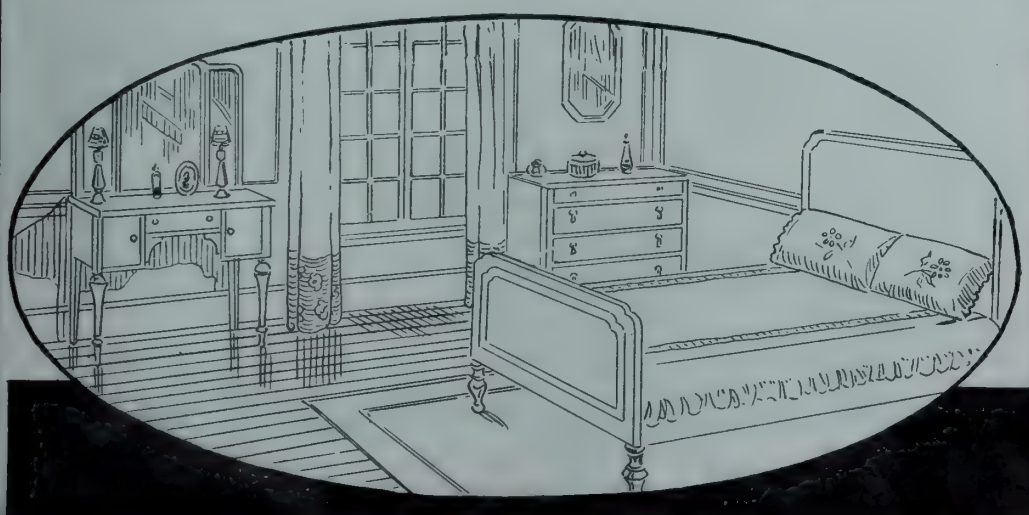
Householders and others are roused to the beautifying possibilities and superior qualities of Berry Brothers products, and dealers featuring them find that our campaign brings business to their doors.

The following have a big sale:

LIQUID GRANITE—magic floor varnish.

LUXEBERRY WHITE ENAMEL—for wood, metal, plaster or cement.

BERRYCRAFT—stain finish for woodwork.



BERRY BROTHERS AUTO COLOR VARNISH—Unequalled for Beautiful Finish and Durability.

If This Were *Your* Window —

Here is a suggestion for a Univernish Window Display—easily arranged, attractive and convincing—one that will beckon the passer-by into your store for supplies of **"The Varnish that lasts longest."**

Univernish needs little introduction to the people of your community. It is known to them already through big space consumer advertisements appearing in Canadian publications of national circulation.

Tell them through your window displays that you sell Univernish. You can meet their every color requirement because Univernish is made in a wide range of transparent wood colors as well as a clear varnish.

Write us to-day for all particulars of our dealer proposition.

Save the surface and you save all" *Paint & Varnish*

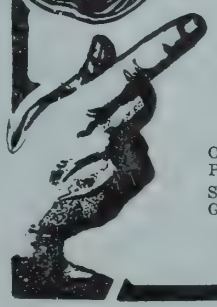
Clears Clogged Pipe Without Damaging the House or Lawns

Think of the multiple advantages of Desolvo! Without, floors, pipes, lawns and gardens had to ripped up at a great expense to clear a clogged or frozen pipe. There was all that expense for damage, beside the time consumed. Desolvo clears clogged and frozen pipes quickly without damage to the premises. No wonder it sells so well!



The CHAMBERLAIN DESOLVO COMPANY
109 Church St., Toronto.

"Save the surface and you save all" Paint & Varnish

Wa-Ko-Ver Stain
Beautifies All Woodwork

Not only does it beautify, but it wears like iron. You will find it pays in future sales always to recommend Wa-Ko-Ver Stain whenever your customers have worn floors or scratched woodwork to renovate. It restores the freshness of the floors or woodwork, pleases your customers, and makes permanent business for you. The established reputation of this effective, serviceable stain makes it a pleasure to sell. Good displays in your windows, on your counters, or other conspicuous places, remind visitors to your store, and people that would otherwise be "passers-by," of their need for Wa-Ko-Ver stain. This sales-maker will handsomely reward a little sales-effort on your part.

North Star Batteries

There's a Size for Every Purpose —and a Customer for Every Size.

Whether it be for bell systems—telephones—motor boats—automobiles—gas engines—tractors or any other Dry Cell ignition work where strong, reliable electric current is required, there is a North Star Dry Cell or Multiple that will give absolute satisfaction.

We use a secret method of construction which gives a greater storage power and lengthens the life of North Star batteries. We guarantee them to give a stronger spark and last longer than any other battery of equal rating manufactured in Canada.

North Star Multiples are unequalled for heavy duty. Made in various sizes, and conveniently arranged with handle; perfectly protected and absolutely waterproof.

Satisfy your customers and increase your profits by selling the complete "North Star" line of batteries.

The leading jobbers sell them.

Absolutely Guaranteed

Floglaze

Registered

The finish that endures

"Save the surface and you save all" *Paint & Varnish*

The Seven Floglaze Lines

Home & Farm Finishes
Velvet Finish
Art Shades
Auto Finish
Porch and Veranda Floors
Lac Shades
Exterior Finishes.

Velvet Finish

(The Can With the Orange and Black Label)

This line will develop big business in sales for wall and ceiling finishes in homes, churches, halls, stores, etc.

Gives an egg shell gloss finish without rubbing on plastered walls, wall board, woodwork, metal work, etc.

It can be used in or out of doors.

This flat finish is adapted to universal use, which increases its possibility for sales, greater turnover and larger profits.

Spreading, covering and wearing qualities are the same as all other Floglaze lines.

Our dealers' booklet, "A Guide to Larger Profits," describes Floglaze Velvet Finish fully. Write us for this book.

Push the Line that Pulls for You

When you sell a Meakins Brush you increase your sales force. Actually the brush has left your store, but it is still selling your store and your stock to its owner, by the constant service it gives.

Meakins Brushes establish consumer confidence, and your customers will express that confidence by repeat purchases of Meakins Brushes and other lines of hardware you sell.

Opening the Strap

O-Rib-O
Adjustable Taper Stove Pipe

This handy patent permits adjustment to fit any stove collar with a smoke-tight joint. No large assortment of taper pipes is necessary, which allows the merchant to economize storage space. It is a quick seller, built for service.

O-Rib-O Manufacturing Co.
Winnipeg, Manitoba

WINNIPEG, MAN.

Instructive Advertisements

"I think the advertisements are good and I read them all the time. If it were not for the ads. I would not be able to keep up-to-date on new equipment. It is the only way we learn about anything new, as circulars are mostly kept in the offices," writes a Hamilton reader.

Double Moral—Read the Advertisements.

Use Hardware and Metal for Advertising.

"It's a good brush—

Where did you get it? at Jones Hardware Store?"

"No, don't go there, he doesn't carry Simms—the next store down on the right—you can't miss it, it's one of the best stores in town—you'll see the Simms display in the window."

How many times has this happened to you? How many times have you lost a good customer that you otherwise would have had — if you had stocked up on—

TRADE SIMMS SET IN RUBBER MARK

Paint and Varnish Brushes

They are **better** Brushes, because they give **real service**—and **satisfaction.**

The bristles can't come out, because they are set in rubber by a process that is guaranteed to hold the bristles in the ferrule for ever.

This is why SIMMS BRUSHES are always in demand.

VIKO
ALUMINUM

A High Grade Ware That Sells at a Popular Price

There is probably no more valuable metal for the making of cooking utensils than aluminum. It is tough, durable, malleable, light in weight, good to look at, an excellent conductor of heat, and it takes a permanently smooth finish. The merit of the finished ware, however, depends not solely upon the fact that it is aluminum. *How it is made* is the important thing.

VIKO, The Popular Aluminum, is sturdily constructed from thick sheet aluminum which is 99% pure. It gives unusual wear, is finely designed, and beautifully finished. It is a good line for the retailer to handle, not only because it gives consumer satisfaction, but because it contains utensils for every kitchen need and retails profitably at a popular price. For full information—

Barrett Roofings, Cements Industrial Paints etc.

Prepare for Bigger Business

MORE and better advertising than ever before—
That's the Barrett program for 1921, and it means quicker, easier sales and larger profits for every dealer who handles the famous Barrett Products.

These products, which are listed below, have made good on their own merits. For many years they have been fast sellers in every section of the Dominion. Each of them is unequalled for its particular purpose.

Everlastic "Rubber" Roofing

The most popular roll roofing on the Canadian market.

Liquid Elastigum

Preserves the surface of prepared and "rubber" roofings.

Everlastic Liquid Roofing Cement

Puts a new surface on worn-out prepared and "rubber" roofs.

Everjet Elastic Carbon Paint

A durable, waterproof, acid-proof, protective paint for wood and metal.

Plastic Elastigum Patching Cement

"The waterproof cement of a thousand uses." Repairs roofs, flashings, etc.

Creonoid (Fly Oil) Cow Spray and Lice Destroyer

Just what farmers want. Inexpensive, effective and easy to use.

This year there will be an unprecedented demand for these products. If you do not carry them *all*, you will miss a sure opportunity to increase your profits.

Descriptive booklets regarding any of these products sent free on request. Address nearest office.

CARTER'S

Always Recommend

CARTER'S GENUINE DRY RED LEAD

It is worth recommending. A highly oxidized and very finely ground Red Lead that is always pure, always uniform and very economical. The best protection paint for metal work, railway and marine work, steam pipes, etc.

Carter's Genuine Orange Lead, Genuine Dry White Lead and Litharge are of a similar high quality. Write for prices and particulars.

The Carter White Lead Company of Canada, Limited, 91 Delorimier Ave., Montreal

Stove Mica

All sizes of Clear Mica in stock for immediate shipment.

Mica Electrical Insulation of Every Kind.

Price List on Application.

Mica Company of Canada, Ltd.
P.O. Box 156, Hull, Que.

An Ingenious Folding Camp Cot

Every customer of yours who is an experienced camper knows the importance of a comfortable cot for sleep, yet it must be easily packed, shipped or stored with due economy of storage space. This convenient cot affords all these advantages. See in the illustration how it appears open and also closed.

TRADE MARK

Abraham Lincoln's Clear Simple Reasoning in Favor of Domestic Buying

"I don't know much about the tariff, but I do know this much: When we buy goods abroad, we get the goods and the foreigner gets the money; when we buy goods made at home, we get both the goods and the money."

Behind the simple language in which Lincoln expressed his ideas there lay a profundity of thought that baffled his enemies, balked the wiliest of diplomats, and aroused the admiration of both friend and foe.

His achievements warrant our taking his advice. By purchasing everything possible at home, and increasing our exports, we can all help build up Canada's prosperity; so confine your purchases to Canadian-made Cordage and Binder Twine.

Remember that import duty is now figured on the exchange—another sound reason to trade among ourselves.

This booklet covers the subject of automotive lubrication in a clear, concise manner. Technical points are well illustrated and explained. Dealers find it a big help in clearing up customers' difficulties. Write to-day for your copy of "Automotive Lubrication."

A Good Book for Dealers—

Helps You Sell Imperial Polarine—Gets Other Business as Well

Motorists and tractor owners these days seek out the dealer who is posted on lubrication. Once you get their oil trade, the rest is easy—repeat orders and business in other lines naturally follow.

The booklet shown above is one of the best goodwill builders and business-getters that we can offer our dealers. It handles automotive lubrication in an interesting, scientific way. It is full of helpful advice that you will want to pass on to customers.

Imperial Polarine is the fastest moving line of motor oils the dealer can sell—especially when backed by expert selling arguments, such as are contained in "Automotive Lubrication."

Your copy of this new booklet is ready. Write to 56 Church Street, Toronto, for it; also for the Imperial Charts of Recommendations for all types of automobiles and tractors, which should be prominently displayed wherever Imperial Polarine Motor Oils are sold.

New oil accounts are easily opened by the dealer who gives Imperial Polarine Crank-Case Service. Besides, he secures additional automotive business from all customers—old and new alike. Establish Imperial Polarine Crank-Case Service. See the Imperial Oil salesmen regarding the big display poster and free electros for advertising this service.

Open a Tire Department — It Will Pay

Plenty of Hardware Dealers have demonstrated that the Hardware Trade CAN and DO handle Tires, Tubes and Accessories, with considerable profit. Some have done so well as to find the bulk of their turnover is made up of sales of Automobile Supplies. When you choose the tire you want to specialize on, give considerable attention to the merits of

"Gutta Percha"

(CORD) TIRES (FABRIC)

"Gutta Percha" lines, including Tubes, Running Board Mats, Blow-Out Patches, Cementless Patches, etc., have the QUALITY that makes it an asset to your business to sell them.

SAMUEL TREES & CO., LIMITED

ESTABLISHED 1869

42 Wellington Street East, Toronto

LANE'S UNIQUE TOOLS

Unique Universal Socket Wrench Set

Style "C" Set

This is the handiest combination of Socket Wrenches conceivable. This set consists of a Lane Unique Ratchet Wrench, an 11" Sliding-T Handle Socket Wrench, Universal Joint, Adapter Pin, eight unique, machine-made, broached, steel sockets, **hexagon** openings from 7/16" to ⅞", and six unique, machine-made steel sockets with **square** openings from ¼" to 9/16" by sixteenths. The hexagon sockets in this set are the same as those in the Style "B" set.

This combination is useful to both mechanics and car owners, and makes a gratifying volume of sales in the hardware store. Ratchet Wrench, Tee Handle Wrench, and Flexible Wrench for the usual run of hexagon and square screws and nuts as found on automobiles and machines.

Point out to your customers that separate wrenches to accomplish the same purposes would cost ten times as much. These sell as well as the well-known pioneer Unique Ratchet Wrench Set Line.

Manufactured by

Will B. Lane Unique Tool Co.

170 W. Randolph St., Chicago, Ill.

M&S

The Plug with the Hotter Spark

THE ball point of the "M & S" spark plug concentrates the current and intensifies the heat. This gives a sure, hot spark—producing better combustion and greater power.

The "M & S" plug is made in all styles to suit every make of car—it is standard equipment on the popular Overland Model 4.

The "M & S" plug is made in Canada and guaranteed to give complete satisfaction.

Dealers:—Ask your jobber for the "M & S" plug or write us direct.

Look! Mr. Dealer—

Have you heard about our extensive Advertising Campaign and our **exceptional sales proposition which we offer you on**

D-B CARBON REMOVER

Every motorist will know about it, and will ask you for it. Why? Because it costs them nothing.

This is our plan—We want you to give **D-B Carbon Remover** to your customers on trial. It it does not prove satisfactory they are to return it and it costs them nothing. No! you don't lose the sale, because—WE GUARANTEE TO PAY YOU FOR EVERY CAN THAT IS RETURNED TO YOU IN THIS MANNER.

Therefore, you are certain of your profits—and good profits they are, too!—when you stock **D-B Carbon Remover.**

"We have confidence in our product."

AUTO JACK says:

D-B Carbon Remover makes a "clean sweep" of 90% of your engine troubles. It is not injurious to the metal; does not cut compression.

RELIABLE PROGRESSIVE LINES

RECOGNIZED STANDARD—SELL WELL

THE LUFKIN RULE CO. OF CANADA, LTD.
WINDSOR, ONT.

Clerk D is making change from his cash drawer. The amount of the sale is shown at the top of the register. The other clerk is handing change and parcel to the customer. He made change from his own cash drawer.

A separate cash drawer for each clerk

This makes clerks more efficient because:

1. Each clerk is responsible for the business he handles.
2. In case of error it shows who made the mistake.
3. It gives each clerk credit for the work he does.

An up-to-date National Cash Register with separate cash drawers measures the ability of each clerk.

Up-to-date National Cash Registers are made with any number of cash drawers, from one to nine

We make cash registers for every line of business

BURGESS BATTERIES ARE WATERPROOF!

The modern, up-to-date farmer puts as much reliance into the Uniplex Battery as the pioneers had in their six shooters—and they are just as dependable.

The Uniplex goes right ahead in the rain or snowstorm. Its waterproof container protects it, and it delivers the last ounce of energy.

The big terminal nuts are easy to handle with gloves or mitts on—no cold fingers—no cussing or delay for want of a pair of pliers.

Burgess Uniplex with its strong, sturdy appearance gives the customer confidence. Standing on your counter with its generous rope handle your customers just can't resist it.

Have your jobber send you a few. Keep them prominently displayed and check up their rate of TURNOVER.

The Door to Prosperity Opens With C.S.G. Co.'s Latches

No. 1240 Barn Door Latch

opens all doors quickly and easily, just as it performs all the other duties of a latch, even the duty of selling readily and with a profit for the merchant. A durable, commonsense latch with Japanned frame and handles, tinned bolt and a Sherardized spring of piano wire that cannot rust. Packed one-quarter dozen in a carton, including padlock eyes. Weight, 175 lbs. per case.

The "Challenge" Latch

has opened a new door to profit for many a shrewd dealer, for it possesses more points of quality and value — selling points — than any other thumb latch on the market; for instance, it is made entirely of wrought steel and it is absolutely impossible for the thumb piece to work loose or get out of place. Packed one-half dozen in a box. 12 dozen in a case. Weight, 180 lbs. per case.

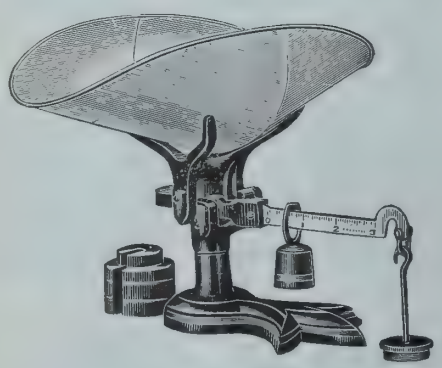
Hanging Household

and Other Useful Scales

In these days of modern efficiency, the housewife insists on her kitchen scale. With this she checks the accuracy of weight received from the grocer, the butcher, the ice man, etc.

The hanging model shown is a neatly Designed Scale with a capacity of 16 lbs. All the weighing is done without any loose weights, which are easily mislaid or lost.

The beam is nicely nickel-plated, and the figuring on it is clear and distinct. The Pan is of heavy white porcelain, easily cleaned, and kept clean.



No. 212

No. 212 has capacity from one ounce to ten pounds. The Scale has nickel-plated beam and strong tin scoop.

It is light, neat and durable, reliable and accurate. Inspected and stamped by a Government official.

It is easily handled, and when not in use, takes up very little shelf room.

No. 214, with capacity of one-half ounce to 25 pounds, has a brass beam, marked to three pounds in half ounce notches.

No. 214

Extra weights supplied—Two 8-lb., one 4-lb., and one 2-lb., making the total capacity of scale 25 pounds.

This is a new scale, made to meet the demand for a Household scale of larger weighing capacity than No. 212. The scoop is made of heavy tin and is quite large. Government inspected and stamped. Can be used for commercial purposes.

SAND'S

How the Hardware Dealer Can Sell More Levels

Lots of good workmen don't feel they need a new level until they see a Sand's.

They may have a heavy iron one or a warped, wooden old timer, and they go on using it until they once get a Sand's level in their hands.

Then they buy a new level.

You can prove to your own satisfaction that it pays handsomely to carry Sand's levels in stock and display them prominently.

You not only get the business of the man who cannot resist buying when he sees a better tool, but you get the business that goes to the mail order house when you do not stock and display levels.

We get hundreds of letters from our national advertising, which we refer to dealers carrying Sand's levels. But it would make some good hardware men squirm if they could read some of the answers to our follow up, saying in substance, "My dealer does not have the level I want. I'll get one somewhere else."

You can hold all the level business with the Sand's line, for there are levels in pine, walnut and aluminum for all workmen on every kind of work. Your jobber will be glad to supply promptly.

Here are some of the special features developed in our two generations of level making that will show you why the better workman insists on Sand's.

Solid set—absolutely accurate spirit glasses, non-adjustable and fool proof.

Very old, air dried wood, seasoned in our factory six months to a year before being made up.

Sand's originated the walnut level.

Sand's originated the aluminum level.

Sand's originated plate glass lens protection to cover glasses and make them dust proof, dirt proof and waterproof.

The friction grip wire locaters that show exact centre instantly are also Sand's developments.

Write for fully illustrated folder describing the complete line of Sand's Levels.

You Can Make 40% Profit

THE secret of successful merchandising is quick turn-over. To keep our factory working up to top notch, and to boost "Made in Canada" electrical goods, we are inaugurating a merchandising campaign, featuring our celebrated Sovereign Electric Iron. It's going to be a winner. Thousands of women will be attracted to the electrical stores, who are displaying the

Sovereign Electric Iron

in their windows.

The margin of profit on the Sovereign Iron is particularly generous. The new list price of $6.00, and the special discounts, enable you to make 40 per cent. profit on this appliance.

Specially prepared advertising matter, suitable for your use, with your name and address printed, free of charge, is available. Sales letters printed on attractive dealer letterheads, ready-prepared newspaper advertisements, window cards, folders, etc., are yours for the asking.

Quick Sales - - - Good Profits

PUT Miss Simplicity in your store and you will realize both quick sales and good profits. An electric washer makes an irresistible appeal to the housewife, but this is intensified almost to the point of instant sales when the very moderate price of Miss Simplicity is known.

Miss Simplicity is Canadian-made throughout and built of the finest materials obtainable. Mechanically perfect, yet very simple in operation, it is an instant favorite. Costs very little to operate and washes clothes, laces and even the daintiest of fabrics, perfectly and without injury.

Miss Simplicity gives you an excellent opportunity to capitalize on the popular demand for electric washers. You can make money fast with Miss Simplicity because each sale brings you a good profit and because quick sales increase your turnover. We give a liberal guarantee with every machine and will assist you with your advertising.

Send to-day for our dealer offer. We know it will interest you, as it has so many others.

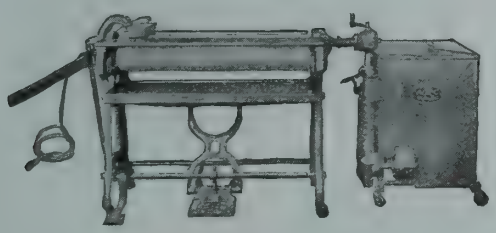
for complete details of selling plan.

A B C

A Complete Line Soundly Backed by a Veteran Maker

As occurs in every new industry, to-day there are innumerable beginners foisting experimental electric washers upon dealers in the hope of securing an eventual foothold. Woe betide those dealers who lend ear to the honeyed promises of inexperience and allow the siren of prices based on visionary rather than actual cost to lure them! For a year hence, the mortality among these hopefuls will have sorely embarrassed many of those dealers who succumb now to the wiles of temporary new makers. How can these new factories produce and sell good appliances for less than the large veteran establishments with their big outputs? Obviously they cannot do so and long remain in business. It is better for dealers to take on only such lines as are already soundly entrenched. The ABC is such a line—backed by veterans in the industry, the great twelve-year-old, $2,000,000 factory of Altorfer Bros. Company. Exclusive dealerships open. Write nearest distributor, or us.



A B C SUPER ELECTRIC WASHER

Open, semi-cabinet and full cabinet models. Maple or zinc cylinders. Copper or galvanized tubs. ¼ h.p. motor. Also equipped for power drive.

A B C ELECTRIC IRONER

Foot pedals apply and release ironing pressure. 45-inch roll and shoe. One-piece steel ironing roll; 8-inch diameter, 7-inch non-warping ironing shoe. Result: faster, uniform work. Shoe drops back 4 inches. Enclosed parts. Equipped either to operate off any A B C electric washer, or with individual motor.

A B C ELECTRIC LAUNDRESS

Washes—Wrings—Irons—with a single motor

The *only* complete home laundry unit. Detachable wringer. Ironer shaft attaches to wringer post. Saves cost of extra motor.
The "Iron-All" attachment superbly irons the difficult operations—such as ruffles, collars, cuffs and children's dresses.

A B C "ALCO" WASHERS

Dolly type. Underneath drive. Single or double tub. Oversize motor. Machine-cut gears insure absolute quietness of operation. Also furnished for power drive off gasoline engine.

The Eveready Line with the Ever Steady Turnover

Announcing the New EVEREADY SPOTLIGHT

—with the 300-foot Range

EVEREADY scores another ten-strike!

Eveready, originators and creators of flashlights and batteries, have produced a brand new type of flashlight. Seven remarkable improvements place the new Eveready Spotlight completely in a class by itself.

Eveready flashlight case turnover, already four times the year according to the records of thousands of energetic dealers, will speed up still more with the announcements to the public of this new Spotlight, just at this season when outdoor and vacation use demands thousands of new Evereadys and hundreds of thousands of Eveready batteries.

A complete merchandising campaign for the dealer is ready and waiting. It is backed by national publicity, including the most striking window display ever produced by Eveready. Place your order instantly through your Eveready distributor for an ample supply of the new Spotlight (two types, 3-cell nickel and vulcanized fibre) and write or wire the nearest Eveready address for the Spotlight Dealer Campaign.

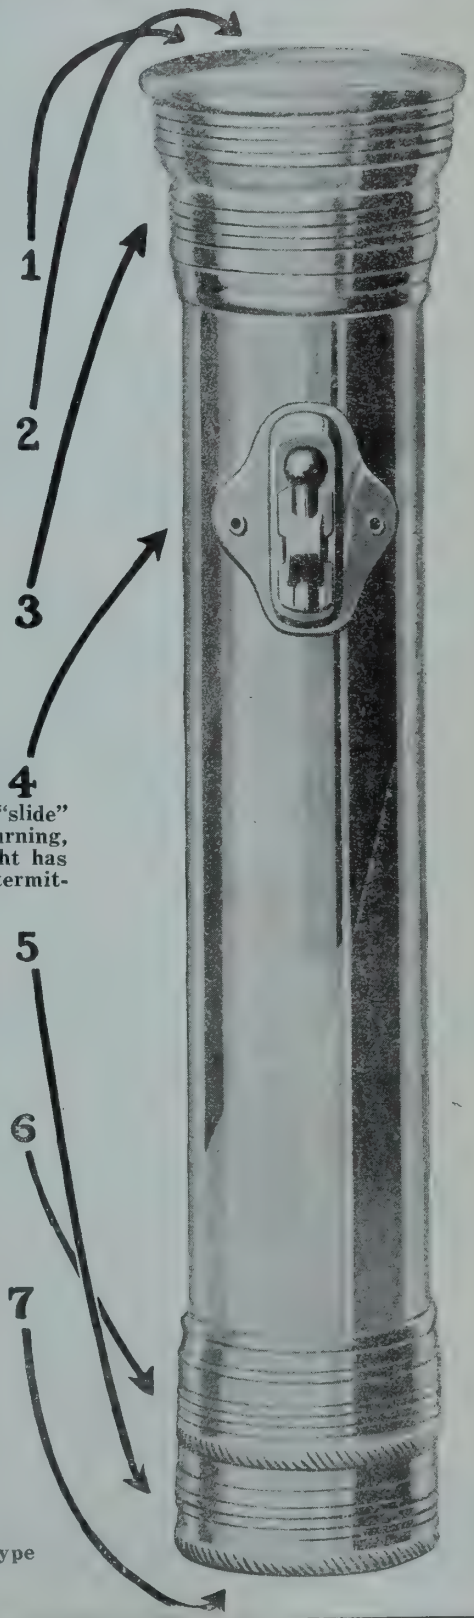
SEVEN BIG IMPROVEMENTS FOR BETTER AND LONGER SERVICE

1. New scientific reflector, concentrating the light rays to give more light and throw it farther.

2. Special Eveready Mazda lamp of increased brilliancy and power.



3. Shock-absorber to prevent breaking of lamp if flashlight is accidently dropped or jarred.

4. In addition to usual "slide" contact for continuous burning, the all-metal type spotlight has "flash" contact for intermittent lighting.

5. Compartment holding two extra Eveready Mazda lamps so that your flashlight may not be put out of business when a lamp burns out.

6. Exclusive focussing device. Light instantly focussed as desired, by turning end cap to right or left.

7. End cap stamped to show the renewal type numbers for battery and Mazda lamp required for this particular flashlight.

The Doors That Serve You Best

KASEMENT

Screen Doors

These better Screen Doors serve you best because they are better made than ordinary screen doors. Stop in at the store and let us show the 26 mortise and tenon joints. You will easily see why they cannot sag, or pull apart. Not only are they more substantial and lasting than common screen doors, but they are very easy to hang—it only takes 10 minutes, and you can take them down or re-hang in a jiffy. Even the holes for hinges are already bored—three holes in each stile. The hardware comes complete in an individual carton. It is simple and easy to adjust. Come in and see how simple your screen door equipment can be made this season.

A Selling Point That Sells

Kopper King Spark Plugs are anti-fouling and rust-proof. This is a selling feature that really appeals to the car owner. A Kopper King Plug will not rust into the cylinder head.

This enables you to sell your customers a Spark Plug that ensures freedom from trouble.

The Kopper King is a Sales-builder --- once a car owner buys his first one, he will, in future, enthusiastically specify Kopper King Spark Plugs throughout.

Rust-proof

A heavy coating of copper protects the body of the plug. This prevents carbon deposits; carbon under electrical heat will not adhere to copper.

KOPPER KING

Kopper King Spark Plugs ensure you a better margin of profit than any competing plug. They meet every requirement. Once sold they stay sold.

Expect Pre War Prices on Basic Lines

Dairy and Some Agricultural Products Down to 1914 Price Levels —Manufactured Goods Maintained in Price by Labor Costs Chiefly—Perfection of Industrial Processes May Help Reduce Costs—The New Taxes Hamper Imports and Trade Generally

FURTHER considering the possibility of a general recession of prices to the levels of 1914 or even to lower levels than prevailed at that time, a subject introduced in last week's issue of Hardware and Metal, some further interesting viewpoints are outlined herewith.

The president of a wholesale hardware firm and a prominent bank official, while pointing out that any such forecast is largely guesswork, states that on the basis of the factors entering into the situation, as now evident, there is reason to think that prices of basic iron and steel commodities will gradually return to 1914 levels. He points to the fact that dairy products, cotton, sugar, etc., are now down to or below prices prevailing at that time. Manufactured goods have been held up in price largely due to high cost of raw materials on hand, to high labor costs and high freight rates.

The process of deflation will, he said, be dependent upon the amount of discomfort which attends the readjustment period. One of the most serious impediments to a readjustment of labor costs to lower levels was said to be the rent problem. While undoubtedly some foodstuffs had declined in cost yet the housing situation is such that even the modest workman must pay an exorbitant rental. Until building costs were reduced and sufficient encouragement be therefore given this industry it was thought this condition would continue. Landlords point out that while the revenue they receive will buy them more foodstuffs than before, yet the money invested in the properties could very well be withdrawn and provide bigger returns in some of the gilt-edged securities being offered at reasonable prices at the present time.

Decreased Production Raises Costs

It was pointed out that manufacturers' and wholesalers' costs are very high. In the case of the manufacturer, decreased production makes for still higher costs due to the fact that much of the overhead expense continues. The fact that large extensions were made to many industries during the boom period was also a factor in keeping costs high at present while production is not in sufficient volume to offset overhead on the additional capital invested.

This official was of the opinion that the increased tax legislation and the changed basis of value for duty on imports, the new import taxes and the anti-dumping provisions would all tend to hamper imports and, therefore, hamper trade generally at a time when every encouragement was needed.

Repeating his belief that 1914 levels would be reached in the prices of many commodities, this official stated that the whole question of a price recession is not solely dependent upon labor costs being reduced. He pointed out that the perfection of industrial processes will cut production costs to some extent, and in many cases might allow of a return to pre-war prices without a corresponding reduction in labor costs. Of course these comments are largely based on primary conditions and do not take into consideration temporarily increased freight rates, higher taxation, etc.

It was acknowledged that labor has set up a higher standard of living as result of higher wages secured in recent years, and it was not thought desirable to make the adjustment so acute that this standard would have to be lowered. It was further shown that recent price recessions on some commodities have not resulted in a stimulation of trade so that it is not altogether established that price reductions are necessary to a return to normal activity in industry.

Dealing with the new import taxes and plan to charge duty on the exchange value of U. S. currency, this wholesaler pointed out that this plan would increase the cost of U. S. imports in Canada approximately 5 per cent. to the wholesaler and 7 per cent. to the retailer. This will, of course, vary according to the rate of duty normally paid. Wholesalers, according to the informant, will not absorb this additional tax on imports, but will collect it from the retail trade. It was stated as a logical consequence that trade in these imported goods would suffer as result of these new proposals.

This wholesale hardware merchant reports that while business during the first months of this year had not been in quite as large volume as last year, yet collections are better and hope is entertained that business is being put upon a somewhat sounder basis for gradual improvement as the readjustment period progresses.

An iron and steel merchant, speaking on this subject stated: Prices of iron and steel will go back to 1914 levels if other things decrease also. The tendency to lower prices has recently been reflected in many lines, and if other elements, such as labor, etc., show declines, there is no future alternative but general reductions. Future price conditions depend upon the amount of reduction the primary factors develop from now on, but if the decreases are of marked degree they might even go below 1914 levels. If all phases of the trade are willing to work for this end, and are ready to bear an equal loss, if they have to, there is no reason why the old standard of prices should not again prevail."

The sales manager of a firm manufacturing stoves, wares, etc., states: "I do not think prices will actually go back to pre-war levels, because there are so many factors at present operating to keep prices up. There will no doubt be gradual declines continuing for some time, but the movement to reduce quotations will be slow. Even if the prices of raw material went back to pre-war levels, labor and transportation still cost more, and while we have this to contend with, how can the raw product prices go back to the old standards? Overhead, including salaries, is now on a higher range than in 1914. If conditions continue to change, prices might eventually decline to a reasonable extent, but altogether it will take much longer to show price decreases than it did to show advances."

An importer of glass states: "Prices can hardly be expected to come anywhere near pre-war levels for some considerable time. Under present conditions, prices cannot be reduced to that extent, as the various elements entering into production costs now combine to prevent it. Transportation and labor charges are vital factors. Before the war, one size of window glass was imported from Belgium at $2.40 per 100 square feet. This size now costs $12.10. Wire glass, imported from the United States, has risen from 7 cents per square foot to 18 cents, plus 12½ per cent. exchange rate, and 2½ per cent. import tax, a total increase of over 200 per cent. Some price reductions have been made, and in several cases jobbers have been forced to take a loss on window and plate glass, but this was due to trade fluctuations and price-cutting activities on the Belgian market. Glass, especially window glass, has reached its lowest ebb, and any price changes should be of an upward trend."

Definite Ruling in Tinsmiths' Case

Hardware Merchants and Tinsmiths Being Bothered by Local Collectors Who do Not Fully Understand the Law—Instructions Given to Merchants Through Hardware and Metal by Deputy Minister of Inland Revenue—May Appeal From Local Collector's Rulings

THE old question of whether a tinsmith should take out a manufacturer's license and collect the sales tax is again brought up even in the face of the recent decision in the test case.

W. H. Turnbull & Sons, Brantford, Ont., write that the local collector advises that as he reads the act a tinsmith is a man who does nothing but repair work and soldering, while a sheet metal worker does furnace work, makes up eavestroughs and is therefore a manufcturer, even under the latest provisions.

But the local collector in this instance has erred in his attempt to define a tinsmith. This fact is established as the result of an interview the Ottawa representative of Hardware and Metal had on Monday of this week with George W. Taylor, assistant deputy minister of the Department of Customs and Inland Revenue. When asked for a definite ruling as to what constitutes a tinsmith, and whether he is liable for the collection of the manufacturer's tax, Mr. Taylor said:

"The whole question rests upon the nature of the man's business. If the work he is doing is being done for the consumers, regardless of what articles he is making or assembling, then I say most emphatically he is a retailer and cannot be classed as a manufacturer. If the local collector in this case has made a ruling, it is not necessarily final. Under the new provisions where there is any doubt or dispute, either the dealer or the collector, or both, have the right to refer the matter to the Minister of Customs and Inland Revenue, who is the final authority.

"If it is established that the firm in question are manufacturers, then they are liable for the collection of the tax from the commencement of the present fiscal year.

"If the firm is satisfied that it is doing a strictly retail business, then all it has to do is to mark 'Abandoned' upon the taxation papers and return them to the department, and of course if the department takes no further action the firm may then consider that it is not liable for the payment of the tax upon any of this year's sales."

From the above statement and ruling it is to be seen that the whole question is one of individual rather than collective adjustment. Each case will be decided upon its merits by the minister of the department who is the final authority. This should be comforting news to the dealer, because he knows now that he has the right to challenge any decision or ruling made by the local collector.

The following is a copy of a circular letter sent by the secretary of the Dominion Board, Retail Merchants' Association of Canada, to the secretaries of the various provincial boards dealing with this matter in a general way:

"Excise taxes are to be paid by manufacturers or producers and wholesalers or jobbers.

"Excise taxes shall not be payable on sales of goods made to the order of each individual customer by a business which sells exclusively by retail under regulations by the Minister of Customs and Inland Revenue, who shall be the sole judge as to the classification of a business.

"Until the Minister of Customs and Inland Revenue makes his rulings regarding the retail trade, it is very necessary before any retail merchant makes application to take out a manufacturer's license, or before they inquire from the Customs Department, or decide what class they come under, they should first refer their case to the secretary of the association in their province, who is asked to take the matter up with our office here, so that we may know exactly under what classification the retail merchant should be placed. This is very important, otherwise we will find ourselves in the same position as we were in before, when all sorts of rulings were made which were contrary to the act."

PUBLISHING UNDER STRIKE CONDITIONS

This issue of Hardware and Metal has been published under strike conditions, and has been slightly delayed in mailing due to the adjustments made necessary by the general strike of printers, pressmen and other allied trades.

This delay will likely be minimized in future issues, and Hardware and Metal will continue giving its readers a weekly service of current trade news, retail helps and market reports on hardware commodities.

(See Page 47)

Household Hardware Selling Helps

Greater Purchasing Value of the Dollar in Foodstuffs and Household Requirements; Gives the Housewife a Larger Surplus For Buying Household Hardware—What Household Lines are Being Featured by Other Hardware Merchants

A household hardware department showing a neat arrangement of a wide range of such lines. Utensils are arranged on the shelving at the left hand front end and on the tables various other household lines are grouped. Vacuum cleaners, oil stoves, washers, wringers, refrigerators, etc., are shown. This department stands by itself as a separate unit and is located on the second floor of the W. C. Edge & Co. store, Ottawa, Ont. Customers appreciate the quiet seclusion of this department to select their household requirements.

THE active season for the sale of many lines of household hardware is here, and as the season progresses more lines will join the seasonable variety which should be pushed with vigor. The household hardware line is a very extensive one and one which soon responds to any special effort to increase sales. House-cleaning work is still in progress in the home and many citizens and townspeople who retire to summer homes for the warm months are now at work housecleaning the summer cottages. This makes a big demand for all cleaning and polishing lines and accessories, of which there are a great number in the hardware trade. Later will come the preserving season and the real hot weather which makes a demand for still other lines which can be featured within a few weeks.

An important reason why the hardware merchant should give attention to specially featuring household hardware lines this year is the fact that prices on many of the home requirements have declined to such an extent that the average housewife has more money to spend on such lines. Furthermore the cost of these lines of hardware has declined to some extent, and the purchasing power of the dollar in household requirements is, therefore, very much greater to-day than for some time. This point was aptly illustrated in a recent issue of Hardware and Metal which showed that the dollar can to-day purchase a great deal more in the line of foodstuffs than a year ago. Wage decreases would of course offset this condition to some extent but this tendency has not been general as yet. This point can be emphasized in the merchant's advertisements, window displays and in his conversational dealings with customers.

The ads. of hardware merchants now are featuring a wide range of household requirements and some of the helpful points in them will be dealt with as follows:

An ad. by Stanley Mills & Co., Hamilton, is devoted entirely to washing machines and other wash needs including wringers, clothesline wire, pulleys, asbestos irons, smoothing irons, hand and power washers, wash benches, etc. Each line is illustrated, described and price marked.

"Keeping Cool" in Summer.

An ad. by Hunter Hardware Co., Wiarton, Ont., is headed "Keep Cool" and continues "During the hot weather, by using an electric iron, stove, percolator and a dish of ice cream afterward." It also illustrates and deals with kitchen cabinets in a wide range of prices.

Summer Resort Necessities

The ad. by Ingram & Davey, Ltd., St Thomas, is somewhat of an innovation in that it deals exclusively with summer resort necessities. The ad asks "Are you prepared for your summer vacation at the lake with all modern conveniences? The Big Hardware Store carries a large stock of the new things to save you unnecessary trouble. Come in and let us show you the many lines." The ad. then illustrates oil stoves, electric heaters, kitchen cabinets, dock chairs, waffle irons, couch hammocks, etc. The line might be extended greatly but it is not wise to deal with too many lines at one time.

An ad. by T. McAvity & Son, Ltd., St. John, deals with household ice tools, pointing out that it is so much easier to handle ice with proper tools. The ad. mentions ice picks, chisels and tongs, every article made of good quality steel—light in weight but strong where the strain is greatest.

Refrigerators Save Food.

An ad. by Mills Hardware Co., Hamilton, dealing with a refrigerator sale says: "There is no question but what a refrigerator saves food. If the use of refrigerators was discontinued for one week the waste of food would be tremendous to say nothing of possible sickness." Other household lines featured in the ad. include household scales, paints, varnish stains, egg poachers, floor waxers and polishers, whitewash brushes, kitchen utensils, brushes and brooms.

The drudgery of wash day without the use of modern machines is pointed out in an ad by Manitoba Hardware and Lumber Co., Virden, Man., which states "The drudgery of wash day can be greatly eliminated by the many labor-saving devices to be had here. The washings at this season of the year and for the next two months are usually very heavy so it would seem a very good time to invest in a good washing machine and wringer. In washing machines we have several styles that will do a real good job, besides lessening the work for you. You will find our prices on any of these machines to be within the reach of all. No need to send away." Other lines featured in the ad. include wringers, clothes line, wash boards, pins, baskets galvanized tubs, scrub brushes, drying racks, clothes line reels, copper boilers, vacuum washers, clothes horses.

Serving Trays

"Dainty Glass-Bottomed Serving Trays." Under this heading an ad. by W. H. Thorne & Co., St. John, N. B., states "You can always find us for extra trays at your social functions, and when summer is here they'll be needed for serving ices on the verandah at your country home. The pretty oval trays we are showing are in mahogany effect, beautifully finished and can be made still more attractive by slipping doilies under the glass bottoms."

Under the heading "Hot Weather Goods," an ad. by A. E. Jones, Milestone, Sask., says "nothing is nicer than a thermos bottle, it will keep your drink cold in summer or hot in winter. They are highly recommended for keeping baby's food, or a thermos lunch box for those who carry their lunch."

"Refrigerator time is here," says an ad. by Rice Lewis & Son, Toronto, which continues, "looks like warm weather is here and likely to stay. Most folks have put off getting a refrigerator for various reasons. We have anticipated a big demand and are well stocked with guaranteed qualities in refrigerators. We want the opportunity to tell you about the various types and show you how well they are made."

Keeping Up to Date

Under the catchy heading "To Men Only," an ad. by F. P. Turner, Port Colborne, Ont., states: "You no longer cut your grain with the sickle or your hay with a scythe. But your women folk, if they are doing your washing on the wash board are doing pretty much the same as the women did when the Pharaoh ruled in Egypt. You could no longer go back to the crude implements of those days than you could get along without electricity or railways. For one quarter of the cost of a binder which is used but a few days and left idle the rest of the year—for the fraction of the cost of a typewriter or adding machine you could equip your kitchen and laundry with modern implements. We have washers, wringers, electric irons, ironing boards, vacuum sweepers, etc. We have all these helps and as merchants we don't want them to remain idle in our store, we want them to work for you in your home. We ask you to appropriate a small sum for the better kitchen and laundry."

Cash Customers Have Advantage

The McAfee hardware company, Holden, Alberta, is introducing a new system into their business. This system will give cash customers a decided advantage over those who desire credit. According to their advertisement all goods are marked at the cash price in plain figures and if anyone desires credit then ten per cent. is added to this marked price and in addition one per cent. interest per month is also added.

Another feature is that if any customer pays cash within fifteen days from the date the goods are purchased then the ten per cent. which was added to the cash price will be refunded.

Selling Suggestions for Household Lines

Comment on Conditions Among Manufacturers of Various Household Hardware Lines and Some Helpful Selling Suggestions Which Can be Used to Advantage by Merchants at This Time

SOME interesting comment on conditions among the manufacturers of various lines of household hardware and some selling suggestions which the trade can use to advantage, are included in the following paragraphs:

"We realize that in view of declining costs of groceries, etc., the housewife will have more money for the purchase of labor-saving devices in the home. We are planning to capitalize on this, and also on the fact that the month of June is the big bride month of the year, and also that the hot weather season is approaching," said T. F. Kelly, sales manager, Hoover Suction Sweeper Co.

"Having this in mind, the company have gotten out a number of special seasonable newspaper advertisements which we are merchandising through our district managers, and offering to supply to our dealers electrotypes of same for their use in their local newspapers, and we believe that we will receive the co-operation of our dealers in running these advertisements, and we hope that they will cash in on the seasonableness of these ads.

"We are becoming more convinced than ever that people do not leave off buying except when they have no longer any money to spend, and as we are convinced that that time has not yet come in this Dominion of ours, people can be found to purchase labor-saving devices such as ours.

"We find that the dealer who is alive to the situation and who has appointed someone in his organization to specialize on our product and devote some time to its sale is securing real results at the present time, and our organization is working and co-operating with our dealers to the utmost extent at the present time, in the hope that our dealers will follow our suggestions and secure maximum results.

"The dealer who is sitting quietly in his office is not doing much business, but the dealer who has adopted as his slogan '1921 WILL REWARD FIGHTERS,' or similar slogans, and is going out after the business, is the one who is cashing in at the present time."

Silver-plated Hollow-ware Business is Good

"General conditions in the silver-plated hollow-ware end of our business are quite gratifying," stated P. W. Haywood, Standard Silver Co., Toronto.

"We do not suppose there has been more than a 10 per cent. decline in business, this being caused, we believe, through the fact that during the past two years advantage was not taken of the increased demand for our goods by placing fictitious value on same.

"The general public have now, we believe, become thoroughly educated to the use of silver-plated goods for the table and we expect this June business to be a very heavy one.

Household hardware lines are well to the front in this view of the department devoted to the line in a hardware store. Enamelware and aluminum utensils are attractively grouped on the shelves displaying the most-called-for types. A glass front to the counter allows the display of some trays and on the table to the left is a dispiay of electrical household goods. Silverware, cutlery, cut glass, etc., is arranged in the showcase, part of which is visible on the right.

"It is pleasing to know that especially in the hollow-ware end of the business there are no inflated stock throughout Canada, and, therefore, this fall we see no reason why business should not become perfectly normal and especially so as there are other possibilities of slight readjustment of a few pieces which got a little out of balance during the rush of the last two years.

"We strongly recommend to the retail hardware merchant the policy of very attractive window displays during the month of June, clean snappy stock and plenty of local advertising."

"We find that there is business to be done but one has to go after it. The Canadian housewife has, evidently, made up her mind to buy a good electric washer and we are endeavoring to cater to her needs," said H. Eccles, vice-president, Easy Washing Machine Co.

"The sales of paint brushes in the medium qualities has been extremely good all year and is still keeping up," stated Meakins & Sons Co., Hamilton, Ont. "Better grades of paint brushes on account of the small amount building are not being sold as freely. The medium grade paint brushes are, however, being sold very rapidly. We think this is on account of the great number of people doing their own painting."

"We have been making an advertising feature of aluminumware being most suitable for June brides," said W. D. Shambrook, of W. D. Shambrook & Co., Hamilton.

"While our plant is not running to capacity, we are however, operating full time, we presume for the reason that aluminumware has become very popular, as it is both useful and ornamental and the average housewife takes a great delight in making her kitchen attractive, so we are of the opinion that while we will not be rushed with orders for the balance of this year, we are confident that we will be able to run our factory full time even under present business conditions."

Effect of Tax and Tariff Changes

New Basis of Value For Duty and Import Taxes May Temporarily Slow Up Tendency Toward Lower Price Levels—Manufacturers Comment on Effect of New Measures on Their Branch of Trade.

THE effect on retail prices of hardware in Canada of the new tax and tariff legislation is matter of interest among all branches of the trade at present.

It was pointed out by one manufacturer that the exchange differential is of importance in this direction, as it operates to increase production costs.

"Import taxation, either direct or indirect, is likewise reflected in the ultimate price of the commodity. No matter whether the manufacturer, the wholesaler or the retailer pays the initial tax or its various phases, it is the consumer who feels the final effects. Thus it is, that prices on hardware lines manufactured from imported materials, or on goods directly imported, will likely be prevented from following the gradual downward trend. Perhaps this offset will only be temporary," said this manufacturer, "but it will take a much longer period at present, than in previous times, for even the slightest increase in production cost to readjust itself, because of the expectations of the public with regard to general price reduction."

When prices increase, there is practically always a corresponding falling off in the number of sales, and the profit total accordingly dwindles, stated another manufacturer, pointing out that a smaller capacity of operation will always increase production costs, especially at this critical moment of trade relations, and that it is natural that the manufacturer or jobber will refrain from any higher quotations, if at all possible.

In the case of import taxation, and its varied phases, the addition must be made to the price, or else the manufacturer must assume the extra cost.

It was pointed out that this does not necessarily imply that the merchant will suffer a direct loss, but that his proportion of profits will be affected, if he does not "pass on" sufficient to cover the amount of taxation involved. This applies to both manufacturers and retailers. There are many merchants who claim that any further cut in their percentage of profit will automatically force their business into liquidation.

Which of these courses is preferential is a matter for the manufacturer concerned to decide upon. But it can readily be seen that a total close down involves a direct charge of indebtedness to the full extent of all carrying and fixed operating costs, as well as the total stagnation of the amount of capital involved, whereas the partial operation of any plant only implies a direct partial loss to the extent of the portion at a standstill.

The relative connection to import taxation here lies in its bearing upon the community welfare. Burdens added to any factory already laboring under the conditions referred to are likely to result in higher operating costs, or else increased prices to the buyer. No relief in this connection can be expected, either from present or future budgets, for taxation is necessary to revenue, and revenue is primarily essential.

Neither the increased sales tax, nor the import tax, will affect profits materially, either one way or the other, if the policy is steadily adopted by manufacturers and dealers of showing the amount of tax separately; for in this manner it will be passed along to the public. But if extra charges of this nature are to be absorbed into operating or overhead costs, then the final price can only reflect the addition.

There's A Real Point Here

MANUFACTURERS in general are faced with the problem of keeping their establishments going and making the best showing possible in a period such as we are going through. There are plenty to give advice, but much of it is not practicable because it comes from men who have no intimate, every-day connection with the machine shop, the foundry or the office.

A Toronto manufacturer made a worth while point in discussing this matter a few days ago.

"There are many things people can do in going through a period such as we have been in for the past six months, but the trouble is that the plan I may try at my shop may not be much use any place else.

"But remember this, there are certain foundations that one can never allow to be broken down. These must be kept up if you are going to stay in business at all. There is the danger of cutting your business movement too fine. There is the danger of cutting the wages of your men, particularly your foreman and superintendents to the point where it takes the conceit and the pride out of them. When this is reached it is better to turn the key in the door and quit until things turn for the better.

"It is possible to run your business like a man trying to save fuel in his boiler. He starts to bank the fires and he starts to use clinkers instead of good coal. After a time he finds there is a call for steam some day and he is not able to produce it because his fire has gone too low. That may be a homely way of stating the case, but it has the real point, viz., that there are well-defined limits in the way of curtailment and it is not safe to go beyond them."

This same warning is capable of very general application. Some firms find it necessary to curtail their publicity. Quite right. Others cut it to the point where they are banking the fires where they are depending on the clinkers of past services and connections to keep up the fires of business accounts.

Half Holidays and Daylight Saving

Partial List of Cities and Towns Throughout Canada Showing Half Holidays Being Observed by Merchants and Whether Standard Time or Daylight Saving is in Effect—List Will Be Completed Shortly—Send in Your Report if Not Already Listed

ONTARIO

ACTON.—Wednesday half holiday from 12.30 p.m. May to October. Close 6 p.m. except Friday and Saturday. Standard time.

ALMONTE.—No half holiday. Close 6.15 p.m. except Saturday. Standard time.

ALLISTON.—Friday half holiday, May to September. Close 6 p.m. except Wednesday and Saturday. Standard time.

ARTHUR.—Wednesday half holiday from 12.30 p.m., May to September 30. Close 6 p.m., except Saturday. Standard time.

ARNPRIOR.—Wednesday half holiday July and August. Close 6 p.m., except Tuesday and Saturday. Standard time.

ALEXANDRIA.—No half holiday. Close 6.30 p.m. Monday, Wednesday, Friday. Standard time.

AILSA CRAIG.—Wednesday half holiday from 12.30 p.m., May 1 to September 30. Close 6 p.m. except Saturday. Standard time.

AURORA.—No half holiday for hardware stores. Close 6 p.m., except Saturday.

BURLINGTON—No half holiday for hardware stores. Close 8 p.m. Standard time.

BURK'S FALLS.—Thursday half holiday from 12 noon June, July, August. Close 6 p.m. except Saturday. Standard time.

BRUCE MINES.—No half holiday. Close 6 p.m. Monday, Wednesday, Friday, all year round. Standard time.

BLIND RIVER. — Wednesday holiday from 12.30 p.m. May 4 to October 5. Close 6 p.m. except Saturday. Standard time.

BRACEBRIDGE.—Thursday half holiday from 1 p.m. from May 1 to October 1. Close 6 p.m. except Saturday and evening prior to holiday. Standard time.

BRANTFORD.—Wednesday holiday from 1 p.m. July and August. Close 6 p.m. except Saturday.

BLENHEIM. — Wednesday holiday from 12 noon in some cases only, from May till October. Close 6 p.m. except Tuesday and Saturday. Standard time.

BRIGHTON.—Wednesday holiday from 12 noon, May to September, inclusive. Close 7 p.m. except Saturday. Standard time.

BELLEVILLE. — Wednesday half holiday from 12 noon, during June, July, August. Close 6 p.m. Standard time.

BARRIE.—Wednesday half holiday from 12 noon from June to September. 6 p.m. closing except Saturday. Standard time.

BOWMANVILLE.—Wednesday half holiday from 12.30 p.m. every month but December. Close 6.30 p.m. except Saturday. Standard time.

BRAMPTON.—Wednesday half holiday from 12.30 May to August. Close 6 p.m. except Saturday. Standard time.

COBALT.—Wednesday half holiday May to September inclusive. Early closing at 6 p.m. Saturday 10 p.m. Standard time.

COCHRANE.—No half holiday. Close 6.15 p.m., except Saturday. Standard time.

COLBORNE.—Wednesday holiday from 12 noon May 1 to October 1. Open evenings except Wednesday. Standard time.

COBOURG. — Wednesday holiday from 12.30 May to September inclusive. Close 6 p.m. except Saturday. Standard time.

COBDEN.—Wednesday half holiday from 12 noon June, July, August. Close 6 p.m. Monday, Wednesday, Friday. Standard time.

COLLINGWOOD. — Wednesday holiday 12.30 p.m. June to August, inclusive. Close 6.30 p.m. except Saturday. Standard time.

COPPER CLIFF. — Thursday holiday from 12.30 p.m. May to August, inclusive. Close 6 p.m. except Saturday. Daylight saving June 1 to Oct. 15.

CREEMORE.—Thursday holiday from 12.30 noon, May to September. 6 p.m. closing except Wednesday. Standard time.

CAMPBELLFORD. — Friday holiday from 12.30 May to September. Close 6 p.m. except Wednesday and Saturday. Standard time.

CLINTON.—Wednesday holiday from 12.30 p.m. May to September inclusive. Close 6.30 p.m. except before holidays. Standard time.

CHATHAM.—Thursday half holiday from 12.30 p.m. from May to August inclusive. Close 7 p.m. Saturday 10 p.m. Standard time.

CHATSWORTH.—Wednesday half holiday May to September. Close 6 p.m. Standard time.

DUNNVILLE.—Wednesday half holiday from 12.30 p.m. May to October. Close 6 p.m. except Saturday. Standard time.

DUTTON.—Close Wednesday from 12 noon May 1 to October 1. Close 6 p.m. except Saturday. Standard time.

DRAYTON.—Thursday half holiday from 12 o'clock from May 15 to September 15. Close 6 p.m. Monday, Tuesday, Friday. Open Wednesday and Saturday evenings. Standard time.

ELORA.—Wednesday holiday from 12 noon May 1 to Nov. 1. Close 6 p.m. Standard time.

EXETER.—Wednesday holiday from 12.30 p.m. June to August. Close 6 p.m. except Saturday. Standard time.

ELMIRA.—Wednesday holiday from 12.30 p.m. April 1 to Nov. 1. Close 6.15 except Saturday. Standard time.

EMBRUN. — No holiday. Close Monday, Wednesday, Friday, 7 p.m.

FINCH. No half holiday. Close 7 p.m. Monday, Wednesday, Friday. Standard time.

FENELON FALLS.—Wednesday half-holiday from 12 noon, May to September inclusive. No early closing. Standard time.

FERGUS.—Wednesday holiday from 12 noon except December. Close 6 p.m. except Saturday. Standard time.

HESPELER.—Wednesday holiday from 1 p.m. all year. Close 6.15 p.m. except Friday and Saturday 10 p.m. Standard time.

HENSALL—Thursday holiday from 12.30 May 1 to October 1. Early closing evenings except Wednesday and Saturday. Standard time.

HAGERSVILLE.—Thursday holiday from 12 noon May to August. Close 6 p.m. except Wednesday and Saturday. Standard time.

HAILEYBURY. — Wednesday holiday from 12 noon, May to September, inclusive. Close 6.30 p.m. Standard time.

HARROW.—Thursday half holiday from May to September. Early closing Tuesday night.

HAMILTON. — No general half holiday. No early closing regulations. Some hardware stores close Wednesday afternoon July and August. Standard time.

HARROW.—Thursday half holiday from May to September. Standard time.

HIGHGATE. — Wednesday holiday from 12 noon, April to October, inclusive. Close 6 p.m. Monday, Wednesday, and Friday. Standard time.

INGERSOLL. — Wednesday holiday from 12.30 May to Nov. inclusive. Close 6.30 except Saturday. Standard time.

KENORA.—Wednesday half holiday from 1 p.m., May to September inclusive. Close 6 p.m. except Saturday. Standard time.

KEEWATIN. — Thursday half holiday. Stores close 6 p.m. except Saturday. Standard time.

KITCHENER.—Wednesday holiday from 12.30 p.m. May to September, inclusive. Close 6.15 p.m. Daylight saving.

KINGSVILLE. — Thursday half holiday from 12 noon May to November. Close Tuesday 6 p.m. Standard time.

LANSDOWNE. — No half holiday. Close 6 p.m. Monday, Wednesday, Friday. Standard time.

LINDSAY.—Wednesday half holiday from 12.30, June, July and August. Close 6 p.m. Standard time.

LISTOWEL. — Wednesday holiday from 12 noon, May to September, inclusive. Close 6 p.m. except Saturday. Standard time.

MILLBROOK.—Thursday half holiday from May to September inclusive. Close 6 p.m. except Wednesday and Saturday. Standard time.

MARKHAM.—Wednesday holiday 12 noon May 1 to October 1. Close 6 p.m. except Saturday. Standard time.

MILTON.—Wednesday holiday from 12.30 p.m. May to September. Close Monday, Wednesday, Friday, 7 p.m. Standard time.

MORRISBURG.—No half holiday. No early closing. Standard time.

MARMORA.—Wednesday half holiday from 12 noon from June to August inclusive. Standard time.

MITCHELL.—Wednesday holiday from 12.30 May to October inclusive. Close 6.30 p.m. except Saturday. Standard time.

MOUNT ALBERT. — Wednesday half holiday May to October. Close 6 p.m. except Thursday and Saturday. Standard time.

MILDMAY. — Thursday half holiday from 1 p.m., from May to August inclusive. Close 6.30 p.m. Standard time.

MIDLAND.—Wednesday half holiday from 1 p.m., June, July and August. Close 6 p.m., except Saturday. Standard time.

NIAGARA FALLS. — Wednesday half holiday from 12 o'clock from January to November. Close 6 p.m. Saturday 9 p.m. Daylight saving May 1 to Oct. 15.

NORTH BAY.—Wednesday holiday from 1 p.m. May to October inclusive. Close 6 p.m. except Saturday and before holidays. Standard time.

NEW LISKEARD.—Wednesday half holiday from 1 p.m., June to September. Close 6 p.m. except Saturday. Standard time.

NEW HAMBURG.—Wednesday holiday from 12.30 p.m. May to August. Close 6 p.m. except Saturday Standard time.

NEWMARKET.—Wednesday half holiday from 12 noon, May to September inclusive. Close 6 p.m., except Saturday. Standard time.

NIAGARA-ON-THE-LAKE. — Wednesday holiday from 1 p.m. June to September. Daylight saving to October 1.

NAPANEE.—Wednesday half holiday from 12 o'clock from June 15 to August 30. Close 6 p.m. except Saturday. Standard time.

OAKVILLE. — Wednesday half holiday, April to August inclusive. No early closing. Daylight saving till September.

ORANGEVILLE. — Wednesday holiday from 12 noon May to September. Close 6 p.m. except Saturday. Standard time.

ORILLIA. — Wednesday holiday from 12 noon, May to October 1. Close 6 p.m., except Saturday. Standard time.

OSHAWA.—Wednesday holiday from 1 p.m. June to August. Close 6.30 except Saturday. Standard time.

OTTAWA.—Saturday half holiday from 1 p.m. during July and August. Close 6 p.m. Daylight saving May 1 to October 1.

PALMERSTON.—Wednesday half holiday from 12.30 p.m., May to September inclusive. Close 6 p.m., except Saturday. Standard time.

PETROLIA.—Wednesday half holiday from 12 noon from June to September inclusive, 6 p.m. closing, except Saturday

Hardware and Metal

Canada's National Hardware Weekly

Member Audit Bureau of Circulations Member Associated Business Papers

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

THE National Association of Purchasing Agents is behind a movement to make a contract sure—a thing that cannot be called off and discarded at the whim of the should-be purchaser. If they can root this sow thistle out of our industrial garden more power to them.

* * *

MERCHANTS in some farming communities are inclined to over-estimate the effect on Canadian farmers of the emergency tariff legislation enacted by the United States. It must be remembered that over eighty per cent. of our dairy products are exported to countries other than the United States.

* * *

TWENTY THOUSAND Farmer's Accounts Books have been supplied to Canadian farmers by the Commission of Conservation for the purpose of keeping records of farm accounts. This is evidence of greater business efficiency on the part of farmers and it should indirectly improve retail trade conditions in rural districts.

* * *

LIQUOR is not hardware, but on more than one occasion recently, when it is hard to get the "strong stuff," it is sometimes shipped as hardware. A few days ago License Inspector Taber in Kingston confiscated fourteen cases of whiskey which had been consigned as hardware to a merchant of Gananoque, and belonging to Watertown, N.Y. The merchant, not a hardwareman, was arrested.

* * *

THE TRANSPORTATION building at the Toronto Exhibition bears the sign of a few years ago: "Transportation—Water, Rail and Road." This year the whole building is given over to automobiles and another building is required for the truck display — such has been the expansion of the automotive industry.

IGNORANCE OF MINOR OFFICIALS

IT is quite an average thing to find some merchants who cannot figure out their responsibility under the Government's tax legislation, but it is a sad commentary on the legislation that local collector of Customs and Inland Revenue do not in many cases fully understand the law themselves.

In connection with the much debated case of the responsibility of the tinsmith, it has clearly been set forth in Hardware and Metal on numerous occasions that the tinsmith who makes up articles sold directly to the customer is not liable as a manufacturer. Some merchants, acting upon this advice, have been informed by local collectors that they are mistaken, that they are manufacturers and should take out license as such and make returns of sales tax collected on such goods as is "manufactured." One collector recently attempted to define the law himself, interpreting it as classing a tinsmith as one who does nothing but repair work and soldering, while classing a sheet metal worker who does furnace work, makes up eavetrough, etc., as a manufacturer.

This ruling is erroneous and the correct ruling stands as outlined in Hardware and Metal, namely that any tinsmith who makes up articles for sale directly to customers is, for purposes of tax legislation, a retailer.

In order to clear up this matter a definite ruling has been secured by Hardware and Metal direct from the Deputy Minister of Customs and Inland Revenue, as outlined elsewhere in this issue. This official points out that if there is any dispute tinsmiths may write the words "abandoned" on the tax papers and return them to the department. The ruling of local collectors is not final so that if the tinsmith has good case and believes himself to be a retailer under the act he need not be scared into taking out a manufacturer's license by any local official, but take no action except to refer the matter to higher authority.

THE FUTURE OF PRICES

EVERYONE is interested in the probable course of prices in the near future. For some years prices have been a very interesting feature, since the rapid rise to unprecedented levels during the war years and the steady decline has been a gradual readjustment to lower price levels, and evident since the armistice was signed. The recent trend interest in the probable course of prices is heightened by predictions from some quarters that the process will not be completed until pre-war levels are returned.

In this issue of Hardware and Metal are some further interesting views on this topic. A prominent wholesaler and banking official is of the opinion that in basic iron and steel commodities pre-war prices will return, the process of returning to be largely governed by the extent of the discomforts of the readjustment period. Already prices on dairy and some agricultural products are down to 1914 levels or below, but the manufactured products have been maintained chiefly on account of high overhead costs, labor costs and freight rates. The present condition of decreased production is not conducive to lower prices as costs are raised as result. Plant extensions were made in many cases during the recent active periods and this all results in a higher rate of overhead. It is expected that this condition may be offset to some extent by the perfection of industrial processes which may lower costs without necessarily lowering the wages of labor. Of course labor costs will also reduce as the period of readjustment progresses, but no one wants the acute condition likely to result from a sudden drop in labor's earnings while the expenses of the laboring man are still as high as at present. One of the most serious impediments to lower labor costs at present is high rentals and it is unlikely that this condition will improve until the housing shortage is relieved, and until the building industry is again encouraged as a means of profitable investment. Landlords will not be inclined to lower rents as long as conditions prevail under which they could just as as well withdraw their investment from building properties and place it to as good advantage in gilt-edged securities paying good returns, as at the present time.

Recent tax and tariff legislation was thought, by this official, to be a further hamper to imports and therefore to trade generally at this time. While this and other factors tend to restrict trade and to maintain high production costs, it was thought that the other factors which will operate naturally, will tend to continue the process of readjustment until price levels of 1914 are again returned.

Events in the Trade

BUSINESS CHANGES

Walter Screaton who has for a number of years represented McClary Mfg. Co. on territory out of London, is resigning to go into business for himself, having purchased the hardware business of Mr. Adolph, of Listowel, Ont. This change will not actually go into effect until the 1st of September, and the name of Mr. Screaton's successor has not yet been announced.

FIRE LOSS

Montreal.—J. & P. Danignon, hardware and stoves, suffered fire loss.

PERSONAL

Lloyd E. Jennings, president the Crescent Co., Meriden, Conn., has been spending a few days visiting Campbell Agencies, Toronto, who represent Crescent Co., in Canada.

COLT COMPANY'S NEW PRESIDENT

Samuel M. Stone, for sixteen years with the Colt's Patent Fire Arms Manufacturing Company, has been elected head of this organization. At a meeting of the board of directors, Col. William C. Skinner, expressed his wish to be relieved of the details encumbent upon the duties of president, after having been in the business harness for more than forty years, and upon Mr. Stone was conferred the well-merited honor. Colonel Skinner will still remain actively engaged in the larger affairs of the company as chairman of the board of directors.

Mr. Stone came to the Colt Company sixteen years ago as a salesman, after being a buyer for the Simmons Hardware Company of St. Louis, Mo., for about fifteen years. Two years later Mr. Stone was made sales manager of the Colt Company and in 1912 was elected vice-president. Mr. Stone received his first business experience in the retail hardware store of Stone Brothers, his uncles. Mr. Stone worked in the store for three years. Mr. Stone's first official act was to appoint Dwight G. Phelps, sales manager. Mr. Phelps came to the Colt Company in 1902.

SPURIOUS "GILLETTE" RAZOR BLADES

Details of the case arising from the unauthorized use of the name "Gillette" on certain razor blades manufactured in Germany are outlined by the Ironmonger as follows:

"The facts brought to light by the prosecution were admitted so far as the character of the blades was concerned, and they suggested that Graetz was known to be sending to this country cutlery marked "Sheffield." The blades in question were packed in dozens, as are the genuine blades, in cartons identical with those used by the Gillette Co. at their factories in Boston, U.S.A., and Montreal (Canada), except that the German carton is stitched and the American is not. Again, the printing looked somewhat different from the original, although the photograph and signature of Mr. Gillette appeared in the same manner as on the genuine article. Intentionally or otherwise, there was, however, a slip in the inscription, "Known all over the world," which Messrs. Gillette adopt, the German imposter having used the word "ower" for "over."

"Witnesses for the Gillette Safety Razor (Lim.), of London, an English company formed for selling the American company's goods in Great Britain and on the Continent, said that a good many spurious blades were now on the market, and were doing the company considerable harm.

"The present price of 'Gillette' blades in this country was stated to be 60m. per dozen, with a trade discount of 40 per cent. on orders of 1,000 dozen packets and upwards—about 5s. at the present rate of exchange ,against the 12m., or 1s., at which these spurious ones were to be sold."

Merchants In Lindsay Adopt Union Delivery

A union delivery system is being used by a majority of the grocers and dry goods merchants of Lindsay, Ont.

A five-wagon service is being operated by Kennedy Bros. and four deliveries per day are given in all parts of the town with five on Saturdays. Every wagon has a certain route to cover, and the goods are all collected by each man before he commences delivery. The goods are then placed in route order and taken as they come irrespective of the merchant from whom they were bought.

This service costs each merchant about the amount which would be required to pay a delivery man's salary.

The system is working very satisfactorily.

Objects to Present Administration

C. A. Macpherson, President McKelvey & Birch, Ltd., Kingston, Ont., Speaks of Business

KINGSTON, Ont.—Speaking of business conditions and means toward improvement, C. A. Macpherson, president McKelvey & Birch, Ltd., hardware merchants, stated to Hardware and Metal that the people must send men to Ottawa to govern directly, not by commission or bureau. It is his opinion that the policy of the federal governments, and provincial, in regard to gratuities, bonuses and artificially-made work such as road building, etc., for sound and healthy returned men, has caused great hardships to employers and interfered with the ordinary good intentions of a large proportion of workers. He states that not only did the gratuities serve to keep men away from work by lending the impression that they could continue to depend on getting something without any present effort, but the road work, besid- sequent higher prices, served to create a thus restricting production with its con- scarcity of general labor for ordinary prosecution were admitted so far as the es denuding the farms of their help and pursuits and also a feeling of unwhole- about an almost entire lack of control among employees at work as well as affecting the quality and amount of work performed.

The Excess Profits Tax (now fortunately repealed) has been a cause of extravagance with a tendency to dishonesty to oneself through the often-expressed excuse:"We may as well create this office or that, or incur that or the other expense, for if profits are allowed to grow unduly, the tax office will take them away."

Pending possible improvement, Mr. Mcpherson offers the following: "We believe that much work awaits the return of confidence and courage to the people. The enforced liquidation of merchandise through restriction of credits has caused declines in prices of practically all lines of materials. This had induced the very reasonable expectation of a drop in wages, on the part of the public, also that much is being held up awaiting not only lower costs, but more particularly a confidence that "near bottom prices" for this year, at least, have been reached.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

WOODWORKERS' VISES

Mitchell & Co., Ingersoll, Ont.—Would you forward us the names and addresses of makers of woodworkers' vises?

Answer—The Jas. Smart Mfg. Co., Brockville, Ont.; The Stevens Co., Ltd., Galt, Ont.; The Canadian Blower & Forge Co., Ltd., Kitchener, Ont.; The Katie Foundry, Galt, Ont.; The National Machinery & Supply Co., Ltd., Hamilton, Ont.; The Richards-Wilcox Co., Ltd., London, Ont.

GLASS DASH CHURNS

Foster Hardware Co., Orono, Ont.—Would you kindly forward us the address of makers of crockery and glass dash churns?

Answer—The Belleville Pottery Co., of Belleville, Ont.

CANADIAN SOAPSTONES

A. E. McPhail, Renfrew, Ont.—Can you inform me where I can procure soapstones in Canada?

Answer—These can be secured from the Hamilton Facing Mill Co., Hamilton, Ont.

ELECTRIC CURLING IRONS

Collingwood Hardware Co., Collingwood, Ont.—Please advise where electric curling irons are made.

Answer—These are made by the Canadian Edison Appliance Company, Stratford, Ont.

LEE-ENFIELD RIFLES

J. B. Crawford Estate, General Merchants Dutton, Ont.—Will you be kind enough to give us the address of the makers of the Lee-Enfield rifle?

Answer—This rifle is of British manufacture and the original makers are: Royal Small Arms Factory, Enfield Lock, Ponders End, Middlesex, England.

PLAYTIME WASHING MACHINES

Hickling Bros., Delhi, Ont.—Will you please tell us the name and address of the company manufacturing the Playtime Washing Machine?

Answer—The Dowswell-Lees & Co., Hamilton, Ont.

CLIPPETTE LAWN MOWER

Madole Hardware Co., Napanee, Ont.—Please advise whether or not the makers of the Clippette Lawn Mower have a branch in Canada.

Answer—This company is not represented in Canada. The mower is made by the Southern Electro Steel Co., Inc., Lynchburg-Virginia.

Trade Enquiries

Names and addresses of enquirers can be obtained only by those interested in such lines upon application to Hardware and Metal. Please quote reference number when requiring addresses.

2857. **Electrical supplies.**—A Manchester firm would like to hear from any Canadian manufacturers of electrical goods (specialties in particular) likely to be saleable in the United Kingdom.

2856. **Belt dressing.**—A Manchester firm wish to place on the Canadian market a new solid non-slip belt dressing, and are prepared to appoint agents in Montreal, Toronto, Winnipeg, and Vancouver.

2866. **Vises.**—The administrator of the of the South African provinces desires to secure from Canadian manufacturers of woodwork vises (instantaneous grip) and metalwork bench vises samples or catalogue illustrations, together with prices f.o.b. Atlantic ports. Replies to give the fullest information as to packing and delivery.

2871. **General agency.**—A firm of manufacturers' agents with head office in Demerara, British Guiana, and who cover the whole of the West Indies, are quite familiar with the trade in these islands, and are in a position to give good references, desire to secure Canadian connections on a large scale in hardware.

3042. **Water-closet seats.**—A Liverpool firm are in the market for 50,000 water-closet seats, single and double. Full particulars with samples asked for.

2914-2915. **Trade with Jugo-Slavia.**—Two important firms in Dubrovnik, Dalmatia, would be interested to hear from Canadian exporters desirous of developing trade with that market.

3045. **Broom handles.**—A Liverpool firm ask for quotations on broom handles, 48 inches by 1⅛ inch by 1¼ inch, in 200 gross lots.

3054. The Municipal Council of Johannesburg, South Africa, are in the market for 15,000 feet of 4-inch black wrought iron piping and 100 4-inch sluice valves, required in connection with same. Specifications, conditions of contract, and particulars of special conditions may be seen on personal application to Room 175, West Block, Ottawa (file No. 21011).

3056. **Pumps.**—One of the best-known firms of South African engineers and mining material merchants, with headquarters in Johannesburg, desire to negotiate with a Canadian manufacturing house specializing in centrifugal pumps, for their South African agency. Catalogues, prices f.o.b. Canadian Atlantic ports, and full particulars as to agency plans desired with first letter.

3061. **Hollow-ware.**—A South African firm of commission agents, with headquarters at Cape Town, desire to represent Canadian manufacturers of galvanized hollow-ware and cast-iron hollow-ware. Particulars as to prices f.o.b. Canadian Atlantic ports, quantities and packing, etc., together with agency terms, desired by first letter.

Catalogs and Booklets

A review of new catalogs, etc., as published by manufacturers, wholesalers and others in the trade for the information of hardware dealers.

CANADA STEEL DAMPERS

The Myers Manufacturing Co., of Dresden, Ont., are distributing to the trade a 4-page folder illustrating their new Canada line of steel dampers. Various sizes for stoves and furnaces of all kinds are being produced and marketed.

NEW MARBLE'S CATALOG

Marble Arms & Mfg. Co., Gladstone, Michigan, have just issued a new consumer catalog. In it Marble's outing equipment is illustrated and described and list prices given. The dealer's name is imprinted on the covers and copies are mailed to prospects. All that is required of the dealer is that he furnish a list of outdoor men who are interested in Marble's outing equipment.

KITCHEN EQUIPMENT

A new catalog covering various lines of standard kitchen equipment has recently been issued by the Josiah Anstice & Co., Inc., of Rochester, N.Y. The booklet illustrates the different "Sterling" products designed especially for hotels, restaurants, cafeterias, institutions and clubs. These include peeling machines, mashers, fruit pressers and slicers, of both power and hand designs and adaptable to various kinds of vegetables. The Josiah Anstice Co., Inc., are successors to the N. R. Streeter & Co.

SMOOTH-ON INSTRUCTION BOOK. No. 18

A pocket booklet, 4-inch by 6-inch and containing 144 pages of useful information and instruction on the uses of Smooth-On, has been issued by the Smooth-On Mfg. Co., Jersey City, N.J. Smooth-On is put up in 7 different forms for various purposes and the makers also manufacture an iron concrete paint and a Smooth-On coated corrugated iron gasket.

The book is profusely illustrated showing actual repairs done by Smooth-On in mending leaks and breaks in machinery, castings and a wide variety of articles.

Smooth-On is also put up in household packages and many handy uses for it round the house are shown. Another form is made for the use of motorists and garage men. For plumbers and steam fitters numerous cases are shown and illustrated where Smooth-On can be used for stopping leaks in radiators, pipe joints, furnace castings, etc.

SIMPLEX ROOF FLASHINGS

A booklet on "Simplex" galvanized iron, copper and all lead flashings has been issued by the Simplex Mfg. Co., Chicago, Ill., and can be obtained from their agents, W. H. Cunningham & Co., 269 West Richmond St., Toronto, Ont. Simplicity, durability and efficiency are claimed for this flashing, which consists of only three parts—the flange plate or base—the cone shaped sleeve—and a pure lead collar. It is stated that these flashings will fit any angle of roof from 50 degrees to flat, and there is no need to stock different angles to conform to various pitches. This means a saving and economy in stock. Simplex flashings are guaranteed to perform every service for which they are made.

A NEW STANLEY SCREEN HARDWARE BOOK

A new booklet devoted to screen door and window hardware has just been issued by the Stanley Works, New Britain, Conn., and the variety of design and finishes in screen door hardware is a revelation to anyone who unthinkingly dismisses this as consisting of a pair of hinges, with screws, a pull and hook and eye.

In window screen hardware simplicity and strength are said to be the points aimed at in designing and manufacturing these lines, and the various hangers though small are constructed so that considerable weight can be carried without risk or danger of screens being blown off. Other lines listed in the book, which has 24 pages, 3 inches by 6 inches, are door and window catches, foot and chain bolts, screen couplings, handles or pulls, corner irons and brace sets.

STANLEY GARAGE HARDWARE SET

A new four-page folder illustrating the No. 1780 Garage hardware set, printed in two colors has just been issued by the Stanley Works, New Britain, Conn. This folder lists the quality garage hardware set manufactured for brick or concrete garages or where the doors require an offset.

This set includes the new cushion type of door holder No. 1773, also the large cremone bolt which fastens the door at top and bottom at one operation of a lever handle. The doors are swung on 12-inch and 36-inch ball bearing hinges. A copy of folder will gladly be sent to any readers interested.

THE NATIONAL PIPE AND CABLE HANGER

A folder illustrating the National pipe and cable hanger illustrates what is described as the only hanger handling pipe in assorted sizes, doing away with the necessity of carrying a stock of various sizes. The National hanger is claimed to be the only hanger with beam clamp requiring no tools to install. It is put up in compact rolls, and is made of soft steel. The makers are the National Pipe and Cable Hanger Co., 921 Melrose Ave., New York City, and the Canadian agents are W. H. Cunningham & Co., 269 W. Richmond St., Toronto, Ont., from whom folders and particulars can be obtained.

SPRAYING MACHINERY

A booklet has been published by the Canadian Potato Machinery Co., Ltd., Galt, Ont., illustrating and describing the sprayers made by this firm. The company specialize on two and four-row sprayers suitable for efficiently covering large areas in short time as well as making tank sprayers that can be carried on a man's back and are more suited for limited areas. The advantages of effective spraying are fully described and illustrated and copies of the booklet may be had on application.

News of Western Canada

British Columbia R.M.A. Convention to Be Held in Duncan

Vancouver (Special).—The British Columbia branch of the Retail Merchants' Association of Canada have accepted the invitation of the Duncan branch to hold the provincial 1921 convention at Duncan, B.C.

Duncan is a delightful town of 1,200 people on the Esquimalt and Nanaimo Railway, forty miles north of Victoria. It is said to enjoy the most equable climate of all Vancouver Island. Situated on the Cowichan River, a sportsman's paradise surrounds it—one mile to Somenos Lake, two miles to Quamichan Lake and only eighteen to Cowichan Lake. Fishing in these waters is a matter of international fame. The surrounding territory tributary to Duncan boasts of mining, lumbering, farming and dairying as well as extensive fruit growing.

The convention will be held in August or September.

WESTERN NOTES

Frintosh, Alta.—L. F. Sherrin has sold his hardware business.

* * *

Regina, Sask.—McKenzie Hardware Co. has taken over the business formerly known as C. T. Laird Hardware.

* * *

Pearson Bros. have purchased the harness and saddlery business recently carried on by John Luft, Carstairs, Alta. Stock is being taken at present and Mr. Luft intends going to Calgary as soon as the business transaction is adjusted.

* * *

J.D. McPherson, of the firm of McPherson and Hanley who have conducted the hardware businesses in Medicine Hat, Vulcan and Red Deer, Alta., spent a few days recently in Drumheller, Alta., looking after their interests in connection with the Cumming Hardware Company of Drumheller which they recently purchased. Mr. McPherson plans to take possession of the new store about June 1st.

* * *

Mr. J. Micholsky is building an addition to his store at Colemand, Alberta, and plans to carry a stock of hardware.

* * *

The interior of Standish and Son's hardware store, Banff, Alberta, has been remodelled and will compare favorably with other hardware stores in the West.

* * *

Loftus H. Allen, Bowden, Alberta, who recently purchased the hardware business of Bernard and Christie at Bowden, is having the store completely renovated and new stock is arriving daily. The business will be run under the management of Ralph Hamilton, who was formerly manager of Wilkinson's hardware at Alds, Alberta.

* * *

The C. H. Horsley hardware store at Castor, Alberta, has just received a coat of paint, which has added much to the appearance of the building.

* * *

Burglars recently entered the hardware store of Graham and McAfee, Viking, and lifted some articles from the store. Entrance was made through one of the back windows; the cash drawer was rifled, the safe door was opened but the second steel door was not tampered with. No clue of the burglars has been found.

* * *

It is reported that the Wilkinson hardware store at Jenner, Alberta, which was recently destroyed by fire, will be rebuilt.

* * *

J. H. Lingjerde, Morrin, Alta., has started on his furniture and hardware store.

* * *

L. F. Sherrin, of Ferintosh, Alberta, has recently sold his hardware store.

Saskatoon Has A Successful Campaign

Saskatoon recently concluded a novel campaign in the interests of better business for the whole city. It was the result of a splendid spirit of co-operation between the merchants of the city, including every branch, and even taking in theatres, hotels, restaurants, etc. It was a city movement, and the name of the campaign was "More than usual courtesy to out-of-town customers."

In writing of this campaign, J. B. Malette, sales promotion manager of F. R. MacMillan, Ltd., of that city, is most enthusiastic regarding the results of the campaign not only to their own store but to the entire city business.

"The campaign was a whirlwind success," he writes, "from every angle—shopkeeper, clerk, theatre owner, restaurateur, hotel proprietor, etc. We placarded the city with the mystic words, 'Treat 'em right.' We shot it on slides in the movies, ran it in every advertiser's copy, scare-headed it across eight columns in the press, pasted stickers on all autos, cards in all elevators and store windows, and even sent personally signed letters to every clerk in the city. Then there were addresses to the Rotary Club, the Kiwanis Club, and the campaign ended in a blaze of glory at the Chamber of Commerce Forum meeting, when the entire subject came up for debate.

"We are now about to launch the second stage of this campaign—'Bringing in the out-of-town guest once a month.' We're going to entertain him, give him special railway rates, sporting events, good shows, and special hotel and restaurant rates. We know if we 'treat 'em right' in ways like this that local retailers will reap the reward."

A Good Plan

"Don't you think it a good plan?" aska Mr. Malette of Hardware & Metal. Assuredly we do. It is one of those co-operative plans that engenders pride in one's own city, convinces the consumer that there isn't a better or more economical place under the sun to do one's shopping in than in one's own home town, and in so doing, increases the business of every retail merchant in the city. The centralization of business in large centres of population is a monument to the lack of co-operation on the part of retail merchants in their respective communities. If there were hundreds of campaigns such as the ones being conducted in Saskatoon, there would be more progressive towns and cities throughout the length and breadth of the Dominion.

NEW VALVE CATALOGS

The Penberthy Injector Company, of Windsor, Ont., have recently issued catalogs covering their new lines in manufactured brass goods. Catalog No. 26C includes descriptions of the new hydraulic vacuum generator, also the steam and hot water valves, as well as covering injectors, brass valves, air cocks, lubricators, oil and grease cups, water gauges and gauge cocks. Catalog No. 25-V illustrates chiefly brass valves of the Radio, Compodisk, and regrinding types. Another useful little booklet covering steam and hot water radiator valves is also ready for distribution.

To Advertisers, and Readers of Hardware and Metal

It is common knowledge that the union printers in many towns and cities in Canada and the United States are on strike. For the first time in its 35 years history The MacLean Publishing Company is involved and we believe you will be interested in receiving a statement as to what the printer's unions are striking for and why their demands cannot be granted.

A year ago (although the wage agreement at that time had over a year to run) the Toronto Publishers and Master Printers gave their employees voluntarily a 10% advance in wages, making the minimum wage $35.20 for a 48-hour week. This was given in recognition of the fact that living costs were then advancing. This voluntary agreement for $35.20 a week expired June 1st. Notwithstanding that the cost of living has declined 22% since March 1920, the printers' union demanded a 44 Hour week and a wage of $44.00. This means four hours per week less work and an increase in rate of pay per hour of over 33%. Employing printers can grant neither shorter hours nor higher wages and the saner printers realize that their union's demands are unreasonable. A large percentage of our own men did not want a strike, but the union leaders in the United States have ordered it and the strike is on.

Negotiations have been carried on for months. The employing printers have been tireless in their efforts to bring about a settlement without a strike. They are now engaged in a fight, not only for their existence but for a principle in which every business man is interested. If the unions secure their unreasonable demands then the fight would surely be carried to other industries. Business men with whom we have discussed the matter have been most emphatic in urging us to take a most determined stand. "Stay with it and we'll stand with you", they say.

And so we shall "carry on". We shall be somewhat handicapped, especially at first there may be occasions when you can extend your co-operation and support and we feel that we can count on you. It is our intention to issue our publications regularly and as promptly as possible. There will be difficulties to be overcome, and for a short term our service may not be up to its usual high standard. If, therefore, your publication does not reach you on time, if we have to repeat a former advertisement, if proofs are not submitted, or if we fall short of full efficiency in any way, we ask your kind indulgence. We are fighting for greater efficiency at a critical juncture in the world's history, and your co-operation and moral support will help.

Refrigerators in Good Demand

BOOKINGS for this season were practically nil on refrigerators, but we have found the seasonable demand good and quite up to expectations. Although the season is now well over as far as we, as manufacturers, are concerned, reports from dealers throughout the country state they are now in the midst of the busy season, with sales very favorable," said A. L. Telfer, vice-president J. H. Hanson Co., Ltd., manufacturers and jobbers of refrigerators and other wooden household articles, to Hardware and Metal.

Lawn Chairs and Boys' Wagons Sell

"In the smaller sundry household articles we sell, a steady movement is noted; lawn chairs are now selling as actively as refrigerators did a month or so ago, the season now coming to hand. Boys' wagons have proven again this year a very profitable line, the sale of these increasing each season," continued Mr. Telfer.

"Prices on practically all our lines have been maintained at quotations of last year. In the case of refrigerators, lumber, hardware and galvanized iron used in their manufacture was bought last January, when prices were high on these materials. Although lumber was down theoretically, the buying price when going on the market for purchasing had been fully maintained until recently, when a reduction has been made generally. This applies to all other lines we handle, wood being the material used in a great number of our articles.

Next Year's Prices Expected Lower

"While the future is always more or less uncertain, we do anticipate lower prices on refrigerators for next season, if present indications remain. Lumber, galvanized iron and hardware have dropped and labor is being adjusted, and with these being the principal factors, we believe that ruling prices will have dropped before next season's demand opens."

Letters to the Editor

Communications expressing the opinions of subscribers concerning matters of interest to the trade.

CO-OPERATIVE UNION OF CANADA

The Editor,
Hardware and Metal.

An article appeared recently in the correspondence columns of the press, written by the Co-operative Union of Canada, in which they make some statements which reflect unfairly on the retail trade of Canada and which are absolutely untrue, and, for the protection of consumers to whom they are endeavoring to promote and sell stock in co-operative societies in Canada, we believe that a reply to their statements should be made public.

The meeting of manufacturers, wholesalers and retailers, which was held in Toronto on March 30th and 31st, for the purpose of arriving at some system of taxation which would be the least objectionable to those who paid the largest portion of taxation, and who are the largest consumers, was not called, as stated by them, either by the Rt. Hon. Arthur Meighen, Premier of the Dominion of Canada, or by the Hon. Sir Henry Drayton, Minister of Finance, or any other department of the Government or their officials. The meeting was a genuine co-operative one in which all present agreed to participate and its doors were open for anyone to enter and its proceedings were reported in the press by the press representatives who were present. There was nothing to hide and nothing to conceal. If the public had wished to attend it would have been welcome, as all retail merchants are the servants of consumers.

Their attempt to show that retail merchants as well as manufacturers and wholesalers are overcharging the public is false and deceptive in every line and if space in your columns would permit we could easily show that the motive that lies behind every effort made by the promoters of these so-called co-operative societies in Canada and the United States, as well as in Europe, is to make every attempt to discredit the methods of honest, legitimate retail merchants, for the purpose of endeavoring to sell stock to the public in these co-operative societies and to secure, if possible, the trade of the public for themselves. Their attempt to make the public believe that their business methods are the only correct ones and to endeavor to throw a cloak of "religion and moral uplift" around their deceptive cause is a slander on the God-fearing men and women of Canada. It is a slander on honest retail merchants and an unfair insinuation on every honest advertisement that appears in the daily, weekly or monthly press of Canada.

If the statements made by the promoters of these wrongly named co-operative concerns are correct, then every retail merchant in the United States and in Canada and throughout Europe is a party to deceiving and overcharging the public and the newspaper press is aiding and abetting them in their deception. All intelligent persons who are familiar with the underlying principles of merchandising understand the scheme that is behind these so-called co-operative societies—which are considered neither "fish nor fowl" in the commercial world—and the very fact that retail stores in all lines of retail trade in every country in the world are still in the field advertising and doing business "at the old stand" is good evidence that the basis upon which they are established is a necessary and a sound one.

Retail merchants have been trained to expect competition in every line of business and they have no fear of it; the only attempted competition they dislike is the one which endeavors to secure the trade of the public by false and deceptive methods.

The Retail Merchants' Association of Canada, which is comprised of retail merchants who are opposed to false methods of trading, is formed for the purpose of protecting the retail trade and the public against all unfair methods of trading and consequently co-operative society promoters are plainly told that if they make any false or misleading statements in order to sell stock in these societies, they will be publicly exposed by us.

Thanking you for allowing us to partially present our side of the case,

We remain,
Yours sincerely,
E. M. TROWERN,
Secretary, Dominion Executive Council and Dominion Board, Ottawa, Canada.

Editor Hardware and Metal
Toronto.

Dear Sir:

This is a real May day and one should certainly be glad we are in Canada with as bright a future ahead of us, we Canadians, providing we all work together and try to stamp out all that is evil and unclean. We certainly are proud of Old Ontario the way they handled the vote on April 18th.

Your valuable paper is an education every week to all the hardware trade..

One will read to-day in every newspaper, magazine and family journal, to boost, not to knock, but there is a difference between boosting and a real kick.

Well! Here are a couple of kicks. Your paper along with other magazines asks Canadians to buy in Canada, keep the dollar at home, etc., etc., which is quite right, but a great many of the manufacturers, wholesalers and even retailers are to blame for the dollar going out of Canada.

One firm purchased the following goods "Made in Canada stamped all over them":

First.—Two dozen curling brooms, made in Winnipeg, by ———, which were not worth two for a nickle. We took this up with a very reputable sporting goods house for a credit note or a fair adjustment. Could we get a dollar? Not a cent.

Second.—A saddlery firm well known in the West sold to us a large consignment of harness and for which they were paid. One set of harness went all to pieces and this is what they said: "Sorry, but this set was not guaranteed, etc., etc."

Thirdly.—We have purchased graniteware that will not stand looking at before the enamel drops off.

We could enumerate numerous other cases where our Canadian manufacturers, selling Made in Canada goods, are driving the retail merchant, as soon as the time is opportune to buy, where he can secure 100 cents for a dollar.

Mr. Editor, I can produce the correspondence for above defective articles any time you want them.

I read in a recent issue in your magazine that "the retailer was at last being recognized." It is pretty near time that they were and those that are not in the Retail Merchants' Association should not lose one day before sending in their money and helping along their executive officers to see that our legitimate rights are recognized.

Yours truly,
L. C. Porteous,
Grand Prairie, Alta.

STERLING FOOD CHOPPERS

F. W. Inman, Dundas, Ont.—Kindly advise us where we can purchase Sterling food choppers?

Answer—The N. B. Streeter Co. at one time manufactured the Sterling food chopper. This firm has now been succeeded by the Josiah Anstice & Co., Inc., of Rochester, New York, and this company has in turn advised us that the manufacture of the Sterling chopper was some time ago turned over to the Colebrookdale Iron Company.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

PRICE reductions continue to be a feature of the hardware markets. Among the declines noted this week is a 15 per cent drop in prices on shovels, scoops and spades. Some lubricating and cylinder oils have lower quotations. Cross-cut saws are on a slightly reduced basis, and reductions are also evident on globe and check valves, and steel gas tubing. Range boiler prices continue unsettled with a lower list at present in effect, but a readjustment is looked for. Another advance of ten cents per gallon is noted in the price of linseed oil.

Other primary markets are maintained at previous levels. There have been more inquiries for galvanized sheets, and a similar increased demand is evident for corrugated. Improved sales are reported on pipe fittings, and a better movement is noted in conductor pipe and eavetrough. Prices in iron and steel bars remain steady, and quotations on boiler tubes, lead and zinc products remain unchanged. Buying in scrap metals is still dull, and ingot metal prices are reactionary.

Collections are fairly good. A brisk movement continues in seasonable lines, with numerous small orders indicating that the policy of purchasing as the need arises is still being followed. Confidence in future business is increasing, but trade improvement is expected to be gradual.

Montreal Markets

MONTREAL, June 2—Changes this week in hardware markets are of some importance, the most important being a reduction on lubricating and cylinder oils. Coal oil and gasoline were also lowered the latter end of last week. Standard and the Emco line of globe and check valves have declined, standard now being quoted at 10 per cent off, and the Emco at 20 off. Trimo wrenches now sell at 37 1-2 per cent off list, this being a slight reduction, and both wooden and steel tackle blocks are reduced.

Prices Revised on Lubricating and Cylinder Oils

Montreal.

Through a revision in prices, many grades of lubricating and cylinder oils are now selling at lower quotations. Cylinder oils generally are affected more than others, but it will be remembered that quotations reached higher levels on the former oils in the period of price advancing. Following are dealer quotations on a few of the best selling grades:

PER GALLON IN BARREL LOTS

Castors Machine	0 47
Atlantic Red	0 48½
Imperial gas engine	0 61
Capital Cylinder	0 80
Less 15 per cent.	
Polarine kerosine tractor	1 50
Less 25 per cent.	

Trimo Wrenches 37 1-2 Off

Montreal.

Trimo wrenches are reduced in price, the discount being increased from 35 to 37 1-2 per cent off list prices. Following are new net quotations:

TRIMO WRENCHES

6 inch dozen	$15 40
8 inch	18 50
10 inch	22 80
12 inch	29 00
15 inch	38 00
18 inch	49 50

Gasoline and Coal Oil Lower

Montreal.

A reduction in the prices of both gasoline and coal oil was made at the close of last week. Gasoline was lowered one cent, coal oil 2 1-2 cents. Present prices are 36 cents for motor grade gasoline, and 21 1-2 cents for coal oil.

Tackle Blocks Reduced

Montreal.

Both wooden and steel tackle block prices have been revised, showing a slight reduction on all sizes. Following are present discounts:

TACKLE BLOCKS WOOD

7 and smaller	10%
Larger	7½

STEEL

7 and smaller	10%
Larger	5

Scrap Metal Business Dull

Montreal.

The prolonged dull period in scrap metals continues, the market remaining featureless insofar as any increased activity being shown. Prices on brass and copper waste have been reduced, due to slackness of demand. Yellow brass is lowered one-half cent, light brass one cent, and is now quoted at three cents. In copper, both light and heavy are now one-half cent lower.

Boiler plate and machinery cast also show reduced figures. Following are nominal quotations:

DEALERS' BUYING PRICES.

Automobile tires	0 75
Yellow brass	0 01½
Red brass	0 08½
Light brass	0 03
Scrap zinc	0 04
Lead, heavy	0 04½
Light copper	0 07
Lead, tea	0 02
Heavy copper	0 10
Wrought iron, R. Rd., No. 1, per gr. ton	10 50
Malleable scrap (ton)	10 50
Pipe scrap (ton)	6 50
Stove plate, per ton	14 50
Heavy melting steel	6 50
No. 2 busheling	4 00
Boiler plate	9 00
No. 1 machinery scrap per ton	20 00

Globe and Check Valves Reduced

Montreal.

The discounts on globe and check valves, both standard and the Emco lines have been reduced through change in discounts. In standard the new discount is 10 per cent off, formerly being 5 off; while the Emco line shows a reduction of about 12 per cent, and are now quoted less 20 per cent. Following are quotations on the different lines:

Bath cocks, compression	20%
Flatway stop and waste cocks, standard	40%
Roundway stop and waste cocks, standard	34%
Globe, angle and check valves, standard	10%
Jenkins globe	10%
Emco globe valves	20%
Emco check valves	20%

Toronto Markets

TORONTO, June 2—The downward trend of prices is still evident in the weekly quotations on many hardware lines. Among the recent important reductions are noted a 15 per cent drop in prices on spades, scoops and shovels, and a new nominal list of quotations at which range boilers are selling locally. Lubricating oils and steel gas tubing are also reduced, and cross-cut saws have been revised on a slightly reduced basis.

Lubricating Oils Reduced

Toronto.

Following on the price declines in gasoline and coal oil announced last week, some reductions in the quotations on lubricating oils are now shown. The new price changes vary; a lower level of 2 cents per gallon being evident on black oil, and a 5½-cent drop on cylinder oil being quoted. Machine oil is also reduced 2½ cents per gallon. The new list prices are included in the current market pages.

Lead and Zinc Product Prices Unchanged

Toronto.

No change in prices on lead and zinc products are reported this week. Locally, the current quotations are well maintained, with a slight improvement in business noticeable in some quarters. The firm tendency that previously existed on the primary markets has now eased considerably, but the fluctuation was not unexpected, and future recovery is anticipated. Bar solders are maintained at the recent higher prices, and following is the prevailing list:

LEAD AND ZINC GOODS

Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subject to a discount of	10%.
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb.	0 36½
Do., strictly, lb.	0 26
Do., commercial, lb.	0 24
Do., guaranteed, lb.	0 29
Do., wiping, lb.	0 24
Zinc sheets, per lb.	0 16

Ingot Prices Fluctuate

Toronto.

The general tone of ingot metals is dull and reactionary this week. Some slight fluctuations have been evident on the primary markets, but this has not been reflected to any extent in prices, and local quotations remain practically unchanged.

A range has developed in quotations on lead, but small orders continue in evidence, with the local prices unchanged. Other ingots are also reported as steady in price. Surplus accumulations are reported in spelter, and it is noted that antimony quotations are far below levels prevailing at this time last year.

Better Demand for Tires

Toronto.

Some dealers report a slight increase evident in sales of automobile tires and inner tubes, due to the recent price reductions announced last week in Hardware and Metal. The declines are generally expected to result in stimulating business activity, and it is further anticipated that a more satisfactory turnover in these products will be recorded in the future, as current quotations are on a lolwer basis than has prevailed for several years past.

Kange Boiler Prices Lower

Toronto.

Quotations on range boilers are still unsettled, and no adjustment with regard to recent price-cutting has been announced.

The following, however, is the nominal list now in effect on the local markets:

RANGE BOILERS

	Standard	Ex. Heavy
30 gallon	$ 9 00	$11 50
40 gallon	13 80	16 50
52 gallon	20 40	25 20
66 gallon	28 80	34 80
82 gallon	36 00	47 40
100 gallon	45 60	56 40
120 gallon	55 20	64 80
144 gallon	78 00	93 00

Note—Electric weld boilers, 30-gallon size, $8.50 each in half dozen lots, or more.

Steel Gas Tubing Reduced

Toronto.

Steel gas tubing, size 5-16 inches, is now selling at six cents per foot, without ends, and seven cents per foot with ends.

Saw Prices Revised

Toronto.

Slightly reduced prices are announced on cross-cut saws, and these are now selling at the following quotations:

Five foot, $5.50 each; 5 ft. 6 in., $6.25 each; and six foot size, $7.25 each.

Whisk Quotations Lower

Toronto.

A decline in prices on whisks is announced this week, the amount of the reductions varying from five to ten per cent on the different sizes and grades. Other brush and broom prices are being maintained at previous levels.

Better Demand For Corrugated Sheets

Toronto.

Seasonable improvement in market conditions on corrugated sheets is reported this week. Prices are maintained at recent levels, while dealers state that business is considerably brighter than it has been for some weeks past. Following is the current list:

CORRUGATED SHEETS—	Per 100 Sq. Ft.
No. 28 gauge	8 50
No. 26 gauge	9 25
No. 24 gauge	13 00
No. 22 gauge	16 00
No. 20 gauge	18 00
No. 18 gauge	24 00
Less 7½%.	

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

Tube Prices May Be Revised

Toronto.

Boiler tube prices at present show no change, and no improvement in demand has been noted. It is the impression in some quarters that further price revisions on boiler tubes will be announced in the near future.

BOILER TUBES—	Seamless.	Lapweld.
1 inch	$26 00	.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	$25 00
2 inch	29 25	22 00
2¼ inch	33 00	25 00
2½ inch	41 75	27 00
3 inch	49 25	35 00
3½ inch	63 50	40 00
4 inch	85 00	50 25

More Inquiries for Galvanized Sheets

Toronto.

The market tendency on sheets and plates is reported to be showing some signs of improvement. There has been an increase noted in the number of inquiries.

Following are the current quotations:

PLATES

10 gauge	from $5 00	to $6 00
12 gauge	5 05	6 05
14 gauge	5 10	6 10
16 gauge	5 20	6 20

BLACK SHEETS

14 gauge	5 10	to 6 10
16 gauge	5 20	6 20
18-20 gauge	5 75	6 75
22-24 gauge	5 80	6 80
26 gauge	5 85	6 85
28 gauge	6 00	7 00

Prices shown are for full cases. An extra charge of from 25c per 00 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 36 in. wide.

GALVANIZED SHEETS

Premier and Apollo		
10¾ oz.	8 40	to 9 40
U. S. 28	8 00	9 00
U. S. 26	7 90	8 90
22 and 24	7 75	8 75

An extra 40c per 100 lbs. is charged for Keystone brand copper bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is from 20c to 30c per 100 pounds. Other gauges show no change for widths of this size, but in some cases there is a further extra for four ft. widths on all gauges.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Small Buying in Scrap Metals

Toronto.

Consumers of waste and other raw materials seem content to go on purchasing in hand-to-mouth tonnages, even at present low prices. Dealers are of the opinion that the trend will be steadily towards improvement from now on, but it is expected that some time will elapse before productive activities are at a normal rate. Prices have been holding firmly.

In the scrap iron market there has been no change to speak of. The situation has been dull, with consumers holding off. Cast iron scrap is about the most active, but the total turnover is small. Prices are nominally unchanged.

Non-ferrous scrap has not been sought actively, and only small lots have changed hands. Copper scrap displays a stronger tone, but real confidence in the market seems lacking and higher prices have not been offered. White metals have been quieter. Nominal quotations for fairly large quantities follow:

WASTE MATERIAL

No. 2 busheling	....	**$13 00**
Stove plate, per ton	15 00	16 00
Yellow brass	6 50	7 50
Red Brass	....	10 00

Light brass	4 00	4 50
R.Rd. wrought iron, No. 1,gr. ton	11 00	12 00
Scrap Pipe	7 00	8 00
Heavy lead	4 50	5 00
Old rubber boots and shoes	2 75	3 25
Overseas lumbermen's rub. boots	1 75	2 25
Auto tires	0 50	1 00
Tea lead	2 25	1 25
Solid tires	0 75	1 25

Shovel Prices Reduced

Toronto.

A reduction of approximately 15 per cent is announced in prices on spades, shovels and scoops. A change in the discount brings the revised current quotations from 35 per cent off list to 45 per cent off.

Iron and Steel Prices Remain Unchanged

Toronto.

Prices on iron and steel are being maintained at previous levels, and no change has been reported in local conditions. The tendency among the local dealers to cut prices has now been eliminated, and no further price revisions are expected until declines are experienced in the Pittsburg iron markets.

Foreign reports on the steel trade hold that the most favorable piece of news as to the future prospects of this industry that has come out for many weeks was the recent announcement that a reduction in railroad wage schedules is justified by present conditions.

Nominal quotations remain locally as follows:

STEEL AND IRON

Mild steel, 3-16 in.	....	4 50
Do., ¼ in. and heavier	....	4 00
Bar iron, 3-16 in.	....	4 50
Do., ¼ in. and heavier	....	3 75
Angle base	....	4 00
Horseshoe iron	....	4 10

Mining drill steel	....	23 00
Cast tool steel	....	20 00
Sleigh shoe steel	4 10	4 50
Norway iron	....	15 00
Toe caulk iron	5 40	6 40
Hoop steel	....	6 00

London Markets

LONDON, June 2—Prices for hardware lines generally remain firm this week, the number of revisions listed being very small. Among the few minor declines noted are globe, angle and check valves, cut lace leather, and a readjustment on Sands levels, showing slightly lower prices.

Business has recently been developing signs of improvement, and during the week is reported good. There is an active demand for all seasonable lines, and little surplus stock in these commodities is evident. Collections are stated to be fairly good.

Linseed Oil Quotations Remain Unchanged

London, Ont.

The recent increases in the price of linseed oil are well maintained, and in spite of the higher quotations, activity in sales is noted. No further price revisions are reported this week, and the prevailing list is as follows:

LINSEED OIL—	Raw	Boiled
1 to 2 barrels, per gal.	0 87	0 90
3 to 5 barrels, per gal.	0 86	0 89
6 to 9 barrels, per gal.	0 84	0 87

Less barrels, add 15 cents per gal.

Screen Cloth in Demand

London, Ont.

The seasonable demand for screen wire cloth still continues. Sales in small quantities are fairly numerous. Prices remain unchanged, and are as follows:

Painted black wire screen, $3.50 per 100 square feet.

Valve Prices Revised

London, Ont.

Globe, angle, and check valves are quoted at slightly lower prices this week. A revision in the discounts gives the new prices as follows: Standard, list less ten per cent; Jenkins pattern, list less 20 per cent.

Cut Lace Leather Reduced

London, Ont.

Some slight reduction in the current price of cut lace leather is announced. The revised quotation is now $2 per pound.

Turpentine Prices Hold

London, Ont.

Turpentine prices remain unchanged this week. A good demand is evident, in spite of the higher quotations, which prevail as follows:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 15
2 to 4 barrel lots	1 14
5 gallon lots	1 30

White Lead Steady

London, Ont.

Prices on white lead in oil continue unchanged, and the strong market tone is still maintained. The demand is seasonable and well sustained. Following are the current quotations:

WHITE LEAD IN OIL

	Tons	Less Tons
Pure, per 100 pounds	$14 95	15 30
Elephant, per 100 pounds	15 45	15 80

Rope Sales Improve

London, Ont.

Sales in rope and cordage continue to show gradual improvement, and the recent price advances are holding firm.

Dealers do not anticipate any marked activity for this season of the year, but the increases noted have resulted in stimulating business in this product.

Brisk Demand for Screens

London, Ont.

The seasonable demand for screen doors and windows, continues to result in numerous small orders. There has been no change in quotations on this line at present, and the following price list prevails:

SANDERSON HAROLD MAKE

Screen Doors

No. 1, grained only	$23 25
No. 2	28 00
No. 21, grained, filled and varnished	35 00
No. 3	38 00
No. 8	41 00
No. 9	46 15
No. 28	42 00

SCREEN WINDOWS

No. 1, $4.25 dozen; No. 2, $5.65; No. 3, $6.20; No. 4, $6.60; No. 5, $7.25; No. 6, $7.80; No. 7, $8.40; No. 8, $9.10; No. 9, $9.90; No. 10, $12.20; No. 13, $4.80; No. 14, $5.15; No. 14½, $5.45; No. 15, $5.90; No. 16, $8.15.

Marked Sales in Shears

London, Ont.

Sheep and grass shears are showing an improved demand, and current prices are as follows:

SHEEP SHEARS ENGLISH

Half polished 5G x 6 in, Bent, dozen	$10 35
Half polished 5G x 6½ in. Bent, dozen	10 85
Full polished K20 x 6½ in.	13 75
Full polished BBA x 7 in. Straight	28 50

GRASS SHEARS

No. 4 ..... $4 dozen

Level Prices Revised

London, Ont.

A slight adjustment announced in prices on sand levels shows a few lines at lower quotations. The new prices on some of the best selling Canadian-made levels are as follows:

SAND LEVELS

No. 1A	$2 25
No. 3A	3 50
No. 42	8 50
No. 72	1 15
No. 72 Brass Ends	1 35
No. 82	1 35
No. 118	1 60
No. 12V	3 75
No. 18	4 50
No. 24	5 50

Nail Orders Numerous

London, Ont.

Prices on nails are unchanged at present, with a good sorting business keeping dealers busy. Orders, however are mostly for small quantities. Prevailing quotations are as follows: wire, $4.65 base; cut nails, $5.75 base.

Winnipeg Markets

WINNIPEG, June 2—Very few important changes have been recorded this week. Among the minor revisions noted are both increases and decreases. Quotations on linseed oil have advanced another five cents per gallon, and the rope market has developed a firm tendency. Automobile tires and inner tubes are among the items registering reductions. Other lines that have lower prices are barbed wire, hand saws, chalk lines, machinists' wrenches, hand and pipe taps, castors, ornamental fence and gates, screw pulleys, soldering coppers, scales, and radiators. Business is considered good, and some wholesalers report that they are very busy filling orders for all seasonable lines.

Linseed Oil Prices Again Increase

Winnipeg.

The price of linseed oil has been advanced five cents per gallon,and raw linseed is now selling at $1.15 per gal., and boiled at $1.18 per gal., in barrel lots.

Rope Market Firm

Winnipeg.

The rope market has been firm for some time, and now that fibre and hemp have advanced, prices are expected to advance locally.

Sales have been very small for the past few months, but they seem to be showing some improvement during the past few days. The present prices are as follows:

Pure Manila

1-4 and 5-16	29¾c
3-8	29¼c
7-16, 1-2 and 9-16	28¾c
5-8	28¼c
3-4 and larger	27¾c

SISAL LARIAT

3 x 7-16	25¼c
4 x 7-16	25¼c

MANILA LARIAT

3 7-16	32¾c
4 x 7-16	33¾c
Lath yarn	20¼c

SISAL

1-4 and 5-16	22¼c
3-8	21¾c
7-16, 1-2, and 9-16	21¼c
5-8	20¾c
3-4 and larger	20¼c

BRITISH MANILA

1-4 and 5-16	24½c
3-8	24 c
7-16, 1-2 and 9-16	23½c
5-8	23 c
3-4 and larger	22½c

Turpentine Prices Steady

Winnipeg.

Turpentine quotations remain unchanged this week, the price of $1.20 per gallon in barrel lots being well maintained.

Barb Wire Prices Lower

Winnipeg.

Prices on barb wire have been reduced ten cents per spool, and this product is now selling at the following prices:

LYMAN

Winnipeg	$1 90
Fort William	1 40

GLIDDEN

Winnipeg	$1 70
Fort William	1 25

BAKER

Winnipeg	$1 60
Fort William	1 15

Reductions in Chalk Lines

Winnipeg.

Prices have been slightly reduced on masons' chalk lines, and are now quoted at $1.75 per dozen for white, and $2 for yellow.

Soldering Coppers Reduced

Winnipeg.

Another reduction has been made in the prices on soldering coppers, and following are the present quotations:

1 pound	55½c
1½ pounds	51½c
2 pounds	48 c
2½ pounds	47 c
3 pounds	45 c
3½ pounds	45 c
4 and over	44 c

Revised Discount on Radiators

Winnipeg.

The discount on hot water and steam radiators has been revised, and prices are slightly lower. The discount applying at the present time is 48 per cent off list, for steam radiators, and 47 per cent off list for hot water radiators.

New Scale Discounts

Winnipeg.

Prices on scales have been reduced, and following are some of the discounts applying:

Champion, 5 per cent off list; platform, 10 per cent off; wagon and stock 5, 10 and 5 off; portable stock scales, 5 and 5 off.

Calcium Carbide Reduced

Winnipeg.

Prices on calcium carbide have been lowered and are now quoted as follows:

1 pound tins, dozen	$3 00
2 pound tins, dozen	5 20
5 pound tins, dozen	9 00
10 pound tins, dozen	18 00
100 pound drums, each	9 20

Tube Prices Reduced

Winnipeg.

Boiler tube prices have been reduced, and these are now selling at the following list:

BOILER TUBES

1½ inch, per foot	25c
2 inch,	27c
2¼ inch	27c
2½ inch	30c
3 inch	38c
4 inch	56c

Automobile Tires Are Reduced In Price

Winnipeg.

A reduction of approximately ten per cent has been made on automobile tires and tubes. The rubber market has been easier for the past few weeks, and manufacturers announce the above decline, keeping in line with the raw product situation.

Following are quotations on a few of the best selling sizes:

30 x 3½, plain $15; non-skid $17; cord, $23; 32 x 3½, plain, $19.50; non-skid, $21.50; cord, $36; 34 x 4, plain, $27.50; non-skid, $30.25; cord, $16.50.

Screw Plate Prices Lower

Winnipeg.

Reductions are announced in prices on one line of machinists screw plates. The new discounts applying are listed below:

BUTTERFIELD'S SCREW PLATES

69, 10 per cent off; 70A, 10 off; 100, 15 off; 44, 10 per cent off; 50, 10 off; 52, 10 off.

Weekly Paint Markets

Toronto

TORONTO, June 2.—The increase of 10 cents per gallon in the price of both white and orange shellac is the feature of the paint markets this week. This advance, however, was generally anticipated due to the gradual higher quotations which have developed on gum shellac, as outlined in last week's Hardware and Metal.

Linseed oil prices are also advanced another ten cents per gallon, the quotations now being 97 cents for raw, and $1 gallon for boiled. Turpentine also remains at the previous levels, but the market on this product is reported as easier, and a tendency to expect a slight price decline has developed in some quarters. No radical changes are expected, however; but the arrival of further shipments has relieved the demand on local stocks.

Prices on plate and window glass are unchanged, but there is an inclination among dealers to quote a slightly higher range on window glass prices, due to the strengthening market, and the firmer showing of the Belgian franc rate. Dealers report that the seasonable demand in paints, varnishes and brushes is still continuing, and market conditions indicate that this brisk activity is likely to be apparent for some little time.

Linseed Oil Price Advances

Toronto.

Linseed oil prices advanced another ten cents per gallon. The new quotations are 97 cents for raw, and $1 is asked for boiled on one and two barrel lots. Current demand is good, and market tendency is reported firm and gaining strength. Argentine seed markets also report a strong tone, with little likelihood of any declines in either demand or price. Flax seed is again higher in price, with an active movement of Canadian seed to the United States still prevailing.

Turpentine Prices Hold

Toronto.

Prices on turpentine remain unchanged on the local markets this week; $1.15 per gallon on one-barrel lots is still the prevailing quotation, but the market is now easier with a slight tendency to lower price levels. It is stated in some quarters that the near future should record a small price reduction in turpentine, although no general statement along these lines could be secured.

Fresh shipments from the south have now arrived, and are reported ready for distribution. Local stocks have thus been replenished, but the demand continues good, and very little surplus is in evidence. Current quotations follow:

TURPENTINE—	
1 barrel lots	1 20
2 to 4 barrel lots	1 18
Broken lots	1 30

Shellac Prices Higher

Toronto.

The anticipated increase in the price of shellac, outlined in last week's issue of Hardware and Metal, has materialized, and the new quotations are orange, at $3.50 per gallon, and white shellac at $4.00 for barrel lots.

Gum shellac has been gradually developing a higher range, and this market is now very firm. The local demand for shellac continues around normal for this season of the year, and up to the present has been equal to current expectations. The revised quotations will be found on the weekly market pages.

Paint Demand Continues

Toronto.

Dealers in paint and varnish products continue to report marked activity in these lines. This is mainly due to the seasonable demand, but orders are generally considered more numerous this season than for several years past. The shipments, however, are in smaller quantities, although the total turnover is expected to equal that of last season. In some quarters new records are being looked for, should the present demand continue well into the summer and fall months. Prices on all paints, varnishes and specialties are holding unchanged, and little revision is expected until much later in the season.

Putty Prices Steady

Toronto.

Quotations of putty are maintained at previous levels, and little change is reported in either conditions or demand. Linseed oil continues at the recent higher price levels and this strengthened tone is reflected in the firm tendency of putty quotations. In view of prevailing prices, the local demand is considered fairly good for this season of the year. Following are the current market quotations:

PUTTY—	Per 100 lbs.
Standard in 100-lb. drums	7 05
Do., 25-lb. irons	7 30
Do., bladders in bbls.	8 30
Do., less quantities	8 55
Pure, in 100-lb. drums	8 55
Do., 25-lb. irons	8 80
Do., bladders in bbls.	9 80

Brush Quotations Hold

Toronto.

The seasonable brush demand is now in full swing, and while orders are smaller than in previous years, yet dealers report more numerous enquiries and some repeat sales combining to make a steady flow of business in these products. Prices are generally being well-maintained, and very few declines on brush quotations are anticipated until near the close of the present season. Russian bristles are still hard to obtain, while the Chinese famine has resulted in restricting the supply from that quarter. These factors are reported as likely to promote a firm tone on the bristle market for some time.

Strong Tone on White Lead

Toronto.

Prices on white lead in oil remain unchanged this week, but the tendency of the market continues to gain strength. The firm showing of pig lead on the primary markets is again maintained, and with present high quotations on linseed oil prevailing, a corresponding strength is reflected in the tone of white lead in oil. The local demand continues undiminished, and very little surplus of supplies are reported on hand. Under current conditions, no easier prices are anticipated for some time. Prevailing prices are as follows:

WHITE LEAD IN OIL—
$15.30 per 100 lbs. in smaller quantities.
$14.95 per 100 lbs. in ton lots.

Window Glass Unchanged

Toronto.

Some slight variance has been noted in the Belgian franc rate, but the exchange is expected to continue the recent readjustment, and the easier quotation has had no effect on the glass market. Prices continue unchanged on both plate and window glass, and, in the absence of any unusual development, the current quotations are expected to rule for some time. The market tendency is firm, and while demand has fallen a little short of expectations, an improvement is looked for. Some local receipts of Belgian shipments are reported, and the replacement cost being higher, no declines in price are anticipated.

Montreal

MONTREAL, JUNE 2—Turpentine is lowered five cents per gallon, making the only change in the paint market quotations this week. Linseed oil is unchanged, but remains very firm, due to the continued strength of the flax market. Slight fluctuations have occurred in the flax market all week, but it is noteworthy that each period of fluctuating is followed by higher prices than formerly.

Linseed Oil Prices Maintained

Montreal.

Linseed oil prices are holding at previous levels, and the seed market is steady and firm. During the week slight fluctuations occurred, but it was noticeable that each period of fluctuating was followed by higher prices than formerly, and present quotations are higher than a week ago.

LINSEED OIL—	Raw	Boiled
1 to 2 barrels	0 87	0 89½
3 to 4 barrels	0 85	0 87½

Broken lots, add 10c gal.

Turpentine Prices Lower

Montreal.

Turpentine quotations are lowered to $1.15 a gallon in one barrel lots, with the present tendency steady to firm.

Although a scarcity is not apparent, any spurt in the demand on local stocks might show a shortage, due to a congestion of freight at Boston, which is now used as a distributing centre. However, shipments were received from there this week, and jobbers' stocks are now said to be ample. Prevailing quotations locally are:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	$1 15
2 to 4 barrel lots	1 13
Broken lots	1 25

Shellac Prices Very Firm

Montreal.

Shellac quotations are held without advance in most quarters, while some jobbers have again raised their prices slightly in advance to those given below. Following are general quotations:

Orange shellac, in barrels, $3.75; in one gal. jugs, $4.05; white, in barrels, or 5 gal. jugs, $4.10; in one gal. jugs, $4.50.

White Lead Prices Hold

Montreal.

There is practically no change on white lead in oil this week. The firmness of recent weeks continues, due to the very active demand at present, and the strength of both pig lead and linseed oil.

Present quotations will be found on current paint market page.

Steady Market on Putty

Montreal.

Putty is held at present quotations. One manufacturer states that the probability of lower prices on putty in the later summer months is not unlikely, but any revision to lower levels will not be great, depending to a great extent upon the linseed oil market at that time. Following are local quotations:

Standard Putty—	5 ton	1 ton	ton
Bulk barrels, 800 lbs.	$5 00	$5 25	$5 60
Bulk drums, 100 lbs.	6 00	6 25	6 60
Do., or tins, loose, 25 lbs.	6 25	6 50	6 85
Drums or tins, cased, 25 lbs.	7 00	7 25	7 60
1 lb. tins	9 75	10 00	10 35

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices.

Glass Quotations Uuchanged

Montreal.

Locally, no change of importance can be reported this week in either window or plate glass. Business is still below normal, and quotations remain at 50 per cent off Montreal list. There is, however, said to be less price cutting and conditions are gradually gaining ground inosfar as prices are concerned.

Paint Demand Still Active

Montreal.

The seasonable activity continues in paints, varnishes and paint specialties, and will in all probability continue to do so well into the summer months.

Considering the low stocks among the dealers throughout the country, a steady flow of orders is anticipated.

GETTING THE EARLY BUYER

Many are the selling plans devised by merchants to stimulate business. All of them are good, but the plan adopted by an Ontario merchant to induce customers to do their shopping in the early hours of the morning is worthy of consideration. His plan is to have what he terms "Morning Hour Sales." Every morning between the hours of nine and ten, this merchant has a special sale on a few lines that are seasonable. These articles are usually odd lots that he has picked up at wholesale houses at reduced prices which the merchant in turn is able to offer to his customers at special prices, that will show some profit or at least allow the merchant to get his money back. No telephone orders are taken for these articles, nor are they charged. Every customer must go to the store for them and pay cash.

Articles that are to be on sale the following morning are attractively displayed in the window the preceding afternoon, and the display is accompanied with price tickets and a large show card announcing that the articles will be on sale the following morning between the hours of nine and ten. These early morning sales have been very successful and have proved the means of bracing up business for the whole day.

Lindsay Business Men Are Forming Board of Trade

After a number of unsuccessful attempts to form a Board of Trade, the business men of Lindsay, Ont., now appear to be on the right road, and are expecting big results from the campaign now being carried on to obtain members.

A committee was formed and two men chosen to captain sides in the effort to get members. These positions were taken by H. Brimwell and F. Forbet, merchants. The campaign is of two weeks' duration and the organization is assured of at least three hundred members.

The membership is made up of business men in the town and representative farmers of the surrounding district. The latter members are being secured as this is almost entirely an agricultural district.

TO ERECT PLANT AT ASBESTOS, QUE.

The Canadian Johns-Manville Co., Ltd., with sales offices at Montreal, Toronto, Winnipeg and Vancouver—which for some years has been operating what is said to be one of the largest asbestos properties in the world, located at Asbestos, Que.—has placed contracts for a large manufacturing plant to be located at Asbestos, Que., where they will manufacture all classes of asbestos products formerly imported from the United States. These products include asbestos roofings, shingles, packings, pipe coverings, textiles, brake band lining, etc.

MONTREAL MERCHANTS INCREASE MEMBERSHIP

Montreal.—The Merchants' Association of Montreal, through their recent drive, have added 243 names to the association list, making the total membership to date 502 members.

At the first meting of the old and new members since the campaign, the discussion of two questions took place, and these will be further augmented by a circular to members not present at the meeting.

1. What do you feel the Merchants' Association of Montreal might reasonably do for the improvement of your own line of business or profession?

2. What, as a citizen, do you believe the Merchants' Association of Montreal should first undertake for the good of the city at large?

With the termination of discussions, they will be analyzed and consolidated in a programme of work for the association.

BUSINESS CHANGES

Courtright, Ont.—Robert A. Cowan, hardware, has sold to Charles J. Hoskin. The latter is removing his tinware business from Strathroy to Courtright.

O.P.W.

Says Ottawa Pete:

"PULL COUNTS!"

"Pushing paints is good stuff, and 'pullin' 'em "is good too!

"If you wanted to start a rush of air through "your house, you wouldn't get behind the air "and push it, would you? You'd create a "vacuum at the other end and let the air rush "in and fill it.

"And the best way to get a current of goods "goin' through your store is for us to help you "get rid of the goods you've got; and the best "way we know for us to get them off your "shelves is to create a condition in your com-"munity that makes a demand for your goods.

"That's why the folk at Ottawa make paints "that 'repeat,' and pay out good money to ad-"vertise the fact to the public; That's why "they put dealer co-operation above every-"thing, and why they boost the 'Save the Sur-"face' campaign and its teaching that it's "cheaper to paint than not to paint.

"I believe there's a time coming when you "won't have to push O.P.W. goods. They'll be "pulled up by the suction that's been created. "Meantime, you push and we'll pull, and we'll "both get there together."

"Save the surface and you save all" *Paint & Varnish*

Doubles Advertising Space on Paints

J. G. Steele, London, Ont., Concentrates on City Trade—Paint Sales Doubled in Four Years—Customers Have Hazy Idea of Application of Paint—Women Big Buyers.

"OUR paint sales are climbing to new records and the season is only getting under way," said J. G. Steele, hardware merchant at London, Ont., to Hardware and Metal.

"There are two reasons for this. One is the unusually early spring and the other is the large amount of work that has been held over from other years. People are realizing that they cannot put off painting any longer. They are "sold" as far as the value of paint is concerned, but have been holding off in the hope of lower prices. This is true in other lines besides paints. Any number of people expected to see a landslide in prices. Now that they are finding that such a drop is not going to take place they are buying."

After City Trade

Just here it might be mentioned that Mr. Steele's trade is practically all confined to city customers. His problem is how to reach the largest number of paint buyers in London. That he has solved it is shown by the fact that his paint sales have shown a splendid increase in volume every year and have doubled in four years. It is perhaps significant also that his advertising space has also been doubled.

"Window displays, store displays and advertising," said Mr. Steele, "are the answer to the problem of increasing turnover. We put in paint windows regularly and we advertise paints and varnishes at the seasons we believe best. We get splendid results. Our paint windows are no sooner in than the various lines we are showing start to move. People come and start asking about this and that. This is important from our standpoint. We let them talk about the work they are planning and by a few tactful questions one can find out a good deal as to the nature of the job.

Have Hazy Ideas

"It is astonishing the hazy ideas many prospective customers, especially women, have about paints and finishes. Even more astonishing is the indefinite ideas people have about how to apply them. This can be capitalized not only by immediate sales, but by laying the foundation for future sales. We find that people appreciate advice. We can often save them time, trouble and money by suggesting this or that kind of paint, the best way of preparing the work, the best brushes to use and so on. This is service and service of a very definite nature. It has a real value and in nine cases out of ten proves the foundation for future trade."

Women Big Buyers

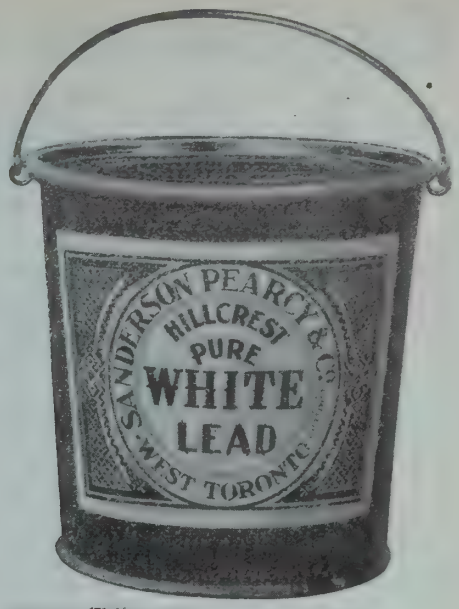
Mr. Steele stated that possibly 95 per cent. of his paint trade is done with city residents. A great many of these are owners of their own homes. A great many of them are women. All of them are interested in getting the very best results they can for their expenditure of time and money. Property owners, Mr. Steele regards as among his best customers. They realize the value of painting and also the need of it. Many of them, especially those who are larger holders of buildings requiring painting, appreciate the replacement costs and are willing to preserve woodwork and other parts as long as possible by applications of paint.

He finds that in a general way city people appreciate the value of paint in improving the appearance of property more than farmers do. Where property is changing hands frequently as in the case of homes, proper painting, whereby the building is made attractive, often means not only a quick sale but a nice profit added to the transaction.

Gets Good Results

Another method of speeding turnover is demonstrations. Recently a three-day demonstration of wall finishes was held. The demonstrator was given his big show window to work in and throughout the day was busy showing passers by just how easily and how quickly they could apply the finishes and the excellent results they could obtain. The result was not only immediate increase in turnover in the lines shown but some excellent future prospects.

Mr. Steele finds it good business to keep in close touch with a number of contractors, especially those whose specialty is home building. By doing this he often secures the complete order for all the paints and hardware required. In a city where the building figures run as high every year as they do in London and where there is an acute shortage of homes in spite of the building that is done, this runs into quite a substantial amount of trade every year. It is not always easy to form a connection with a builder but once it is done and good merchandise and good service supplied, the connection is a lasting affair that brings with it excellent business and profits.



An Interesting Point

This merchant recounted a rather interesting point he has proven. He stated that a paint firm to whom he had sent a list of names of prospective purchasers of paints had mailed to each of them a coupon entitling them to so much money toward the purchase of a can of the firm's paints. The number of coupons returned were very small. Mr. Steele stated that he found out that by advertising his paints and printing his own coupon in the paper he could get many times as many coupons returned and do a much larger business.

Hillcrest

Pure

White Lead

Every Iron Sold Boosts Your Business

This is smooth, wonderfully-ground white lead of an almost dazzling whiteness. The clear smoothness can only be fully appreciated by seeing it and trying it. This is a real asset to the paint and varnish department of your store. You'll be proud to sell "Hillcrest" Pure White Lead—especially to professional painters that can appreciate it; it brings them back for more.

When the "Hillcrest" salesman comes with "Hillcrest" Pure White Lead, give him a good hearing. He will be glad to tell you more about it and show you how helpful all the "Hillcrest" lines can be in building up lasting trade among your permanently satisfied customers. We are manufacturing "Hillcrest" Paint Products with an exactness that assures you the ability to supply customers with the same satisfying goods now or in years to come.

We Also Manufacture:

Hillcrest Colors in Oil; Hillcrest Colors in Distemper; Hillcrest in Japan; Hillcrest Porcelain White Enamel; Hillcrest Ebony Black; Spanish Enamel; Hillcrest Bath Enamel; Hillcrest Motor Car Enamel; Hillcrest Paste Filler; Hillcrest Crack Filler; Pearcy's Pure Prepared Paints; Hillcrest Barn Red Paint; Hillcrest Outside Gloss White; Hillcrest Inside Flat White; Hillcrest Aluminum Paint; Hillcrest Carriage Paint; Hillcrest California Gold Paint; Hillcrest Graphite Machine Paint Liquid; Hillcrest Orange Shellac; Hillcrest White Shellac; Hillcrest Oil Stain; Hillcrest Varnish Stain; Hillcrest Shingle Stain; Cottage Shingle Stain; Hillcrest Varnishes—all kinds; Hillcrest Pure Lead; Hillcrest Bronzing Liquid.

Hillcrest Paint Products

Emphasizes Value of "Save the Surface"

Plans of Hardware Merchants in All Parts of Canada Point to Effort to Acquaint Customers With Value of Protecting Surfaces Whether of Buildings, Implements, Vehicles, or Furniture—"You Pay for the Paint You Need But Do Not Use."

SOME novel means are being employed by hardware merchants throughout the country at the present time to encourage "saving the surface" of buildings, implements, furniture, etc. The newspapers are carrying advertisements setting forth the various means employed by these merchants.

Latham's Hardware, Moose Jaw, Sask., is conducting a house painting contest offering a $100 Victory Bond as first prize. The prize is open to owners or lessees of the best painted house in the city, subject to the conditions outlined which include the fact that the brand of paint caried by this store must be used and must be purchased at that store between May 15 and September 1, 1921. Only exterior work is to be judged and this accomplished by capable and disinterested parties who will make awards after due consideration of neatness, color scheme and general effect. Entries could be made between the dates mentioned though actual painting may be completed as late as September 10, 1921. Entry is by leaving name at the store or by phoning.

Save Paint Slips

The firm's ad dealing with this contest stated: "If your painter is about to begin your work have him get his paint at Latham's and enter your name in the contest. Save your paint bill slips as these will have to be produced at the completion of the contest."

The balance of the ad is devoted to an outline of the value of good paint because it covers more ground and wears longer.

Active work in "saving the surface" is progressing in Calgary largely influenced by hardware merchants. Use is made of the statement of the city health officer as follows: "We who live closely in communities must realize that if we wish to maintain wholesome, healthful surroundings it will be necessary that at least once a year we take stock of our surroundings and put them in the best possible order."

Another prize award was made by Reid Bros., hardware, Swan River, Man., in connection with a local painting campaign. A recent advertisement stated that this firm would give $5.00 worth of paint to the citizen of Swan River who had the cleanest property by a certain date.

Floor Surfaces to be Saved

An ad on floor finishes by Strathmore Hardware Co., Strathmore, Alta., says: "Old scratched surfaces disappear, dullness gives way to newness and the surface is easily made waterproof and beautiful if you use—floor finish. Especially made to withstand the scuff and tread of grinding heels on the floor. It is therefore the ideal varnish for refinishing furniture and all woodwork. Easy to apply, it dries overnight with a tough durable lustre that is guaranteed not to crack or chip. Nothing to mix, nothing to fuss with, just dip the brush. Come in and let us show you what——will do in protecting floors and furniture."

Home Preservation

Under the heading "Home Preservation" and pointing out the value of "Save the Surface and you Save all," an ad by W. R. Horner & Son, Granby, Que., states that to ascertain the amount of paint required, add the number of feet of both sides, multiply by the average height, divide by 400 (as one gallon will cover 400 square feet, two coats) ;this giving the required number of gallons. As an example it gives the measurements 25 feet front, 25 feet rear, 30 feet side, 30 feet side, totalling 110 feet, height 20 feet, 110 x 20, 2,200 divide by 400, 5½ gallons for two coats. It continues by outlining the exact paint required for buildings, porch floors, walls, wagons and implements, carriages and sleighs, porch and lawn furniture, staining, for linoleums and for finish on stoves, radiators, gas pipes, picture frames, etc.

"Live in a Cheerful Home"

Dealing with the beautifying as well as the preservative value of paint an ad by W. H. Turnbull & Sons, Brantford, Ont., states:— "LIVE IN A CHEERFUL HOME.—Good cheer in the home means health and happiness. Successful men seldom live in dull and dismal houses. This means paint. It means frequent painting. It never pays to put off painting until the old coats are completely gone. Don't forget that you have to pay for the paint you didn't buy through the greater depreciation in the value of your property."

"———paint is real property insurance. This high grade paint not only adds to the value of the home by making it look like new but it protects and conserves your investment. Protect your property—it means the greatest economy in the end."

Some good pointers are contained in excerpts from some of the ads used in connection with the paint campaign recently held in Winnipeg. It states: "Paint goes hand in hand with cleaning up. When you have dusted and swept and mopped the corners and open spaces put the paint brush to work. It will be easy to keep things clean then. A painted surface does not accumulate dirt like an unpainted one. Besides, dirt is more obvious on a painted surface and less apt to be ignored. Paintliness is the best incentive to cleanliness. Make the paint brush the partner of the scrubbing brush. They make a good team."

Paint That Repeats

It's often easy to make first sales.

But first sales are not the most profitable sales. You find your greatest profit in repeat sales—the business that comes to you without effort—the results of good goods that have given satisfaction.

It is just this kind of profitable repeat business that Glidden reputation brings. While it is selling painting materials for you it is selling other products. Glidden reputation will be a real asset for your business.

If you were in business for a month or two any kind of paint might do. But you're in business to stay. So are we. Let's get together and get a firm hold on the paint business in your territory.

Write to-day for prices and plans.

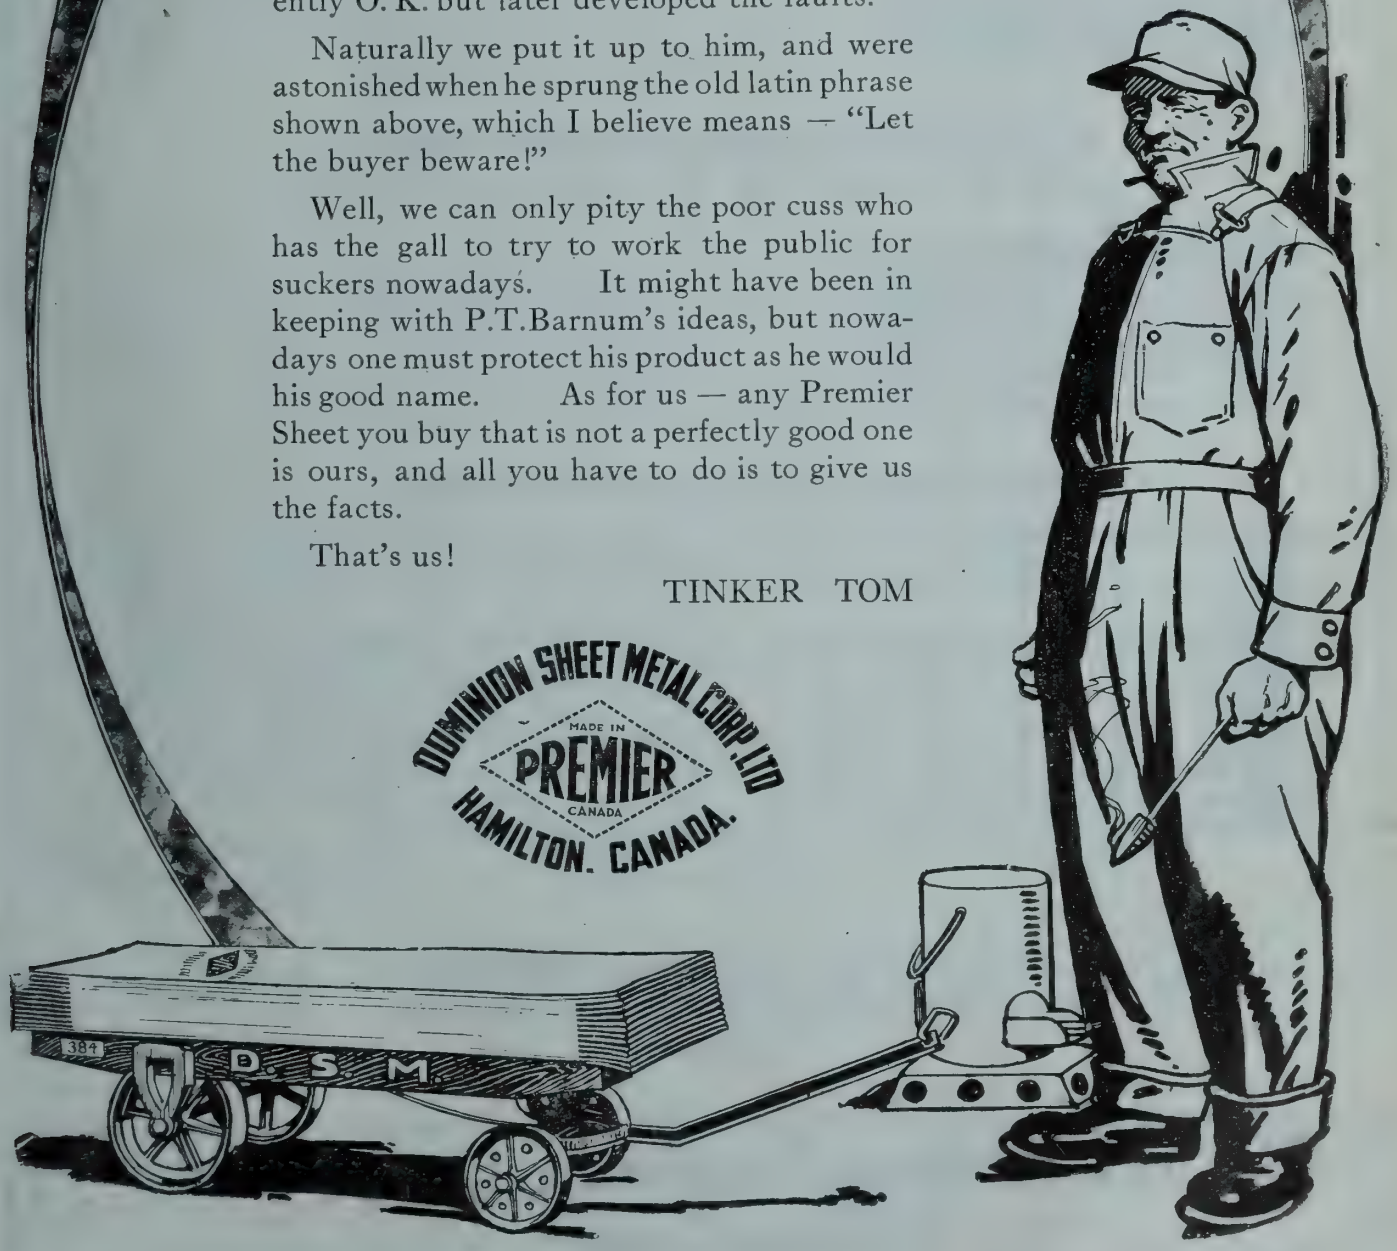
TINKER TOM'S TALKS.

No. 314

"Caveat Emptor!"

Not our Motto—No Sir!

Just recently we bought some material from a manufacturer which turned out to be imperfect. On first inspection it was apparently O. K. but later developed the faults.



Naturally we put it up to him, and were astonished when he sprung the old latin phrase shown above, which I believe means — "Let the buyer beware!"

Well, we can only pity the poor cuss who has the gall to try to work the public for suckers nowadays. It might have been in keeping with P.T.Barnum's ideas, but nowadays one must protect his product as he would his good name. As for us — any Premier Sheet you buy that is not a perfectly good one is ours, and all you have to do is to give us the facts.

That's us!

System In Selling Paint Oils

No System—Lots of Waste and a Very Dangerous Fire Trap.

Haphazard methods in selling paint oils are dangerous and usually a losing proposition for the dealer.

There is one thing absolutely necessary to systematic and profitable handling of paint oils. That is modern storage equipment.

The Bowser Way—Pumps are on floor above. Systematic, Clean, Safe, and Saving.

Bowser Paint Oil Storage Systems

are to the paint business what bookkeeping machines are to accounting—an economic necessity. They store the oils without loss from leakage or evaporation; give accurate measure, keep the oil room clean, make the labor of handling a small item.

If you are not using Bowser Storage Systems you are missing an opportunity to profit in your paint oil business.

Dampers of 21 Gauge Steel

Dropped Forged Stem—Sharp Point—Positive Lock

Our new 6″ and 7″ are stamped from 21 gauge steel. The stems are drop forged. The point sharp. The lock positive. There can be no breakage. There is no better damper on the market to-day.
Our Furnace Dampers are stamped from 26 gauge steel; drop forged stem; positive lock.

Our Damper Clips are stamped from 21 gauge steel. Packed one dozen in a box.
Canada Dampers are unexcelled and are lighter, stronger and cheaper than other dampers made.

A sample dozen will convince you.

Your Jobber Has Them

The Myers Manufacturing Company

Dresden, Ontario

Actual Demonstration

is the most convincing sales argument.

MORE VALET AUTOSTROP RAZORS have been sold through demonstration than by any other method. Always let your customer run the razor to and fro on the strop. Watch his amazement at the simplicity of the stropping device which is built right into the frame. Don't take it for granted that your customer knows all about it. Show him how the

VALET AutoStrop Razor

—sharpens itself

is easily adjusted for a close, medium or light shave by merely pressing the lever, why it saves constant blade expense by the fact that the edge is renewed by stropping. Remember that the Valet Auto Strop Razor sharpens, shaves and is cleaned without removing the blade.

Every sale means a satisfied customer and more profit to you. Don't miss an opportunity to demonstrate the Valet AutoStrop Safety Razor.

AutoStrop Safety Razor Co., Limited

TORONTO - - CANADA

Our Reputation is Your Profit

The fact that each of our five brands of files is recognized as standard quality by file users means easy sales and steady profits to you as a dealer.

New file users are being made aware of what "old timers" already know by our continuous advertising.

Specify one of these brands when ordering:

KEARNEY & FOOT

AMERICAN
ARCADE
GLOBE

FILES

We carry large reserves, so you can re-stock quickly from your jobber.

Made in Canada by

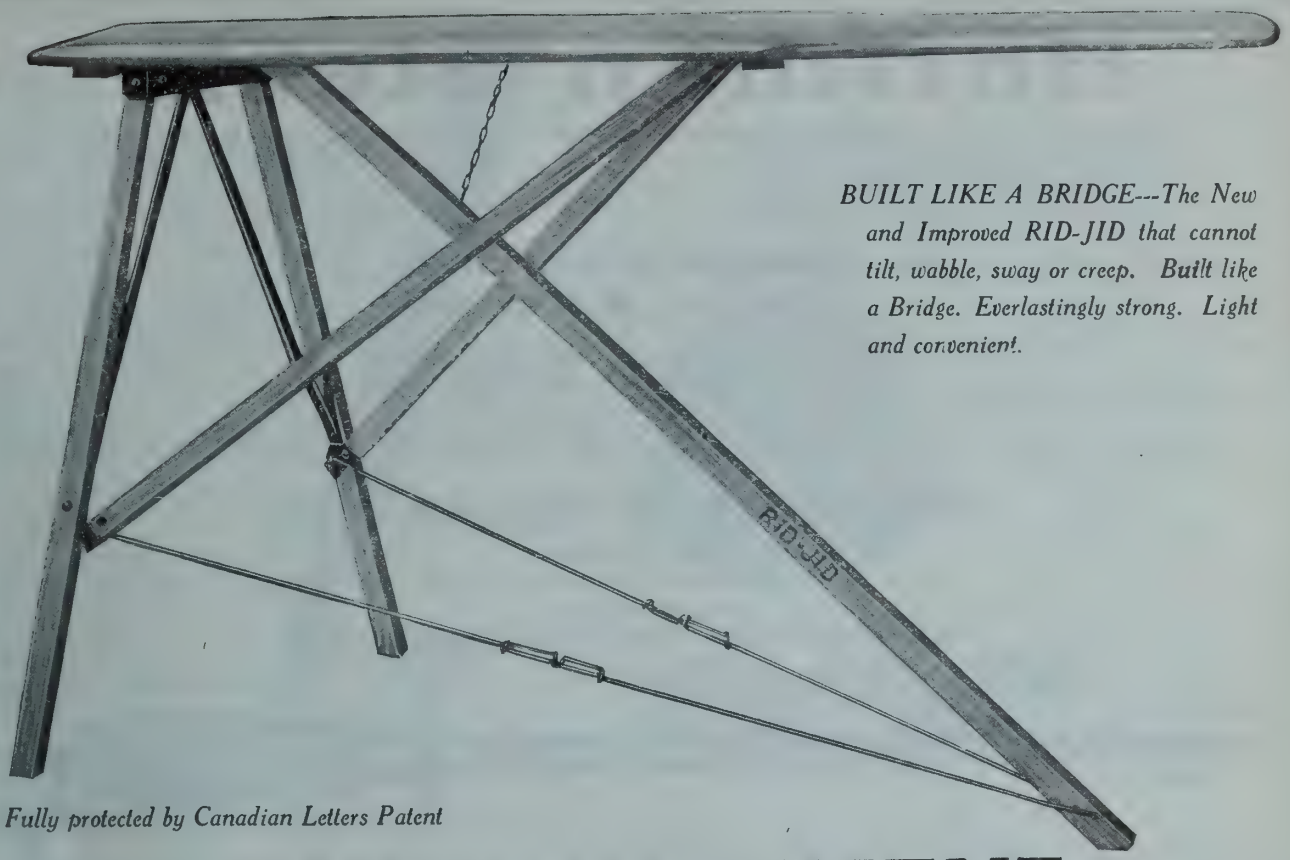
Nicholson File Company

Port Hope - Ontario

Three Special Reasons Why You Should Order Your FREEZERS Now

(1) We can ship more promptly now than when the big demand is on.

(2) Transportation is better now.



(3) Hot weather is sure to come. So will the rush for Freezers, all along the line, from user to dealer,—to jobber,—to us. But we cannot supply every demand promptly the last minute. Be wise in time, get your stock now while the getting is good. Be ready to supply your customers the moment they are in a humor to buy. If you hesitate now you may lose later. We venture to guess that your stock is low, so there is every good business reason why you should prepare in time. Place your order with your jobber now—you cannot lose.

Shelf and Heavy Wholesale Hardware

Ottawa, Canada

TWO GREAT GUILDS

ONE hundred years before Columbus landed in America, there was established in England a guild of gold and silver smiths who, through pride of craft, established a mark whereby when a housewife bought silverware and saw on it the word "Sterling" she made her purchase with absolute assurance of value received.

Five centuries have passed since that mark was established. To-day it still remains an unerring guide throughout the English-speaking world, and woe betide the man or firm who misuses this mark "Sterling." The police of the world stand back of it.

Only six short years ago there was established on the North American Continent another guild of craftsmen — another body of men with pride of achievement—the guild of Advertisers, Advertising Agents and Publishers.

They, too, adopted a hall mark to designate an honest product in the business in which they were engaged.

Sentiment, genius or instinct guided the adoption of the three great foundational letters A.B.C. as their insignia. In one respect alone did these two great guilds of craftsmen—separated in birth by over five centuries—differ. One determined the fineness alone, and left the purchaser to measure the weight. The other determined the weight but gave such specific information as would enable the buyer to determine for himself the degree to which that fineness applied to his own particular business.

A.B.C. stands for Audit Bureau of Circulations, and Audit Bureau of Circulations stands for absolute honesty in the preparation and presentation of circulation statements. The advertiser who buys space in a publication whose circulation is audited by the A.B.C. knows exactly what he is getting.

Sanitary Engineer and all MacLean Publishing Company papers are members of the A.B.C.

"If I Were a Hardware Man"

Said a bright business man, when talking on the subject of **Opportunities,** "I would look upon the handling of some leading make of Automobile Tire as a most profitable line. A Tire represents a comparatively big turnover for a hardware sale, and the profit is in proportion. If I had to give **service,** that is, if I had to put a tire on the car for a customer, I would not consider it any more trouble than to help a customer load up his truck with a barrel of sugar, or of nails, or any other commodity that required a strong pair of hands for a few minutes. I would consider it just another way of getting a good customer to keep on coming."

"Shootwell" Bristle Brush

With Flexible Metallic Bristles

MOST rifle brushes are of little use except for oiling the barrel. They are usually much larger in diameter than the bore of the rifle, and when inside the bristles simply lie down and slide over the top of the lands, serving little purpose. The "SHOOTWELL" Bristle Brush is made only just slightly larger than the bore to give the necessary friction on the inside surface, and it has more bristles in it than any other brush.

This is but one of the attractive, salable lines offered by the Fraser Company, Montreal. Let us show you the B.S.A. line of Shotguns, Air Rifles, Sporting and Target Rifles, and the many useful, quick-selling firearm supplies, like "Safetipaste," etc.

Sales Built on Confidence

Morrison Gauges

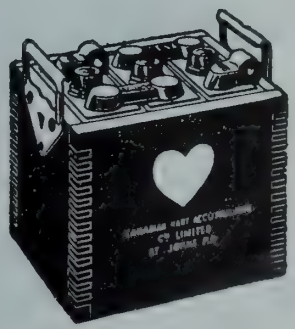
include gauges for every conceivable purpose—for indicating or recording:—pressure, temperature, altitude, revolutions, etc.

These well-known, reliable gauges sell well because they are regarded by mechanical men as standard.

There is hardly a requirement for gauges that you cannot supply with Morrison Gauges. With the Morrison line you can make a sale out of inquiries.

Write to-day for catalogue of the reliable Morrison products. It will pay you to stock and sell the famous Morrison line.

James Morrison Brass Mfg. Co., Ltd.



93-97 Adelaide Street West, Toronto

Can the Hardware Man Make Money as a Battery Agent?

There is a generous profit to the dealer who sells a Hart Battery. Hardware men are particularly suited to act as a Battery Agent, because they are reliable tradesmen and the public feel the need of a reliable dealer, especially in batteries and battery repairs. Hardware men, too, have facilities for shipping batteries that need repairs and for taking orders for new batteries to replace old ones on cars that need a replacement.

YES!

The Battery Agency is very simple. If a customer's old battery gives out, express it to us and we will give a prompt report as to its condition and the cost of repair. If the old battery is not worth repairing, we can ship a fully charged Hart Battery by express and the whole transaction is done without any unnecessary delay. We would like to show hardwaremen how they can make money as Battery Agents. Write us if you are interested.

The New Westco Tankless Water System

It is very often said that nothing is so perfect but that it may be improved.

To some extent this is true—at least we think so—so much so, that we are always investigating to discover means of improving the Westco System.

The general operation of the Westco Tankless System represents absolutely the last word in water pressure systems. Therefore, it is only in the details of construction of the system that we can effect improvements.

If you already sell Westco Systems you should write us for particulars about the improved Westco System.

If you do not sell Westco Systems you should write and find out what you have been losing by not handling this line.

For your information:—The Westco Tankless Water System is now fitted with an

All-Bronze Pump and New Westco Two-Pole Pressure Switch

Write us for complete information about this pump, which has only one moving part, and for our Dealer Co-operative plan.

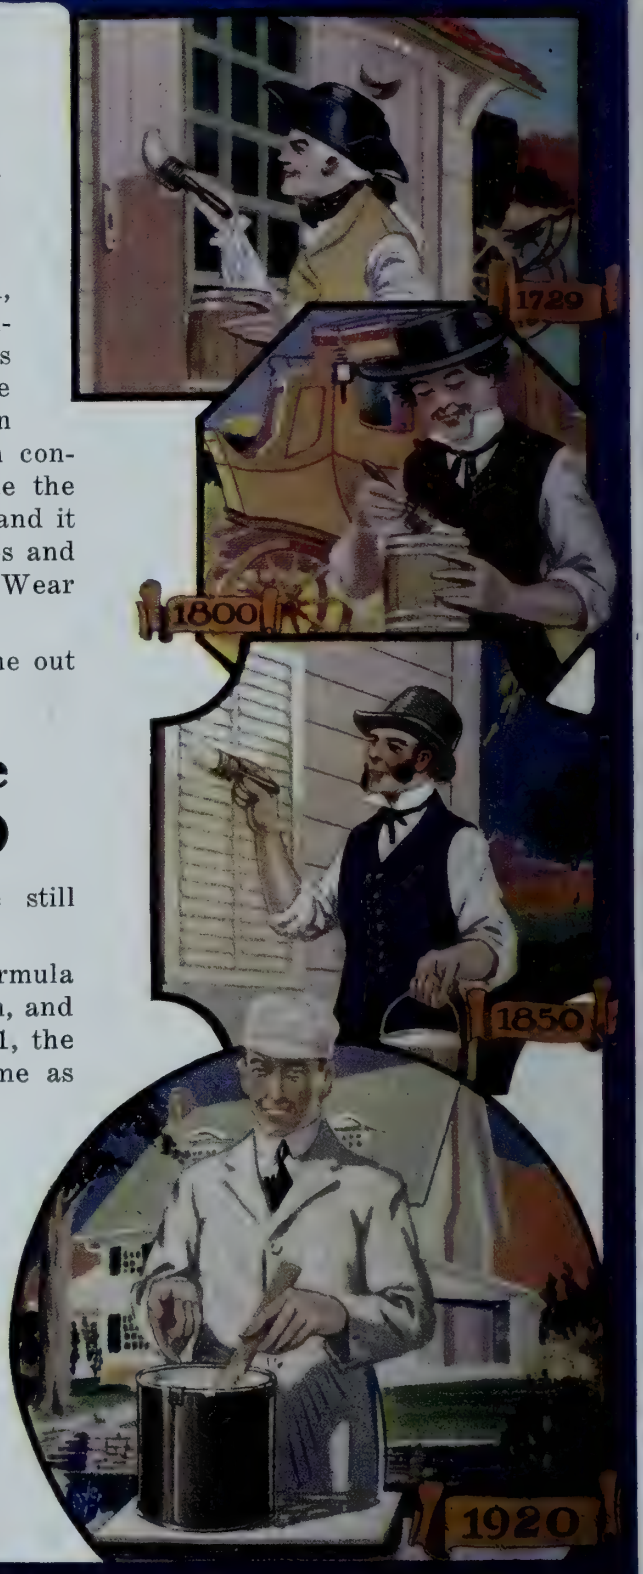
The Survival of the Fittest

TWO hundred years ago in England, Brandram discovered a process for corroding White Lead. It was found that this new method was capable of merging the material into a pigment of previously unknown smoothness. He marketed his invention with considerable success—so much so that it became the standard base for paint of every description, and it was used for interiors, exteriors, coaches, ships and every other surface which was subject to Wear and Tear.

So, when later the early English Colonists came out to Canada

Brandram's Genuine B.B. WHITE LEAD



came with them, and Canadians to-day are still using it in preference to any other make.

Many years ago we obtained this secret formula from the descendants of the original Brandram, and it is an interesting fact that even now, in 1921, the process of manufacture is identically the same as the original in the 18th Century—ours being the only patented process of White Lead manufacture that can boast of so ancient a pedigree. Its covering capacity and its durability are unrivalled the world over.

In spite of all the modern inventions, it is still the finest obtainable and is the White Lead basis of our famous B-H "English" Paint, and similar products.

Write for full particulars of our Agency Proposition.

Vol. XXXIII. No. 24 THE MACLEAN PUBLISHING COMPANY, LIMITED PUBLICATION OFFICE: TORONTO, CANADA JUNE 11, 1921

A Shingle with a Distinctive Feature

In Ruberoid Strip-shingles is embodied a selling feature found in no other strip-shingle made in Canada—a feature which manifoldly increases their protective qualities and greatly lengthens their life.

Ruberoid Strip-shingles, in addition to their surface coating of evenly crushed slate, carry on their *under side* a heavy coating of an especially prepared bituminous compound. Your customers will readily see the triple purpose which this extra coating serves. It prevents the sweating, which inevitably takes place under a roof covering, from lowering the weather-resisting qualities of the shingles. It serves as a binder between two rows of shingles, thus making a more solid roof covering. It adds weight and strength to the shingles and so renders them more resistant to the ravages of high winds.

This distinctive feature, added to the well-known high quality and unfailing durability characteristic of every product bearing the name Ruberoid, will materially help you to sell Ruberoid Strip-shingles. Present or prospective customers of your store are being told about these shingles in an advertising campaign covering the entire Dominion of Canada. Stock Ruberoid Strip-shingles and other Ruberoid Weather-proofing Products and be prepared to get your share of the business resulting from this widespread publicity.

Write to-day for the Ruberoid Merchandising Plan. It protects the dealer by eliminating competition.

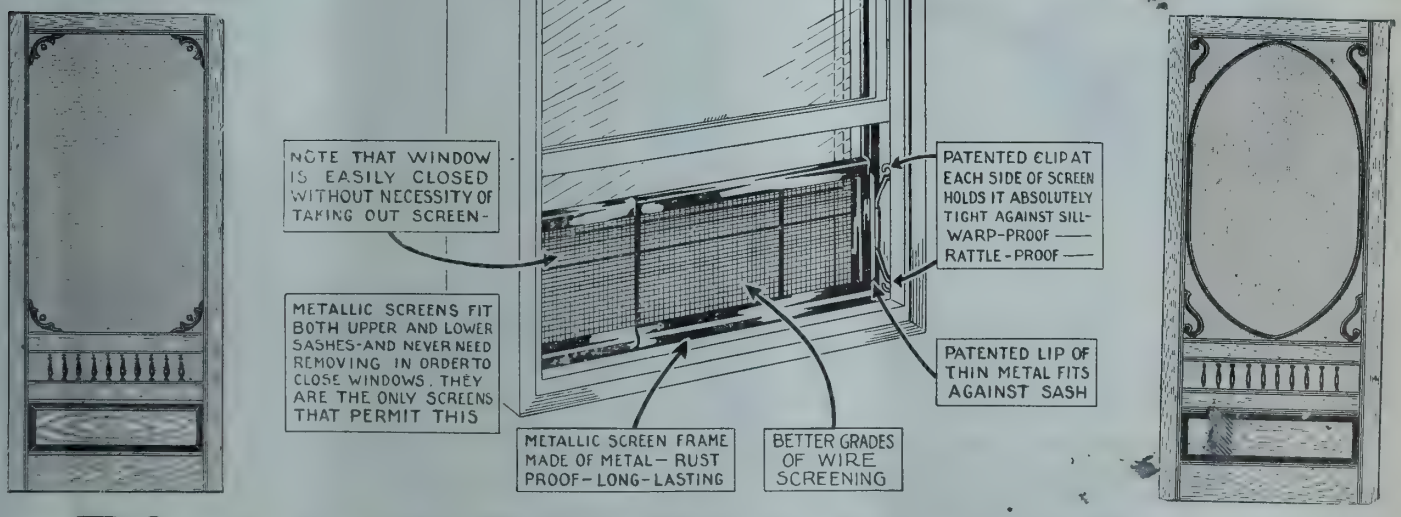
'RICE LEWIS' NEWS

Ventilation Without Flies

Ventilation unquestionably is very desirable, but ventilation when blended with flies leaves much to be desired. June is the screen door and window month. Let us suggest the following to sort your stock :

Metallic Window Screens

The centre illustration herewith shown not only illustrates the "Thalmetal" (all metal, adjustable) Window Screen ; but it gives its main features ; chief among which are : Adjustable (a size to suit every standard window) allows perfect ventilation, convenient, (window can be closed without removing) interchangeable, (fits top or bottom sash) substantial (all metal) always in place.



Send for a trial Shipment.

Screen Doors & Windows

We carry in stock a full line of Standard Screen Doors and Windows in styles and sizes to suit most requirements : Screen Doors in Nos. 1, 2, 8, 9 and 21, sizes 2 feet 6 inches by 6 feet 6 inches ; 2 feet 8 inches by 6 feet 8 inches ; 2 feet 10 inches by 6 feet 10 inches ; 3 feet by 7 feet.

Window Screens Nos. 1 to 15 in widths extending to 18 inches up to 48 inches.

We carry in stock, Black, Galvanized and Bronze Screen Cloth.

Rice Lewis & Son Limited, Toronto

Ask the "Rice Lewis Man" or Write Direct

Have You Ordered a Stock of Lumino Ware?

While our splendid new line of aluminum ware has been on the market only a few weeks, it has already gained favor in a most gratifying manner. We anticipated big orders for this new line and our expectations have been fulfilled.

Rice Boiler

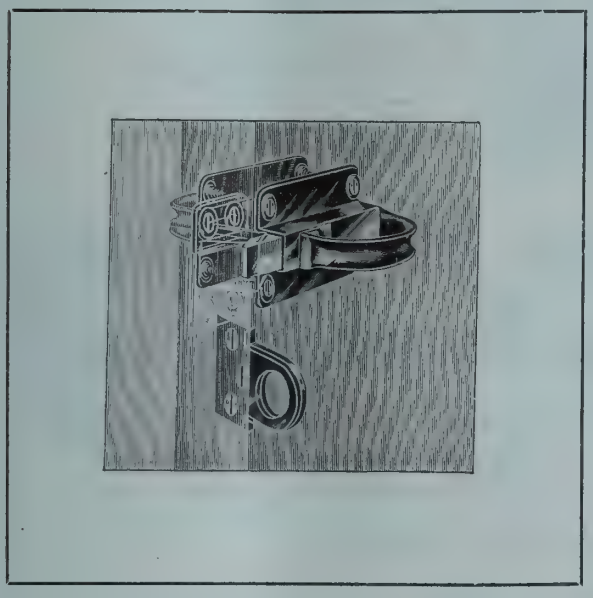
Sauce Pan

Lumino
REGD
Pure Aluminum
SMP
"QUALITY"

The above registered trade mark is to be found stamped on the bottom of every genuine article of Lumino Ware.

The articles in the Lumino Line are manufactured from the best procurable aluminum sheets. Each piece is rigidly inspected after every operation. There are no flaws. The always-cool, tubular handles, for example, are so riveted to the body that the bearing is along the tapered heads of rivets. A stronger connection is not possible, and leaks never develop around the rivets, which is an exclusive feature of this line of goods.

Have **you** ordered a stock of Lumino Ware? All we ask is that you see any article in this line. A few minutes' inspection will convince you that there is no line equal to it on this or any other market.



Most important, you can sort up on Lumino Ware when buying anything in enameled ware, hot galvanized ware and other goods that we make.

The Door to Prosperity Opens With C.S.G. Co.'s Latches

No. 1240 Barn Door Latch

opens all doors quickly and easily, just as it performs all the other duties of a latch, even the duty of selling readily and with a profit for the merchant. A durable, commonsense latch with Japanned frame and handles, tinned bolt and a Sherardized spring of piano wire that cannot rust. Packed one-quarter dozen in a carton, including padlock eyes. Weight, 175 lbs. per case.

The "Challenge" Latch

has opened a new door to profit for many a shrewd dealer, for it possesses more points of quality and value — selling points — than any other thumb latch on the market; for instance, it is made entirely of wrought steel and it is absolutely impossible for the thumb piece to work loose or get out of place. Packed one-half dozen in a box. 12 dozen in a case. Weight, 180 lbs. per case.

Calling Attention To—

Aloxite Razor Hones and Carborundum Razor Strops

TALK to the man who hones his own, and to the barbers in your community, about Aloxite Razor Hones and Carborundum Strops.

They surely will be interested.

The improved Aloxite Hone has the smooth, velvet-like texture of the old world natural hone, but it cuts quicker and cleaner.

Each hone is packed in blue, white and gold cartons and put up in a sales boosting container.

In Carborundum Razor Strops you will be selling a line of strops cut from the choicest of stock —every strop perfectly finished, attractively fitted.

The strops you can display in the special case or on the metal hangers which we furnish.

Carry these two products in your cutlery department and there will be no question about sales and profits.

Would you like more detailed information?

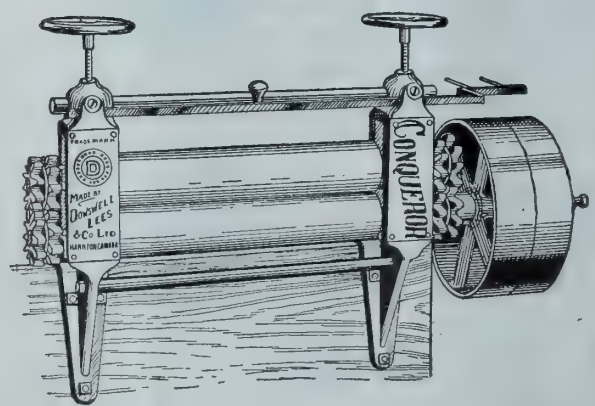
LARGE WRINGERS

When Your Customers ask to see Wringers larger than the standard size, what have you to show them?
Here are three large Wringers built for hard, heavy work.



Trojan

An ideal wringer for large familes, Chinese or small laundries.
Extra grade rubber rolls 12 inches by 2¼ inches.
Has reversible drain board which sheds water either way.
Suitable for stationary tubs only.

Ajax

This is a fine big general purpose wringer.
Has reversible drain board which sheds water either way.
It is suitable for large, round or square tubs.
Extra grade rubber rolls 14 inches by 2¼ inches.

Conqueror

Is designed for the heavy work of Hospitals, Hotels and large institutions, also for clothing manufacturers, tent makers, and others, for shrinking cloth, canvas, etc.

Dairy Pails

These "Sterling" Pails have a body of the finest quality XXXX tin, strongly wired with ears of extra heavy steel tinned and reinforced on the inside to body by a steel band.

Another point in their favor is the outside soldering around wires and ears—this leaves no crevices for milk to lodge and decay, and ensures a more sanitary Pail. A strong, sturdy line carrying the Davidson seal of durability.

Write for particulars and prices. Ask for Booklet No. 2.

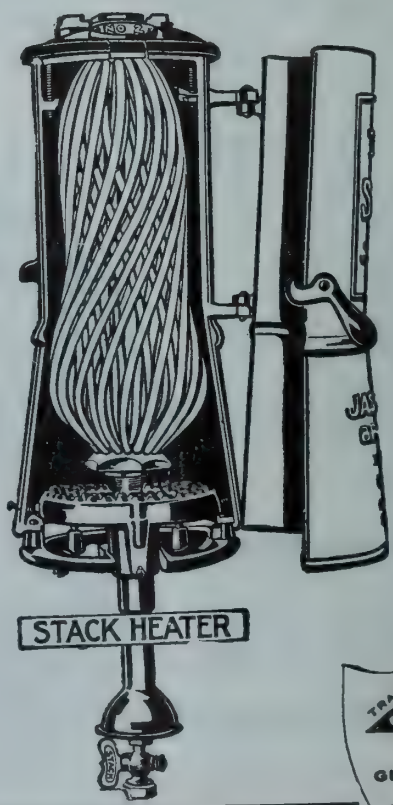
DAVIDSON

TRADE MARK J.M.T. REGISTERED A GUARANTEE OF QUALITY

True Economy



Stack Heater

The Stack Gas Water Heater will heat water in one minute.

The almost perpendicular copper pipes in the Stack Heater offer no hindrance to the natural tendency of water to rise when heated.

Take notice of the small size and large number of coils; this means quick heat. The numerous small pipes will naturally heat water quicker than one big pipe because of the greater heating surface offered.

More hot water with smaller consumption of gas—that's true economy.

Some dealers have not heard of our sales plan

FOR

D-B CARBON REMOVER

There are still a few dealers who have not taken advantage of our exceptional sales proposition—**Why not?** D-B CARBON REMOVER is sold to dealers with the understanding that they can **give** all customers a can on trial. If they find that it does not remove the carbon —they return the empty can to the dealer.

Every can returned for this reason, we guarantee to pay the dealer the **retail** value. This proves the confidence we have in our product.

AUTO JACK says: D-B CARBON REMOVER cleans a carbonized engine in 30 minutes, without even removing the cylinder head.

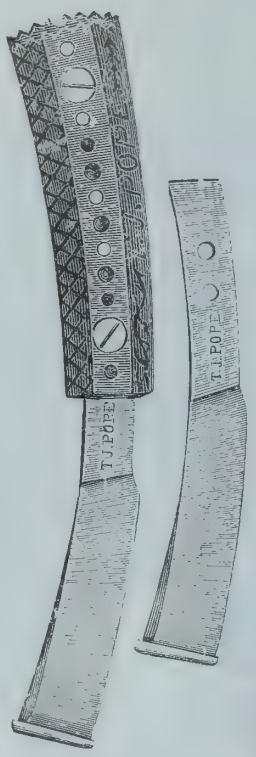
Toronto Globe comments on Boy and Slate Sign

THE papers are quoting En-ar-co epigrams in box rules on their front pages. The people are talking. Everybody is watching those Big Boy and Slate Signs in front of Garages, Service Stations and Stores all over the country.



Have This Attention Directed Your Way

This sign and epigram service of ours is open to you. It's the most novel eye-catcher ever produced. And when it gets people looking your way—they start coming your way.
Now, you want this sign. We want to tell you how easy you can get it, how we work out new epigrams for you to put on it every other day; how successful it has been for other dealers. This information will only cost you the price of a postage stamp. And it won't obligate you one bit. So why not, right now, fill in this coupon (it's put here for your convenience) and slip it in the mail to-night addressed to our branch nearest you.

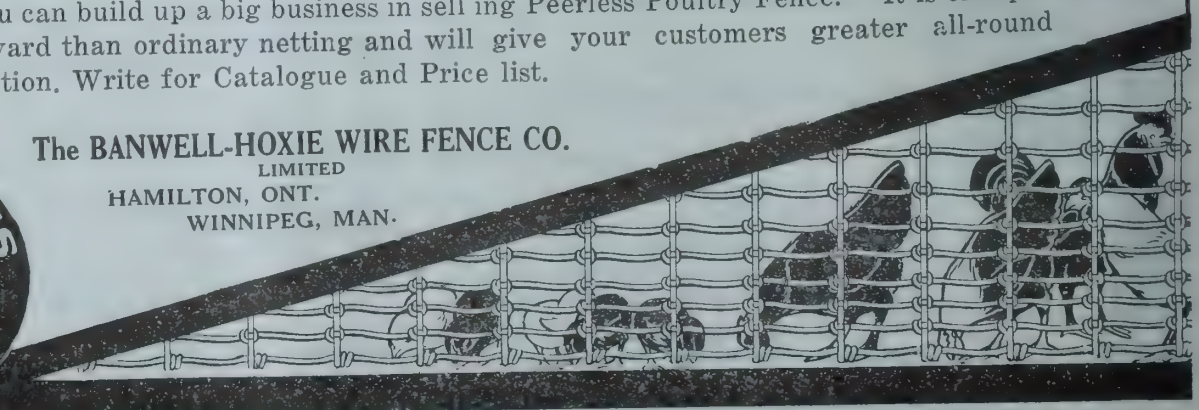
PEERLESS POULTRY FENCE

Now Made in Any Height You Wish from 3 feet to 7 feet

A few days ago a dealer told us that he could increase his business in Peerless Poultry Fence if he could get it in a wide range of heights, as all his customers would rather buy real poultry fence instead of netting, but the small range of heights limited its sale.



The policy of this company has always been to give the dealer what he wants and no exception was made when the request came in to supply poultry fence in a wider range of heights.

Peerless is the only poultry fence manufactured in Canada in these heights, from 3 feet up to 7 feet, and is the strongest and best fence on the market.

You can build up a big business in sell ing Peerless Poultry Fence. It is cheaper by the yard than ordinary netting and will give your customers greater all-round satisfaction. Write for Catalogue and Price list.

What Our Service Means to You

We co-operate with you in every way.
All your orders and correspondence will be given the most careful attention.

We will ship your orders neatly finished and packed ready to open and go on the sample floor without delay or bother on your part.

We will supply you liberally with circulars and advertising matter.

If you will let us have a mailing list of your prospective customers we will write them a sales letter and mail descriptive literature.

We stand ready at all times to replace, free of charge, defective goods or shortages, should they, by any chance, get past our inspection.

We fully guarantee our goods to work satisfactorily if installed and operated properly.

It will pay you to stock and sell our well-known line.

New Stove Catalogue just off the press, which we will gladly mail upon request.

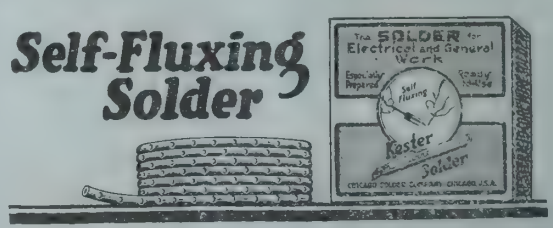
75 Years Successful Manufacturing



"Forget Fluxing—Just Solder Away"

That's what you tell your customer when you carry Self-Fluxing Solder. Solder and iron is all that's needed; for the flux is in the solder and flows onto the work as needed and in just the proper amount to make a perfect bond.

Cuts soldering time in half. Eliminates the mussy pot of acid, paste or salts. Does Better Work too.

Use it yourself—then you'll sell no other kind. Learn the saving of patience and money.

CHICAGO SOLDER COMPANY
4225 WRIGHTWOOD AVE., CHICAGO, U.S.A.

Easy to stock—to sell—to use

Stocks two items in one—flux and solder. Send for sample and try it out on your hardest job. Then you'll know why hundreds of dealers use it and recommend it. Cash in on the big, growing demand.

Sold in one pound cartons and on one, five and ten pound spools.

Can the Hardware Man Make Money as a Battery Agent?

There is a generous profit to the dealer who sells a Hart Battery. Hardware men are particularly suited to act as a Battery Agent, because they are reliable tradesmen and the public feel the need of a reliable dealer, especially in batteries and battery repairs. Hardware men, too, have facilities for shipping batteries that need repairs and for taking orders for new batteries to replace old ones on cars that need a replacement.

YES!

The Battery Agency is very simple. If a customer's old battery gives out, express it to us and we will give a prompt report as to its condition and the cost of repair. If the old battery is not worth repairing, we can ship a fully charged Hart Battery by express and the whole transaction is done without any unnecessary delay. We would like to show hardwaremen how they can make money as Battery Agents. Write us if you are interested.

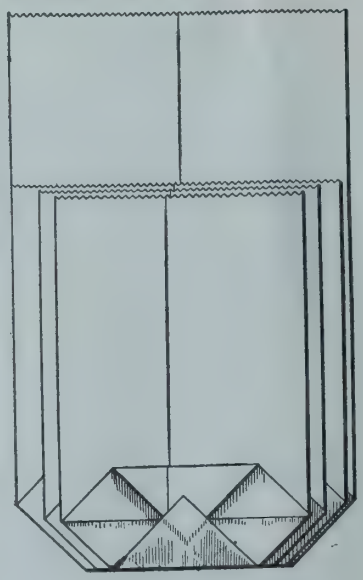
Dealers — Here's your chance to make Easy Profits

WELDED COPPER STEEL



HOG TROUGHS

These troughs are made of copper steel and welded throughout, making them practically one-piece: no chance of leaking. To prevent rust and wear each one is coated with an acid-proof, brine-proof oil, forming a porous-proof elastic film which toughens with age and is absolutely water proof.

Note these new reduced prices: 4 feet, 70c per foot; 5 feet and longer, 60c per foot, with liberal dealers' discount. *Farmers are sending their orders for troughs direct to us because you are not carrying them in stock.* Get in on this now—send an order for at least fifty-foot sample lot. Fuller information and catalogue of Tanks, Water Troughs, etc., sent on request.

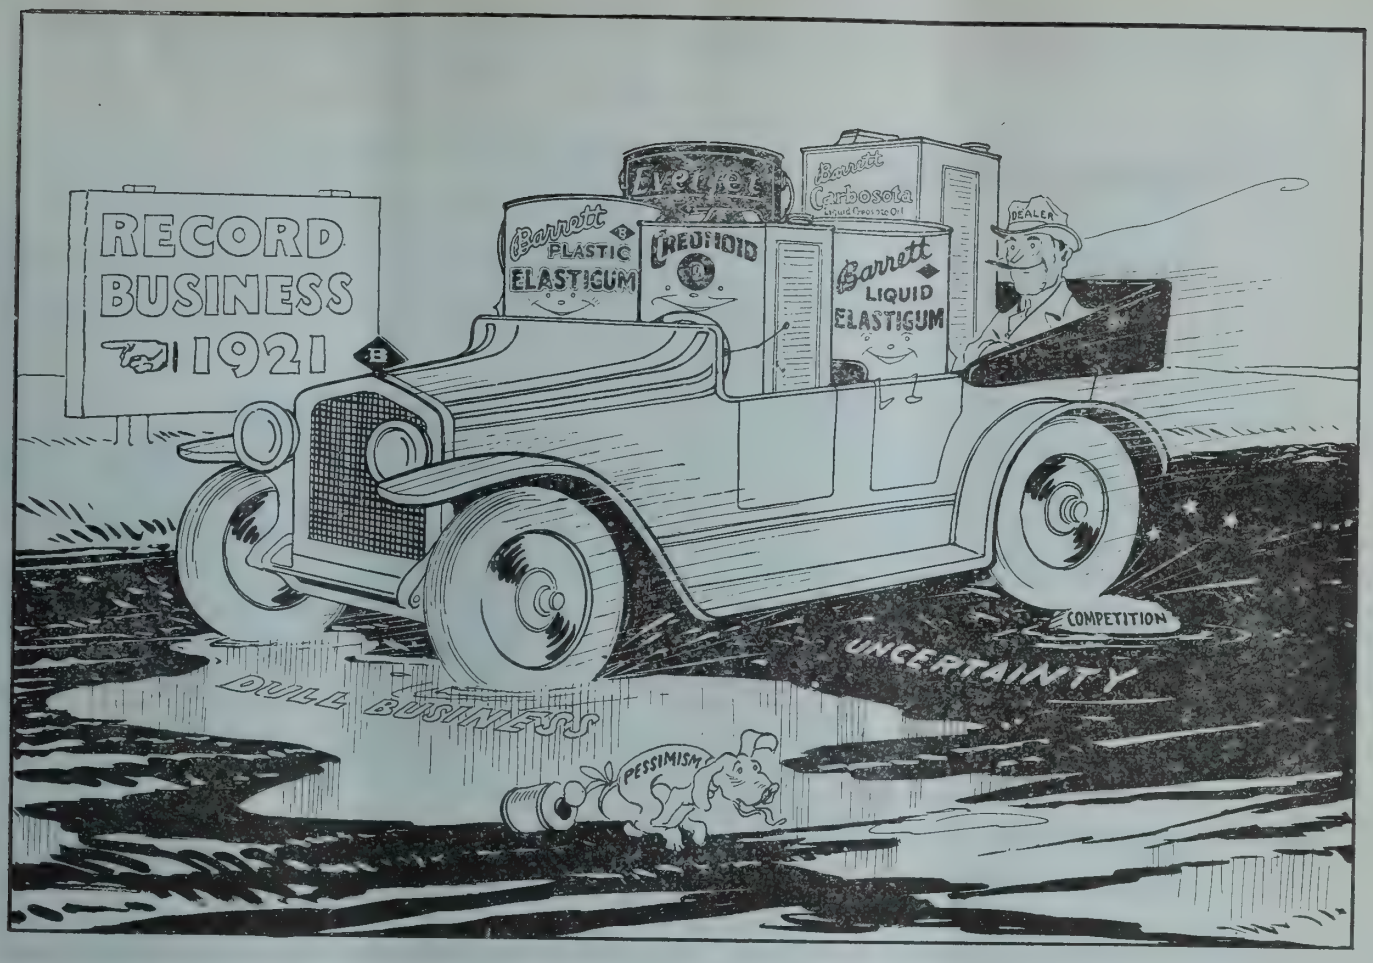
TRIMO

THE WORD TRIMO

Stands for good tools made by the Trimont Mfg. Co., which are the following:—



The Trimo Pipe Wrench
The Trimo Chain Pipe-Wrench
The Trimo Nut Wrench
The Trimo Pipe Cutter (Hand)

The four good points that make Trimo Pipe Wrenches superior are the Spiral Spring always in place—Steel Frames that will not break—Nut Guards that protect adjustment nut—and the Inserted Jaw in handle that can be replaced when worn.

MANUFACTURERS

The Barrett Specialties are Self-Starters
They Move Fast ---

Here they come now! There's room for you, too. So get aboard the Barrett car with Messrs. Creonoid, Everjet, Carbosota, and Liquid and Plastic Elastigum.

Let them show you how they skim—spry as quicksilver—over the bumps in the trade road.

They'll carry you to Profitstown faster than you ever traveled before.

Creonoid—Fly Oil, Lice Destroyer and Cow Spray. Cows give more milk, hens lay more eggs and hogs fatten quicker when relieved of the torment of flies and lice by Creonoid. A business building product for you to carry.

Everjet Elastic Carbon Paint is a proven protective paint. It dries quickly, forming a smooth, glossy surface that is proof against moisture, acids, alkalis and fumes. Prevents corrosion of metal.

Plastic Elastigum — for stuffing cornices, relining gutters, patching leaks in roofs and innumerable other purposes. "The plastic cement of a hundred uses."

Liquid Elastigum for resurfacing badly worn prepared and "rubber" roofing. It is waterproof, durable and easy to apply. A quick seller and very popular throughout the Dominion.

Barrett Carbosota Liquid Creosote Oil is a standardized, highly-refined grade of pure coal-tar creosote oil. Will positively prevent decay of wood.

Dependable Jobbers

Must be qualified with the experience, the capital, the storage space, and the judgment to select, and hold in stock, the most reliable and saleable goods for their customers. They must have facilities to fill, and ship promptly, the orders received from retail merchants. Most important of all, they must fully realize how much the wholesaler's success depends on the success of the retail merchant, and co-operate with him accordingly.

We have all these qualifications and facilities. May we serve you?

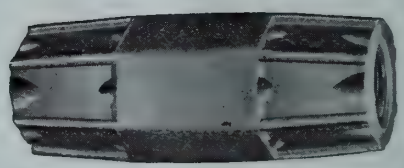
The Newest and Latest Maxwell Washer

AS ITS NAME implies, this washer cleanses the clothes by the vacuum process—the simplest and most natural method known. It makes instant appeal to every housewife entering your store.

Maxwell
VACUUM WASHER



Note that the location of the gears is UNDER the tub. The washer cannot tip over when the cover is open, for there are no heavy gears above tub to make it top heavy. Automatically-cut gears ensure an exceptionally smooth, quiet running machine.

All wooden parts are beautifully finished in natural wood and metal parts painted in aluminum bronze. Its appearance attracts immediate attention. A single demonstration effects many sales, for every satisfied user sells others.

Write for descriptive folder and prices.

MAXWELLS LIMITED

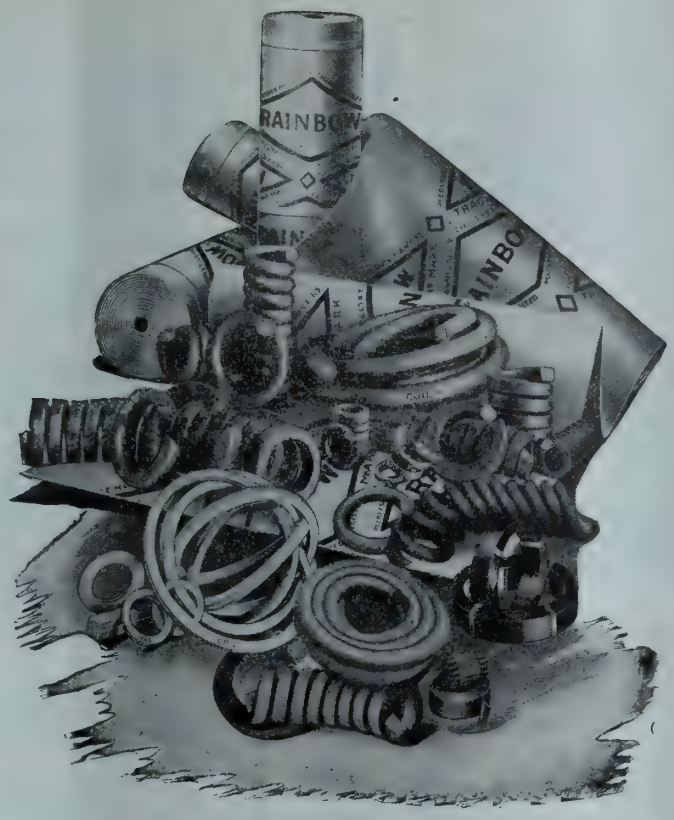
Demon Grip



Pump Rod Couplings

The new "Demon Grip" Welded Steel Pump Rod Coupling has many superior features, features that assure the consumer faithful service, and the dealer easily closed sales.

Made of Steel—same as the rod.
Hot Forged—perfect hex.
Welded—makes solid job.
Strongest—over three times as strong as a malleable.
Packing—twenty-five in a box to go on your shelf.
Novel—the above advantages make a novelty of a very staple article. The DEMON GRIP cannot help attracting attention.

Manufactured by

Edward E. Johnson, Inc.

Your customers look for the RAINBOW Trade Mark

Because genuine Rainbow Sheet Packing—the original red sheet — has held the confidence of the mechanical world for over 30 years, steam engineers everywhere have learned to look for the Diamond Rainbow Trade-Mark on every yard. They know that it is their best assurance of permanently packed flanges.

Hardware dealers throughout Canada who are displaying genuine Rainbow and letting their customers know they have it in stock—ready for quick delivery— are building up a profitable business with steam plants, large and small. And these sales of Rainbow Sheet Packing lead to sales of supplies, tools and fittings.

It will pay you well to link your store with the Rainbow reputation for dependability and economy.

Genuine Rainbow is made in Canada and is stocked by your jobber. We will be pleased to send details of special interest to the hardware trade.

Where Disston Quality Is Born

There is something more than a proper mixture of metal put into the crucible when Disston steel is made.

It is an unseen, intangible ingredient—yet as big and real as the tremendous plant in which Disston Saws and Tools are made. The long experience of men whose fathers were Disston steel workers, whose grandfathers worked out the secrets of fine Disston steel generations ago—this is what has made the present quality of Disston steel.

Under the greatest test of all, hard service over a long period of years, the quality born in Disston steel is revealed. The greatest praise of Disston Saws and Tools comes from men who have used them longest, men who write of these tools with a friendliness, and even affection, seldom given to inanimate objects—and there could be no higher tribute.

and all kinds of Lubricating Oil and Greases, etc.

Velvet Lubricant is suitable for transmission, differential and cup lubrication, does not stiffen up in the cold so as to cause any inconvenience in shifting the gears, and will not become thin in hot weather, having been specially treated to meet the requirements of the varied weather conditions. Coats the gears to make them silent, will work into the smallest openings where oil will travel, and lubricate every bearing perfectly.

"Lubriko" Auto Oil is the most highly refined neutral oil for automobile lubrication, possessing high fire test, so that it retains its body under extreme heat.

After many years' practical experience in oils we produced this brand, and we offer it to dealers, knowing it to be of the highest standard of quality for the lubrication of automobiles, stationary gas engines, motor boats, motor cycles, and all kinds of gas engines, whether air or water cooled. Made in light, medium and heavy consistencies.

Clears Clogged Pipe Without Damaging the House or Lawns

Think of the multiple advantages of Desolvo! Without, floors, pipes, lawns and gardens had to ripped up at a great expense to clear a clogged or frozen pipe. There was all that expense for damage, beside the time consumed. Desolvo clears clogged and frozen pipes quickly without damage to the premises. No wonder it sells so well!

For Quick Turnover and Repeat Sales

The present-day buying trend in cooking ware is toward aluminum. And the popular demand of women who choose aluminum is for VIKO—The Popular Aluminum.

Women are quick to realize the advantages of aluminum ware for cooking. They appreciate its light weight, its attractive appearance, its durability.

And they know through experience that VIKO, The Popular Aluminum, combines all the desirable features of fine aluminum with modern methods of manufacture, which makes Viko high in quality but popular in price.

Put the Viko line in your store. Cash in on the present-day demand of the modern woman. Viko sales are easy to make and they bring repeat orders. For full information—

Help Us To Help You

This Fall you can't sell ammunition unless you have it. We can't manufacture your requirements without your specifications.

Although we have all the materials and know that your order will come, we must have specifications before we dare manufacture more than a certain percentage of Canada's requirements.

You will have demand for ammunition, just as the demand has been for other sporting goods, but to be ready next Fall for duck and deer shooters, you must tell us now what you will require so that you will have it when your customers want it. We cannot possibly supply the entire demand over night.

By sending your specifications now,—no matter how small—"**you help us to help you**".

Anticipate normal sales,—sportsmen know no dull times. To-day is the day,—this is the hour. There is no possibility of disappointment if you act on this suggestion.

Outlook In Hardware and Metals

Leaders in Various Branches of This Trade Address Convention of American Iron, Steel and Heavy Hardware Association in Montreal—Generally Thought Tide of Depression Has Turned—Constructive Suggestions Offered for Liquidation of Overstocks

MONTREAL was honoured this week with the twelfth annual convention of the American Iron, Steel and Heavy Hardware Association, this being the first occasion on which the convention has been held outside of the United States. Visiting delegates, to the number of about two hundred, were the guests of the Canadian Wholesale Hardware Association. Prominent among the members of the latter association to extend welcome to the visitors were Lt. Col. Robert Starke, George Caverhill, G. R. Caverhill, Gordon Seybold, Herbert Seybold, T. M. Hutchison, Drummond McCall Co; A. McFarlane, J. Dowling, A. Letang and Alex. Prudhomme, Montreal; A. Lawson, T. B. Williamson, Toronto; H. S. Alexander, Hamilton, C. A. Whitwam, S. Rea, London; T. M. Birkett, Ottawa; J. McD Wilson, Quebec; W. Zimmerman, Collingwood, Ontario.

Colonel Starke welcomed the delegates on behalf of the Canadian hardware trade, pointing out that there was much in common between the two countries. W. M. Birks, Board of Trade, greeted the delegates, pointing out that the Montreal Metal & Hardware Association is one of the strongest trade branches of the Board of Trade. S. L. Orr, Evansville, Ind. responded for the active members stating that he would welcome a change in the organisation so that Canadians and Americans would become one large association. C. O. Hadly, Alan Wood Iron & Steel Co. Philadelphia, replied for the associate members. President Eugene J. McCarthy, Beals, McCarthy & Rogers Inc. Buffalo, N. Y. also replied to the welcome extended and then proceeded with his annual address. After tracing the trend of business for several years back and pointing out the similarity of present conditions with those which prevailed on many past occasions, Mr. McCarthy dealt briefly with the outlook "It seems to me that the present period is not only the culmination of a generation of inflation and rising costs, but is in fact the actual turning point in the other direction. Better times are before us. It may sound paradoxical, but it is a fact that a community prospers more when costs are low than when costs are high. The great nations of the world have become rich during periods of falling prices, not poor.

Initial Impulse Needed

"The period ahead of us should be marked by a return to the old legitimate means of production. Men's minds and talents will be turned once more to the urgent need of reducing costs and improving the quality of output.

"The present situation calls for the real energies of labour and managements and what the country needs to start the ball of business activity rolling is the initial impulse, and this may be furnished by the present year's planting. Agriculture is still our primary wealth, but also of our business vitality. Fifty per cent. of the purchasing power of the country lies in the farmer.

"The basic conditions for a revival of trade are sufficient raw materials, labour and capital, and the initial impulse to start the movement. That impulse, I believe, will be the agricultural activity. It is sure to have its effect on other industries. We must also remember that for five years nearly our entire productive capacity was devoted to war supplies and the enormous peace requirements of over 100 million people were absolutely neglected. Are we not bound to feel sooner or later the accumulated demands of the Railroads, House and Industrial building and the general replacement due to several years of ordinary wear and tear?

"The recovery in business activity and of price stabilisation is certain to be slower in some materials and goods than in others. Cotton and its products are usually prompt in recovering from business depression, because cotton is the clothing of the masses. On the other hand, steel continues to decline long after the bottom of a business depression is reached, because it is largely used in the construction of additional building and plant capacity. Such capacity is not needed until general consumption increases enough to employ fully the existing capacity. The highest courage and the greatest confidence is needed to-day. Courage in men and confidence in our political institutions."

Speaking on the subject "The party of the third part in business contracts" Job E. Hedges, prominent lawyer of New York stated that he thought a "professional" was required to re-organise the business world. He disagreed with many men who wished for a return of pre-war conditions stating that if such conditions returned we would be wishing for another war. The need to-day was for plain thinking men, aided by men big enough to lead them.

Senator George E. Foster representing the Canadian Government gave a few brief remarks in the form of a welcome.

Canadian Warehouse Business

T. M. Hutchison, Drummond McCall Co., Montreal, spoke on the subject of the Canadian warehouse business pointing out that Canada's market was so distributed that in the case of Nova Scotia and New Brunswick where there were no steel warehouses, in the sense of the term as understood by the delegates from the U.S., that many consumers, one thousand miles away, had to depend on Montreal for emergency supplies. He stated that the main difficulty in Canada is the necessity of carrying adequate stocks and sufficiently varied to satisfy a market which demands the same range of miscellaneous requirements as does the trade in the U.S., but which is ten to fifteen times smaller.

"As an example" he pointed out "a representative Canadian warehouse carries in stock to-day no less than 100 different sizes, qualities and thicknesses of Sheared Plates; in Blue Annealed Sheets no less than 60 different sizes and in Black Sheets no less than 50 different sizes. In Cold Drawn Shafting excluding Strip Steel—as many as 130 different sizes and lengths are kept in stock, while as regards Boiler Tubes, no fewer than 126 different diameters, lengths and gauges are found to be necessary to have on hand in order to handle customers' requirements in a proper manner. Other lines will show much the same proportions. The necessary investment of capital is therefore very considerable in the case of a steel warehouse in this country attempting to handle its business along intel-

ligent lines and aiming at rendering the best possible service to its customers. Again, we are operating some 500 miles or more away from the source of many of our supplies, thus necessitating larger stocks being carried than would be required were we within striking distance of the mills. Our margin for warehouse profit corresponds to your own, but against this, our operating expenses may possibly be higher, owing to the greater distances over which it is necessary to look for business as well as to the great variety of our stocks.

"We have been blessed in this country since the days of Confederation by a steady flow of sturdy settlers from Great Britain, many of whom were craftsmen. As time went on, they called for the product which they were accustomed to use at home, and so a demand arose for Lowmoor Bar Iron and other well-known brands which has continued to the present time. Similar conditions prevail in the case of Chain. Spring Steel is a further instance. Several consumers prefer the Sheffield made product to the Spring Steel of this country or of the States. It becomes, as you can see, an expensive matter for the merchant in this country to follow all these personal likes and dislikes, and to carry adequate stocks to satisfy everyone.

"Our natural resources cannot, as yet produce all the qualities that it is necessary for this market to have. Several lines have still to be imported, making it essential for the iron and steel warehouses to carry, in some instances, duplicate, triplicate and even quadruplicate stocks of different qualities in certain sizes in order to serve the trade properly.

"Canada continues to advance in its manufacture of iron and steel. Our Canadian mills produce excellent material which we continue to buy and stock in increasing quantity. Our latest additions, in the form of plate mills at Hamilton and at Sydney, are now in operation and turning out an excellent quality and finish of Open Hearth Plate. We naturally buy at home what material we can, if of equal quality and at equivalent import prices. At the same time, a considerable quantity of our steel supplies will continue to be imported from the United States, and it is only proper to say that no makers have treated the steel merchants of this country fairer or more generously than the steel manufacturers of your country."

Burdens of Taxation

Wm. H. Taft, former president of the United States addressed the gathering briefly, pointing out that one of the greatest obstructions to business is taxation. "Men are in a desperate condition" he stated "and if there ever was a motive towards profiteering it is the taking of almost all the profits from men who are trying to carry on business. More than that it frightens capital into non-productive business investments. Further, the over-taxing of business alarmed merchants and frightened citizens and led them to wait and see. One of the things we must realise in dealing with Governmental matters—and it is the reason we ought to keep business as much as we can out of the Government—is that Governments move slowly."

Canadian Steel Industry

Harry T. Diplock, Sales-Manager of the Eastern division of the Steel Company of Canada, spoke in the absence of Ross H. McMaster, Vice-President.

Mr. Diplock said the Canadian steel industry had many reasons to give thanks to the American industry, and that the amount and quality of ingots produced was splendid, the quality comparing very favourably with the output of either countries. Belgium and France had had a great falling off in production, Great Britain being the early European source to uphold its output and it was being greatly burdened to-day by the coal strike.

If the production to-day was down to 35 or 40 per cent. of capacity, it was certainly insufficient. It was not a question of the world not requiring steel as we found it in every pathway of life. The knowledge and growing demand for steel are quite apparent.

Considering the countries to-day who cannot dispose of their natural products, for instance the coffee from the Southern Islands and the silk from Japan, it seems reasonable to assume that we can look back at conditions as they were a year ago with comfort for the present. We are going through a constructive rather than a destructive period and it is only a question of time.

Looking Ahead

Speaking on the subject "A Look Ahead by an Optimist," Severn P. Ker, president Sharon Steel Hoop Co. Sharon, Pa. stated that a brighter aspect was ahead. "This is not the first depression in the steel industry" he said. "Much the same conditions prevailed in 1893 and again in the early years of the 20th century, and a greater height of prosperity should follow the present year. We have now dragged the bottom and I believe it will not be more than 60 or 90 days before an improvement will be shown and by 1922 we will have forgotten conditions as they are to-day."

A. I. Findley, editor The Iron Age read an interesting address on the steel market and some thoughts on the problem of the Pittsburg Base. This will be outlined in a later issue of Hardware and Metal.

Distribution of Overstock

In addressing the convention on the subject of "Distribution of Jobbers' Overstock" F. M. Butts, Butts & Ordway Co, Boston, stated that there were few hardware jobbers not suffering from this malady and indicated that the policy of trying to get the jump on their competitors with a cut price had not resulted in any gain by reason of the fact that such a policy tends to make the prospective buyer hold off even longer in the hope of lower quotations. He stated that automotive equipment jobbers in solving the problem of overstock had sent lists of such stock to all other jobbers. Goods so listed would be sold at the same price that manufacturers would charge for the same merchandise if the jobber were to go to the manufacturer and buy it. Freight is sacrificed willingly. The plan is said to have worked admirably.

Dealing with conditions in leading lines, a number of brief addresses were as follows :—

Chains

C. M. Power stated his belief that if standardisation of sizes was adopted in many lines to-day it would save the public millions of dollars. A. E. Mountford, chainmanager of Drummond McCall Co. gave a brief account of the demand from the Canadian field for chain, in which he said the finer qualities of chain were in greatest demand.

Bolts

In pointing out that the manufacturers, railroads, jobbers and foreign buyers are the largest purchasers of bolts and that with the exception of the jobber these had practically disappeared, W. F. McKenzie thought that the increased earnings of the railroads, European exchange and the acceptance of wage reductions by steel workers would all help to a rapid improvement in this branch of industry.

Blacksmith Supplies

H. W. Wendt claimed that the manufacturer would profit if he would canvass the smaller markets and get the "pickings." Large contracts were not plentiful. Regarding labour he advised the employer to be loyal to the employee as long as the loyalty was reciprocate. Increased production was, he thought, the solution of the problem of decreasing labour costs

---

WELSH TINPLATE

Under the title, "Welsh Tinplate, its History, Manufacture, Application and Use," a 24-page booklet has been compiled by the Welsh Plate & Sheet Manufacturers, London, England.

In addition to some highly interesting information concerning the history and manufacture of tinplate and its service to mankind as the "World's Wrapper," this booklet contains some useful hints on how to order tinplate, which should obviate unnecessary delay, misunderstanding, and disappointment. Tables giving standard weights and sizes, and a glossary of terms common to the trade are also contained.

Under the sub-heading, "World's Debt to Welsh Tinplate," an interesting table showing in tons the amount of foodstuffs, in tinplate containers, exported from the different countries is given. Color-printing on Welsh tinplate has become a fine art, ornamental boxes of artistic shapes and beautiful colors being a great attraction.

Besides the above are the more common uses to which tinplate is adapted, with which the trade is more or less acquainted. From the giant aeroplane to the child's toy, tinplate serves.

Prominent importers of Welsh tinplate are A. C. Leslie & Co., Ltd., Montreal.

Hardware Firm Goes On Cash Basis

Carter Bros., Hardware, Picton, Ont., on Cash Basis After June 1 —Advertisements and Circular Letters Prepare Customers For the Change—Commendation From Farmers—Convincing Customers That Cash Means Lower Prices

ANOTHER retail hardware firm to adopt the cash basis of business is Carter Bros., Picton, Ont. For the last two months this firm has been preparing the public for the change by the use of advertisements in local papers. The ads were changed weekly and fifteen hundred double circulars were sent out to customers. It is the intention of the firm to run weekly sales at special prices.

Speaking to Hardware and Metal concerning the change Mr. Carter states: "We have heard nothing but words of commendation from the farmers for adopting the system, therefore we feel we are off to a good start."

The letter sent to customers was as follows, with the statement shown in the panel on the right attached to the letter:

Picton, Ont., May 23rd, 1921.

To our Friends and Customers:

We herewith announce that on and after June 1 our business will be run on a strictly cash basis to all individuals. During the last three years the proportion of credit to cash in our business has decreased to an enormous extent and the expense of maintaining credit acocunts has increased in a similar proportion. We know by eliminating this expense and attendant losses we can offer very much better values in our lines.

We will maintain accounts for cheese factories, canning factories, corporations and institutions on regular terms.

As the accounts for the above have to be passed by shareholders before being paid it would be impossible for them to pay cash. The benefit of the lower prices from the cash system will be derived by the farmers and general public who are shareholders in these concerns.

Building accounts, etc. We will maintain deposit accounts for building, painting and others who wish to take advantage of the big saving under our cash system.

Outside workshop accounts will be payable on completion of work.

Phone orders will be sent C.O.D. by our regular delivery system.

We take this opportunity of thanking you for your patronage of the past and trust we may have the pleasure of serving you in the future under our money saving cash system.

Very truly yours,

Carter Bros.

Cash Means Lower Prices

Reasons Why:

55 per cent. of our credit accounts in 1920 were for less than $5.00, **19 per cent.** for less than $10.00. A total of **74 per cent.** for less than $10.00. The expense of keeping all these small accounts falls indirectly on a great many customers who pay cash altogether, and on a great many credit customers who would pay cash if they knew they could **save money** by so doing.

Who pays the cost of Credit Business?

Who pays the Bookkeeping Expense, the LOSS from Bad Debts, Forgotten Charges, etc.?

The public must know this expense is indirectly borne by them.

Cash business will do away with all this expense and allows us to give you better service at lower prices.

During 1920 we wrote off several bad accounts, including one of $150.00. While the usual run are not nearly as large as this, it serves to emphasize the fact that Cash must mean lower prices if such losses are eliminated. Stop and figure how many sales any business would have to make before recovering such a loss. Then again, we are not infallible and sometimes goods are charged to a customer in error Sometimes the customer is wrong. But every error on either side causes much work and uncertainty. The Cash System will abolish this.

Benjamin Franklin said: "In buying goods 'tis best to pay ready money, because: He that sells upon credit expects to lose 5 per cent. by bad debts, therefore he charges upon all he sells an advance that will make up that deficiency. He that pays ready money escapes or may escape that charge."

COMPARE OUR PRICES

It will pay you to get our prices under the Cash System. The credit system entails a great deal of expense and lost time which our customers will save by paying cash. Often an account will require before it is collected an expense of 15 per cent. to 20 per cent. The Cash System means this expense will be done away with and the saving given to our customers.

We believe in Cash Business because we know it is going to mean better values and better service to the people of Prince Edward County. We did not decide to adopt the idea of Cash until we had considered it from all angles and our action is the result of careful investigation, not only in our own business but in many hardware businesses throughout Ontario. Hardwarde dealers in other towns have told us they are able to give better prices on high-class merchandise and better service to their customers by conducting their business on a cash basis. That is what we wish to do. We absolutely believe Cash Business will mean a very great saving of time and money to our customers and are so convinced we know the most doubtful individual will heartily support our new policy as soon as each and every one gains by purchasing from us on the cash plan. Profit is not the sole object of our business. In fact we plan to retail for less profit under the Cash system than ever before. By Constantly adopting money-saving systems together with fair dealing, the firm of CARTER BROS, has been advanced from a very modest beginning to its present size. Trustworthy goods, at a fair price, honesty and good service, have always been our motto. We have constantly planned and thought for means to better our service to the people of Prince Edward county and when we were advised that Cash Business, while a new idea in hardware stores in this town, would be a good thing, we were not afraid to offer it to the people. It is an idea we feel will be welcomed by all.

WATCH FOR OUR SPECIAL OFFERS

By selling for Cash we can buy for Cash and we will be in a position to offer very special prices. Watch our advertisements and visit our store when in town. You will buy the same high class merchandise that Carter Bros. have always sold at lower prices. Past experience, we believe, has proven that when we advertise special prices, we give special prices.

CARTER BROS.

CASH HARDWARE

MAYALL AUTO SUNDRIES

The Mayall line of motor car accessories is described in a new 4-page folder recently issued by the Motor Sundries Corporation, Ltd., 414 Eastern Ave., Toronto. The various products illustrated, include motor heaters, shock absorbers, rustproof flat spring bumpers, and air-tite pump plungers. The leaflet is primarily intended for distribution to the hardware and accessory trade.

McCLARY HEATING SYSTEMS

Catalog No. 92, illustrating warm air furnaces, registers and furnace fittings is now being distributed by the McClary Manufacturing Company, of London, Ont., In this new booklet, McClary's message to the trade covers the proper installation and maintenance of warm air heating systems, and the many details, problems and accessories in connection therewith. McClary types of furnaces, with all special and repair parts, are fully described.

ACCESSORY CATALOG

Among the latest trade booklets now being distributed is the 1921 illustrated catalog of automobile accessory lines carried by the Sumner Company, Limited, Moncton, N.B.

The book is generally illustrated throughout, and covers a varied assortment of automotive trade equipment from the car-owner's average requirements, to the garage and repair specialties. Tires and inner tubes, spark plugs, auto finishes and surface polishes, lunch baskets, and tools of all kinds are included among the many lines described in this catalog.

The Sumner Company also conduct a retail hardware and accessory department in conjunction with their wholesale activities.

COMMENTS ON THE OUTLOOK

SOME brief and interesting comments on the business outlook, made by a number of speakers at the convention of the American Iron, Steel and Heavy Hardware Association were as follows :—

"The man who says there is no sentiment in business has not read his history, or has been brought up as an only child." Jeb. E. Hedges.

"Things are going to be reorganized by the plain thinking man. Aided by you gentlemen who are big enough to lead them." Jeb. E. Hedges.

* * *

"Canada and the United States are so rich we dare not count it. Not on the table in front of us, but we have it." Jeb. E. Hedges.

* * *

"I believe it will not be more than sixty or ninety days before an improvement is shown, and by 1922 we will have forgot conditions as they are to-day." Severn P. Ker.

* * *

"The present situation calls for the real energies of labour and managements, and what the country needs to start the ball of business activity rolling, is the initial impulse, and this may be furnished by this year's planting." President McCarthy.

* * *

"The highest courage and the greatest confidence is needed to-day. Courage in men, and confidence in our political institutions." President McCarthy.

* * *

"When the sun shines again, which I hope and think will be soon, we will forge ahead better, stronger and more useful than ever before." President McCarthy.

* * *

"If we have faith in the future and faith in humanity we have nothing to fear." Severn P. Ker.

* * *

"We are going through a constructive, rather than a destructive period and it is only a question of time." H. T. Diplock, Sales Manager Steel Company of Canada.

Sales Tax on Invoices

THE report of the amendments to the Budget resolutions dealing with the showing of the sales tax on invoices, as outlined in a recent issue of Hardware and Metal has evidently been misunderstood by some in the trade. It was stated that the amendment left it optional with the manufacturer or wholesaler as to what percentage of tax they showed separately on invoices, but it was necessary to show at least 1½%. It was further stated that this change had been made to comply with the request of certain manufacturers in order that they might show the same percentage of tax on invoice when selling to the retail trade direct as the wholesaler. This does not make it necessary for the manufacturer to show only 1½%, he may show the whole 3% separately if he cares to, but at least 1½% must be shown on the invoice from either wholesaler or manufacturer. Of course in the case of the wholesaler selling direct to the retail trade this is all the tax that would be shown in any case, but the case of the manufacturer is somewhat different.

Some manufacturers have advised Hardware and Metal that some retail hardware merchants have drawn this statement to their notice stating that they should only be showing 1½% instead of 3%.

Obviously in leaving this matter optional with the manufacturer to the extent mentioned, the idea has been to give the manufacturer who sells direct to the retail trade the same apparent responsibility for taxation as the wholesaler and so as not to make it appear to the retailer as though the manufacturer was collecting a higher tax and therefore a higher gross charge for the goods than the wholesaler selling the same order of goods to the retailer. Nevertheless the tax amounts to practically the same thing on the goods when they reach the retailer, whether they come direct from the wholesaler or the manufacturer, but in the latter case if only 1½% is shown on the invoices the manufacturer is absorbing the other 1½% because no matter what percentage he shows on invoices, he must make a return of 3% on each sale to the retail trade and 1½% on each sale to the wholesaler.

Getting the Business

ONE of the largest merchandising firms on this continent having branches in all the principal cities of United States and Canada, has passed through the period of curtailment so far successfully, and in passing through has been gathering much information from experience.

In one of the United States branch offices it was found necessary some time ago to curtail expenses as the overhead was making the place top heavy. So it was decided to take some of the men from the sales force. This was done twice until there were only three salesmen left in the place. Finally word came, after surveying the figures from this office that it would be necessary to cut again, and two of the remaining three would have to go.

The manager of the local branch was faced with a peculiar situation. The three men were counted as good salesmen, and each of them had home and family responsibilities that could hardly be ignored. In order to let himself out and be fair to them all, he called the trio to his office, explained the whole matter, and put the proposition to them that the one showing the best month's business should be retained. They all agreed that such a chance was as fair a bargain as they could ask, and they started out on the trial.

At the end of the month the three men came in and compared figures. It was found that in each case they had piled up business larger than any month preceding it this year, and their sales were so satisfactory that none of them was let go.

That happened just a few weeks ago, and those three salesmen are at it again for another record month. They are not only saving themselves, but they are hunting up business here, there and all over that is going to be the means of keeping other men employed.

They were all of them good salesmen before, but they are better salesmen now, and they will be better still when business conditions improve. Any man who is going through the furnace now is going to come out stronger and more efficient for future business.

The experience of that firm backs up the contention that has been put forward a good many times recently, viz., that right now there is business for the man who goes out to get it. The trouble is there are too many going out with the expectation that they are not going to get anything.

The Case for and Against the Sales Tax

Sales Tax is Good Revenue Producer—Lifts Burdens of Unwise Taxation—Does Not Add as Heavy a Burden as at First Appeared —In Competition Some Stages of Turnover May Be Eliminated

NOW that an extension of the sales tax principle has been made effective in Canada for the collection of revenue it is interesting to note some of the arguments for it and to point out the weaknesses of many of the arguments against it. Generally speaking, many of the foremost economists believe that a sales tax lifts many of the burdens of unwise taxation which paralyzes industry and destroys business initiative. The world over this method of taxation has met every test as a revenue producer. As industries, businesses and individuals must buy their supplies and spend money on their needs whether they are making profits or not, whether they are growing richer or poorer, there is always in the sales tax the sure source of revenue upon which the Government must be able to count absolutely.

The retailer adds the percentage of the tax to the price of his goods, where desired, and calculates it just like rent or clerk hire or any other regular overhead expense of doing business. So he is really only a collector of the tax. It is passed on from raw material through manufacturer, wholesaler and retailer.

Does Not Add Heavy Burden

But do not imagine that this adds any heavy burden. If an article requires ten turnovers and pays 1½ per cent. on each process this does not add 15 per cent. to the cost. On the contrary, on the eleven turnovers required, for instance in the manufacture of a rubber tire, the total amount added to the cost to the consumer would be about 4¾ per cent.

This form of tax has been administered in the Philippine Islands for some years and is one of the biggest revenue-producing items. The tax is popular in that the whole tax burden is distributed among all and to each according to his ability and willingness to pay. It is not a tax against the living wage and can be defended on the ground of social justice. The tax rate is small and can be shifted and is not heavily accumulative. It is easily assessed and fully collected at a reasonable expense and without harassing the taxpayers.

At first there were protests against this tax in the Philippine Islands and these protests were much the same as are now being advanced in this country, but after sixteen years of experience these protests have disappeared.

Figuring this matter on the basis of a general sales tax of 1 per cent. the maximum increased cost to the ultimate buyer even with a large number of turnovers would be but 3¼ per cent., while the average would be 2½ per cent., according to an analysis of the matter by the Tax League of America.

CONCRETELY, THE ADVANTAGES OF A GENERAL SALES TAX ARE:

1.—It will undoubtedly produce all the revenue needed.
2.—Under it the flow of revenue will be prompt, constant and dependable.
3.—It will be paid by the whole body of the people, but in infinitely small amounts by each individual.
4.—It is simple in operation and will be promptly, completely and economically collected without burdening anyone.
5.—When supplemented by a moderate income tax it will rest equitably on all.
6.—It will abolish the present harmful method of class taxation and business will promptly get back on its feet and prosperity return.
7.—It will reduce the high cost of living without reducing the profits of the producer.

How It Works on a Rubber Tire

Figuring out an actual calculation, the following figures show the amount of taxation after the completion of the final process in the making of a rubber tire:

30 x 3½ Cord Tires, Retailing at $25 10		Tax at 1%
1. Crude Rubber used at importation cost	$ 5.35	$ .0535
2. Raw Cotton used as imported	3.00	.0300
3. Raw Cotton used domestic growth	.40	.0040
4. Imported Cotton into Yarn	4.20	.0420
5. Domestic Cotton into Yarn	.80	.0080
6. Yarn into Fabric	5.50	.0550
7. Yarn into Fabric	1.00	.0100
8. Miscellaneous Pigments.	.70	.0070
9. The above materials converted into tires by the manufacturer, who sells them to the Franchise Dealer	28.45	.2845
10. Franchise Dealer sells them to the Dealer	29.90	.2990
11. Dealer sells them to Consumer	35.10	.3510
Total Tax on price for Consumption		$1.1440

Arguments Against Sales Tax

The principal arguments that have been advanced against the sales tax are concerned with one of three aspects, namely, equity of distribution, the effect upon business organization and the administration of the tax, says the Commerce Monthly. Upon grounds of inequity the sales tax is opposed by two groups of arguments, each one of which, however, arises from a different viewpoint. In the first case it is assumed that the tax will nearly always be added to the price of the commodity sold, and that since the larger part of the consumption of the nation is represented by the family budgets of the poorer classes and the lower middle class, the major portion of the tax will rest upon the masses of the people. For example, in 1910 more than 70 per cent. of the total consumption expenditures in the United States was made up of the expenditures of families having incomes less than $1,800.

In the second place, the equity of the tax is assailed on the ground that in important cases the sales tax cannot be shifted and under such conditions places a severe burden upon those concerns that have numerous turnovers during the year. The corporation with a large turnover at a low per unit profit bears a much heavier burden than another corporation with a small turnover at a large per unit profit.

From the business point of view two additional arguments are presented, namely, while the income tax places the burden upon the business enterprise only when net earnings are made and therefore at a time when the business unit will not be embarrassed, the sales tax, in so far as it cannot be shifted, must be borne in times of business depression as well as in good times. It may place a heavy burden upon the corporation at the very time when it can least afford to bear it.

Eliminate Steps in Turnover

Furthermore, it is asserted that where large organizations may compete with smaller ones, the former may, by a series of combinations, eliminate some of the steps in the sequence of turnovers from the production of the raw product to the final sale to the consumer, and therefore the accumulated tax burden that would be added to the price by the large organization would be less than the accumulated burden that must be paid by the series of smaller organizations with which it competes. It is argued that if the rate is high the tendency will be to drive the smaller organizations into the larger combinations or altogether to drive them out of business.

Concerning the administration of the tax, it has been repeatedly asserted that unless a large number of collectors were employed in every part of the country,

Events in the Trade

BUSINESS CHANGES

Guelph, Ont.—J. P. Hammill, of Galt, Ont., has purchased a hardware business locally.

PERSONAL

F. Roy Sumner, of the Sumner Co., Moncton, N.B., was in Ottawa recently, a delegate from the Retail Merchants' Association on freight rate matters.

W. Bruce Morrow, mfg. agent, Toronto, is confined to hospital, undergoing an operation. He will most likely be laid up for a month.

R. P. Dickson, manager for Sumner Co., Ltd., Moncton, N.B., was the speaker at a recent Rotary Club luncheon and gave a very interesting address on the Hardware Business.

Norman R. Howden, London, Ont., hardware wholesaler, has purchased what is said to be one of the finest private steam yachts on the continent. Mr. Howden went to New York to complete purchase arrangements, and is shortly expected to arrive at Port Stanley aboard his new purchase.

Geo. P. Fraser, representing Campbell Agencies, Toronto, left on his Eastern trip last week and reports very gratifying business. He will be in Montreal next week, and will continue his trip through to Newfoundland. The results reported so far are said to indicate a pleasing revival in business.

E. T. Hart, who for some years represented H. S. Howland & Son Co., afterwards Kennedy Hardware Co., Toronto, recently sold out his business in Niagara Falls, Ont., and is now on the sales staff of Campbell Agencies, Toronto, and will confine his labors to the City of Toronto and Ontario territory.

ACTIVE INDUSTRIAL CONDITIONS IN BRANTFORD

Brantford, Ont.—An industrial census of Brantford covering all local industrial plants shows that of the 48 largest only two have less than 50 per cent. of their employees at work, save those which are totally closed, four of the factories are employing more than normal.

The Brantford Roofing Company a few days ago commenced the use of a night staff and by so doing increased the number of employees on its payroll to 40 per cent. above normal. A. J. Reach Company has slightly over five per cent. more employees than usual. Fifteen factories are employing their full regular staff. Such large concerns as the Verity Plow Company, Watson Manufacturing, Brantford Cordage Company, American Radiator Company, are included in this list.

W. S. FISHER.

President Enterprise Foundry Co., Sackville, N.B., and Vice-President of Emerson & Fisher, Ltd., hardware, St. John, N.B., who was elected President of the Canadian Manufacturers' Association at the annual convention in Quebec City.

E. T. WRIGHT CO. EXTENDS RANGE OF PRODUCTS.

The E. T. Wright Co., Limited, of Hamilton, Ont., announce that thay have taken over from the Ontario Lantern & Lamp Co., the stock patterns and manufacturing rights of Banner, Trulite & Climax Lanterns, and are now prepared to supply the trade with any of these lines.

NEW BUILDING FOR CANADA CEMENT CO.

Montreal.—Building operations on the new ten-story building for the Canada Cement Company, Ltd., will be commenced at once. Concrete and reinforced concrete construction will be used throughout, at a cost in the neighborhood of two million dollars, and the building will have a frontage of 120 ft. on Phillips Square. There will be approximately 14,000 square feet of rental area on each floor. Contractors are George A. Fuller Co., Ltd., Montreal.

ELECTRICAL INDUSTRY FOR WELLAND

Hydro Appliances, Ltd., recently organized with an authorized capitalization of $200,000, has purchased a plant at Port Robinson, near Welland, Ont., formerly occupied by Dominion Canners, Limited. The company will manufacture a line of electric appliances, concentrating on an electric washer and an ironing machine. The organization expects to have machinery installed ready for manufacturing operations within the next thirty days.

ADDITIONAL SURTAX ON IMPORTS INTO NEWFOUNDLAND.

According to a telegram from the Deputy Minister of Customs, St. John's, Newfoundland, to the Canadian Manufacturers' Association, Toronto, an additional surtax of 25 per cent. of the duty will in future be levied on imports into that colony. This 25 per cent. is in addition to a 10 per cent. surtax which has been in effect for some time. The Deputy Minister of the Newfoundland Customs explains the surtaxes as working out in this way: "Thus if duty levied per tariff rate amounts to $100, 10 per cent. thereon would be $10, total $110. Add 25 per cent. equals $27.50; total duty $137.50, or a total surtax equal to 37½ per cent." The surtax went into effect May 26.

TRADE REVIVAL IN HAMILTON

Hamilton.—The Steel Company of Canada will operate four days a week on an eight-hour-per-day schedule, commencing next week. Work will be afforded to hundreds of mechanics and unskilled workmen who have long been idle. The Canadian Westinghouse will also be busier. Some departments which have been working four days a week will now carry on five days per week. The moulding shops, which have to the present operated four days in two weeks, are to work four days weekly. A big contract was given a local firm last week by the Japanese Government.

GATHERING OF McCLARY BRANCH MANAGERS.

Branch managers, from Halifax to Vancouver, of The McClary Mfg. Co., Ltd., were the guests of J. C. Newman, Montreal Manager. Following the convention of all branch managers at the head office in London, the Hamilton, Brantford, Toronto, Montreal and Quebec warehouses were visited.

ARGUMENT FOR BICYCLE AND AUTO LOCKS.

Official statistics show that during the past five months, 1000 bicycles, worth $38,000, have been stolen. Of the number stolen, 445 have been recovered, but of these only 347 have been claimed by owners. So far this year 433 automobiles have been stolen and all but 19 have been recovered. This represents a loss of close to $40,000. Last year, of 1149 cars stolen, 63 were not recovered.

WESTERN NOTES.

O-Rib-O Manufacturing Company, of Winnipeg, have been appointed representatives for Tuttle & Bailey, of Bridgeburg, Ontario, manufacturers of hot air registers and gratings, and will carry a complete line for Western Canada. Mr. Brockest, accompanied by Mr. P. Gordon, manager of Tuttle & Bailey, has just returned from a trip through the West and finds business conditions improving.

Kamloops, B.C.—Kamloops Hardware Co., a new firm, in charge of J. R. Michell, formerly of E. G. Prior & Co., has opened here.

SUMMER COTTAGERS BRING ACTIVE PAINT BUSINESS

The summer colony have moved into Port Stanley, Ont., and district, much earlier this year than usual, and, according to J. H. Burke, hardware merchant, the cottagers are painting with a vengeance. He states that never has there been as much painting done before in any one season. This is accounted for by the fact that most people neglected this work during recent years due to high prices and times of depression.

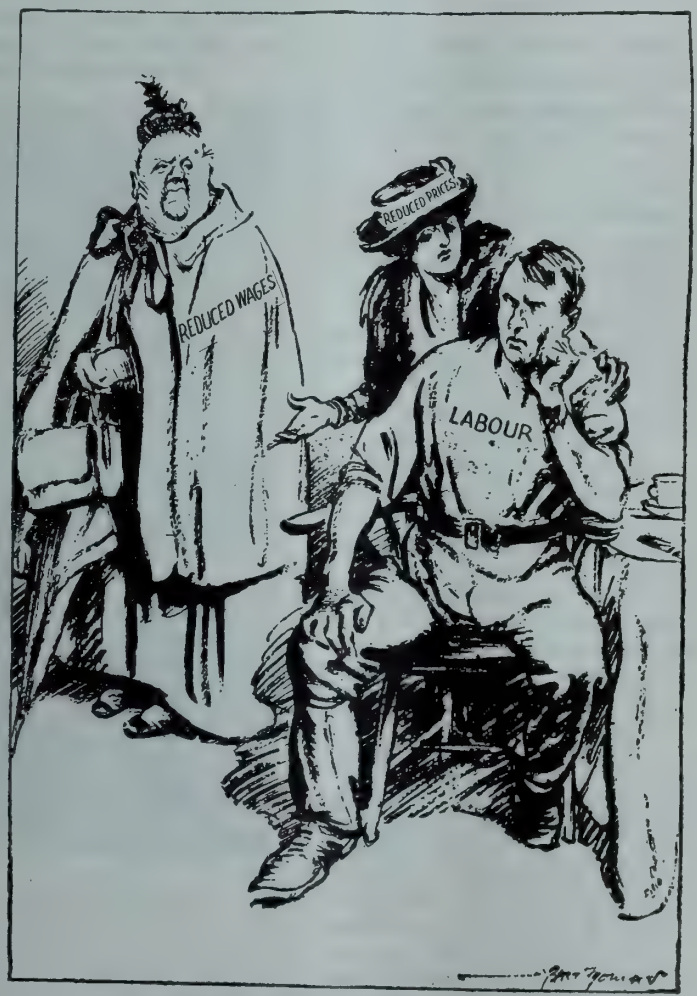
"I don't know what we would have done without Hardware and Metal during the war," said Mr. Burke, "it was positively the best means we had of keeping posted on prices." During the present recession in prices, Mr. Burke also finds the market reports especially valuable for keeping posted.

INCREASE FREIGHTS ON MACHINERY.

A movement is reported on foot for the railways to elevate the listing of machinery from sixth to fifth rate. Not only is a higher freight rate suggested through these sources, but the proposal contains an increase in the minimum of carload capacity from 20,000 to 24,000 lbs.

Such an increase would have to be reflected in the cost of machinery to the consumer, which, it is further pointed out, is in direct variance to public opinion and the general trend of prices at this time. The opinion in the trade seems to be that no increase in carload carrying capacity can be achieved in this manner, and that such revised regulations would fail, if that is the chief objective.

BUSINESS GRADUALLY IMPROVING



Speaking of conditions as affecting their particular branch of trade, A. T. Channell, President Channell Ltd., Toronto, stated that after the bad conditions of December, January, and February, business is gradually improving and although it has not yet reached the old standard of 1920, it is leaving 1919 behind. The future outlook is said to be the best that the firm have experienced for some time. It is the expectation that the last portion of the year will be better than the first six months, and if so it will be the first time in the history of this company in Canada that such a condition has existed. Generally the first half of the year has been better than the last half.

IMPORTED FIBRE FOR BINDER TWINE ONLY IS EXEMPT

The recent report of the amendments to the budget, as appearing in Hardware and Metal, after setting forth the statement that fibre for the manufacture of binder twine was exempt from the import taxes, made subsequent reference to the exemption of binder twine. Some merchants have interpreted this to mean that binder twine in its finished state is exempted from all taxation, but this is not the case. It is still subject to the sales tax of 3 per cent. if sold to the retail trade direct from a manufacturer, or 1½ per cent. if sold by a wholesaler to the retailer. Only the import tax on the raw materials has been removed.

MANTEL SUPPLEMENT

A new supplementary catalog covering mantels, grates, tiles and fireplace furnishings, has been ilsued by the Toronto Lock Manufacturing Company. The booklet is a supplementary to Catalog A, and contains new designs and revised patterns in the more prominent lines of this firm's products.

The New Bride.—"You must remember, dear, it was always understood that mother should come and live with us when we were married."

—Thomas in "World Wide."

Says Retailer is Conforming More With Replacement Value

Result of Analysis of *Financial Post* of Questionnaire to Bank Managers—Has Made Considerable Progress Since January—Result by Provinces.

IT will be remembered that the Financial Post in one of its issues in the early part of the year analyzed a questionnaire submitted to bank managers all over Canada in which it was claimed that the retailer at that time had not taken his loss, having in view the replacement value of merchandise carried on his shelves. This was the opinion of bank managers all over the country at that time; and the inference was that the retailer was holding up deflation more or less.

A second questionnaire has been submitted to bank managers across Canada and the analysis appearing in the issue of the Financial Post of May 20th shows that a different conclusion has been arrived at by managers. They are of the opinion that the retailer has taken a long step toward marking his goods on replacement value basis and that, since January, he has made considerable progress in this direction.

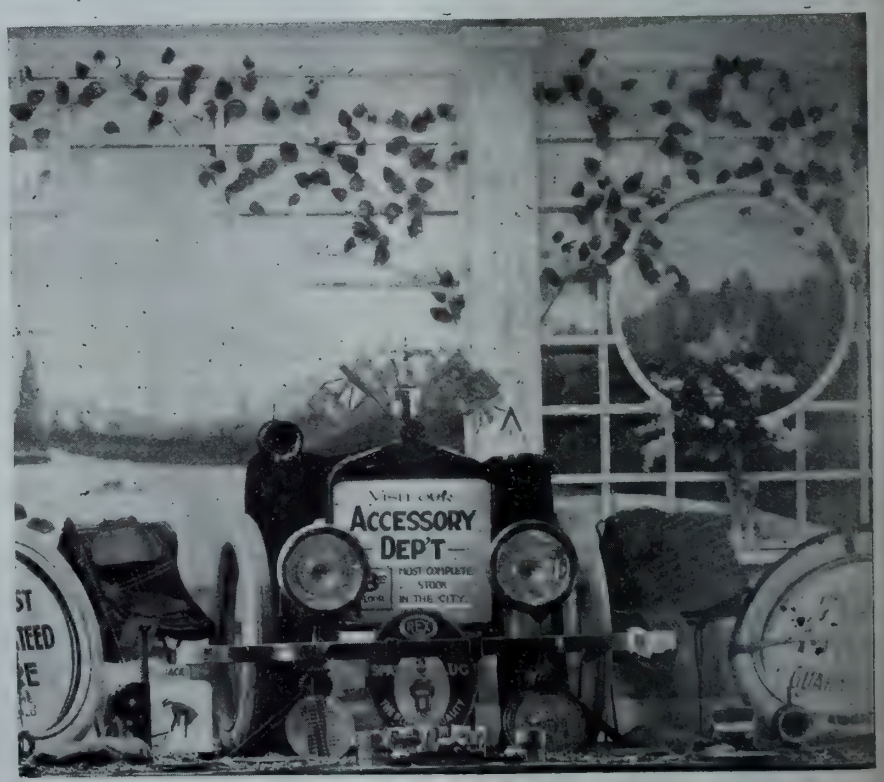
What the Post Says

Here is what the Financial Post says in its general analysis of the questionnaire submitted to the bank managers:

The Financial Post is in receipt of some hundred or more replies to a questionnaire submitted to bank managers across Canada. Several phases of the business situation are discussed, particularly applying to industry, to retail trade, to building and to agriculture. From a careful analysis of these replies it may be stated definitely that business on the whole throughout Canada is being conducted along restricted lines. The retailer is meeting altered conditions and is marking his goods down to conform more closely with replacement values. The extent of this reduction of course varies, but on the whole substantial progress has been made. One hopeful feature of the situation, as revealed through these replies is the fact that the retail trade has not suffered to the same extent as industrial lines of enterprise. The reports indicate that retail sales are continuing in practically as large a volume as for the corresponding period a year ago. In a number of instances a reduction is reported but when it is considered that the prices have been reduced since a year ago it is quite probable that the volume of goods actually handled is as large or larger. This condition removes from the consumer the onus of responsibility for the "buyers' strike." There is no strike among the consuming public although there is no doubt that the individual is buying more carefully, and in smaller quantities, but he comes back to the market oftener. The retailers are however, adopting a conservative policy and are strictly limiting purchases to meet immediate needs only. Stocks in retailers' and wholesalers' hands must be cleaned up before manufacturers will again find anything like a normal demand.

Summary of Provinces

The article in the Post is a lengthy one, but such parts of it as deal with the retail trade are of considerable interest. Conditions, generally, in British Columbia are improving and there is a feeling that the worst is over. "In the smaller centres of British Columbia," says the Financial Post, "the retail dealers have been loath to cut prices, but the fact that a large number of consumers have been sending to the larger cities for their supplies has compelled action in this respect."



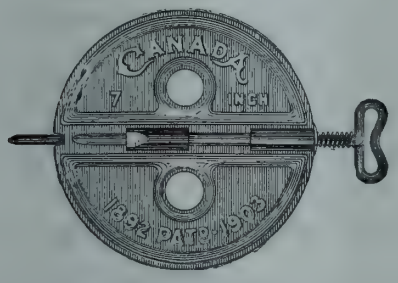
From the prairie provinces reports come that the crop outlook has im-

(Continued on Page 54)

Continued from Page 39.

widespread evasion would result. It is believed, however, that this objection has been suggested rather by a sense of the difficulties of our income tax administration than by a familiarity with sales tax administration.

The Canadian sales tax is not a general turnover tax nor is it a general commodity sales tax. The sales tax proper is levied only upon the commodity sales of manufacturers, wholesalers and jobbers. In general the sales of farmers and others engaged in extractive industries, as well as the sales of retailers, are excluded. Very many important exemptions are also allowed, including materials used for the production of heat, light and power, some foods, etc. A double schedule of rates is provided imposing a certain per cent. tax upon both sales and importations by manufacturers, wholesalers and jobbers. A higher rate is imposed upon importations by retailers and consumers and upon sales by manufacturers direct to retailers or consumers. The latter provision in part compensates for the advantage that a uniform rate would give to the larger corporations that are able to eliminate several turnovers by integration of industry.



The reductions in prices of motor cars now being announced by practically every manufacturer coupled with the expected influx of tourists to Canada during the summer are two factors which should more or less directly affect auto accessory trade. Displays of a wide range of accessories such as is shown herewith, should be used frequently at this season of the year to better acquaint prospective customers with the lines which they can purchase at the hardware store.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

CANADA STOVE DAMPERS

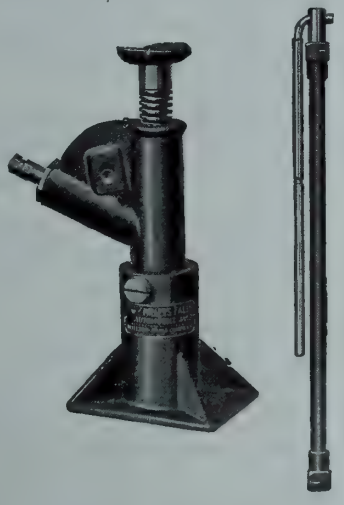
The Canada steel damper is a new product being manufactured and marketed by the Myers Manufacturing Company, of Dresden, Ont. Special features claimed for these 6-inch and 7-inch

dampers include the drop-forged stem, the positive lock, the sharp point, and the fact that they are stamped from 21 gauge steel. The manufacturers claim that strength, lightness and economy are thus assured. The furnace dampers are stamped from 26 gauge steel. Various sizes to suit every damper requirement are embraced in the Canada line being produced by this company.

HOUSEHOLD SCALE.

A household scale with a capacity of 16 lbs. is one of the recent new lines manufactured by the Burrow, Stewart & Milne Company, Ltd., Hamilton, Ont. It is made on the suspension beam principle, with a firm wall bracket, thus supplying weighing service without any loose weights. The beam is nickel-plated, with the figuring in clear vision. The makers also point out that the base or pan, being of white porcelain, can be easily cleaned.

"EASY VACUUM" ELECTRIC WASHING MACHINE WITH NICKEL-ZINC TUB.



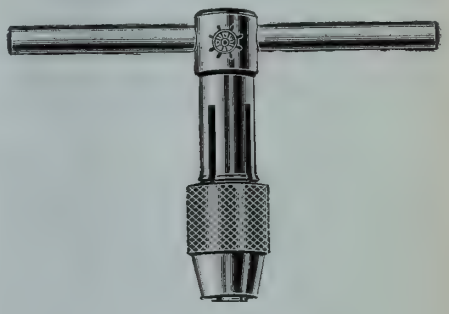
The Easy Washing Machine Company, Toronto, have announced the placing on the market of a duplicate of their Model H, electrically driven washing machine, with the difference that the tub is now being made of nickel-zinc, instead of copper. The new departure has been devised in order to meet the demand for a more popular-priced machine, and the manufacturers point out that this newly devised style is identical with the standard model, with the exception of the tub, as stated.

The standard Model H, with its copper tub, is stil being retained on the market, but this product is naturally of higher value. The makers claim that the nickel-zinc body is non-corrosive, and altogether equally as efficient in operation as the more-established make. A protection is also being applied over motor and gears, this feature enclosing the moving parts.

AUTO JACK

A new auto jack has been placed on the market by the Millers Falls Company. The makers claim that the worm gear principle which it employs not only eliminates friction, but pawls, springs and ratchets as well. There are no intricate parts to get out of order.

A broad rectangular base insures a good footing, it is claimed, on all surfaces. The jack has a lifting capacity of two tons. As the handle is slipped into place it automatically locks. A light



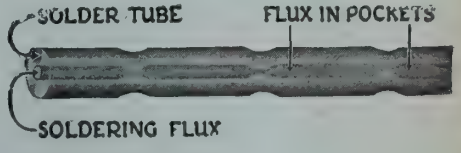
pressure of the locking pin allows it to slip off easily. The body of the handle is of steel tubing. The telescopic rod is 3-8-inch hexagon cold rolled steel. It folds to a minimum of 18 inches and extends to 36 inches.

ALUMINUM EGG POACHER

A new aluminum egg poacher has recently been put on the market by the Aluminum Specialty Co. of Canada, 60 John Street, Toronto, Ont. This new egg poacher, it is stated, will sit in any utensil for poaching or boiling eggs. It is strongly made and highly polished and should find a ready sale for aluminum kitchen "showers" on account of the moderate price and being both novel and practicable.

ADJUSTABLE TAP WRENCH

This is a handy wrench which is adjustable for taps, drills, reamers and all tools of a similar nature used in garages



and machine shops. They are made of solid bar steel, the makers claim, and are accurately machined, with a ground and polished finish.

KESTER ACID-CORE WIRE SOLDER

This is a solder that combines solder and flux. As shown by the illustration, the flux is contained in little pockets in the hollow wire of the solder. As the solder melts the flux is released and flows out on the part to be soldered.

The elimination of the separate fluxing operation, it is claimed, saves one-half of the workman's time. Perfect fluxing is assured. The solder and flux, the makers say, flow out on the job together in just the right proportions to assure a perfect weld. Hard-to-get-at places almost inaccessible any other way, are easily and quickly reached. It is made in two forms—

acid-core wire solder for general and automotive work for soldering all metals except aluminum, and rosin-core wire solder for delicate electrical work. It is manufactured by the Chicago Solder Co.

Trade Enquiries

Names and addresses of enquirers can be obtained only by those interested in such lines upon application to Hardware and Metal. Please quote reference number when requiring addresses.

3114. **Electric supplies and fixtures.** — A Belgian manufacturer wishes to receive quotations and catalogues on electric supplies and fixtures.

3115. **Paints and varnishes.**—A Belgian commercial agent wishes to receive particulars of Canadian paints and varnishes for export.

3118. **A commission merchant of Havana, Cuba,** wishes to represent and get in touch with Canadian manufacturers and exporters of the following products: Construction materials; chemical products; paints and varnishes. References.

3119. **Asbestos, rubber goods, and belting.** —Present representative in Scotland of large United States manufacturers of rubber articles desires to acquire instead agency for asbestos goods of every description, rubber goods, and belting manufactured by Canadian firms—agency to be not only for Scotland, but also for re-export.

3121. **Piping.**—A firm of engineering agents in Johannesburg inquire for 15,000 feet of 4-inch black screwed and socketed piping (Stewart & Lloyds' standard thread), weight to be 8.3 pounds per foot, and capable of standing pressure of 300 pounds per square inch, coated inside and outside with Dr. Angus Smith's solution; also for 100 4-inch sluice valves, with socket ends and cap tops, gunmetal spindles, etc. Prices f.o.b. Canadian Atlantic port or c.i.f. Cape Town and particulars as to shipment, possible date of delivery after receipt of order, terms of payment, etc.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

Wm. Lawrie, merchant, Forest, Ont. — Would you kindly inform me where I can get repairs for the One-Minute washer?

Answer.—The One-Minute washing machine is manufactured by the One-Minute Manufacturing Co., Newton, Iowa, U.S.A.

Norfolk & Rochester Hardware Co., Ltd., Haileybury, Ont.—Will you please inform us where we can obtain speaking tube whistles?

Answer.—The James Morrison Brass Manufacturing Co., Toronto, Ont.

C. R. Watcher, Ailsa Craig, Ont.—Will you please inform us where we can procure Spalding sporting goods?

Answer.—From A. G. Spalding & Bros., 207 Yonge Street, Toronto, Ont.

Peart Bros. Hardware Co., Regina, Sask. —We would be glad if you will give us names of manufacturers making steel factory sashes, other than the Steel & Radiation Co. and the Concrete & Steel Co.

Answer.—The Metal Shingle & Siding Co., Ltd., Preston, Ont.

G. M. Howell, Brantford, Ont.—Could you inform me where I can procure iron chairs, such as are sometimes used the cemeteries?

Answer—We are referring you to the following list covering the names of the principal Canadian firms engaged in the manufacture of ornamental iron work and a number of them should be in a position to satisfy your requirements.

Aikenhead Architectural Metal Works, Ltd., Toronto, Ont.; The Architectural Metal Co., Ottawa, Ont.; W. D. Beath & Son, Ltd., Toronto, Ont.; Canada Wire & Iron Goods Co., Hamilton, Ont.; Canadian Ornamental Iron Co., Torontod, Ont.; Canadian Welding Works, Ltd., Montreal, Que.; Dennis Wire & Iron Works Co., Ltd., London, Ont.; Geo. B. Meadows Wire, Iron & Brass Works Co., Ltd., Toronto, Ont.; John Watson & Son, of Montreal, Ltd., Montreal, Que.

G. W. Millard, Port Hope, Ont.—Will you kindly send me the names of parties who manufacture the Jack Frost ice-making refrigerator?

Answer—The Jack Frost machine is manufactured by the Toronto Laundry Machine Co., Toronto, Ont.

Scriven & Rutherford, Tilbury, Ont.—Will you please give us the names of firms making sporting goods?

Answer.—The following is a list of Canadian firms engaged in the manufacture of sports supplies:—

Walter Bentley & Co., Ltd., Niagara Falls, Ont.

The A. J. Reach Co., Brantford, Ont.

Western King Mfg. Co., Ltd., Winnipeg, Man.

Harold A. Wilson Co., Ltd., Toronto, Ont.

Winnett & Wellinger, Ltd., Toronto, Ont.

ARE YOU NEGLECTING THEM TOO?

"What do you need to make your business more profitable?" was asked a paint dealer recently.

"More volume of sales, of course," was the reply.

"Are you taking advantage of every opportunity to increase your volume?"

"I thought I was; why?"

"See those two men on the roof of that house over yonder; what are they doing?"

"Reshingling the shack," said the dealer without seeing the point.

"Why?"

"Oh, old shingles rotted; that's a common occurrence."

"The siding seems to be sound."

"Sure," said the dealer, "the siding's painted."

"You sell shingle stain, don't you?"

"Yep; need any?"

"No, but I think that fellow who is reshingling his house over there needed some pretty badly a couple of years ago. Why didn't you sell him some? Can you see a single shingle roof from here that is stained? I can't. Every one bare as a newborn babe, and every one of them will have to be reshingled before many moons. And yet you say you need more volume of sales to make more money in the paint business. Did you ever take the trouble by advertising, by circularizing, by personal solicitation, by letter or any other way to point out to the owners of shingled buildings that their roofs needed protection from the elements as well as their side walls, and that they would decay and have to be replaced if they didn't have it?"

"By jingo!" exclaimed the dealer, "I never did; but say, old top, I'm going to do that little thing beginning this very day. I see a lot of volume in that idea. Wonder why I never thought of it before?"

Catalogs and Booklets

A review of new catalogs, etc., as published by manufacturers, wholesalers and others in the trade for the information of hardware dealers.

IRON WORKERS' TOOLS

The Stanley Works have recently issued a new booklet illustrating various lines of structural iron workers' tools, which are manufactured by the Atha division of the Stanley Rule & Level plant.

STANLEY MITRE BOX

Of interest chiefly to carpenters and builders is the new folder covering the Stanley mitre box, which booklet has been recently issued by the Stanley Works.

This firm has also ready for distribution a folder illustrating the Stanley line of nail hammers.

ENTERPRISE BLAZER PIPELESS FURNACE

The Enterprise Foundry Company, Limited, Sackville, N.B., have issued an eight-page illustrated booklet featuring the Enterprise Blazer Pipeless Furnace. The booklet gives some interesting information regarding the operation of pipeless furnaces. Copies will be supplied to the trade upon request.

SUPPLEMENT ON LUFKIN MECHANICS' TOOLS

The Lufkin Rule Company of Canada, Limited, Windsor, Ont., have issued a twelve-page supplement to their catalogue featuring their new line of mechanics' tools, including depth gauges, thickness gauges, combination squares, combination sets, centre gauges, etc. Copies of the new supplement will be supplied upon request to the Lufkin Rule Company of Canada, Limited, Windsor, Ont.

SANDPAPER SALES TIPS

A very useful and instructive booklet has been compiled and published by the Wausau Abrasives Co., Wausau, Wisconsin, entitled "Sandpaper Sales Tips," and contains among other interesting hints on "making your sandpaper stocks draw trade for more costly goods." It is stated that sandpaper is a little thing, it's the little things that sell the big things. The booklet contains illustrations of window displays in which sandpaper and other abrasive products are featured, some of the uses to which this commodity can be put, hints on using, selling and advertising, and also an illustrated description of the method of manufacture of sandpaper and emery cloth, etc.

BOOKS ON "ARMCO" PRODUCTS

One of the most recent publications of particular interest to all branches of the metal trades is the book, "Armco, In Pictures and Fact," now being distributed by the American Rolling Mill Co.

In a brief historical sketch, the advancement of the iron and steel industry is received from its earliest days until the present time. The book is splendidly illustrated with a plentiful supply of photographs showing the various stages and processes of manufacture from the raw materials, the special treatments accorded various grades of metal, and the methods of producing the finished articles.

Pictures of typical mill equipment are instructive as well as interesting; and a portion of the book is devoted to reference and computing tables, with other useful information. Views of laboratory tests and a summary of the different Armco products, are also included.

The central works and head offices of the American Rolling Mill Company are at Middleton, Ohio, which is also the original home of Amco iron. The Canadian district office of the firm is at 2 Colborne street, Toronto, Ont.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

REDUCTIONS continue to be the feature of the current hardware market quotations. Among the declines noted this week are copper and brass tubing and sheets, a lower range on cotton waste prices, both white ad coloured, a reduction in one line of wrenches, and faucets are also on a lower level. Other lines reduced are asbestos paper, and a revision in discount to a lower price basis is recorded on one line of valves. Scrap metal prices show slight declines, while the market reaction has been reflected in ingot metal quotations.

With the exception of an increase in the price of linseed oil, other products are maintained at previous levels. An improved demand has been recorded on corrugated sheets, conductor pipe and eavestrough, and pipe fittings. The range boiler situation remains unsettled, and a further readjustment in prices is looked for.

Montreal Markets

MONTREAL, June 9th.—Price changes this week cover some very important lines, namely; spades, shovels and scoops. These are lowered through a change in discounts, and are now quoted at 45 per cent. off list. Lanterns, both short and long globe pattern, are now $12.00 a dozen, a reduction of $3.00 being made. Joker mouse and rat traps also have new lower prices. On the heavier lines of hardware, no change is made in quotations, and little change is noted in the demand. They are practically all moving slow on the market at present.

Spring business is keeping up fairly well but a slight slackening off has taken place during the past week, jobbers stating they are expecting a little less activity now as the warmer weather approaches.

Lanterns Now $12.00 Dozen

Montreal.

Cold blast lanterns have been reduced from $15.00 to $12.00 a dozen this week. This applies to both the short and long pattern.

Spades, Shovels and Scoops Down

Montreal.

Through a change in discount, shovels, spades and scoops are reduced in price. The discount is now 45 per cent off list, formerly being 35 per cent.

Joker Mouse Traps Reduced

Montreal.

Joker mouse traps have been lowered and they are now quoted at $4.30 gross.

Lead Products Firm; No Advances

The market tendency of all lead products remains fairly firm, notwithstanding the recent weaker tone of pig lead on the primary markets. This metal in the ingot stage has been reported with a falling off in the last two weeks from the strength of previous weeks. However, with the finished products no reflection has been cast as yet. With the demand fair, prices are unchanged as follows:

Lead pipe	0 12½
Lead waste	0 13½
Note.—Lead pipe is subject to a discount of	10%
Couplings Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 11
Do., 3 to 3½ lbs. sq. ft. lb.	0 10¾
Do., 4 to 8 lbs.	0 10
Cut sheets ¼c. lb. extra and cut sheets to size, ¾c. lb. extra.	
Solder, guaranteed, lb	0 29
Do., strictly, lb.	0 27
Do., commercial, lb.	0 24
Do., wiping, lb.	0 24¾
Do., wire, lb.	0 37½
Zinc sheets, casks	0 13
Do., broken lots	0 13½

Iron And Steel Slow

Montreal.

Little change is to be reported in bar iron and steel. Sales are of a small order, with little improvement looked for among the jobbers during the summer months. Quotations on the different grades are holding at $3.70 base.

IRON AND STEEL BARS

Common bar iron, 100 lbs	3 70
Refined iron	5 20
Iron finished machinery steel	3 75
Mild steel	3 70
Band steel	3 70
Single reeled machinery steel	5 75
Spring steel	5 00
Sleighshoe steel	3 70
Tire steel	3 90
Toe calk steel	4 60
Harrow tooth steel	3 85
Mining tool steel, per lb.	0 23
Black Diamond tool and cast steel	0 23

NOTE.—Refined iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.
Band steel in scroll bdles., 50c. per 100 lbs. extra.
Flats, iron and steel, 3-16 and thinner, 50c. per 100 lbs. extra.

Pipe Fittings Prices Steady

Montreal.

Conditions in general with regard to pipe fittings are unchanged. Quotations on the many lines are held while sales are small and significant that dealers are only buying to sort their stocks foractual requirements. Prices on the various kinds are the following:

PIPE FITTINGS

Cast iron fittings	20%
Bushings, cast	30%
Do., malleable	30%
Flanges	27%
Plugs	22½%
Flange Unions	20%
Malleable Unions	40%
Dart Unions, black	29%
Do., galv.	8%
Nipples, ⅛ to 4 in. close and short	40%
Do., long	50%
Do., 4½ to 8in., close and short	30%
Do., long	40%
Couplings, 4 in. and under	20%
Do., 4½ in. and larger	Net list

Pound goods—	Black	Galv.
Class B	0 20	0 28
Class C	0 13	0 20

Boiler Quotations Unsettled

Montreal.

Range boilers are still selling under the following list although it was thought by some wholesalers that a revised list would be issued this week, raising the prices on practically all sizes. Prices continue unsettled with sales light, the 30 gallon boiler being practically the only size moving. Local quotations follow;

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	8 75	11 25
35 gallon	11 25	.....
40 gallon	13 50	16 00
52 gallon	20 00	.....
66 gallon	28 00	.....
82 gallon	35 00	.....
100 gallon	45 00	.....
120 gallon	54 00	.....

Rat Traps Reduced

Montreal.

The Joker rat trap will now sell for $1.35 a dozen, a reduction being made this week.

Ingot Metals Continue Easier

Montreal.

Quotations on most metals in the ingot markets are slightly lower, while the undertones are generally easier. The demand is now very limited, a slight slackening being noticed in the past week or ten days. Much depends on the coal strike in England, with regards future trend and activity, and an early settlement is hoped for in this direction.

TIN.—Tin has eased appreciably in London and the market looks weak at the moment. Doubtless there will be an improvement as soon as the coal strike is over. Local price is fairly steady at 38 cents, owing to a scarcity of supplies.

COPPER.—Owing to the severe decline in exchange, European buying has ceased with the result that market is easier. Present prospects are for a dull market for a time. Quotations are 18¼ cts. for electro, and 18 cts. for casting.

LEAD.—London has had a fairly sharp decline but recovering to some extent while the American market is also lower. The decline will probably not go much further, but the demand is very limited at present. Local price is now 7 cents.

SPELTER.—Spelter has had a sharp decline in London, and East St. Louis has also touched a new low point of $4.50. The market is weak at present and present prices are considered very low. A recovery would seem to be in order with this metal. Prices are found 7¾ cents to 8c.

ANTIMONY—This metal is being offered for shipment from the East at a very low basis, and there is no sign of improvement. Quotations are unchanged at 7½ cents for Chinese and 8½ cents for high grade English.

ALUMINUM.—Quotations on this metal are held at 33 cents although it also shows signs of weakness and continues dull on the market.

Toronto Markets

TORONTO, June 9.—Several reductions are evident in current hardware quotations this week. Among the price changes noted are reduced quotations on copper and brass tubing and sheets, and a revision of the discount on Emco valves to a lower price basis. Cotton wastes, both white and colored, have decreased from 1 to 2 cents on the various grades, and through a revision in discounts one line of faucets is now lower. Asbestos paper has also been reduced, and scrap metal prices show declines, while the reaction in the ingot metal markets has been reflected in some lower quotations.

The boiler tube market is dull, and a readjustment to a higher price level is looked for on range boilers. An easier tone is noted in lead and zinc products. Pipe sales are reported irregular, but an improvement in demand is recorded in pipe fittings, also on eavestrough and conductor pipe. The current demand for corrugated sheets has improved, and an increase in building activity is looked for to stimulate sales in soil pipe and fittings at this season. Small orders are prevalent in bar iron and steel, and similar conditions govern sheets and plates.

Readjustment Looked For On Boiler Prices

Toronto.

Some degree of unsettlement still pervades the range boiler situation. Due to the recent price-cutting, a new price list has been in effect; dealers hoping that the lower quotations would revive the market. A further price readjustment however, is looked for, manufacturers claiming that present levels are below actual value. Some jobbers also have maintained prices in advance of those generally quoted, being reluctant to sell at a distinct loss. Under these conditions, it is expected that a new list will be issued in the near future showing prices in advance of those given below, which quotes the average range at which boilers are selling locally;

RANGE BOILERS

	Standard	Ex-Heavy
30 gallon	$ 9.00	$11.50
40 gallon	13.80	16.50
52 gallon	20.40	25.20
66 gallon	28.80	34.80
82 gallon	36.00	47.40
100 gallon	45.60	56.40
120 gallon	55.20	64.80
144 gallon	78.00	93.00

Asbestos Paper Reduced

Toronto.

Current sales in roofing are reported good. Tar paper and sheathing are in seasonable demand, and dealers quote present business as satisfactory. A reduction is announced on asbestos paper, the current quotations being $12.50 per 100 lbs. The previous price was $13.50. There has been no other change recorded in these lines.

Cotton Waste Reduced

Toronto.

Reductions have been announced in prices on both white and coloured cotton waste. The extent of the decrease varies between one and two cents on the different grades. Demand is reported as fair, with the present market containing some signs of slight improvement. Following are the revised quotations:

WASTE	per lb.
Cream, polishing	0.19½ 0.20
WHITE COTTON	
XXX	0.18½
XX	0.16½
X	0.15½
XC	0.14½
XXX extra	0.17
XX grad.	0.16
XLCR	0.15
X empire	0.14
X press	0.13
COLORED COTTON	
Fancy	0.14
Lion	0.12½
Standard	0.11
Popular	0.10
Keen	0.09
No. 1	0.13½
No. 7	0.12½
No. 1A	0.11½
No. 1B	0.10½

Above lines subject to trade discount for quantity.

Irregular Pipe Sales

Toronto.

Prices on wrought iron and steel pipe are being maintained at List No. 51. Sales are small and of an irregular nature. A constant sorting of stocks is apparent, with dealers ordering very sparingly. The market in these products, however, is still dull, and very little improvement has been noted.

Faucet Quotations Lower

Toronto.

A reduction has been announced in the price of Perfection faucets, and the discount on these products is now quoted at 35 per cent. off list.

Oil Prices Now Steady

Toronto.

Quotations on lubricating oils, gasoline, and coal oils, remain unchanged this week; the recent price reductions announced in these lines still being maintained on local markets.

Reduced Quotations On Copper And Brass

Toronto.

The sudden reaction evident in the primary metal markets, has resulted in a decrease in the price of copper and brass. A 2-cent reduction has been announced on copper and brass tubing, while the base price of sheets is also lower 2 cents per lb. The local market in these products has been dull, and due to the revisions, an improved demand is looked for. The new quotations follow:

BRASS	
Sheets, base, per lb.	$0.27
Rods, base, per pound	0.27
Tubing, base, per lb.	0.34
COPPER	
Rods, base, per pound	0.32
Soft sheets, plain, 16-oz. and heavier, lb.	0.32
Do., plain tinned 16-oz. and heavier, lb.	0.40
Do., polished and tinned 16-oz. and heavier, lb.	0.45
Tubing	0.37

Lead and Zinc Easier

Toronto.

The tone in lead products is now a little easier, due to the recent fluctuations on the primary markets. Current local quotations remain unchanged, and a firm demand continues. Whether the reaction in the price of ingot lead reflects the future strength of this market, or is just a temporary decline, is too early to ascertain. The tone in zinc is fair and easier. Following are prevailing prices :

LEAD AND ZINC GOODS

Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subject to a discount of	10%
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft. in rolls, lb.	0 09½
Cut Sheets, ½c. to ¾c. lb. extra and cut sheets to size 1c. lb. extra.	
Solder, wire, per lb.	0 36½
Do., strictly, lb.	0 26
Do., commercial, lb.	0 23
Do., guaranteed, lb.	0 29
Do., wiping, lb.	0 23
Zinc sheets, per lb.	0 16

Binder Twine Orders In Smaller Quantities

Toronto.

The movement in binder twine for the domestic harvests is reported to be somewhat below the average at this season of the year. Consumers and merchants are not ordering in the same quantities as previously, and manufacturers report that they are likely to be handicapped in supplying requirements if an unexpectedly heavy demand should occur on the eve of harvesting.

No further change in rope and cordage prices has been recorded this week, the recent increases still being maintained. Distributors report that these price changes have stimulated business a little, but no outstanding demand is apparent.

Valve Discount Revised

Toronto.

A revision in the discounts bringing prices on Emco valves to a lower level, is the only change recorded on compression brass goods this week. The new discount on Emco J. D. and check valves is 20 per cent ; the previous quotation being only 10%. The reduction is in line with other revisions recently announced, and improved activity in sales of these products is looked for in the near future. The following quotations prevail locally :

Compression work, standard	37%
Fuller work, standard	30%
Bath cocks, compression	29%
Do., Fuller	25%
Flatway stop and waste cocks, standard	40%
Roundaway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	5%
J.M.T.	20%
J.M.T. C.	25%
J.M.T. Gate Valves	15%
Gate or straightway	16/10%
Jenkins Globe	10/10%
Radiator valves, standard	23%
Do,, removable disc	38%
BASIN COCKS	
No. 1 and 1, Fuller pattern	30%
Quick opening No. 3633	37%
Emco J. D. Valves	20%
Emco Check Valves	20%
Webber Gate Valves	15%

Sheet Demand Improves

Toronto.

The demand for corrugated sheets has improved and dealers report more satisfactory conditions now prevailing. Activity is evident in numerous small orders, seasonable business being anticipated in many quarters. Prices are unchanged and the present list follows :

CORRUGATED SHEETS

	Per 100 Sq. Ft.
No. 28 gauge	8 50
No. 26 gauge	9 25
No. 24 gauge	13 00
No. 22 gauge	16 00
No. 20 gauge	18 00
No. 18 gauge	24 00

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c. a square extra.

Slightly Better Demand For Pipe Fittings

Toronto.

The volume of sales in pipe fittings is now reported to be more satisfactory, and market conditions are returning to normal. Prices remain unchanged, and following are the current quotations :

Cast iron fittings	20%
Plugs, cast iron	27½%
Do., solid	10%
Do., countersunk	net
Bushings	30%
Unions, ¼-in. to 2-in.	40%
Do., ⅛ in., 2½ to 4 in.	35%

MALLEABLE FITTINGS

	Black.	Galvanised
Class A	0 60	0 75
Class B	0 24	0 34
Class C	0 15	0 24

Eavestrough In Demand

Toronto.

A good demand for conductor pipe, eavestrough and conductor elbows is now reported. Better weather conditions, coupled with the erection of numerous small buildings and minor house repairs has resulted in this seasonable activity. The present movement in these products is now stated as more satisfactory. Price quotations still remain at the new discount levels recently announced. Following are current prices:

TROUGH (Eave)

O. G., Square Bead and half round. Size in girth :

Per 100 ft.		Per 100 ft.
8-in.	$15 90	15-in. $28 80
10-in.	17 70	18-in. 36 50
12-in.	21 20	

Less 60 per cent.

CONDUCTOR ELBOWS—

2 inch, list	$5 25
3 inch, list	6 00
4 inch, list	10 50
5 inch, list	24 00
6 inch, list	29 00

Less 55 per cent.

Demand Is Small For Sheets And Plates

Toronto.

While local prices of sheets and plates are being well maintained, yet it is intimated that the lack of a strong market keeps quotations at their present level. In the southern steel markets, some unsettlement over sheet prices is evident, a revision on a downward grade being looked for in some quarters. No declines generally are expected however, until an improvement in demand is shown. No changes have been noted in local conditions, the trend of orders being of the small variety. Nominal quotations remain as follows:

PLATES

10 gauge	from $5 00 to $6 00
12 gauge	5 05 6 05
14 gauge	5 10 6 10
16 gauge	5 20 6 20

BLACK SHEETS

14 gauge	5 10 to 6 10
16 gauge	5 20 6 20
18-20 gauge	5 75 6 75
22-24 gauge	5 80 6 80
26 gauge	5 85 6 85
28 gauge	6 00 7 00

Prices shown are for full cases. An extra charge of from 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 36 in. wide.

GALVANISED SHEETS

Premier and Apollo

10¾ oz.	8 40 to 9 40
U. S. 28	8 00 9 00
U. S. 26	7 90 8 90
22 and 24	7 75 8 75
18 and 20	7 60 8 60
16	7 45 8 45
12 and 14	7 40 8 40

An extra 40c. per 100 lbs. is charged for Keystone brand copper bearing sheets.

An extra is now charged on galvanised sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c. per 100 pounds. Other gauges show no change for different widths.

Prices shown are full cases. An extra charge of 25c. per 100 lbs. is made for less than case lots.

Boiler Tube Market Dull

Toronto.

A dull tone prevades the boiler tube markets, and present conditions are reported as slightly unsettled. Some price revisions have been looked for in certain quarters, but current quotations remain unchanged. The demand is light, and doubt whether price reductions would stimulate market activity is quoted as the reason for holding to the present list, which follows:

BOILER TUBES—	Seamless	Lapweld
1 inch	$26 00	.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	$25 00
2 inch	29 25	22 00
2¼ inch	33 00	25 00
2½ inch	41 75	27 00
3 inch	49 25	35 00
3½ inch	63 50	40 00
4 inch	85 00	50 25

Small Orders Prevalent In Iron And Steel

Toronto.

Local price quotations on bar iron and steel remain unchanged this week, and with an understanding having been reached among the dealers, future revisions are expected to be dependent upon conditions and changes prevailing on the Pittsburg markets. Present business continues to be chiefly composed of very small orders and no immediate improvement in demand is looked for.

Rumors that another price war is anticipated between the steel mills in the United States continue to slightly upset the stabilised markets, and consequently buying for future delivery is retarded in many lines. The present unsettled condition of the steel industry, is reflected in the small amount of new business, buyers declining to commit themselves in advance.

Current prices remain locally as follows:

STEEL AND IRON

Mild steel, 3-16 in.	4 50
Do., ¼ in. and heavier	4 00
Bar iron, 3-16 in.	4 50
Do., ¼ in. and heavier	3 75
Angle base	4 00
Horseshoe iron	4 10
Tire Steel	4 70 5 95
Band steel	4 50
Spring steel	10 75 12 75
Crucible cast sheet steel	30 00 35 00
Mining drill steel	23 00
Cast tool steel	20 00
Sleigh shoe steel	4 10 4 50
Norway iron	15 00
Toe caulk iron	5 40 6 40
Hoop steel	6 00

Scrap Prices Show Declines

Toronto.

Scrap metal prices are easier this week, due to the continued indifference of consumers. Quiet conditions prevail, and little interest is evident. Improvement in operations is very slow, and consumers are still purchasing according to immediate needs only. Sentiment is developing however, that an increase in the buying of some waste materials is anticipated in the future.

The following list shows a slightly lower range on certain prices, which are the average nominal quotations for fairly large quantities:

WASTE MATERIALS

No. 2 busheling		—	$13.00
Heavy melting steel, Gross ton	$13.50	—	14.50
R. Rd. wrought iron, No. 1, gr. ton	11.00	—	12.00
Sracp pipe, gr. ton	7.00	—	8.00
Stove plate, net ton	15.00	—	16.00
No. 1 machinery cast, net ton	22.50	—	23.50
Heavy lead	4.50	—	5.00
Tea lead	2.25	—	2.75
Red brass		—	10.00
Yellow brass	6.50	—	7.50
Light brass	4.00	—	4.50
Heavy copper	10.00	—	11.00
Scrap zinc	3.50	—	4.00
Old rubbers, boots and shoes	2.75	—	3.25
Lumbermen's rubber boots	1.75	—	2.25
Auto tires	0.50	—	1.00
Solid tires	0.75	—	1.25

Reaction In Ingot Metals

Toronto.

Easier market tones and some reductions are among the changes in ingot metals this week. A reaction has been evident in foreign buying, which for the past few weeks was the chief support of the strength recorded in the tone of copper, lead and tin.

COPPER—The copper market is reported much easier, and quotations are now holding steady. The presence of surplus stocks of scrap copper has had its effect on the market. The heavy slump in the exchange rate resulted in a decrease of foreign buying, which has been the main support of the domestic situation during recent weeks. Very few inquiries are in evidence, and reports indicate that ample stocks are available for present needs. Local quotations remain unchanged at 18 cents.

TIN—The recent fluctuations in exchange made foreign values of tin very uncertain. A corresponding weakening in the domestic markets has been noted, and a sagging in price resulted. This reduction brings the nominal quotation to 38 cents, and the demand at present is dull. Future recovery is looked for in some quarters.

LEAD—The lead market is reported dull and unsteady this week, and buyers are adopting a waiting policy pending future developments. Foreign quotations have declined slightly, and this has been reflected locally with a decline of 25 cents, the average price being $6.50.

SPELTER—Spelter is still selling below cost, with a feeble demand on all markets. Business is reported as very dull, and lower quotations have not served to bring any new buyers into the market. Surplus stocks are heavy. A reduction has been recorded locally, the price of $7.25 being made on recent inquiries.

ANTIMONY—Consumers are showing little interest in antimony at the present time. The slight concessions that have been made by some dealers failed to increase their business to any extent. Values are therefore unchanged from prevous levels, and the local current prices are maintained at from 8 to 10 cents.

ALUMINUM—This market is reported almost neglected, but prices are holding at previous levels. Foreign markets maintain that present quotations could be shaded for any large amount of business, but the price of 30 cents in still in effect locally.

London Markets

LONDON, June 9.—Some important hardware lines show a substantial price reduction this week. Among them are noted a reduction in spades and shovels of approximately 15 per cent., and also a reduction of $3.00 per dozen in lantern quotations for fall booking. Collections are reported good, and the excellent volume of business the hardware stores enjoyed during the month of May, is continuing well into the current month. Merchants report as being well satisfied with present sales and are optimistic as to future trade.

Turpentine Price Steady

London, Ont.

Turpentine prices remain unchanged this week, and the local demand is good. A slightly easier tone was anticipated in some quarters, but is not yet apparent. XQ. QT per gallon is still the prevailing quotation for 1 barrel lots.

White Lead Market Firm

London, Ont.

The exceptional good demand which was apparent in white lead in oil during the past two months, is reported as still continuing. The current price remains unchanged, and a firm tone has recently developed, due to the increase in linseed oil prices and the strength of lead on the primary markets.

Sorting Movement In Glass

London, Ont.

While orders for plate and window glass are reported fair, yet they are limited mostly to sorting and current stocks are well below the average. No change in price has been recorded, the prevailing quotation for single and double diamond being 50 per cent. off case list, and the cut light price being 60 and 10 per cent. off light list.

Lantern Prices Lower

London, Ont.

Reductions in lanterns have been announced for present and fall booking. The new prices have a lower range of $3.00 per dozen over previous quotations. Tin short or long pattern are now $12.00 per dozen, with the usual extras for coppered or japanned.

Nail Orders More Numerous

London, Ont.

Orders for nails are fairly numerous, but the purchases are mainly in small quantities, and the total sales are still light. There has been no change in prices at present, but some revision is looked for in some quarters. Current quotations are wire, $4.65 base, and cut nails $5.75 base.

Rope Demand Improves

London, Ont.

With the approach of harvest season, the current sales of rope and cordage are registering a steady improvement. Prices on these products are firm and unchanged at present.

Netting Prices Maintained

London, Ont.

The Canadian make of poultry netting is still in good demand, and the 1 and 2 inch mesh are the best selling sizes. Quotations remain unchanged at list plus 10 per cent.

More Lawn Mower Sales

London, Ont.

Seasonable weather conditions have stimulated the demand for lawn mowers, and dealers report that with improved sales, current stocks are moving nicely. Prices on the various lines are unchanged this week.

Brisk Sales In Wire Screen

London, Ont.

An excellent sale of screen wire cloth was reported by local dealers during the past week. Quotations on wire screen are being well maintained, the price for painted black being $3.50 per 100 square feet.

Demand For Paris Green

London, Ont.

The seasonable demand for insecticides is now apparent and numerous sales are recorded in paris green. Prices remain unchanged at 52 cents per lb. for ½ lb. packages, with a lower range of two cents being quoted on larger quantities.

Good Demand For Tools

London, Ont.

The current demand for garden and harvest tools continues good, and dealers report a fair amount of business in these seasonable lines. The quotations are unchanged: list less 50 and 10 per cent. being the prevailing prices.

Grass Hooks Sell Well

London, Ont.

Local dealers report that a brisk sale has ben noted in the Canadian make of grass hooks. A seasonable demand is looked for at this time of the year.

Scythes And Snaths In Demand

London, Ont.

A seasonable demand is now evident in scythes and snaths, and local dealers report numerous small sales in these lines.

Sprayer Prices Lower

London, Ont.

A reduction of approximately 10 per cent. has been announced in current quotations on Eureka sprayers.

Oil Stoves Reduced

London, Ont.

A new lower price is now recorded on hot blast oil stoves, and the prevailing quotations on the No. 200 stove is now $15.60 per dozen.

Revised Discounts on Scoops And Shovels

London, Ont.

Quotations on spades, scoops and shovels are now lower, a new revision in discounts reflecting fairly substantial reductions. The latest current price is now 45 per cent. off list.

Canvas Belting Reduced

London, Ont.

A substantial reduction has been announced in prices on canvas belting. The new discount on the Maple Leaf brand is now 67½ per cent. off list.

Winnipeg Markets

WINNIPEG, June 9.—Current price changes still show a downward tendency. Among the most important declines are noted bar, pig and block lead, stove pipe, tarred felt, lace leather and some lines of carpenters' tools. Hose clamps in some sizes are advanced. Hay tools, and cold blast lanterns have also been reduced. Business has improved considerably during the past week.

Stove Pipe Declines

Winnipeg.

Stove pipe has declined this week and following are the latest quotations:—Standard 6-inch, $21.10; 7 inch, $22.50; Ready to rivet,, 6-inch, $20.60; 7-inch, $22.00; Rivetted 6-inch, $20.60; 7-inch, $22.00.

Lead Prices Decline

Winnipeg.

Prices on bar, pig and block lead have been reduced this week although they have held firm for some time and it was expected an advance would be forthcoming. The market however took on an easier tone during the past few days and a slight reduction was the result. Latest prices are; Bar lead 7¾ cents; pig lead, 7½ cents, block lead, 7¾ cents.

Linseed Oil Market Firm

Winnipeg.

The linseed oil market is very firm with the demand continuing good in spite of recent advances. Prevailing prices are: raw, $1.15 per gallon; boiled, $1.18 per gallon.

Cold Blast Lanterns Reduced

Winnipeg.

Prices have been reduced on cold blast lanterns this week and current quotations are as follows, No. 2 plain $12.75; japanned, $13.50; coppered, $16.25.

Hose Clamps Advanced

Winnipeg.

While most price changes are downward, hose clamps show an advance this week in some sizes. Current prices are as follows;—1¼ inch, $1.45; 1½ inch, $1.75; 2 inch, $2.40; 2½ inch, $4.00; 3 inch, $5.75.

Lace Leather Reduced

Winnipeg.

Lace leather shows a reduction this week. Following are this week's prices, rawhide, $1.60 per lb; tanned, $1.60 per lb; cut laces, tanned, $1.90 per lb.

Sheet Demand Limited

Winnipeg.

The demand remains limited on sheets and plates and only small orders are being handled. Quotations are unchanged. The tendency was toward lower prices a few week's ago but buyers are now of the opinion that reduced prices would not help sales. Conditions and prices on the foreign market do not warrant lower levels at present. With the demand continuing small little change in prices is expected.

Range Boilers Moving Slowly

Winnipeg.

Sales of range boilers are only fair and the recent price reduction has had no stimulating effects as yet. Present prices are considered below the actual value and represent price cutting between various firms. Following are prevailing prices: 30 gallons, $11.25; 35 gallons, $15.00; 40 gallons, $17.00; 52 gallons, $24.00; 66 gallons, $32.00; 82 gallons, $40.00; 100 gallons, $50.00; 120 gallons, $60.00.

Turpentine May Decline

Winnipeg.

Although local quotations are maintained at $1.20 per gallon it would not be surprising if a decline of a few cents a gallon was made on turpentine in a few days as an easier tone is reported from other markets. Nominal price this week is $1.20 per gallon in barrel lots. 10 cents extra for less than barrel lots. Containers, 25 cents per gallon extra.

MILD OPTIMISM AMONG STEEL MAKERS

Although a mild undercurrent of optimism prevails among steelmakers, it is difficult to attribute it to any single factor. Slight encouragement is gained from the volume of new business, which is almost entirely composed of orders for carload or less than carload lots. Further releases on old bookings account for a goodly portion of present shipments. Satisfaction generally is expressed over the rounding out of wage reductions, which is seen in the 20 per cent. cut announced by other firms. Further adjustments at mills and mines by independents are expected. Although lower wages, corresponding more nearly to the cost of living, are deemed important in the gradual return to normalcy, producers on all sides agree that lower freight rates would help the steel industry more than any other single factor, says the Iron Trade Review. The announcement that the Algoma Steel Corporation has received an order from the Dominion Government for 50,000 tons of rails for the Canadian National Railways is interesting in view of the quoted price, which is said to be equal to the United States Steel Corporation price, plus duty.

Weekly Paint Markets

Montreal

MONTREAL, June 9—The paint markets this week are featured by both a decline and an advance. The decline is registered on turpentine which is 5 cents per gallon less and quotations are now $1.10 per gallon in one barrel lots. Shellac has advanced 25 cents per gallon on orange both in barrels and in one gallon jugs, and white is now 30 cents a gallon higher in both quantities. Linseed oil is held at quotations that were ruling last week, namely 89 cents per gallon for raw in one barrel lots. Fluctuations in the seed market still occur, the latest report being that it is now a little easier than formerly, and while this condition is prevailing the oil products will in all probability show slight changes in price, both up and down. However quotations are expected to remain fairly steady while the present demand is maintained.

White lead in oil and putty are unchanged this week and there is little new in either of these markets. Window glass is also unchanged in price, and the market is much the same. Paint manufacturers still report good business in their lines, and it is quite apparent that Spring painting in the outside country is not yet over. No price changes are made in paint, paint specialties, or varnishes.

Linseed Oil Quotations Held

Montreal.

Linseed oil is unchanged in price this week, 89 cents per gallon in one barrel lots being the ruling quotation. The domestic demand for this product is strong and this is expected to remain during the present month. Flaxseed continues to fluctuate. At the close of the week it was reported a little easier, but this had no reflection on the oil quotations, and while the demand is kept up to a fair amount, prices are expected to remain well around the 90 cent figure. Following are the present quotations.

LINSEED OIL—	Raw	Boiled
1 to 2 barrels	0 89	0 91½
3 to 4 barrels	0 87	0 89½

Broken lots, add 10c. gal.

Turpentine Down 5 Cents

Montreal.

Turpentine is again reduced 5 cents per gallon this week, and quotations are now $1.10 per gallon in one barrel lots. In the southern market the situation is much the same, and is reported a little easier again this week. The demand, both foreign and domestic, has fallen off considerably in the past two weeks, and while this is in evidence the market is more liable to show slightly easier quotations. Local prices are as follows:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 10
2 to 4 barrel lots	1 08
Broken lots	1 20

Shellac Gains In Price

Montreal.

Shellac, both white and orange remains very firm, due to the strength of gum shellac. Prices on these products are advanced this week, orange now being quoted 25 cents per gallon higher in barrels and jugs, and white is advanced 30 cents per gallon in both quantities. Present quotations are the following:

Orange shellac, in barrels, $4.00, in one gal. jugs, $4.30; white, in barrels, or 5 gal. jugs, $4.40; in one gal. jugs, $4.80.

Putty Price Steady

Montreal.

Putty quotations remain unchanged. Linseed oil is holding the putty market considerably firmer than it was in the earlier months of the spring, and while oil is maintained around the present figures putty may be said as remaining quite firm. The demand for this product is light, but is anticipated at this season of the year. Putty quotations follow:

Standard Putty—	5 ton	1 ton	ton
Bulk barrels, 800 lbs.	$5 00	$5 25	$5 60
Bulk drums, 100 lbs.	6 00	6 25	6 60
Do., or tins, loose, 25 lbs.	6 25	6 50	6 85
Drums or tins, cased, 25 lbs.	7 00	7 25	7 60
1 lb. tins	9 75	10 00	10 35

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices.

Firm Tendency In White Lead

Montreal.

Prices on white lead in oil remain unchanged and continue more or less firm. During the past few weeks the market tone has been very firm, due to the strength of pig lead, and also the higher range of prices quoted on linseed oil.

Window Glass Unchanged

Montreal.

Locally no change of importance has taken place in the window glass situation. Price cutting is not nearly so prevalent, and quotations are now well settled at 50 per cent. on the Montreal glass list. The Belgian market shows very little change, but it is notable that the Belgian franc has again made a gain on the exchange. The demand for both window glass and plate glass is still very limited.

Paris Green Now Active

Montreal.

Paris Green has now found an active market. Vegetation has advanced to the stage where it requires insecticides to help to protect the plants against the potato bug and other pests. No change has been made in the quotations on Paris Green since the prices were set early in the spring months.

Toronto

TORONTO, June 9—Another increase in shellac prices features the paint market quotations this week. Local prices on both orange and white shellac are not only on a higher level, but a range is shown between the various dealers. This is considered due to the increase in shellac gum, and became evident with the increase noted in last week's Hardware & Metal.

All lines of paint and paint products continue to move briskly, and dealers report an exceptionally busy season. Putty quotations remain unchanged, but a considerably firmer tone is now apparant due to the advance in linseed oil prices. Paris green is selling on an active market.

Shellac Prices Higher

Toronto.

A further advance in the price of both orange and white shellac is recorded this week. Current quotations now show a range, and the market tone is very firm. The revised prices are: pure white, $4.25—$4.50. Pure orange, $3.65—$4.25 per gallon in barrel lots. There is an extra charge of 50 cents for gallon jugs.

Turpentine Stocks Small

Toronto.

Prices on turpentine have remained steady, and the recent quotations are unchanged this week. There has been a slightly easier tone noted on the foreign markets, but the local shortage of turpentine, while not making supply difficult to obtain, has resulted in very little surplus being on hand. The current demand is reported firm and unchanged. Following are present quotations:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 15
2 to 4 barrel lots	1 14
5 gallon lots	1 30

"Save the surface and you save all" *Paint & Varnish*

Only One JAP-A-LAC

And that is Glidden Jap-a-lac.

Like many another good product, Jap-a-lac is imitated. And as might be expected, its imitators fall far short of the original.

Because of these facts it is important that you sell the genuine Jap-a-lac. Its true, lasting colors, long-wearing qualities and worth of every kind assure satisfied customers for you and result in many repeat sales. It is in these repeat sales — sales without effort on your part — that your greatest profit lies.

There is a Jap-a-lac Household Finish for every home purpose. Stock up *now* with a complete line.

Write for our dealers' proposition.

Branches at Montreal and Winnipeg

The Brush Department

Pointers on Selling Shaving Brushes

Some details of materials used in shaving brushes showing what is best to recommend—Pointers on preservation of brushes.

By Roy C. Lewis of Roy C. Lewis Sales Co., Montreal.

WITH so many styles and qualities of shaving brushes on the market to-day, it is a hard proposition to know just what to recommend to a prospective customer.

Brushes made of pure French bristle and badger hair are the most serviceable, and if given the proper care will wear a lifetime.

When using brushes made of badger hair, they should be rinsed thoroughly after using, as the alkali in some soaps will rot same, causing the hair to break off and the brush gradually to lose its fullness.

There are made substitutes for badger, horse hair, goat hair and even fibre are dyed to imitate the rich color found in the badger, but when put into use, these brushes gradually curl and become flabby, the hair matting down, breaking off, and the dye fading out.

By holding the brush in the palm of the hand and allowing your thumb to run over the tip, you can determine if the brush has enough elasticity to make a lather, and none of the substitutes mentioned will spring up into place as quickly as the pure bristle or badger hair.

A new, pure bristle brush requires several days working before it will give the best of satisfaction, while a brush made of one of the before-mentioned imitations may feel very attractive because of its softness, before using, will become nothing but a tangled mass after being put into water.

If it is necessary to recommend a cheap brush, select one made of all white or black bristle. In the medium grades recommend one of badger and bristle mixed, and in the higher class, a pure badger brush.

The new processes now in use have revolutionized the shaving brush business, these methods enable the manufacturer to guarantee against the bristle or stock coming out of the brush. The stock is firmly embedded and no matter what usage the brush gets, it cannot fall apart; although, as said above, if the soap is left in the brush, the stock will rot and break off close to the setting.

The Canadian manufacturers are noted for making "honest brushes," and when comparing values, it is advisable to note if the brush is made full and not all "plug."

Pointers for Paint Selling

By H. S. Duncan, A. Ramsay & Son Co.

The slogan, 1921 the "Paint Up" Year, is not a catch phrase, but can be made real by every live merchant selling paint products. First is it needed?

Thousands, yes, tens of thousands of homes, stores, public buildings and factories answer with an emphatic "Yes." Go where you will, whether to our cities, towns or modest hamlets, the drab outlook of time-worn buildings meets you. Ask the average business man whether he believes in fire insurance and his answer is "Yes." Why not use paint insurance to stop that deterioration, caused by the ravages of time through lack of paint?

Mr. Businessman, do you know that the loss of property by the neglect of painting amounts to more than fire loss every year.

Paint is first of all a necessity because it protects your property. A house valued at $5,000 can be painted for about $125, and paint properly applied will protect this building for a period of from three to five years. The depreciation of a frame house not properly painted is about 5 per cent. a year. When the paint wears off the lumber is exposed to the elements. Rain and snow penetrate it, the lumber begins to decay and the expense of repairs is much greater than the expenditure for protection.

Now as to price—possibly your prospect is one of those looking for a drop in price. If so, show him that last year white paint cost $5.75 per gallon; to-day it is $4.60, or a decline of 20 per cent. Have any other building products made a decline of a like amount?

A close analization of building supply statistics will disclose that few, if any, have done so.

Why not, Mr. Hardware Merchant, get the "COMMUNITY SPIRIT?" Your stores, by their cleanliness and brightness show that you have it in you. Get that spirit moving among your townsfolk. Get behind a "clean-up" and "paint-up" campaign in your town and, if it needs it, start on your own store front. You will be surprised at the number of inquiries it will bring you and don't forget to make a memorandum of them to follow up. One merchant in a small Manitoba town told me that this suggestion brought him $2,000 worth of paint business as well as many other lines. Another question I should like to ask you: Is it fair for the manufacturer to do all his advertising promotion work, such as newspaper and magazine advertising, panels, cut-outs, cards, personal letters, etc.?

Remember, things are undergoing a change and instead of business coming to you, it is going to the man who is going after it. Keep in mind that the business is here and ask yourself to-day are you a "GO GETTER?"

Half Holiday Once a Week Can Be Now Compulsory

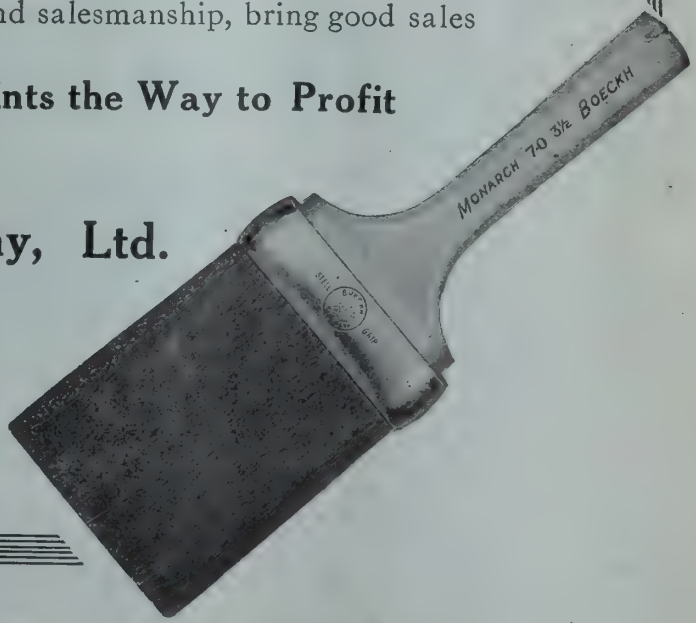
THE officers of the Manitoba Board of the Retail Merchants' Association of Canada, Inc., have secured legislation amending the Shops' Regulation Act, as follows:

1. The Shops' Regulation Act, being chapter 180 of the Revised Statutes of Manitoba, 1913, is hereby amended by inserting next after section 3 the following sections:

3A—The municipal council of any rural municipality, incorporated village or town may by bylaw require that all or any class or classes of shops within the municipality shall be closed and remain closed on Thursday of every week between the hours of 12 o'clock noon and 6 o'clock in the afternoon during the whole or any part of the year.

3B—The council of any incorporated city may by bylaw require that all or any class or classes of shops within the city shall be closed and remain closed between the hours of 12 o'clock noon and 6 o'clock in the afternoon on such day or days of every week as the council may determine, during the whole or any part of the year.

2. This Act shall come into force on March 27th.



BOECKH'S BRUSHES ARE RUBBER SET

And further strengthened by the powerful grip of well-made ferrules. The bristles cannot come out of Boeckh's Brushes. The bristles are the finest of selected boar bristles, carefully sorted and skilfully set, to make a perfect brush. Boeckh's Brushes are reliable, dependable,

Toronto, Canada.

Established 1856.

Firm Tone In Lead

Toronto.

The fluctuations on the primary lead markets has not affected white lead in oil, and local quotations remain unchanged. A firm tone is still evident, and with linseed oil registering a further advance in price, the strength of white lead is expected to continue while these two raw materials maintain their present conditions, according to dealers' reports. Corroders are stated to be busy keeping stocks parallel with the present demand, which is good, and no great surplus of supplies is evident at this time. Local prices on white lead in oil are: $14.95 per 100 lbs. in ton lots, and $15.30 per 100 lbs. in smaller quantities.

Higher Prices Remain On Linseed Oil

Toronto.

The tendency of the linseed oil market continues decidedly firm, with a good seasonable demand. The increased quotation of 10 cents per gallon, announced in last week's issue of Hardware & Metal, is still being strongly maintained. This brings the current local price of raw to 97 cents per gallon, and $1.00 for boiled, in 1 and 2 barrel lots. The seed markets continue to show a higher range, and a brisk movement in flax seed is apparent. No further price change has been recorded this week, but the market is reported on an upward trend, with foreign oils on a higher level.

LINSEED OIL—	Raw	Boiled
1 to 2 barrels, per gal.	$0.97	$1.00
3 to 5 barrels, per gal.	0.96	0.99
6 to 9 barrels, per gal.	0.94	0.97
Less barrels, add 15 cents per gal.		

Glass Demand Is Limited

Toronto.

The window glass market is gradually settling, but the current demand is limited. However, with the continued strength in the Belgian franc rate and the United States protective tariff operating to higher levels, it is generally anticipated that the window glass market has reached its lowest ebb for some time. Re-action in conditions is looked for, and price changes are expected to follow in some quarters. Dealers and retail merchants are reported to have very low stocks on hand, and should the expected summer and fall demands materialise, an increase in market activity is anticipated in the late season.

(Continued from Page 42)

proved during the last few weeks because of abundant rains. "Retail prices," it says, "are slowly declining and there is room for further movement yet. Sales on the whole are on a smaller scale than last year, one correspondent estimating the total for the first three months of the year at least 25 per cent. below the corresponding period of last year. Stocks in the hands of retailers are generally much lower than at this time last year and Western retailers are not entering the markets freely for goods."

A correspondent from Kamsack, Sask., writes to the Financial Post as follows: Retailers are marking down their goods somewhat, but they have to mark them down a good deal yet before the public can be induced to see that they are getting real bargains. So far as I can see, retailers are buying very little, in fact, only enough to replace sold out lines. Payments of all kinds are very slow except among those merchants who have been conducting business on cash lines.

Ontario

The most hopeful phase of the situation in Ontario is the fact that the retail dealers are doing as large business as in the other provinces of the Dominion. At no time since the adverse turn in trade materialized last fall has the turnover of the retailer suffered any drastic decline. The turnover is without doubt above the average of the previous year. Profits have suffered, but in the fact that the dealer is able to sell his goods freely lies the solution of the present situation. With the distributing agencies rapidly depleting their own stocks, they must come into the market more and more for new goods and this will in time be reflected upon the industrial field.

The replies without exception indicated that retail trade was at or near last year's level, and in some few cases distinctly above. There appears to be room for a still further adjustment of prices, but on the whole merchants have made progress in the movement toward normal price levels. At the moment, however, retail buying is proceeding cautiously, and there is a tendency to buy only for immediate requirements.

Quebec

Reports from a number of centres in the province of Quebec lead to the conclusion that retail trade has on the whole been very satisfactory. As yet no decided improvement can be traced, but there is a feeling of hopefulness for the future. Accounts appear to have been met in a satisfactory manner in this province. At Gaspe, however, a town which depends largely on the fishing industry, the report is distinctly unfavorable. Our correspondent writes that business is largely at a standstill in this district. The flat failure of the fisheries last Summer coupled with the collapse of the market has wiped out a large number of the smaller merchants. Those that survive are not in a position to grant credit for fitting out boats, etc. Many fishermen will not be able to equip themselves in consequence.

The Maritimes

With the balance of the Dominion the Maritime provinces are suffering from the curtailment of business operations. No definite trend can as yet be traced, although there has been some slight indications of improvement. Retail trade is being conducted along fairly normal lines, and merchants have made progress in marking down their goods and stocks appear to be fairly well reduced. Orders for new goods are restricted as much as possible however. Accounts on the whole are being paid fairly well, but not as freely as during the previous year.

From the city of Sydney Mines, N.S., it is reported that business during the month of April has been far ahead of the previous months of the year.

"Lasters Wanted"

A big shoe manufacturer hung out a sign reading "Lasters Wanted."

What that company wanted specifically for a given time the world is needing generally all the time.

"Lasters Wanted"—not only the man who can shape up a last in a shoe factory—but the man who can be as good today as yesterday, and probably better tomorrow than today.

How often it is that some spellbinder comes into a business and shows, or thinks he shows, that present methods are antiquated, and proceeds to introduce innovations by the cart load. He is all white heat the first day. In two weeks there is a slight indication of "cooling off," and in two months the fires are running low. He cannot work normally in one place. He must work abnormally in many places. For him it is the "hurrahs" before the curtain, but the ding-dong of cleaning up the dishes behind the scenes—that's for other mortals.

The "lasters" are the salt of the earth, but because their work is never showy they are perpetually in eclipse.

A great publicist years ago said that those who know, work; those who don't, teach.

Irony, par excellence, you say—yes, really and truly a long-dated lampoon at the species who, especially in bully times, load up industries with "lame-duck" philosophy about psycho-analysis, subconscious suggestion, multi-vision, and what not. With this school of sophists a salesman is not a salesman but a merchandiser, a territory is not a territory but a zone, a diplomat is not a diplomat but a contact man, and so on.

It's a mighty good job for business that the "lasters" are always on deck, doing the real work of the world. The "lasters" know what David Harum said about the flea keeping the dog from thinking too much he was a dog, and, being dead sure they're not failures, they don't care a rap about how or why they are a success.—Dunlop Rubber Factory News.

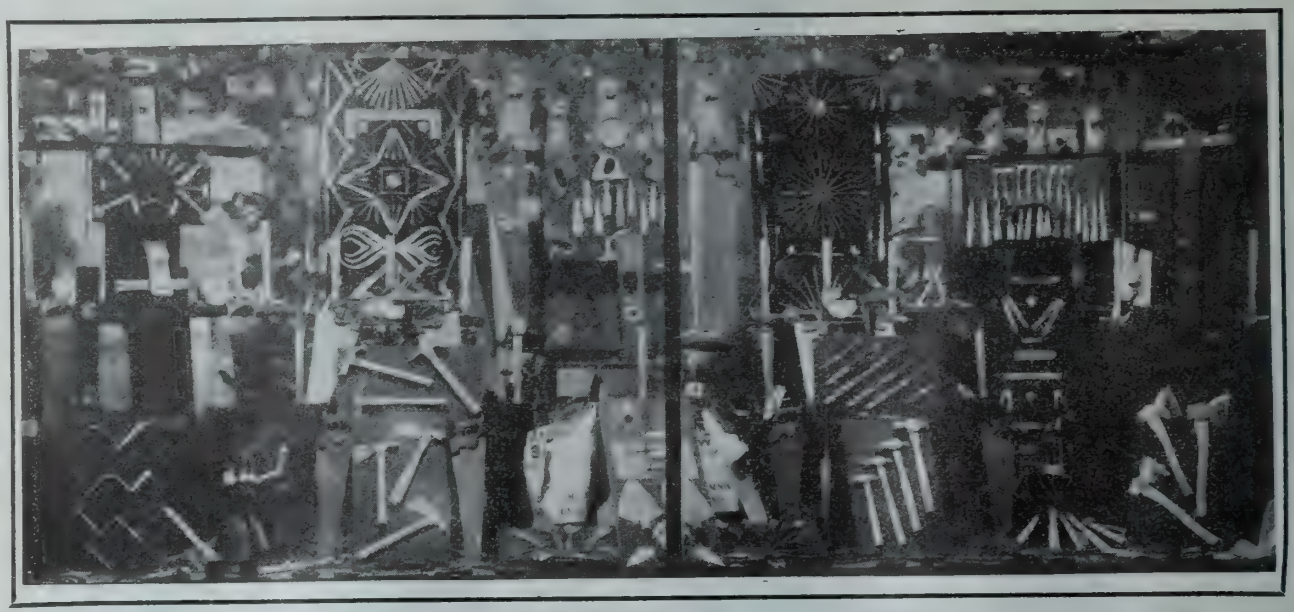
Wa-Ko-Ver Stain
Beautifies All Woodwork



Not only does it beautify, but it wears like iron. You will find it pays in future sales always to recommend Wa-Ko-Ver Stain whenever your customers have worn floors or scratched woodwork to renovate. It restores the freshness of the floors or woodwork, pleases your customers, and makes permanent business for you. The established reputation of this effective, serviceable stain makes it a pleasure to sell. Good displays in your windows, on your counters, or other conspicuous places, remind visitors to your store, and people that would otherwise be "passers-by," of their need for Wa-Ko-Ver stain. This sales-maker will handsomely reward a little sales-effort on your part.

Should Retailers Display Your Goods?

Do You Set a Good Example?

RETAILERS have their displays in "silent salesmen," and in windows where the goods appeal silently to the desire of every passer-by.

And your goods—where do you display them to create desire in the buyers of the Canadian hardware trade?

There is one street, with one great national display window, where the hardware buyers of the Dominion throng each week eager and interested to see what new goods, new models or new messages are displayed to the trade there. This national display window is the advertising section of HARDWARE AND METAL. Its pages are intently studied each week by all the wholesale hardware buyers of Canada and over 90% of the retailers.

Let us show in detail that it pays you to display your goods in HARDWARE AND METAL's National Show Window.

HARDWARE AND METAL

"Canada's National Hardware Weekly"

143 University Avenue, Toronto, Canada

Montreal Branch, Southam Building **Winnipeg Branch, Union Trust Building**

Published every Saturday since 1888. The only weekly hardware paper in Canada and the only hardware paper in Canada that gives you a circulation statement audited by the Audit Bureau of Circulations.

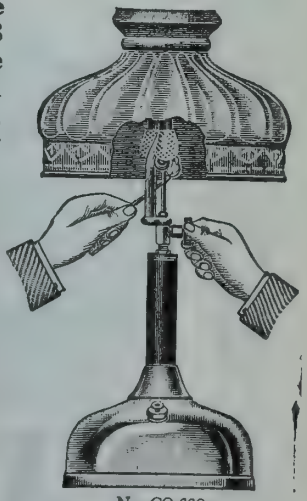
Superior Gasoline Lamps and Lanterns

The Storm King Lantern—the most efficient, safe, reliable, powerful and economical light on the market; simple in construction and operation; easy to light and extinguish, and absolutely storm-proof; can be taken apart in a few seconds if desired. The ideal lantern for campers, hunters, and summer resorts.

The Nulite Lamp is the Match Lighting Air-O-Lite. It gives a 300 candle-power light. It makes and burns its own gas from common gasoline—costs less than half a cent per hour to operate. Has no wicks to trim, no chimney to wash. Can't spill fuel or explode, even if upset. Can't be filled while lighted.



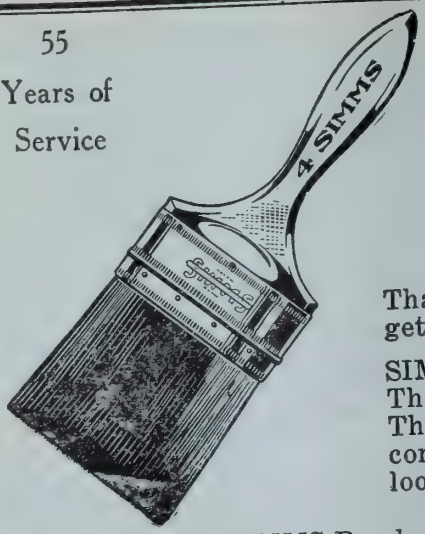
The Powerlight—The first and only Gasoline Table Lamp, proving conclusively its merit, efficiency, superiority and absolute safety. Passed and accepted by the National Board of Underwriters. Burns either Kerosene or Gasoline without adjustment.

No. LQ 327

The LQ. 327 Quick-Lite Lantern, with match generating burner, is the handiest outdoor lantern made. Gives same brilliant, pure white light of 300 candle-power at same cost. Is wind-proof, rain-proof and bug-proof. Holds a quart of fuel, enough for 12 hours' use on one filling. Just the thing for farmers, night-watchmen, plumbers, garages, builders, campers, auto-tourists, etc.

No. CQ329 Quick-Lite holds 3 pints and burns 18 hours on one filling. One in carton complete with shade, mantles, pump, wrench, hanger, cleaning pick and extra generator. Shipping weight, 9 lbs. A handsome, attractive lamp. Popular with users and easy to sell. It gives the greatest satisfaction in use and leads to many other sales. Ask for detailed information about this interesting lamp or any of the others shown here.

No. CQ 329



Dealers who have used or sold gasoline lamps will quickly recognize the big advantage a match-lighting lamp has over the torch-lighting styles.

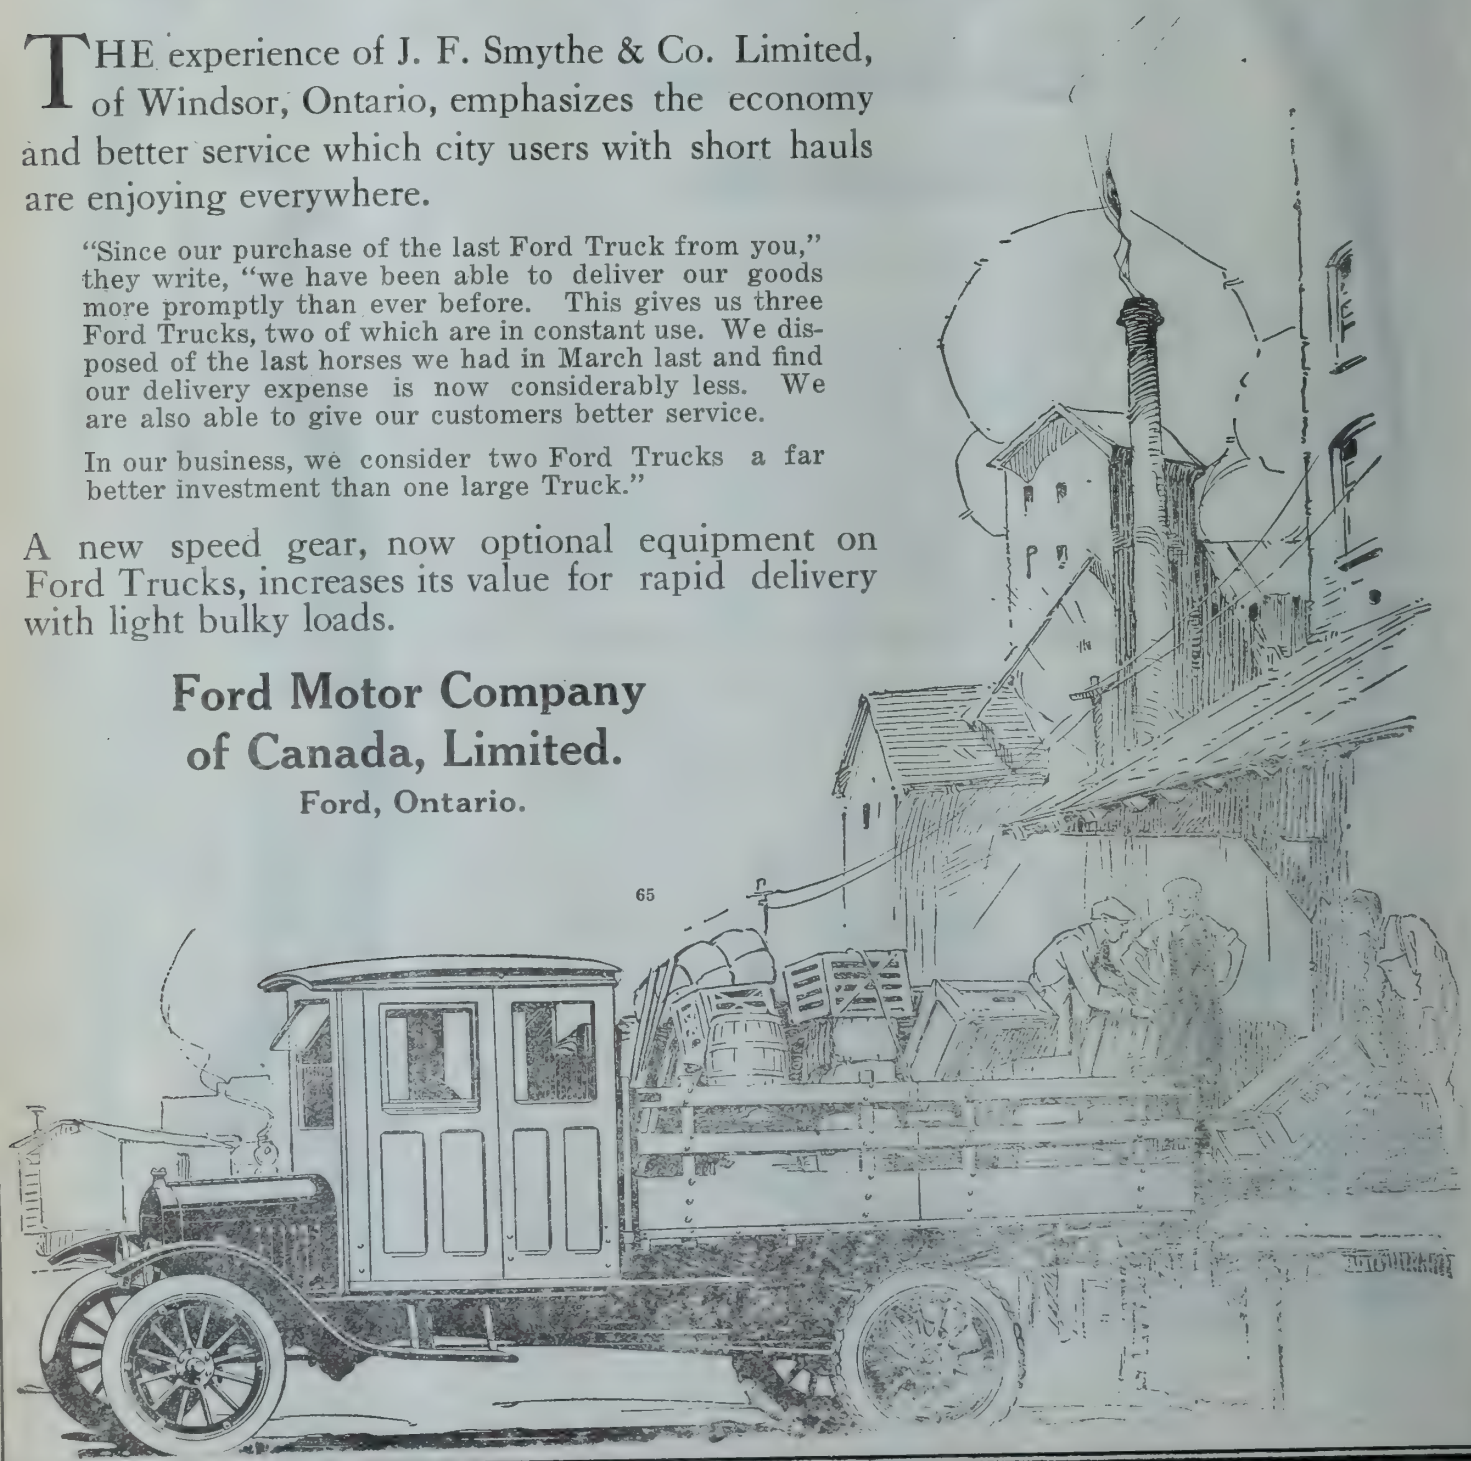
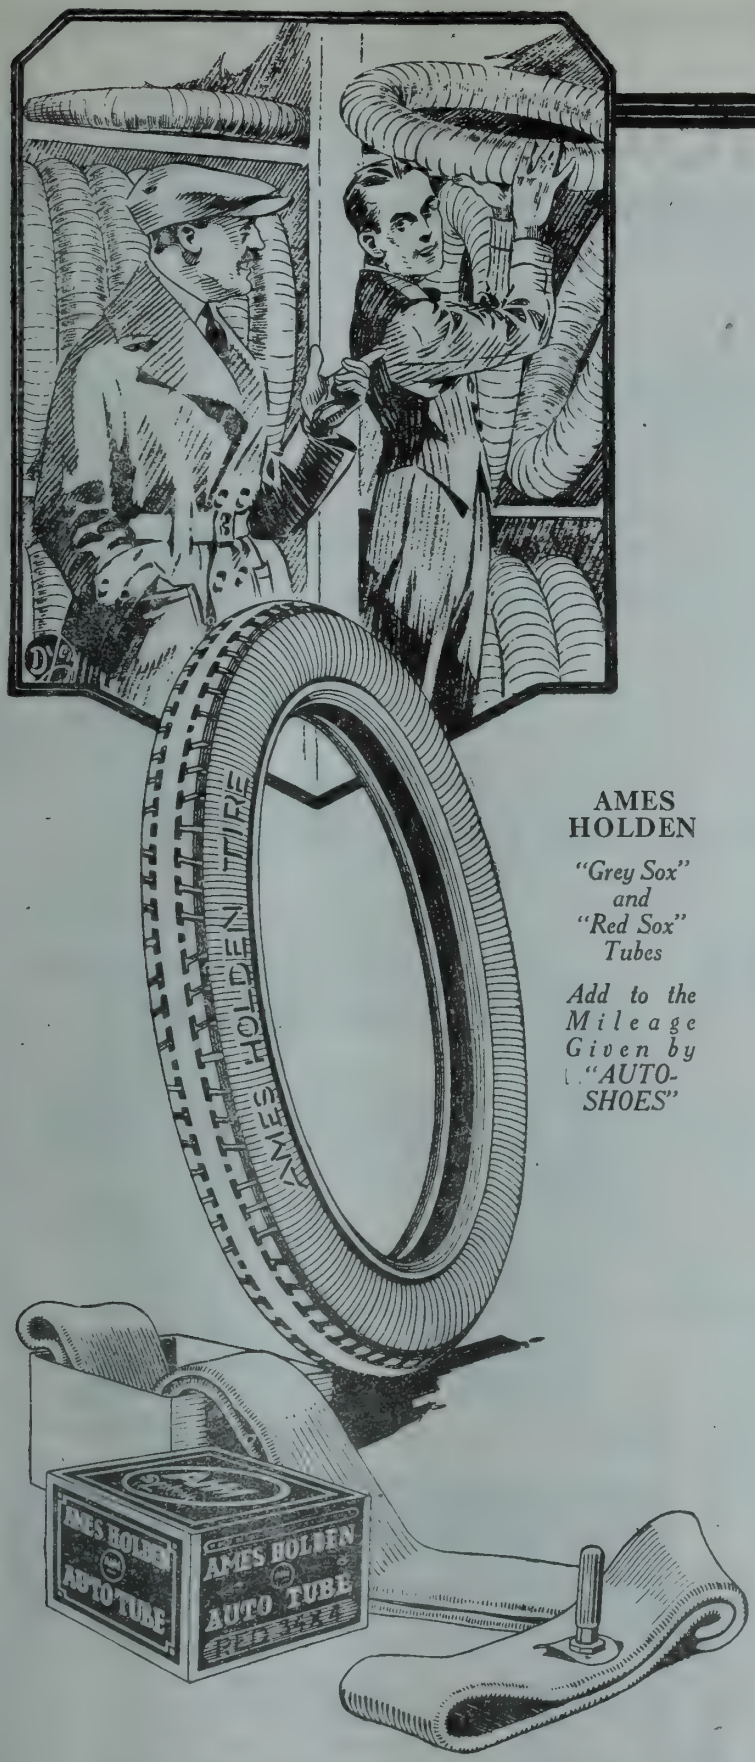
The Truck for Short, Quick Hauls



THE experience of J. F. Smythe & Co. Limited, of Windsor, Ontario, emphasizes the economy and better service which city users with short hauls are enjoying everywhere.



"Since our purchase of the last Ford Truck from you," they write, "we have been able to deliver our goods more promptly than ever before. This gives us three Ford Trucks, two of which are in constant use. We disposed of the last horses we had in March last and find our delivery expense is now considerably less. We are also able to give our customers better service.

In our business, we consider two Ford Trucks a far better investment than one large Truck."

A new speed gear, now optional equipment on Ford Trucks, increases its value for rapid delivery with light bulky loads.

Ford Motor Company of Canada, Limited.

AHM System

HERE ARE "AUTO-SHOES"

AMES HOLDEN

"Grey Sox" and "Red Sox" Tubes

Add to the Mileage Given by "AUTO-SHOES"

Any automobile casing has a right to be called a "tire"—the good, the bad, the indifferent.

The word "tire" contains nothing to indicate the origin of the casing, its character, value, mileage or reliability.

Ample reasons why we should desire a distinctive name for casings—built to give much greater than average mileage—Ames Holden "Auto-Shoes."

A name which will distinguish them from the hosts of ordinary tires indicate their superiority—identify them immediately as "the casings that give the cheapest mileage"—Ames Holden "Auto-Shoes."

The policy behind Ames Holden "Auto-Shoes" is as distinctive as the name—a policy that considers the dealer very largely—that aims at pleasant relationship and goodwill, free from irritating rules and red tape.

The reputation for excessive mileage established by Ames Holden "Auto-Shoes" is being talked of everywhere. Sales and distribution are increasing rapidly. We have a good proposition to make to you for your territory—a proposition you will be glad to consider and act upon. Write.

Ames Holden "Auto-Shoes"

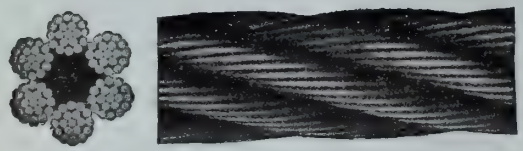
LANE'S UNIQUE TOOLS

The Unique Angle Socket Wrench Set

Style "K" Set

Lane's Style "K" Angle Socket Wrench Set, consists of a right angle, hexagon key 8 in. long, and six round, cold rolled, hardened steel sockets, with broached hexagon openings. Size of socket openings: ½", 9/16", ⅝", also 11/16", ¾", and ⅞". Packed in Brown Karatol Case, weight 20 ozs.



This little wrench sells splendidly because every man of mechanical intelligence appreciates its exceptional value for removing stubborn cap-screws and hexagon nuts. It is made entirely of steel, has powerful leverage, and, like all "Unique" Tools, is guaranteed against wear and breakage. It is built for speed, and never slips, or "chews up" screws or nuts.

"If I Were a Hardware Man"

Said a bright business man, when talking on the subject of **Opportunities,** "I would look upon the handling of some leading make of Automobile Tire as a most profitable line. A Tire represents a comparatively big turnover for a hardware sale, and the profit is in proportion. If I had to give **service,** that is, if I had to put a tire on the car for a customer, I would not consider it any more trouble than to help a customer load up his truck with a barrel of sugar, or of nails, or any other commodity that required a strong pair of hands for a few minutes. I would consider it just another way of getting a good customer to keep on coming."

Why has Hardware and Metal Such a Large Western Canada Circulation?

There are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Winnipeg.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh — and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the *only* hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 33 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

Name of Hardware Merchant and further details, supplied upon request

The Answer is—He Didn't!

THE crowd was drawn by a hardware firm in an Ontario town of 700 population. This crowd of over 1,000 people represents customers of the store, drawn from miles around, to attend the picnic given by this firm to its customers. Surely this is evidence of the close relationship between this hardware firm and its customers.

The close relationship between retailer and customer in this instance is typical of conditions existing in hundreds of Canadian towns, villages and cities.

The average hardware merchant (particularly in the smaller cities and towns) has been established for many years. He has a big business connection built up through years of efficient service to his customers. He is well rated, and a desirable man with whom to do business. He influences the buying habits of the people in his community, and in over 90% of the sales made, he is the deciding factor. *"Which one do you recommend?"* is a question asked thousands of times each day in the hardware stores of Canada.

If you can get the effort and enthusiasm of the retail hardware merchants and their clerks, plus their window and interior displays and local advertising behind your goods, you will have secured the co-operation of one of the greatest available selling forces.

HARDWARE AND METAL is paid for, and read, by all the wholesale hardware buyers of Canada, and over 90% of the retailers from coast to coast. They are the men who control the sale of your products to the hardware consumers. HARDWARE AND METAL can put your story before, practically, the entire Canadian hardware trade. One of our representatives would be glad to give further details.

(Only hardware paper in Canada with membership in the Audit Bureau of Circulations).

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

Metal Stamping and Press Work to Order

People Walk Over It — Hundreds of Cars Drive By It—Only YOU Can Make It Profitable

It's that spot at your curb. Just 1½ square feet in front of your store.

Put a Wayne Honest Measure Pump out there and get the profit that naturally belongs to you. Not only will a Wayne pump create business for itself, it also directs trade to your store and is responsible for increased sales.

With the model shown above, twenty gallons per minute are readily obtained—40% faster than any one-gallon model. This means 40% more trade waited upon in the same length of time, 40% less labor, an equal saving in wear and tear on pump. Rapid in delivery, accurate in measure, easy to operate.

Remember: A Wayne Pump in front of a store is the sign of a dealer who believes in *clean* gasoline and *clean* business.

We are always glad to give Hardware dealers full information about our pumps, and we co-operate with them to the limit to build good will through 100% service to customers.

In writing ask for Bulletins 276 HM, 310 HM and 2500 HM.

Business that stays is Business that Pays

Build it with the

DAYTON HARDWARE SCALE

Don't tell people you're honest and efficient. PROVE IT all day and every day by using Dayton Hardware Scales and plenty of them. Dayton means

HONEST SERVICE.

The International Dayton Scale gives accurate weight to the fraction of an ounce.

It computes to the fraction of a cent the money value of the goods weighed.

It saves time and prevents errors, enabling the merchant to get the profit to which he is entitled, and insures the customer that he gets full value for the money he expends.

EFFICIENT SERVICE.

The International Dayton Scale saves the time of the clerks and the time of customers every time anything is weighed.

It engenders confidence in the customer's mind in the integrity of the store that uses it.

It is the standing medium of good-will between merchant and customer. It brings the business that stays.

Vol. XXXIII. No. 25 THE MACLEAN PUBLISHING COMPANY, LIMITED PUBLICATION OFFICE: TORONTO, CANADA JUNE 18, 1921

Tinker Tom Prophesies

TALK NO. 316

Just a year ago

We were hoping for relief from Railway troubles and predicting better deliveries soon. Everybody was pressing us for rush deliveries at top-notch prices, but—

Oh, what a change !

When the Summer passed all the business in the World passed too, and you'll recall we predicted lower prices and changed conditions when others "hooted" the idea.

and Now ?

The Prince is now a Pauper! That's exactly what we said, January 20th, 1920, in the old reliable Hardware & Metal, would occur. Fortunately the swing has started back, maybe not so vigorously but it's on the way! If you're wise, you'll begin to think seriously of buying at the bottom which will soon be here, if it isn't here now.

—Tinker Tom

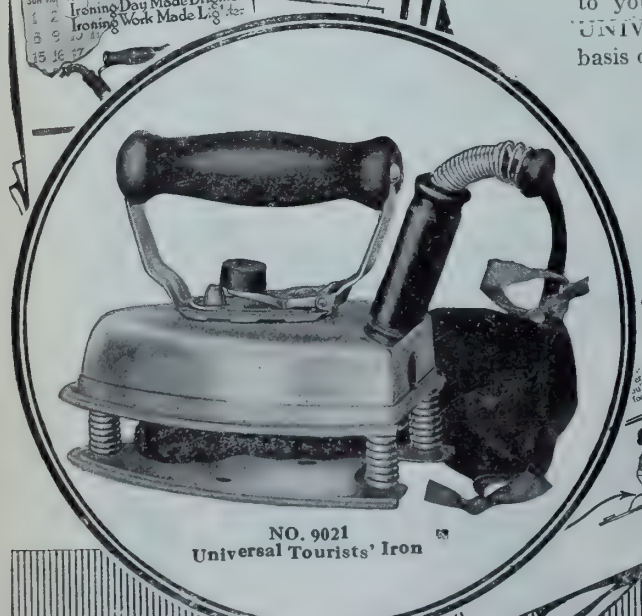
NO. 905
UNIVERSAL STANDARD
IRON

THE most curious thing in the world is a woman who isn't. The wise woman doesn't buy an iron as the result of sudden impulse. She satisfies her curiosity as to its origin, construction, quality and reputation. She is careful where she places her confidence—then watches the place.

WHEN you sell the UNIVERSAL Iron every sale proves a boom, not a boomerang. There is no aftermath of complaints, no calls for alibis or sugar-coated excuses. The profit you make, you *keep*. It isn't returned to the customer because the iron is returned to you. National advertising has firmly established the merits of UNIVERSAL Irons in the minds of housewives. They sell on the basis of distinctive merit to careful and exacting buyers.



IF your sales are lagging behind instead of leaping ahead, stock and feature UNIVERSAL Tourist's Iron No. 905 for home use and UNIVERSAL Tourist's Iron No. 9021—the little iron in big demand by travelers and vacationists.

Newspaper Ads, Folders, Car Cards—all the sales helps you want are yours for the asking.

Better Closets for Your Customers--

Bigger Sales for You

RITE-WAY Garment Fixtures provide double the room for clothes in half the space required by the old-fashioned closets.

On new work, smaller closets can be used, allowing better arrangement of rooms and reduced outside dimensions with a corresponding reduction of building costs.

Old closets equipped with Rite-Way Fixtures will accommodate more clothes and keep them in better condition than where they are hung back in dark, inaccessible corners.

A touch brings the whole wardrobe out into light and air. No chance for moths to gather. The carrier works on fibre rollers that will not rust or stick, and will support a surprising weight.

Hangers are kept at even distances from each other so that garments can be hung and removed easily, without mussing or tearing.

Easy to Install

A screw driver is the only tool needed. Can be fastened to the underside of a shelf or directly to the ceiling. Made in various lengths to suit any depth of closet.

Rite-Way Fixtures Are Quick Sellers

Did you ever see a woman who did not want additional closet space? Just let her see the Rite-Way Fixtures and she will be enthusiastic over the compact and convenient arrangement they provide. Strongly made and heavily nickel-plated. The price is within reach of every one. That makes a rapid turn-over. The margin of profit for you is much larger than you expect in quick-moving merchandise.

The Rite-Way Field is Unlimited

From the largest office or apartment building to the smallest home there is a demand for Rite-Way Garment Fixtures. Architects and builders everywhere are using them on new work. Retail customers want them for their own homes. The Hardware store that doesn't carry Rite-Way Fixtures is now old-fashioned.

We have taken over from the Barney Moore Co. the manufacture and sale of Rite-Way Garment Fixtures. They will continue to be made with the same excellence of design and construction that you know now **you can depend upon in Lawson Spring Hinges.**

Write Today

for detailed information and prices. Let us show you how Rite-Way Garment Fixtures will save space and money for your customers. Let us prove that they will increase sales and profits for you. This is worth while looking into. Write to-day to

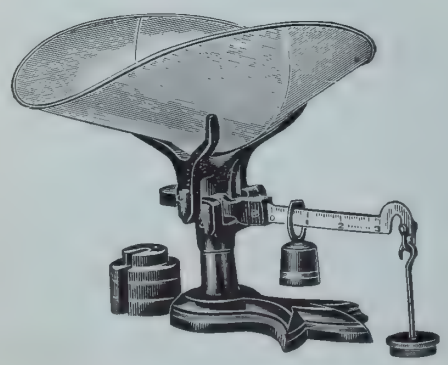
Hanging Household

and Other Useful Scales

In these days of modern efficiency, the housewife insists on her kitchen scale. With this she checks the accuracy of weight received from the grocer, the butcher, the ice man, etc.

The hanging model shown is a neatly Designed Scale with a capacity of 16 lbs. All the weighing is done without any loose weights, which are easily mislaid or lost.

The beam is nicely nickel-plated, and the figuring on it is clear and distinct. The Pan is of heavy white porcelain, easily cleaned, and kept clean.



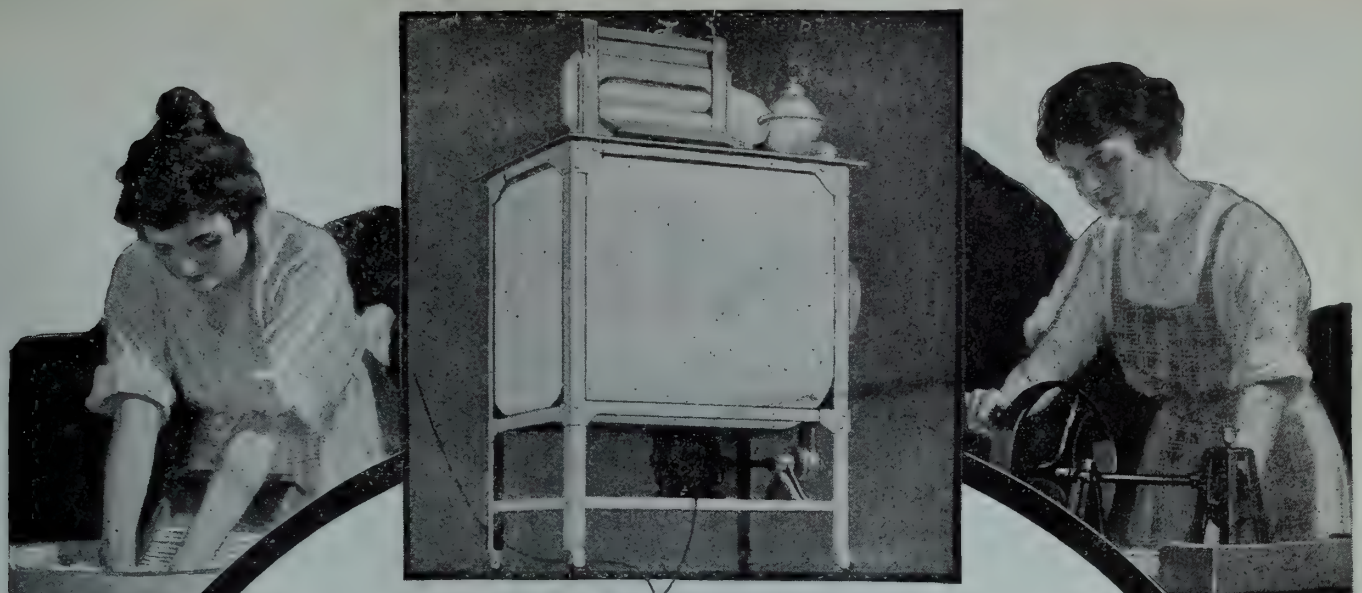
No. 212

No. 212 has capacity from one ounce to ten pounds. The Scale has nickel-plated beam and strong tin scoop.

It is light, neat and durable, reliable and accurate. Inspected and stamped by a Government official.

It is easily handled, and when not in use, takes up very little shelf room.

No. 214, with capacity of one-half ounce to 25 pounds, has a brass beam, marked to three pounds in half ounce notches.



No. 214

Extra weights supplied—Two 8-lb., one 4-lb., and one 2-lb., making the total capacity of scale 25 pounds.

This is a new scale, made to meet the demand for a Household scale of larger weighing capacity than No. 212. The scoop is made of heavy tin and is quite large. Government inspected and stamped. Can be used for commercial purposes.

Muscle or Motor?

The years are left behind that bound women in drudging peonage to household tasks. The electric motor, always a stimulant to progress, has made possible the development of household devices which have brought about an astonishing reduction in the amount of human energy expended on the washing, the cleaning, and the sewing of the nation.

Women have been quick to see the possibilities in motor-driven labor-savers for the home, and those who have had experience with these machines realize how important to their success is the reliability of the motor.

Reliability is the Westinghouse watchword.

Westclox

—that's Big Ben's family name

Getting Pocket Ben turnover

THE illustration above will appear on page one of the June 4 issue of the Saturday Evening Post. This will be the first time that Pocket Ben has had this preferred position all to himself.

It is the fourth time Pocket Ben has been on page one of the Post, each time under the Westclox banner—March 12, April 9, May 6, and June 4.

Now the readers of the Post are familiar with the name Pocket Ben and what it stands for. They know everything about him that the Post advertisements can tell them, particularly that he's a Westclox product.

The information they lack is the kind that nobody but you can supply—where to get Pocket Ben. If you have Pocket Ben in stock, our advertising does not do you one bit of good until the people in your town know that you have Pocket Ben to sell.

As soon as they know that, you begin to take in the money for Pocket Ben sales. When your stock moves we get repeat orders, and everybody is happy.

DU PONT THE STANDARD SHOTGUN POWDER

The Best Powder Makes the Best Loads —And the Best Loads Sell Fastest

—simple truths that have a great bearing on the question of "How fast can I turn over my stock of shotgun shells?"

The verdict is in the hands of the shooters themselves—and the vast majority use Du Pont Shotgun Powders, recognized as standard in this country for one hundred and nineteen years.

Meet this demand—carry a highly condensed stock of shotgun shells in the Standard Loads listed in the table below—cut down your investment by eliminating dead or slow-moving loads—speed up your turnover and increase your profits.

Keep this fact in mind—

Most Shooters Use Du Pont Shotgun Powders

STOCK THEM IN THESE STANDARD LOADS

Facts that Every Dealer Should Know about Du Pont

It is a fact that "Du Pont" is very hard-grained—more so than any other bulk powder—and is therefore highly resistant to moisture which tends to attack powders and gradually disintegrate them.

Other reasons why "Du Pont" has the largest sale of any powder made:

—it gives the highest velocity.

* * *

—it gives the closest patterns.

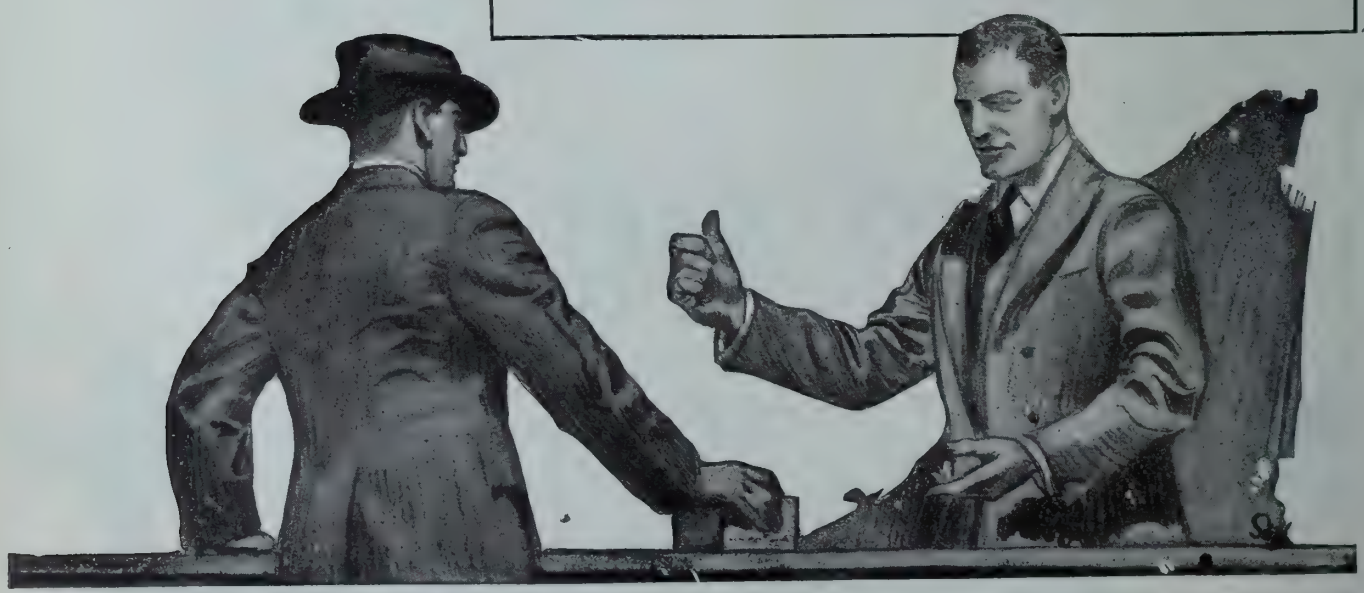
* * *

—it develops the lowest initial pressure, which means less strain on the gun.

* * *

—it is the cleanest burning powder made.

* * *



A shell is only as good as the powder it contains.

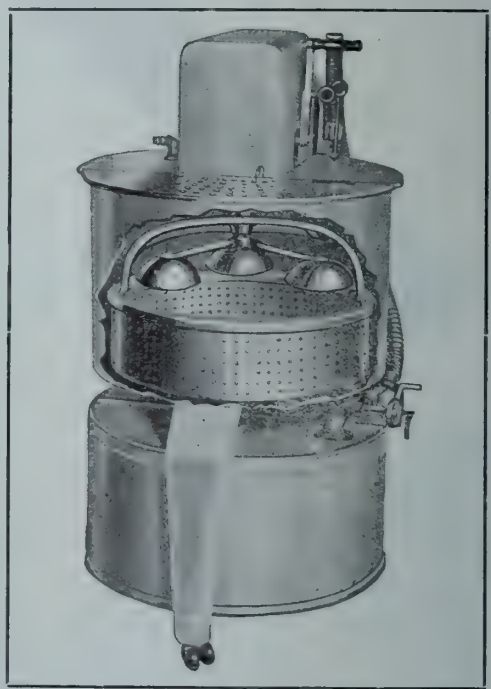
WHAT WILL SELL?

There are always buyers for the BEST article in every field of manufacture, whether it be an automobile, a pair of socks or a home utility.

TO EFFECT SALES IN DIFFICULT TIMES you must be able to prove to your customer the SUPERIORITY of the article you can show and demonstrate the advantages of ownership.

THERE ARE 147 DIFFERENT MAKES OF electric washers. Some are CHEAP machines.

Some are good machines.



ONE IS THE BEST MACHINE.

There is very little difference between the many good machines, but even a casual comparison of any or all of them with the BEST WASHER MADE will convince one of the fact that the KLYMAX is the washing machine PERFECT.

There is no other washer made which requires so little selling and servicing on the part of the dealer and so little attention from the operator on wash days.

Think what it means when you can tell a prospective customer, and show her, that with a KLYMAX ELECTRIC VACUUM WASHER she puts the clothes in dirty and takes them out in less than half an hour washed, rinsed, blued and wringer-dried ready for the line. And all this without having to touch the clothes, handle water or even get her hands wet.

The KLYMAX is the latest development in home washing machines successfully combines every BEST feature of the 147 different makes. It has no equal for efficiency, construction, saleability and serviceability. There is big money for dealers in handling the KLYMAX because of the rapidity with which they are turned over and the advertisements of satisfied customers. Write for fuller details.

SENCA
Safety Razors

Note the many features of the Senca Razor. Every detail necessary for ease and comfort in shaving has been provided for.

For twenty years the makers of the Senca razor have been manufacturers of the famous Genco standard (barber type) blades.

This experience in producing shaving edges will in itself guarantee high quality in Senca blades—the most important of the many points in which the Senca is superior.

Senca Model "A," which is the razor illustrated, is made of brass heavily nickel-plated.

Razor is packed complete with six blades in a black leatherette box lettered in gold and lined with purple plush. Cartons are provided for sharp and dull blades.

A curve in the handle throws the shaving edge at the proper position against the face and weight attained through the use of solid metal gives a natural and comfortable balance. The handle can be set in three positions providing slanting as well as the straight stroke. The guard is flat and leaves no ribbons of lather on the face after shaving, while the opening between the guard and blade permits the free passage of lather and avoids clogging.

Handle is permanently attached to the frame which opens wide, permitting the insertion and removing of the blades without danger of cutting the fingers and making the razor easy to clean.

To Sell For $1.00 Each to the Shaver

Sold through the regular Jobbing and Retail trade in keeping with recognized merchandising practices.

"There is a profit on the razor as well as on the blades"

If your jobber cannot supply you, write us.

1847 ROGERS BROS.
SILVERPLATE

Ambassador
THE NEWEST PATTERN IN A FAMOUS SILVERPLATE

The dignity and beauty of this new design are most happily suggested by its name. Like the true ambassador—at ease wherever he may be; distinguished, whatever his surroundings—the Ambassador pattern worthily represents the great line of which it is a part.

NOW READY FOR DELIVERY

MERIDEN BRITANNIA CO., LIMITED

Ambassador

AMBASSADOR SUGAR SHELL

A New Pattern

True to Old Ideals of Quality

COMBINING a distinctly new decorative design with a graceful outline, and of that high standard which characterizes all 1847 ROGERS BROS. Silverplate and makes it the best—

THE *Ambassador* PATTERN

is the latest product of the world's largest makers of fine silverplate, and worthy indeed of bearing the trademark that has long identified the most extensively advertised, the best known, and the easiest sold brand.

The Ambassador Pattern makes a strong appeal to lovers of quality silverware and it can be offered with absolute assurance. Noteworthy for its freshness of design and authoritative style, its high quality insures years of faithful service.

Your customers are bound to see and read the dominant Ambassador announcements appearing regularly in publications of national circulation, and all are possible buyers.

In handling 1847 ROGERS BROS. Silverplate, you handle the brand that the great majority of the public wants.

Include in your stock a representative assortment of staple and fancy pieces in the Ambassador Pattern. Be prepared for and profit by the demand for this design.

Link Your Store to the Big Advertising Campaign

We will forward a variety of advertising helps and attractive sales-compelling display material.

Tell your customers about the new Ambassador design. Display this pleasing and attractive pattern in your windows and your store, feature it in your newspaper announcements and get your full share of the benefits.

Ford Auger Bits

Solid Center Pattern No. 542

Sizes in sixteenths: 3-4-5-6-7-8-9-10-11-12-13-14-15-16-17-18-19-20-21-22-24. Packed one-half dozen in a paste board box up to and including 24/16 in. Also put up in wooden boxes and canvas roll sets.

The solid center auger bit is popular with most mechanics. This is especially true in its smaller sizes, because its strength is so clearly apparent, and because it is a great improvement over the old style twisted bit in its ability to clear itself.

This type of bit also made in car bits and ship auger car bits.

Single Lip Auger Bit No. 531

Sizes in sixteenths: 3-4-5-6-7-8-9-10-11-12 13-14-15-16-17-18-19-20-21-22-24-26-28-30-32. Packed one-half dozen in a paste board box up to and including 24/16 in., also put up in wooden boxes and canvas roll sets.

In perfecting these bits, we cast aside all tradition of auger bit making and scientifically designed a type of bit that would give the greatest cutting power with the least friction. The concave spiral draws the chips towards the center of the bit, and carries them to the surface, instead of driving them to the sides of the hole where they tend to bind and choke the bit. This feature alone distinguishes this line of bits, for it accomplishes this purpose better than any other bit.

This type also made in car bits, ship auger car bits, ship augers, machine bits and boring machine augers.

Your stock is incomplete without these Ford Bits. Ask your jobber to show them to you.

Subject - TAPATCO Gloves & Gauntlets

Dear Sirs:-

You may be interested to know that the service that we have had from the subject articles, has been unequalled by any other glove or gauntlet of Canadian or American make. We have tried all types from the cheapest to the most expensive in first-cost. TAPATCO gloves and gauntlets prove by far the cheapest.

Yours very truly,

VAN DER LINDE RUBBER CO. Limited

Van der Linde
Factory Manager.

VvdL/MSP

What Users Think

Read the letter

Here is proof that the wearing qualities, and service, of Tapatco Brand Work Gloves makes them the cheapest in the end. They give the most wear per dollar invested for consumers, and the best sales for merchants.

Tapatco Gloves are made in Gauntlet, Knit Wrist and Band Top. In Heavy, Medium and Light Weights. Also Leather Tip and Leather-faced Gloves, Jersey Gloves and Mitts in Tan, Slate or Oxfords. Made of best grade Cantons.

Why Horse Owners Buy Tapatco Brand Horse Collar Pads

Because horses disabled and idle are an expense every minute they remain so. The soft, cushion-like Tapatco Collar Pads prevent bruised, chafed, or galled shoulders. They keep horses well and fit, producing profits every day.

An exclusive feature of Tapatco Pads is the Tapatco Stapling Device for attaching hooks. (U.S. Patent Dec. 1, 1914) Canadian Patent April 6, 1915). This gives a firm hold that outlasts even the splendid wearing qualities of the fabric itself.

CONCRETE FACTS ABOUT YOUR PLIER BUSINESS!

Stop and think for just a minute about your plier business!

If you are a wise hardware dealer, you have gotten your plier business down to one "quality line" and have a line or two lower in price for general demand.

Your "quality line" sells largely to mechanics, linemen and electricians—who demand only the best—"Klein Pliers."

The "Klein line" has been built out of the experience of 64 years of supplying the quality trade—every tool is right, and our proposition is confined to the few patterns and sizes in demand.

We back you with the right kind of advertising helps—counter displays, window displays and enamel signs.

Put "Klein Pliers" in as your **quality line**—sell the tools the expert mechanics buy—write for our proposition No. 4 to day.

You Can Make 40% Profit

THE secret of successful merchandising is quick turn-over. To keep our factory working up to top notch, and to boost "Made in Canada" electrical goods, we are inaugurating a merchandising campaign, featuring our celebrated Sovereign Electric Iron. It's going to be a winner. Thousands of women will be attracted to the electrical stores, who are displaying the

Sovereign Electric Iron

in their windows.

The margin of profit on the Sovereign Iron is particularly generous. The new list price of $6.00, and the special discounts, enable you to make 40 per cent. profit on this appliance.

Specially prepared advertising matter, suitable for your use, with your name and address printed, free of charge, is available. Sales letters printed on attractive dealer letterheads, ready-prepared newspaper advertisements, window cards, folders, etc., are yours for the asking.

A Selling Point That Sells

Kopper King Spark Plugs are anti-fouling and rust-proof. This is a selling feature that really appeals to the car owner. A Kopper King Plug will not rust into the cylinder head.

This enables you to sell your customers a Spark Plug that ensures freedom from trouble.

The Kopper King is a Sales-builder --- once a car owner buys his first one, he will, in future, enthusiastically specify Kopper King Spark Plugs throughout.

Rust-proof

A heavy coating of copper protects the body of the plug. This prevents carbon deposits; carbon under electrical heat will not adhere to copper.

KOPPER KING

Kopper King Spark Plugs ensure you a better margin of profit than any competing plug. They meet every requirement. Once sold they stay sold.

SAVAGE

A Rifle And a Shotgun in One

All Model '99 Take-Down Savage Rifles Can Now Be Made Into a Shotgun With The New Interchangeable .410 Gauge Savage Barrel

NO DELAY—you don't need to send it to the factory for adjustment. In two minutes you can change it yourself. It's the most common-sense, useful, and convenient addition that has ever been introduced with any line of rifles.

Every owner of a Model '99 Savage Take-Down Rifle will want a .410 gauge barrel, because with it he can hunt big game or spend an off day at Camp shooting partridge or rabbit.

And remember the .410 gauge barrel is interchangeable with any regular barrel in any caliber on any Model '99 Take-Down Savage Rifle. But it has to be a Savage!

In ordering be sure to specify whether rifle is a featherweight model or a regular model.

Model '99 Take-Down Savage Rifles to which the .410 Gauge Barrel can be adjusted

.30-30 Savage Regular
.303 Savage Regular
.22 Savage Hi-Power Fwt.
.250-3000 Savage
.30-30 Savage Fwt.
.303 Savage Fwt.

The .410 Barrel is also adjustable to the old Savage rifles caliber, .25-35, .33-55 and .32-40, which are no longer manufactured.

Next to His Horse

The cowboy's rope is his closest friend.

Under his expert guidance, it instantly obeys the dictates of his will. To do this, the cowboy's lariat must possess the qualities of lightness, strength, softness, flexibility. It cannot be just rope.

And because all Plymouth Rope is made with a real appreciation of the work it is to do, Plymouth lariat is the choice of most expert ropers.

So Plymouth Yacht Rope, and hay rope, drilling cables, transmission rope, tow lines, etc., give that characteristic measure of service and satisfaction.

Plymouth Rope is pure Manilla; more than that, it is good rope. Your customers will find it is the ROPE YOU CAN TRUST.

LION BRAND CORDAGE

Time is the most thorough test. High quality is much, but superiority consistently maintained for approximately a century is far more.

During this period Consumers Cordage has been the choice of many leading Canadian industries over long periods of time, as well as by the farming community.

Early in the 19th century Consumers Cordage towlines were used to tow the "Accommodation" the first steamboat in the British Empire—along the St. Lawrence River navigation route is used extensively by the various elevators, and has been used by vessels of the Montreal Transportation Company, and the Hastings Saw Mills (owned by the B. C. Mills and Trading Co.) more than a quarter century. This record makes greater sales, a reason why you should handle Consumers Cordage.

The Difference

Uses the same fine Gillette Blades as the old-type razor, but now your customer gets ALL the luxury of the finest shaving edge in the world.

The main difference between the New Improved Gillette Safety Razor and the old-type Gillette are two:

The Shave Itself;
The Service of the Blades.

The shave is quicker, cleaner, smoother and infinitely more comfortable.

The Gillette Standard blades, when used in the new razor, give many more shaves than when used in the old-type razor.

The Overhanging Cap, Fulcrum Shoulder, Adjustable Short Flexure and Channelled Guard are the new features that give these results.

QUALITY COUNTS

YOUR customer invariably wonders, "Am I getting my money's worth?" whenever she buys.

At the moment she doesn't know. She can't tell. But in a week, or a month, or a year, she **will** know, because the **quality** of the article will have made itself felt.

If the quality proves to be high, your one-time buyer will come back for more, because she "got her money's worth" the first time.

But if the quality was lacking she'll start nosing around looking for a **qua.ity shop.**

This is especially true of electrical appliances. What is your stock like? They may **look** fine, but what will they **do?**

If you carry the new Canadian Beauty line you are perfectly safe, for we have rigidly insisted on turning out appliances of the very highest quality only.

The public will spot the new Canadian Beauty Appliances right away for their "good looks." They have a smooth finish, brilliant polish, graceful lines, atmosphere—

Their "good looks" will **sell** them and their splendid quality will **keep** them sold. Your customers get "their money's worth." They'll surely come back for more new Canadian Beauty Electrical Appliances.

And they are right up to the minute in improvements. No worth-while feature is lacking. The new Canadian Beauty line is the last word in electrical appliance perfection.

Order through your jobber, or, if he cannot supply you, direct from us.

Value of Trade Marks in Merchandizing

Development of Trade Mark or Trade Names has been Important Factor in Perfecting and Extending means of Production and Distribution—Giving the Product Individuality—Protecting the Buyer and the Manufacturer—Value of Color in Trade Marks.

ONE of the outstanding features in connection with the development of efficient merchandising methods has been in the extension of the principle of the trade mark or trade name. Manufacturers were quick to see the value of giving their products individuality, for it singled out the line which stood for the highest in quality and workmanship and assisted the retailer and the consumer in their buying. The principle has been much extended in recent years along the lines of adopting trade names which not only single out a particular product, but which give, at the same time, some indication of their purpose or merit. Some of these names are designed to convey a vivid impression to the mind, and to make it easy to remember. It is therefore said that ability to recognize a certain product and the facility of recalling certain claims made for the article bearing that name, are the chief functions of a trade mark. This being the case, the more easily and correctly the mark can be recalled and the more quickly it is recognized, the better will be the result from its use.

Forms of Trade Marks.

Trade marks come under one or more of the following headings: pictures, words, geometrical forms, syllables or groups of letters. Naturally these differ much in their value from the standpoint of securing attention and their being retained in the memory. For memory value and recognition, pictures have the best result. Forms come next, then words and syllables come last. It is said that syllables are six times as difficult to recognize as pictures, and words are nearly three times as hard.

The functions of a trade mark, briefly, are as follows: Simplify purchasing, help identification, recognition and recall; protect the consumer, merchant and manufacturer against substitutes; crystallizes good-will and reputation as marketable qualities; acts as a sales force through its suggestiveness. It also protects the consumer from the standpoint that once a manufacturer has established a certain standard for his product he will be forced to maintain that standard throughout every article which bears the name.

Easy to Infringe.

In past years there has been some difficulty over the registration of trade-marks, due to the fact that it is not difficult to infringe upon some other mark already established, and also partly due to the fact that there are some traders who will deliberately infringe on a well-known trade-mark in order to take advantage of the market already established by that line. Therefore in the selection of a trade mark great care must be employed to see that no infringement takes place.

Advertising Enhances Value of Marks.

The development of advertising as a force in selling has enhanced the value of a good trade mark for it has greatly widened the field in which the product can be marketed. The development of various channels of distribution has also removed the final sale of the goods so far from the manufacturer that some such means of ultimate identification is necessary.

The law regards the trade-mark as a protection to the buyer, and only incidentally a protection to the manufacturer. The reason that foremost manufacturers have trade-marked goods is that the mark is valuable only to a permanent organization which gives uniform value in its products, and, being given to assist the repeat buyer or permanent customer, there would be no

use identifying the product unless value was always given.

Trade marks are not property, they are merely an identification and cannot be transferred, bought or sold, as among individuals. They can be transferred only as part of a business.

Registering Color.

The question of registering colors in trade marks is one which is grossly misunderstood by many firms. A popular notion exists that a trade mark registered merely in black and white, is protected against marks of similar design in any colors. It has frequently occurred, therefore, that marks usually used in colors have been registered without any statement as to color, those registering them in this way doing so either through ignorance or with the idea that they were enlarging the scope of the trade-mark and making it an infringement to use the same or a similar mark in any colors whatsoever.

Value of Color.

Color is an essential element of a trade-mark when color is used and it is equally important to get the proper color and see that it is properly registered as to see that the name is spelled properly and the design the correct proportions.

The value of color in a trade-mark is vouched for by many manufacturers who use it to attract more attention. True the average person has an eye for coloring in a suitable design, but unfortunately the idea is overdone in some cases and there are freak advertisers who employ colors to attract attention but which ultimately displease. Shrewd advertisers do not make such use of color, but plan to blend the shades in a pleasing manner, and put the reader in a receptive mood.

Where the Merchant Comes in.

The use of trade-marks in the merchandising plan of to-day is an important factor. For many years merchandise had little to distinguish the product of one manufacturer from that of another, and later there were private brands which had little meaning in the channels of distribution. This situation has been changed, until now the trade-marked product with its backing of national advertising and its definite standards of quality is the backbone of all trade. Here is where the retail merchant's interests are closely allied with the marketing of trade-marked goods. The merchant accepts the goods so marked with the knowledge that they are of a certain standard, and he feels safe in recommending such goods to his customers. Through national advertising the customer is more or less acquainted with the goods and is more ready to accept the recommendation of the merchant. Some merchants realize the value of trade-marked goods to such an extent as to confine their stocks to such lines. This condition is not altogether general but the importance of the trade-marked goods is such as to direct the tendency in that direction.

Price Recessions on Steel Products

Lower prices this week on certain Steel Products Maintains Tendency toward Lower Price Levels on Hardware—Reflection of Conditions in Iron and Steel Industry—Steel Production below ratio of Consumption due to Large Stocks held by Manufacturers —Another Price War is Rumored.

WITH many price quotations on hardware commodities inclining towards lower levels during the past few months, the reductions in certain steel products, announced this week, are of vital interest to the trade. Revisions on a downward grade are noted in the new list prices on double-pointed tacks, and a similar new list with lower quotations has been issued, covering bright and coppered staples.

The decrease in the base price of wire is a feature of the current steel product situation, the extent of the reduction being 35 cents. Wire nails also register a new lower base price, and stove-pipe wire prices are included in the list of present declines. Quotations on cut nails are also lowered, and other lines on which decreases have been announced are coppered-split clinch rivets, and both bright and galvanized fence staples.

These reductions in finished steel products are heralded in some quarters as the forerunner of general lower levels in basic iron and steel. The fact is noticeable that the great increase in capacity of steel production during war time, now operates adversely to prevailing market conditions. Recent months have witnessed a gradual decline in the percentage of mill operation, and this current depression is generally expected to continue until August.

Production Lower Than Consumption.

With the low rate of operation in evidence, a corresponding movement to reduce stocks is apparent. In fact, production of steel is reported to have sunk below the ratio of consumption, a condition, which if continued, is expected to eventually lead towards a revival in the industry during the fall months. No great demand for steel is evident however, although the average demands this spring have shown a slight increase over the very poor conditions that prevailed early in the year.

May be Another Price War.

Rumors of another price war between the steel mills are being circulated, but no great reliance is placed by dealers upon this phase of the current situation, as it is pointed out that with the production of steel down to within almost one quarter of capacity, the cost of operation is correspondingly high. Lower prices are looked for when the demand has revived, and a consequent increase in production has resulted. The ratio of cost by the steel mills should then be lowered, and price reductions are more likely to be in order under such conditions.

The fact that price cutting would neither create nor stimulate demand was generally thought to have been amply demonstrated during the price war, launched by the independent steel mills this spring. Owing to the recent gradual revision in conditions, including the wage adjustment of the Steel Corporation during May, it is now indicated that a serious effort to locate buyers would probably materialize. In some quarters, buyers and consumers of steel and steel products, are reported to be awaiting future developments, and look for slight price revisions on a downward scale. Others are said to be even holding current orders, pending further declines.

Lowering Overhead Costs.

Other opinions, however, hold that steel market conditions do not warrant any further price reduction until lower levels are evident in wages and freight rates; more especially the latter. Dealers point out that lower freight charges would be the primary step in reducing the cost of transporting the raw materials, and that finished steel products would then be in line for similar reductions. The movement for lower prices has recently made marked progress. Manufacturers claim that overhead costs have been reduced wherever possible, under existing circumstances. Also that while some declines have been made in raw material prices, further revisions are held up pending contributory costs. Labor has recently registered a willingness to accept lower wage scales in several instances, and it is claimed by the steel interests that a decrease in transportation charges would complete the circle on a reduced plane, and primarily pave the way for the return of pre-war price levels on many hardware lines.

Price Reductions on Enamelware

Price Reductions Announced by Manufacturers on Enamelled Ware, Tin-Ware and Other Similar Lines—New Scale of Discounts Expected to Stimulate Business—No Drastic Reductions expected on Aluminumware.

ONE of the most important of recent price reductions is the announcement this week of substantial revisions in prices on enamelled ware, granite ware, japanned ware, tin ware, galvanized ware and many similar lines. The average decrease varies between 20 and 25 per cent on these different products, some wares having been reduced to a slightly greater extent, and other lines not registering quite such radical changes.

The general opinion of hardware merchants is that the price revisions on such a prominent line as wares should have far-reaching effects on the trade, and they are directly in keeping with the public expectations for lower price levels. While the actual list remains unchanged, discounts have practically been altered all through on a generous scale, and the nominal cost is extensively lowered on the majority of grades listed.

Reason for Reductions.

In announcing these reduced prices the manufacturers state that they have kept in mind not only the reductions which have already taken place in the cost of labor and in certain raw materials—both of which items are vital factors in production—but they have also anticipated, somewhat extensively, future reduced wage scales and further expected reductions in raw material prices, particularly those covering steel.

New Discounts to Hold.

The new discounts amount to an average cut of almost twenty-five per cent on the previous prevailing quotations, and the manufacturers further express the opinion that this current revision should enable the trade to purchase future requirements, firmly confident that the new prices will remain stable for several months.

The announced reductions are expected to stimulate active trade in these lines; for the small replacement orders that have been prevailing for some time, have resulted in low stocks among merchants generally, with little or no surplus of supplies noted on hand. The new scale of prices is quoted as being comparatively lower than those at present prevailing on similar lines in the foreign markets, and not only register a startling precedent in the decline of kitchen utensil prices, but it is calculated to pave the way—according to opinions gained in certain quarters—towards some reductions in the current costs of aluminum ware.

Effect on Aluminum Ware.

A slight decrease in the cost of sheet aluminum has recently been noted on the market, but outstanding price reductions are not generally expected to feature aluminum ware to the same extent as in other lines of kitchen products, due to the fact that certain price cuts have been made from time to time among the manufacturers and distributors of aluminum ware in competitive efforts to secure business or uncover buyers.

The present revision of enamelled-ware prices, however, conforms to the current trend of quotations on numerous other hardware commodities, and also substantiates the gradual return to pre-war levels, as outlined in recent issues of Hardware and Metal. The new discount list on wares is included in the weekly market quotations.

Further Curtail Steel Production

Little Hope of Renewed Activity Before Fall—Price Recessions Bring No Stimulation to Trade.

A dragging market persists in iron and steel with new tonnage so light that a further paring of the 25 to 30 per cent of mill operations is in sight. Another large independent company will be idle by the end of the week with the exception of a single blast furnace, says The Iron Trade Review. If this plant goes down, it probably will remain practically inactive to September. Some eastern plate mills are expecting to close for the month of July. Valley operations this week temporarily were speeded up to 39 per cent of ingot capacity or double that of a week go. All present indications point to one of the quietest summers in the history of the industry.

The railroad outlook continue to offer some measure of promise. Considerable buying of repair material, railroad purchasing agents say will be done as soon as the recent shop wage reductions have been assimilated. Competition among the mills for desirable tonnages and even for small lots rules very keen. The steady weekly droop of the general market level is being continued. The composite market average of The Iron Trade Review this week is $42.15 against $42.45 last week and $42.75 two weeks ago.

American producers are more inclined to meet the lower foreign mill prices. Great Britain's pig iron production in May was only 13,600 tons and of ingots, but 5600 tons, or 1 to 2 per cent of that in January. Only one small blast furnace in Great Britain now is active.

Revival in the Fall.

So pronounced is the stagnation that the trade has given up hope that anything can be done to break the accentuated summer dullness, says The Iron Age. The continued excess of consumption over production is digging into stocks in consuming hands and some expansion in demand is counted on in the early fall. The quick deliveries asked on much of the run of new orders indicate that stock balances are far from remaining well rounded out.

Except for a further slowing down of operations, the week has been devoid of developments. Gaging of the percentage of producing capacity that is active is difficult. It is doubtful if the industry as a whole output is above a 25 per cent rate. The estimate for the Pittsburgh region is that it is around 20 per cent.

Seven of the open-hearth plants of the Carnegie Steel Co., including blast furnaces are idle. Two more of its blast furnaces are expected to go out of blast this week, leaving only 15 of its total of 59 in operation. One Steel Corporation stack has been blown out in Chicago, leaving nine active out of 29. The corporation's steel output in the Chicago district is put at 30 per cent of normal.

Price changes have been unimportant. The recessions, as in wire products, sheets, chain and cast-iron pipe, brought no better demand. Bidding for export business, small but conspicuous by comparison with the orders making up domestic sales, bring out price weakness which points the way attractive inquiries will be received except in the event of an expansion beyond present hopes for 1921.

Trade Enquiries

Names and addresses of enquirers can be obtained only by those interested in such lines upon application to Hardware and Metal. Please quote reference number when requiring addresses.

3155. **Trade with New Zealand.**—The London office of a New Zealand firm would welcome quotations from Canadian exporters of hardware, iron staples, tools, etc., suitable for sale among the agricultural population of New Zealand.

3156. **Hardware and metals.**—A London firm buying for associates in China and the Dutch East Indies is open to handle the agency for Canadian lines in the above markets.

3157. **Machinery and metals.**—The London office of an Indian house is open to receive offers from Canadian exporters of machinery and metals suitable for the Indian market.

A New York exporting firm desires to be placed in touch with manufacturers of the following: rails; galvanized barb wire, 12 by 6-12 by 3; galvanized No. 8 wire; galvanized diamond head nails; galvanized floor brads; galvanized flat-head nails; galvanized pipe, with a view to exporting same to New Zealand.

Retailers' Relation to Present Prices

Retailer Being Made the Scapegoat for Strong Undercurrent of Resentment for Alleged Refusal to Reduce Prices—No Instances of Retail Profiteering have Come to Prominence—Retailers Have Faced Stern Difficulties—No Organization to Maintain Prices.

POINTING out that it requires some courage and a large degree of self-restraint to avoid blaming the other fellow for conditions that strike at one's business activities, John O'Connor, manager Murray-Kay Co., Toronto, in a recent interview, deals with the condition existing to-day wherein the retailer is being made the scapegoat of a strong undercurrent of resentment for his alleged refusal to reduce prices.

"Whether those who are all too frequently endeavoring to place—among other things—responsibility for the unemployment evil on the shoulders of the er or manufacturer to his Majesty in retailer have any grounds for their line of propaganda is difficult to determine," says Mr. O'Connor, "for it must be admitted that no specific instances of retail profiteering have been brought into prominence; but the propaganda nevertheless bears the stamp of authenticity because of its endorsement by men in high positions. When linked with the idea that, because of high retail prices, commodities are not moving and manufacturing plants are silent, the propaganda takes a slant that will work serious harm if not checked.

"The public undoubtedly has suffered through the so-called 'vicious' circle of expanding prices which eventually got out of control, but—let's see who were contributory to the inflation? Is it not fair to assume that those two highly organized entities, if I may call them such, Labor and Capital, were the two great factors in the production costs? Throughout the period of price spiral activity, the retail trade was the one that suffered from interference to an extent that gave many a retailer an almost hopeless outlook.

Many Handicaps.

"First we had the Board of Commerce insisting on a margin of profit entirely inadequate to the proper financing of the average business. Next we had the luxury tax with the arbitrary enrollment of all retailers as tax collectors without fee or reward. These two Governmental handicaps on retail distribution, had they continued long enough, would have sent many a sound business to the scrap-heap.

"After having successfully combated the handicaps referred to, the retailer now finds himself charged with arbitrarily holding up prices—a charge impossible of proof and wholly ridiculous, for there is no other line of mercantile activity that stands so aloof from organized action as does the retail trade.

"Every other department of business effort has its trade organization—ostensibly for the purpose of preventing demoralization—but in the last analysis one is led to the conclusion that the stick-together spirit prevents many a break in prices that might occur if things were different. The retailer plays a lone hand so far as the pricing of his commodities is concerned. His ambition is to attain prominence as a merchant giving the best values obtainable anywhere. Occasionally he breaks into hectic merchandising by slashing prices below replacement costs. In such cases he is merely hysterical and is not contributing to the welfare of his community when he does the reckless things, even though a few seem to benefit temporarily by getting goods for less than their worth.

No Combination.

"I am interpolating this sidelight on retailing in proof of my contention that no combination exists for the holding up of prices in the retail trade. In no other line of business is there to be found the fierce competition that governs retail activities. This competition is an absolute guard against exorbitant profits by the retailer, and so long as retailers are determined to conduct their businesses free of secret agreements or understanding with respect to prices, the public can rest secure in the knowledge that it will never have to pay more than a fair margin for the retailer's profit.

"The whole system of retailing is modelled on the plan of not how much, but how little we can quote. Indeed individual retailers from time to time have used their great abilities and have spent money freely to secure legal judgment enabling them to sell below fixed prices. This is a matter of record in many courts.

"The public's ability to pay has never entered in a large way into the retailer's curriculum; rather has he devoted himself to the pulling down of costs, thereby giving the ultimate consumer the benefit of highly trained merchandising ability. It is a matter of every-day occurrence that retailers are in conference with manufacturers closely analyzing commodities and endeavoring through the placing of large orders, to cut production costs. This all works in favor of the consumer, for the retailer passes on whatever benefit he is able to secure from reduced production costs.

Labor and Capital Responsible.

"The retailer is the last link in the chain of producer to consumer. The price the retailer pays must absorb all the costs and profits which Labor and Capital think they are entitled to. If these have been more than is necessary, it is the combination of Labor and Capital that should answer at the bar of public opinion. The retailer can place his margin of profit only at a point in line with what his competitor is willing to accept. Let me emphasize again the retailer's position—at the end of the line. In order to get goods to sell he must pay the price, or rather assume the burden created by those who brought the commodities to the finished state.

"The spiral of retail prices never climbed to the heights—proportionately—of manufacturing costs. To-day prices at retail are fixed below the level of what should be secured in order to show a fair return to the retailer. I think most retail organizations can bear me out in this."

View of hardware department of R. T. Holman, Ltd., Summerside, P. E. I., showing the employment of modern display facilities. A display of cutlery, razors, etc., is seen in the showcase. Tools are displayed in a glass-fronted cabinet in the wall fixtures and supplemented with stocks kept in the drawers, with samples affixed to the front of each. Every section of the store is lettered to facilitate stock records.

$2,000,000 Turnover in Town of 3,000

Experienced Salesmen in Charge of Each Section of Hardware Department—Getting the Public's Interest Through the Window Displays and Advertisements—Special Train Brings Customers From Radius of Fifty Miles—Offering Articles in Combination Groups—Schoolboy Popularity Contest.

WITH an annual turnover of approximately $2,000,000 in Summerside, Prince Edward Island, a town of 3,000 population, with a provincial population of only 90,000, the firm of R. T. Holman, Ltd., is regarded as probably the largest retail business in the world in proportion to population. Some 200 employees are on the pay roll and it requires fifteen large warehouses to feed the large retail store, which measures 128 feet deep and 260 feet long, four floors in all. The warehouse property includes an extensive wharf and three railway sidings.

One of the busiest sections of the big store is the hardware department, which occupies a large area in the mid-section of the main building.

Here are carried roofing, paints, fencing, tools of every kind, building hardware, stoves and ranges, auto accessories, fishermen's supplies, sporting goods, washing machines, farm pumps and machinery, cutlery and in fact every article found in a modern hardware store. Each experienced salesman has charge of one particular line and all correspondence with the manufacturers and all trade news relating to that line are referred directly to the salesman interested. With such authority the salesman is put on his mettle to make the best showing possible and is constantly trying for better values and for new sales ideas.

Novel Window Dressings

Two large windows and a battery of silent salesmen are used to display goods. Efforts are made to have window dressings that are different from the ordinary. A woodsmen's window, for example, would show a tree trunk leaning against the wall of the window with an axe buried in the wood; a log on a saw-horse would have a saw buried in it, with the floor sprinkled liberally with sawdust; a log lying on the floor would be well chipped at the top, with the large chips lying about and the axe head buried into the wood.

At the start of the fishing season a window was arranged with a pool of

Some samples of the local advertising done by R. T. Holman, Ltd., Summerside, P.E.I., in connection with its hardware department. Generous use is made of illustrations and some item of current interest is generally worked into the introductions to secure attention. The ad. on housecleaning makes the point that housecleaning can be done for less money this spring. The paint ad. points out that it is better to paint than to repair. Some pointers for securing a good lawn and garden are set forth, and another ad. emphasizes the necessity of good traps for game hunting.

water forming a pond, artificial moss at the sides and live fish disporting in the water. Another very successful window was arranged to show the line of bicycles handled by the store and with a cyclometer attached to the raised rear wheel, a mile race was run off in the window between several local speed cyclists, a suitable prize being awarded the winners.

"Something new" has been the slogan of Holman's advertising department and quite a large share of the successes achieved can be traced directly to the novel and sensible sales plans that have

Crowd in front of the sporting goods window display of R. T. Holman, Ltd., Summerside, P.E.I. A bicycle race was the centre of attraction, the back wheel of the bicycle being raised and by means of a cyclometer a race was run off in the window between several local speed cyclists, a suitable prize being awarded the winners. Picture shows the referee marking the score of the first contestant. This is a sample of the novel displays which this firm endeavors to arrange to attract attention to its various departments.

Another view of the hardware department of R. T. Holman, Ltd., showing some of the heavier goods on display. The idea carried out is to place the goods within easy reach of the customer, so that close examination and personal handling may be facilitated. Here are the stoves, washers, bicycles, etc., placed so that the customer may spend as much time as desired on examination.

originated at the advertising office.

Refund Railway Fares

As mentioned before the store is located in a town of 3,000 population, the nearest other sizeable community is located nine miles away and the only city in the province is 48 miles distant. Consequently a large part of the selling is done to out-of-town customers and it is a frequent and very successful inducement to refund all railway fares to out-of-town customers, providing their purchases amount to a certain sum usually $20.00.

Recently the firm increased the transportation plan, by hiring a special train and sending it out with a special representative of the store to bring customers from a radius of 48 miles from Summerside. Some of these trains have carried as many as six passenger cars and standing room was usually required at that.

Another plan, very popular, in which some of the other stores co-operated was a Bean Guessing Contest. Prizes aggregating $550.00 in value were offered to those who most correctly guessed the number of beans in a large glass jar. Purchases amounting to one dollar qualified a person to guess.

Dollar sales have been frequent; Holman Special Sales are recognized as real bargain events and frequent drives are made on a certain line, the price usually being a very low one on an established article.

Offer Articles in Combination

It has been found that in some lines it is a popular and profitable scheme to offer articles in combination even at a slightly reduced price. For example paints and paint brushes; fencing and fence tools; lawn hose and patented sprays; oil and containers and popular combinations.

Schoolboy Popularity Contest

One of the most popular plans was a schoolboy popularity contest recently held, in which more than 100 schoolboys participated. Prizes ranging from a high grade bicycle to baseball games were given, weekly "ginger" meetings with refreshments were held and a banquet was tendered all who polled 10,000 votes. The boys were given charge of their own meetings and some showed unusual initiative in securing votes; some even making out of town visits to friends and relatives urging them to buy at Holman's and give him the votes—every dollar sale counting as 100 votes for the candidate favored by the customer and the winner rolled up a vote in excess of 100,000.

Quite recently the salesmen of R. T. Holman, Ltd., embracing all departments, formed an improvement and entertainment club. More than one-tenth of the voting population of Summerside was present and featured by frequent banquets and smokers, the club is rapidly becoming one of the important organizations in the province.

Record of Daily Sales

Records of daily sales and stock on hand of every department are kept right up to the minute and there is never any doubt as to what lines are selling best; what lines should be discontinued; how large the stocks are. Every section is lettered to facilitate stock records and every article carried is displayed in silent salesmen, on the front of storage drawers, on the top of bins or otherwise before the customer's eyes.

A large mail order catalog, covering every department, is issued by R. T. Holman, Ltd., twice a year to a very large list of customers throughout Prince Edward Island, Nova Scotia, New Brunswick and Quebec. This is the only large general catalog issued by a strictly Eastern Canada concern and the slogan,

"Shop by mail from Holman's Catalog" and "Holman's Catalog brings the store to your door" are ones familiar in more than 60,000 homes in the Maritime Provinces.

Helpful Points in Ads

Some helpful ideas are set forth in the advertising done by this firm. It will be noted that items of current interest are always dealt with to make the ads timely. The ad on paints is run in connection with a local Clean Up, Paint Up campaign and points out that it is better to paint than to repair. It points out that this paint does not necessarily require experienced labor to apply. The ad on spring housecleaning makes a point of the fact that it costs less money to houseclean to-day than for some time. Special attention is directed to the wallpapers, carpets, oilcloths, brushes, mops, paints, soaps, and polishes, etc., with an argument for the use of each and prices quoted.

In the ad on garden seeds the statement is made "You will always notice that it is the man who started early and who kept always on the job who has the best garden and lawn during the summer and fall. Be one of the wise ones and make a start on your garden to-day—we have everything you need and can surely satisfy you both in quality and price."

An ad on traps points out that "you can't catch game without good traps and good traps usually cost more than you have generally been ready to pay."

An ad on fishermen's supplies pointed out that the man who wants to be first on the market does not wait until the last minute to get his supplies. It lists nets, traps, rope, twine, and other such supplies. Another ad is devoted to lawn requirements featuring mowers, grass catchers, rollers, etc., and telling the reader not to wear himself out pushing a heavy mower but to save many a backache by purchasing an easy running one.

Official Text of Sales Tax Legislation

Full Text of Amendments to Special War Revenue Act Dealing With Sales Tax as Applied Since May 10th—List of Exempted Articles.

THE full text of the amendment made to The Special War Revenue Act, and which deal with the tax on sales as it now exists, is as follows:

"19BBB (1) In addition to the present duties of customs and excise there shall be imposed, levied and collected an excise tax of one and one-half per cent. on sales and deliveries by Canadian manufacturers or producers, and wholesalers or jobbers, and a tax of two and one-hal per cent. on the duty-paid value of goods imported, but in respect of sales by manufacturers to retailers or consumers, including sales to His Majesty, whether in the right of His Majesty's Government of Canada or His Majesty's Government of any province of Canada for the purpose of resale, the excise tax payable shall be three per cent. and on goods imported by retailers or consumers, including importations by His Majesty, whether in the right of His Majesty's Government of Canada or His Majesty's Government of any province of Canada for the purpose of re-sale, the excise tax payable on the duty-paid value shall be four per cent.; the purchaser shall be furnished with a written invoice of any sale, which invoice shall state separately the amount of such tax to at least the extent of one and one-half per cent. but such tax must not be included in the manufacturer's, producer's or wholesaler's costs on which profit is calculated; and the tax shall be payable by the purchaser to the wholesaler, producer or manufacturer at the time of such sale, and by the wholesaler, producor manufacturer to His Majesty in accordance with such regulations as may be prescribed, and such wholesaler, producer or manufacturer shall be liable to a penalty not exceeding five hundred dollars, if such payments are not made, and in addition shall be liable to a penalty equal to double the amount of the excise duties unpaid; the term "duty paid value" means the value of the article as it would be determined for the purpose of calculating an ad valorem duty upon the importation of same into Canada under the laws relating to the Customs and the Customs Tariff whether such article be in fact subject to ad valorem or other duty or not, and in addition the amount of the Customs duties, if any, payable thereon.

Provided that in respect of lumber an excise tax of two per cent. shall be imposed, levied and collected on sales and deliveries by the Canadian manufacturer and of three per cent. on importations, and that no further excise tax shall be payable on re-sale.

List of Exemptions.

Provided also that the taxes specified in this section shall not apply to sales or importations of:—Certain foodstuffs, ores of metals of all kinds; fuel of all kinds; gold and silver in ingots, blocks, bars, drops, sheets or plates unmanufactured; logs and round unmanufactured timber; fence posts, railroad ties, pulpwood, tan bark, and other articles the product of the forest, when produced and sold by the individual settler or farmer; materials for use only in the construction, equipment and repair of ships; calcium carbide; electricity; gas manufactured from coal, calcium carbide or oil for illuminating or heating purposes; settlers' effects.

Not Payable on Exports.

Provided further that the excise taxes specified in this section shall not be payable on goods exported, or on sales of goods made to the order of each individual customer by a business which sells exclusively by retail, under regulations by the Minister of Customs and Inland Revenue who shall be sole judge as to the classification of a business; and a drawback may be granted of ninety-nine per cent. of the said taxes paid on materials used, wrought into or attached to articles exported.

(2) The Minister may require every manufacturer, producer, wholesaler or jobber to take out an annual license for the purposes aforesaid, and may prescribe a fee therefor, not exceeding two dollars, and the penalty for neglect or refusal shall be a sum not exceeding one thousand dollars.

(3) Any such tax, costs or penalties may, at the option of the Minister, be recovered and imposed in the Exchequer Court of Canada or in any other Court of competent jurisdiction, in the name of His Majesty.

(4) The provisions of this section respecting a tax on sales shall be deemed to have come into force on the tenth day of May, nineteen hundred and twenty-one, and to have applied to all goods imported or taken out of warehouse for consumption on and after that day, and to have also aplied to goods previously imported, for which no entry for consumption was made before that day."

Trade Enquiries

3137. **Asbestos.**—A responsible concern located in Kobe, having very close connections with all the manufacturers of asbestos products, would be glad to receive complete samples and prices direct from Canadian asbestos mines. This firm does not wish to deal through American brokers or elsewhere, but wishes to purchase direct from Canada. A good opportunity for any bona fide Canadian firm who wish representation in Japan.

3138. **Tools.**—A Belgian firm wishes to receive catalogues and prices on Canadian tools.

Review of Iron and Steel Industry

Pig Iron Production at low Ebb but producers are Optimistic—Credits Improving—Unemployment Serious but More Efficiency of Workers Evident—Heavy Raw Material Stocks Held by Manufacturers—Prices Still Above 10 Year Pre War Average but Earnings Less than in 1913.

IN the midst of a depression more acute than any known to the present business generation, the steel trade seeks signs of the return of prosperity and finds little that is definitely assuring as to the immediate future. Production of iron and steel have fallen to the lowest point on record in proportion to the country's capacity. Pig iron production to-day is at 30 per cent. of capacity, whereas it has been the common experience in other periods of famine that the country's simple wear and tear has called for a 60 per cent. operation in iron and steel.

It is a matter of comment that even at this closest approach they have ever made to an absolute stoppage, producers of iron and steel for the most part are looking forward hopefully. They expect business to recover in time, from the present unparalleled inaction and are confident that there is ahead a period of great prosperity. To think otherwise is to say that history has ceased to repeat itself and that the American capacity for industrial enterprise has departed.

But what will be the course of business in the next six months, in the next twelve months? That is the question which the average business man finds it difficult to answer, and all his interrogations bring him little evidence that others are more enlightened than himself. In some quarters there was an expectation that the recent meeting of the American Iron and Steel Institute would help to the discovery of what lies just ahead, but even that hope was disappointed.

Credits Improving.

Some things are to be set down on the favorable side of the account. The credit situation has been improving. In the thawing out of frozen credits some progress has been made. The reserve of gold and lawful money has been increasing for several months. The eight months that have gone by since buying of iron and steel stopped almost overnight, and the 13 months since the re-adjustment from war prices started in mercantile lines, have contributed not a little toward the changes that needed to come before the country could get on the right track. For many months preceding May, 1920, consumers were fed on reasons why prices could not come down. Now that so many profiteer arguments have been punctured by one decline after another, a change in mental attitude can be seen that signifies much for economic health.

While unemployment has not decreased—indeed in iron and steel and all metal-working lines is still increasing—more work is being done for the wage received, and that is one of the largest factors on the right side of the balance sheet as of to-day. The worker has long been getting out of industry a good deal more than he put in. Every day that passes is making it plainer that the public will not longer pay the difference between the worker's actual performance and that big, but theoretical day's work for which he has actually been drawing pay.

Situation Was Misjudged.

In the steel in dustry the otulook for an early increase in the rate of consumption is not all that could be desired. What has come out in the last six months concerning raw material stocks in the hands of manufacturing consumers of iron and steel shows that the views commonly current on this subject in the early fall of 1920 were far astray. Much of the error was due to the fact that buyers of steel in order to get their supplies, had duplicated and triplicated their orders. This was no secret at the time,but the extent to which the practice had gone was underestimated. It was not appreciated, moreover, until the depression was well under way, to what extent manufacturers had been swept off their feet last year. No matter how large the stock of raw material that was on hand or under contract, it was surprising to what extent the view prevailed that demand was going to keep up for a year or more at a rate that would call for all of it and more. It is entirely another picture that we have had presented in these recent months. We are now hearing how long manufacturers in various lines can go without making any call on the mills except for filling in purposes. Some implement manufacturers, for example, have been saying that it may take a year to dispose of the stocks of implements that are now stored in warehouses otr in manufacturers' hands. The disastrous decline in prices of cereals has reduced the demand for implements to its lowest terms. The automobile building program has been by turns raising and dashing the hopes of steel makers. To-day the best estimate is that operations in that industry will be at a lower rate through the summer and that the total for 1921 is not likely to reach 40 per cent. of the 1920 output, as was at one time hoped.

Rails Gone Into Storage.

Railroad buying was expected early in 1921 to be the sustaining feature of the market, seeing that in so many lines the year's prospects were not encouraging. The fact that a large part of the rails already rolled to be put in track this year have gone instead into storage, is

not reassuring. Mining, lumber and other basic industries promise to run far into 1921 without making any considerable call upon the producers of iron and steel. Building materials and labor are not yet re-adjusted to a point that would quicken the market for structural shapes. The expectation of a spring demand buoyed the hopes of the industry early in the year, and now there is a disposition to look for some increase in activities in the coming fall, but, with the tendency often seen in the industry, to swing too far to pessimism when the outlook is clouded, the common estimate of the round-up for 1921 is quite conservative.

Without question buying of steel is held back by the belief that the re-adjustment of steel prices still has some distance to go. Steel producers as a rule, are losing money on the present market, with mills running 20 to 30 per cent. of capacity, yet prices show a tendency to sag, and the expectation of reductions both in freight rates and prices for finished steel is general. That a further reduction in wages may come at a number of works in the next 90 days is also before the trade as a possibility. Partly because of the size of the Steel Corporation and the prominence of the steel industry, partly because of large war profits in steel, and partly because steel prices are high compared with the pre-war average, many who have discussed price re-adjustments in various lines have pointed to iron and steel and their products as a class in which the re-adjustment has not been adequate. The prices of the principal forms of finished steel are still 50 to 60 per cent. above the 10-year pre-war average. That in itself does not give the measure of re-adjustment that may be in store, for even on to-day's basis some companies are earning less than in 1913, and the latter year by no stretch of the imagination could be put down as a year that yielded a satisfactory profit to any maker of pig iron or finished steel.

To say that buyers of steel look for some further decline in prices that steel producers look for a reduction in freight rates, and that some of them believe wages will be still lower before a basis will be reached that will warrant free buying—to say these things, is equivalent to saying that time will be a large element in the re-adjustment that remains. That makes prophecy difficult, though the obvious prognosis is that whatever revival in demand comes this year it will not develop into large proportions. The state of mind of many workers, of many manufacturers and merchants needed to be changed. The worker had begun to visualize war wages as his legitimate and normal wage. Many manufacturers and merchants had begun to visualize war prices as legitimate and their continuance as justified. Inflation had been pictured by some economists as an expected and long-enduring result of the war. Many had predicted that a depression would follow the war, and when instead, we had the boom of 1919 and 1920, the feeling came that the depression would be staved off one year, two years or even longer. Time must be the corrective of the state of mind which swept so many business men off their feet. There will be no short cut to prosperity. Industry must get back to the old-fashioned economies, and it is getting back to them. That is the main encouragement in the situation. And the fact that a good deal of progress can yet be made in 1921 along the old road of working and saving and of willingness to do a full day's work, is at the moment one of the most hopeful features in the outlook for iron and steel and for all industry.

PITTSBURG BASING.

The ramifications of the practice of using the Pittsburgh base for prices of finished steel are by no means simple. Those who have had much to do with the Washington hearings on Pittsburgh basing will be quite willing to tell you that what is involved in changing the existing practice is more complicated still.

When this matter first came before the Federal Trade Commission at Washington in July, 1919, it took the form of a very friendly discussion. Chairman Gary of the Steel Corporation and the attorney for the Western Association of Rolled Steel Consumers, suggested to the commission that a thorough inquiry be undertaken. At that time the Western manufacturing consumers of steel asked for a Chicago basing in addition to the Pittsburgh base. But Judge Gary pointed out that it would be difficult to stop there, and that if the Pittsburgh basing system was declared inequitable, the alternative would be to base quotations on each mill wherever it might be located. He spoke of the case as being as far-reaching in its scope and as important as any ever considered by any judicial tribune. He pointed out that the prosperity of entire communities was involved, saying that the establishment of mills at points where costs are higher than elsewhere has been made possible by the use of Pittsburgh as a basing point.

Nine months prior to this preliminary hearing at Washington the Chicago base was given a standing in a very quiet way without any preceding agitation of the question. The first schedule of prices issued by the president after it had been prepared by the War Industries Board, provided for a common price at Pittsburgh and Chicago on bars, plates, shapes and other forms of finished steel. Many in the steel trade did not know that such a dual basing was contemplated, but the decision of the War Industries Board was accepted and for nine months was carried out. In that period, Pittsburgh manufacturers who delivered steel in the Chicago district were compelled to absorb the freight. Opposition among the manufacturers developed to such a point that when the Government schedule was arranged for the quarter beginning July 1, 1918, all prices of finished material were f.o.b Pittsburgh.

As the Chicago district has grown in importance as a steel producer, so the agitation against Pittsburgh basing has increased. In recent years the Chicago district has become more and more of a producing factor.

The hearings are likely to take up a year, and in case an order should be issued against the Pittsburgh case, the ensuing litigation in the courts would probably consume another year at least. If the commission disapproves of the Pittsburgh basing it is to be expected that some other method or methods will be propesed. If it proposes a substitute the commission might have difficulty with the courts, just as occurred under the original Interstate Commerce Commission Act. That commission was not allowed to go further than to declare a rate unreasonable.

In view of the far-reaching effect of a decision wiping out the Pittsburgn plus system, the steel trade will follow this latest case with special interest, though, from the present outlook, the question of sufficient tonnage to keep the mills employed in the next two years will be far more engrossing.

NEW YORK FUNDS.

June 9.—New York funds opened at 12 3-16 with sales at 12¼, 12, 11⅞ and 12 at close.

June 10.—Funds were steady, ranging between 11 13-16 and 11-31-32.

June 11.—Rate ranged between 12 and 12⅛.

June 13.—Funds sold at 12⅛ and 12 3-16.

June 14.—Sales at 12⅛, 12¼, 12-⅜, 12 3-16 and 12 5-16 at close.

June 15.—Funds opened at 12¼ to 12 5-16 lith sales at 12⅛, 12-7-32, 12 9-32.

The active season for many lines of sporting goods is at hand. The merchant whose window display is depicted herewith, realizes the value of showing an extensive range of such lines to appeal to those interested in practically every summer sport. Oftentimes a suggestion from an attractive window display such as this will clinch a sale. With the luxury taxes on sporting goods lines removed this summer there should be a big revival of business in such lines as are shown. Encouraging local sporting tournaments is a good way for the merchant to help the sale of such goods.

Progress of Firearms Legislation

New Bill Amending Criminal Code re Sale and Ownership of Firearms Passes Commons, now Before Senate—Ruling re Giving .22 Rifles as Premiums to Boys Said to be too Drastic.

While various newspapers in Canada have been commenting on the seriousness of the Goverment laying over until the next session of Parliament, the proposed amendments to the Criminal Code respecting the ownership and sale of firearms and other weapons, Hardware and Metal learns from an authoritative source that the bill to amend that section of the Criminal Code relating to permits for the possession of firearms, as outlined in a recent issue of Hardware and Metal, has passed the House of Commons and is at present before the Senate. This being the case, there should be little likelihood of any undue delay in repealing the law as it now stands and which puts serious impediments in the way of trade in rifles, shotguns, etc.

Commenting on the recent editorial note quoting Superintendent of Ontario Police Rogers, in regard to the giving of premiums in the form of .22 rifles to boys, an official who has been in close touch with the Department of Justice in connection with amending these regulations, states that the interpretation put on this matter by Superintendent Rogers is rather drastic. This official comments on the matter as follows:

"The Criminal Code covers this matter by forbidding selling, loaning or giving away firearms, air guns or ammunition to a boy under sixteen years old. So long as a dealer takes necessary precautions to find out that a boy is not under sixteen years old he is within his rights in selling or giving away such premiums.

"There is no law, so far as we are aware, that prevents any recognized dealer keeping on hand for sale such firearms and ammunition as he sees fit.

"Should the amendments to the Criminal Code, which have passed the House and are now before the Senate, become law, a permit will be necessary for an alien to possess firearms or ammunition, but a British subject will need no permit."

For the Man Behind the Counter

Some Adventures with Salesmen

How the Retail Hardware Salesman can measure up to His Job Under Present Conditions—How He can Best Do His Duty to the Customer, Employer and Himself—The Seven Deadly Sins.

ONE day last summer a browser in a bookshop on Fifth Avenue, New York, was accosted by one of the store's salesmen. "Something I can show you, sir?" asked the merchandiser in the manner of one who had thoroughly mastered the principles of scientific sales approach and was not going to permit any potential customers to remain merely latent prospects.

The prospect looked up from his book, frowning at the interruption. Then his face brightened. "Yes," he replied, "there is something I wanted to ask about. It's this new history of the world by Wells that they're getting out in England. When's it going to be published over here?"

"This what you mean?" answered the salesman, reaching over the counter for a volume of a much-advertised history of the world war.

"No, no! Not the world war—the world! A history of the whole world, by Wells."

"Oh, he's dead, you know," announced the salesman.

"No? What do you mean! Who's dead?"

"Wells."

"H. G. Wells?"

The salesman nodded.

"Nonsense," said the man, who by now, I suppose, might be called a live prospect. "That can't be so. There's been no mention of his death in the newspapers. Only the other day there was a piece in the 'Evening Post' telling of a meeting of Wells, Barrie, Arnold Bennett and Frank Swinnerton in a London club. It was as good as an interview with all four of them."

The salesman's face betokened interest, but betrayed ignorance.

"And there was mention in this article of the history I'm asking about," continued the customer.

"My dear sir," answered the salesman suddenly assuming control of the interview, "I wouldn't for a moment dispute you. I only answer your question. We have no history of the world war by Wells, and I never heard of one, but if you are looking for a good history of the war"—

"But I'm not," put in the customer. "And of course you have no history by Wells, for it isn't published yet. All I want to know is, when will the book be published over here?"

Ignorance of the Educated.

"Oh, next fall, doubtless," answered the salesman, smiling. "Yes, undoubtedly it'll be published in the fall. Most summer books are published in the fall."

I have reported this true incident in detail, not with any desire to cast opprobrium upon the trade of bookselling, but to illustrate what I suppose Mr. C. K. Chesterton would call the ignorance of the educated. For, what education is of greater importance to a salesman, whether he be a purveyor of books or biscuits, than that which gives him an adequate knowledge of his merchandise! And what ignorance is deeper or more damning than ignorance of his merchandise! You can forgive a clumsy "approach." You can overlook a faltering "sales talk." You can even dispense with that "snappy" appearance. But you cannot dispense with intelligence on the only subject of mutual interest to you and the salesman; namely, the goods you stand in desire of.

There is an old bookseller on a side street who sells me more books than all the classy fellows in the well-stocked shops that have the prestige of locati n and name. Why? Not because of his sales approach; for, to tell the truth, he is something of a grouch. Not because of his line of talk; he is of a taciturn nature and uses words sparingly. And certainly not because of his looks. But I have found out through experience, that this man knows books. I can count on his intelligence on that subject, and when I am in doubt, or outright ignorant, I can depend on this book salesman's setting me straight.

When I came to him asking for a book to take along for a winter vacation in the Adirondacks, he got out "The Way of All Flesh" and introduced me to the unflinching realism of Samuel Butler. On his say so, I carried home "The Mayor of Castorbridge" one day, and began to know Thomas Hardy.

It is this sort of ability that is the very foundation of sales 'ability. And no amount of glib talk, politeness, prepossessing appearance, or acquaintance with the theory of salesmanship, will make up for deficient knowledge of the goods. Yet the incident of the book salseman who was ignorant of one of the most popular makes of his merchandise isn't a rare exception, either in the book trade or many other lines.

"I'm looking for an axe, a man's size axe, and a wedge for splitting wood," said a customer to a clerk in the hardware department of a nationally-known retail store. And while the clerk exhibited his stock, the customer went on to explain that he was a recent emigrant from a city flat to a little country home, that there was a big wood-lot adjoining his place, and that he proposed to cut and split his own firewood. The clerk sold him an axe, the best in the house; and as he couldn't supply the wedge sent the customer to a nearby hardware store for that article.

A month later, the store got its first reaction from that sale. The customer wrote in to say that as a result of his wood splitting the head of the axe had spread loosening,the handle and rendering the implement useless. He wanted to know what the store would do about it. The store asked him to return the axe for inspection. A few days later he was informed as follows by letter:

> "In reference to the axe, we wish to inform you that the one sold was for household use only. We find upon investigation that this axe has been used for splitting logs. Therefore we do not feel in any way responsible for the condition of same."

The customer may or may not always be right, but he was right in this case; he had explained to the salesman how he intended to use the axe. A letter-writing controversy ensued, which ended by the refund of the money. In the meantime, the customer went to a regular hardware store, where he had the good fortune to be waited on by a salesman who knew axes and their use. This salesman explained that the heavy flat head of an axe is intended primarily to give weight to the cutting edge; that it is risky to use it as a maul, since the head is likely to mushroom; and that in splitting logs with a wedge, woodsmen generally use a sledge hammer. So the customer bought a new axe and a six-pound sledge hammer. If the clerk in the department store had only *known* axes, he could have sold a sledge in addition to the axe in the first place. And he would have pleased a customer and earned goodwill for his store.

It is dangerous, however, to presume too much on the customer's ignorance, or to his dependence on the salesman's judgment. There was the case of a young housewife in one of the Westchester suburban towns who read the advertisement of a vacuum cleaner shop in New York. It claimed to carry all makes of weepers and offered an expert consulting service to advise prospective customers.

Some Adventures With Salesmen

The salesman must be forceful without browbeating his prospect; he must be enthusiastic without exaggerating; he must know his line, but he must not pretend to a knowledge that is not his; he must be tactful and diplomatic, without becoming oily and ingratiating; he must be able to make his point, without petty squabbling or argumentation; and he must use sales strategy, without stopping to artless trickery. These are some of the maxims enumerated by George W. Gray in an article outlining some of the methods of various deluded salesman and the seven deadly sins, in Forbes Magazine.

Dealing with the question from the customer's standpoint, Mr. Gray makes the point that there is as much to be written on how not to make a sale as has been written on "how to make 'em sign the dotted line." The article appearing herewith outlines Mr. Gray's experiences with some salesmen, pointing out a number of glaring faults and giving some helpful suggestions which every hardware merchant and retail salesman can absorb with interest and value.

The advertisement included a coupon which called for a catalog. The housewife clipped the coupon, signed and mailed it.

In reply she received the booklet, with its list of sweepers, marked by stars of varying magnitudes to indicate degrees of desirability. In addition, there was an effusive letter calling attention to the store's advisory service and recommending the Blank sweeper as the best. Finally there were two stamped postcards; one saying, in effect, "Ship me a Blank vacuum sweeper for five day's trial?" "I am not interested in vacuum sweepers." The letter called special attention to the first postcard. All that was necessary for Mrs. Housewife to get a sweeper for trial was to sign her name and drop it in the postbox—terms would be arranged later, "to the satisfaction of the purchaser."

The offer looked good. But money was a bit tight in the household just then; so with the filing of the catalog for future reference, the subject was dismissed from her mind.

A Brilliant Plan Upset.

But a week later there came another letter from the dealers. It "begged to advise" that a Blank sweeper had been shipped and was on its way.

"Not receiving the postcard advising us of a lack of interest in the subject," said the letter, "we have ventured to take the initiative and are sending you by express prepaid, the finest Blank sweeper that we have in stock. Give it a good trial. You can't hurt it. Make it do your work, and after five days write us what you think."

An hour later the expressman drove up to the back door. Mrs. Housewife was furious. She wouldn't receive the package. The poor psychologist in New York who conceived this brilliant plan probably never realized that he had spoiled a good sale by his stroke of "super-salesmanship," and at the same time had made an enemy for his store.

This was a case, I suppose, of knowing the goods but not being able to size-up the customer. The scheme may have worked successfully in other cases; it may have turned the will of wavering customers and focused the decision to buy. But in this instance it was disastrous.

Another adventure, illustrating the same method in face-to-face dealings, concerns a young couple in a large Eastern city. They had recently moved there from Boston and needed some additional furniture for their larger house. But they were strangers to the business houses of the city; so making up a list of three stores whose advertisements had attracted them, they set out one morning. As they alighted from the car, they passed a store whose show-windows proclaimed that it sold furniture. It was not one of the three on their list, but the window display lured them and they decided to go in.

The salesman who met them seemed to know his line of goods and soon had them interested in several pieces of bedroom furniture. Incidentally, he found out that they were new residents, that they intended to pay cash and that they had bought all their furniture hitherto from a large establishment in Boston, well-known in the furniture trade. On receiving the latter information, the salesman's assurance and self-confidence visibly weakened.

"I'll tell you," he said, "I want you to have the benefit of the best price we can make on these goods. I'm going to get our buyer—Mr. Beat—if you'll excuse me for a moment.'

Up to this time there had been no question in the minds of the prospective customers as to the price. But this retreat of the salesman lighted the spark of a tiny doubt. When Mr. Beat appeared a moment later and was introduced by the salesman, who thereupon withdrew, the doubt was a flickering flame.

Tactics That Repeal.

"Now let me see," began Mr. Beat. "This suite in ivory enamel is the one you fancy most?" and he lifted up the price tag from the bedpost as though he were going to hand the thing over forthwith to its new owners.

"We like that best," admitted the gentleman addressed.

"Why not settle the matter and buy?" asked Mr. Beat. "You'll never get a better opportunity. Furniture right now is at rock-bottom."

"We want to look around more," said Mr. Customer. "Furniture, you know, you buy for life. You've got to live with it, and before you decide, you want to know you're suited."

"Now, I'll tell you what I'll do," answered Mr. Beat. "This suite is priced at rock-bottom now, but I'll give you ten per cent. off. You are new people here, we want your trade, and I'll make that concession for the sake of new business."

"We appreciate it," said Mr. Customer, "but we want to see what the other stores have."

"Just what do you expect to accomplish by looking around?" asked Mr. Beat, with a grinning smile that only half-concealed the querulous mood that was behind his words. Without waiting for an answer, he went on:

"Most people nowadays pick out a good reliable store, and do their buying there. They object to the drudgery, the wear and tear upon nerves and energy, the inefficiency, of shopping around. You can't find anything in any other store that we haven't here."

"But we prefer to look around," insisted Mr. Customer, whose wife had already taken his arm in token of their resolution to go.

"Just a moment," said Mr. Beat, "but will you tell me what other store you have in mind?"

"Well"—Mr. Customer hesitated and flushed slightly. He didn't think it any of Mr. Beat's business, but he answered, "For one place, there's Mahogany & Sons."

A look of amused disgust spread over Mr. Beat's small features.

"Why, my friend, do you know they're just out of bankruptcy? And I wouldn't be surprised but what they're on the brink of it again. Why look a-here," and he turned again to his furniture and its price tag, "I'll tell you what I'll do. I've given you a discount of ten per cent. That brings the price down to $306. Now on top of that we'll cut another ten per cent. That means that you'll get this magnificent suite for $276.40—actually below cost sir. I'm losing money, but I don't want to lose this sale. What d'you say?"

"I'll say good day," answered the customer, as he started for the elevator. "I've told you I want to look around, and I intend to."

And with that Mr. Beat was all smiles, and grins, as he threw up his hands. "I give up," he said, "but you're throwing away a big bargain." The customers that might have been his, bought at the Mahogany & Sons' store, and have continued to do their furniture buying there—thanks, largely, to the tactics of Mr. Beat.

In contrast with this episode is an experience in a jeweler's shop on Fifth Avenue, New York. A young wife had come there to buy a pair of cuff-links as a birthday gift for her husband, and as he had expressed a desire for a particular style she brought him along to make the selection. The salesman set forth his array of cuff-links, and a selection was soon made. The husband then took a look at the price tag.

"Eighteen dollars!" he exclaimed, looking up inquiringly at the salesman, who nodded affirmatively.

"Is that the way they all run? What's your cheapest?"

"That's about the average price," said the salesman. "Here is a pair, in plainer design, for $13. They run as high as $25.

The wife picked up the $18 pair. "These are all right, Billy," she said. "These are the kind you wanted, aren't they?"

"Yes," he muttered, "but they're sky-high; let's go on and look somewhere else."

"But you can't do any better than this," urged the wife. "These are solid gold, remember. And they suit you. Besides I'm paying for this. You haven't any right to discuss the price."

"No," said the husband stubbornly, as he pulled on his gloves. "I won't let you be worked this way. We can get them cheaper, and just as good, somewhere else. This store—why, it's profiteering to charge that!"

During all of this dialogue, the salesman remained at respectful attention. There was no urging, no attitude of impatience, no word of defence for his price, and no resentment at the criticism.

The wife, with a murmured apology and thanks, turned away with her husband and left the store. But she came back later and bought the cuff-links, and her husband is wearing them today. The consideration of price, which seemed to be the determining factor at first, became of minor significance when measured beside the integrity of the house as typified in the bearing of its representative. No amount of talk, of price concession, of persuasion, could have accomplished the result that was accomplished by the considerate silence

Continued on page 54.

WHAT IS YOUR BIGGEST PROBLEM?

In introducing this department for retail hardware salesmen, Hardware and Metal does so with the knowledge that there are many interesting subjects regarding the work of the retail hardware salesmen, and their relations with their employers, which can be dealt with in this department, Contributions of ideas along these and other lines will be welcomed by the editor, providing these are of an intelligent and constructive nature.

The "men behind the counter" can use this department as a clearing house for ideas and for securing and giving timely hints on various matters concerning their work. The views of employers on topics of interest to the retail salesmen are also wanted. Contributions will be used either with or without name of writer, but

REMEMBER that this department is created for YOUR use and it will benefit both yourself and other salesmen for YOU to make the best possible use of it.

Let's hear from you.

Hardware and Metal

Canada's National Hardware Weekly

The Only Weekly Hardware Paper in Canada

PUBLISHED EVERY SATURDAY SINCE 1888 BY

The MacLean Publishing Company, Limited

Montreal TORONTO, CANADA Winnipeg

A NEWSPAPER editorial suggests that marriage is not only one of the great mainsprings of social progress, but also of commercial business, and for this reason, it should be encouraged. The hardware benefits by marriages in connection with showers and wedding gifts and housefurnishings and should therefore, encourage marriages according to the suggestion. The difficulty is that the barriers before the intending couples these days are such as can be little reduced by the effort of the retail hardware merchant, but it is concede that in most cases, he is doing his share to have costs returned to somewhere near normal levels.

MANY PRICE CHANGES.

THE importance of keeping in close weekly touch with the hardware markets is again emphasized this week, when many further recessions in prices are noted. For many weeks past, there have been heavy budgets of price changes of vital importance to the entire hardware trade. The market reports elsewhere in this issue indicate price reductions on a wide range of hardware commodities. Among the many lines on which lower prices are quoted are enamelware, tinware, etc., cut and wire nails, wire, staples, turpentine, fibre wares, and many other lines. Hardware buyers and pricers to-day have big jobs on their hands in keeping posted on market tendencies and prices. Thousands of dollars may be made or lost through inattention to this important part of the retail business at the present time. Another phase of great importance to the trade is that of changes in list prices on many lines. As outlined elsewhere in the market reports, discounts remain unchanged on many lines, but there have been revisions in the lists which in some cases cover several hundred styles, sizes, or designs of hardware goods. Unless these revised lists are noted there is great danger of losses and errors. The fact that the discount has not been changed for sometime past, does not necessarily indicate that the price of the goods remains unchanged. Standard lists as well as discounts and net prices must be watched carefully these days.

THE RETAIL SALESMAN.

IN this issue HARDWARE AND METAL introduces a new department for the men behind the counter. Arrangements have been made for a series of contributed articles of particular interest to retail salesmen. These combined with the other contributed and selected articles, in addition to articles prepared by retail salesmen themselves should prove one of the most interesting departments in our paper. It is our intention to publish in this new department all material which we may be able to secure, provided that each article possesses ideas of real practical value to the retail salesman. Employers of all kinds realize to-day, more than ever before, the importance of high grade salesmen in the retail stores. The man behind the counter is the man who stands between the manufacturer, wholesaler and retailer and the ultimate buyers or consumers— the general public. It is important that retail salesmen should be highly efficient if the best results are to be secured. There is a great scarcity of real high-class retail salesmen at the present time. Employers have found it profitable to pay good wages to good men. Fortunately for efficient retail salesmen, there are many employers today who are willing to pay good salaries to good men. Unfortunately, however, there are many retail salesmen who consider that they are high grade men, when as a matter of fact, they are merely "counter hoppers". There are on the other hand many retail salesmen today who are drawing salaries which were undreamed of five or ten years ago. The whole tendency will be towards higher salaries for retail salesmen provided they can sell the goods and sell them efficiently. It is with a desire to assist all retail salesmen that HARDWARE AND METAL will publish a larger number of articles which should prove of real practical value to retail salesmen who wish to forge ahead.

TRADE MARKS.

WITH the return of lower prices, a decided falling off has been noticed in the sale of many of the unknown and untried lines which found ready sale during the boom period. This was particularly true in the case of paints and varnishes when many lines were placed upon the market, under fictitious names. Some of these lines were undoubtedly good value, considering the price charged for them. Others were dear at almost any price. Under the weeding-out process which is now in evidence throughout the retail trade, many of these lines have been considered unnecessary and are being rapidly cleared out. The old tendency is towards selling goods of known value. The product of a well-known manufacturer, bearing his trade name or trade-mark carries greater weight with the retailer and his salesmen than the unknown, untried products. The manufacturer who places his name on a package, places himself under an obligation to produce a product worthy of his name. In the great shuffle which is now taking place, questionable lines are being eliminated. The result will mean cleaner stocks, and more reliable stocks than at any time in the past.

BUSINESS APATHY AFFECTS TAXES.

THE result of the Sales Tax for the last month at the old rates were made public the other day by the Minister of Customs and Inland Revenue; and it is worth while to examine the returns for the eleven months in which it was in force. It is evident from this comparison that there has been a big falling off in the proceeds of this tax of late; and this fact suggests speculation as to what will be the results of the new tax in the year now current. The revenue from the sales tax for April was $2,873,219, of which $2,186,649 was obtained from the tax on domestic trade and the balance on imports. The revenue from this tax, reached its peak in October last, when it totalled $5,020,474; and with the exception of March, it has been falling steadily since. The average figure for the ten months contained in the last fiscal year, which ended with March ,was $3,802,516, so that the April return s

are nearly a million below the average. The returns for March were $3,404,571, and this, though it was an exception from a general decline, was considerably below the average for the ten months during which the Sales Tax was in operation last year.

What do these figures suggest as to the fruitfulness of the sales Tax under the new scale of rates? Another fact that has to be taken into account, is that last year, imports supplied little more than one-quarter of the revenue obtained by the sales tax. The total revenue of the ten months was $38,025,164; of which $27,900,669 came from domestic sales. Taking these two considerations into account, it would look as if the proceeds of the new taxes would not be underestimated, if it were assumed that the domestic taxes are increased by fifty per cent., and the taxes on imports by one hundred and fifty per cent. On this basis, taking the April figures as a starting point, you get the total revenue for eleven months under the new rates as $54,949,367; and adding the revenue for April under the old rates, the total Sales Tax revenue of the year would appear likely to approximate $57,822,000.

That this figure is not likely to be an under-estimate will be realized, when it is recalled the decline in prices which has already greatly reduced the profitableness of the old tax will, in all probability, affect the new tax rates further in the same direction in order to have a comprehensive view of the tax revenue from manufacturing and commodity sales, the 1920 yield from the 1 per cent. manufactures' tax—being approximately $21,698,000—should be added to the above $57,822,000,making a total minimum estimate of $79,422,000 for 1921.

THE EXCHANGE SITUATION.

There has been much criticism by merchants, of the exchange situation existing between Canada and the United States and on many occasions this has been raised as a reason why trade in U. S. goods in Canada should be curtailed. It has even been hinted by some merchants who become particularly exasperated, that the United States is making a profit because of the discount which is made on Canadian funds in that country. Similarly, Canadian trade with Europe is falling off, due to the depreciation of European funds in Canada, but no one suggests that this is an advantage to Canada. These critics do not realize that the currency of one country has no legal status in another country and that a Canadian dollar is not a legal dollar in the United States, but merely a promise to pay a dollar in Canada.

Similarly a U. S. dollar in Canada is only a promise to pay, which must be collected in the United States. It is at a premium in Canada because our currency is depreciated to the extent of our inability to redeem our promises to pay in specie. This is no fault of the United States, and they are doing their best to correct it by the purchase of Canadian securities. Of the total Canadian bond sales last year more than two-thirds were sold in the United States.

The premium on New York funds in Canada is a distinct detriment to U. S. trade with Canada, and the fact that a number of hotels and shops in that country are advertising their willingness to take Canadian money at par, is sufficient evidence of their desire to retain it, even foregoing a considerable part of their profit to do so. Much of the criticism is due to the trade which exists for certain classes of U. S. goods in Canada. True this helps to swell the balance of trade against us, but this is another matter, due entirely to the belief of the public and some distributors that they are getting better value in quality or style, for their money. Those who prefer to buy U. S. goods in Canada must be willing to buy at the retail prices in Canada which must allow for the duty as well as the premium on U. S. funds. As long as this willingness lasts, trade will continue along much the same lines.

THE IRON AND STEEL INDUSTRY.

The iron and steel industry, being one of the chief basic branches of production, is being closely watched by many for signs of improvement. In this connection it must be remembered that the steel industry is one of the last to be re-adjusted, for increased activity on the part of the producers follows largely upon a stimulation of industrial activity in other lines, and often-times the steel industry is completing its re-adjustment when other lines are well on the way to recovery. The steel business depends, for instance, upon building activity, chiefly industrial; upon railroad extensions, upon the development of automobile business, etc., and all these sources of potential business will hardly become active until conditions generally are improved.

At present attention is being centred more and more upon the improving position of the railroads as the chief factor calculated to rescue the iron and steel industry from its present depression. Mining, lumber and such basic industries promise to run far into 1921 without much call for iron and steel and while the automobile business has shown occasional evidence of renewed activity, it is generally thought that the average production for the year will not be much more than 40 per cent. of normal. In view of talk of a return to pre-war levels, it is to be noted that while steel prices are still within about fifty per cent. above the 10-year pre-war average, yet the earnings of producers are now less than in 1913 which was an especially poor year for profits in this industry. Further wage reductions may figure in the matter but the course of wages, freights, etc., cannot be predicted with any degree of accuracy. It is altogether probable that the increasing efficiency of labor will do more to bring costs and prices to a correct relation and to a basis on which business can be encouraged, than any other single factor.

APART perhaps from freight rates, there is no single factor which so universally affects the price of every commodite in use at the present day as the cost of printing. Every pric list, catalogue, booklet, handbill, circular letter, price card, newspaper advertisement, display card, all sales literature cost money for printing, which cost has to be covered in the price charged for the various commodities you sell.

Any increase, therefore, in the cost of printing affects the cost of every one of the items above mentioned and must therefore ultimately raise the price of every article sold by the retail merchant. Any such increase at the present time is bound to have a restrictive tendency upon sales and is therefore detrimental to the merchant's interests. If he is forced to absorb the extra cost himself, it affects his pocket still more directly.

You are therefore vitally interested in the outcome of the printers' strike for a forty-four hour week and increased wages amounting in all to an advance of about 40%. This would inevitably result in an increase both in your overhead expenses, in the prices you pay for goods and thus it cannot fail to prejudicially affect your interests.

The forty-four hour week will benefit no one. If a man is only willing to work forty-four hours he will earn less for himself and for his employers than if he worked forty-eight hours. The great need the world over is for elimination of waste and increase in production.

Events in the Trade

BUSINESS CHANGES.

Amherstburg, Ont.

Wigle Hardware Co., have taken over the business formerly carried on by Ryan & Co.

* * *

PERSONAL

Henry S. Campbell, salesman for the Ontario Steel Products Company, at Gananoque, Ont., returned this week from a trip through the provinces of Manitoba Alberta, and Saskatchewan. He reports the crop outlook as excellent, although business conditions are as yet none too bright.

* * *

BURGLARS ENTER HARDWARE STORE

Kingston, Ont.—Burglars secured an entrance to the hardware store of Edwin Chown & Sons and made off with automobile accessories, rifles, ammunition and other things to the value of $500.

* * *

ALTERATIONS TO STORE.

Rainy River, Ont.—The Emo Hardware Co., is making some alterations to provide better store facilities.

* * *

PICNIC OF LONDON HARDWARE MERCHANTS.

The London hardware merchants plan to hold their annual summer outing and picnic at Port Stanley on Wednesday, August 3. A special train is being arranged for, and the usual program of sports and fun is being planned.

* * *

WESTERN NOTES.

Swift Current.—Twenty thousand dollars' damage was done by fire which started in Fyffe & Park's hardware store. The loss is fully covered by insurance.

* * *

W. M. Keeler, of Estuary, Sask., has succeeded N. O. Storey in the hardware business.

* * *

Pearson Bros., of Carstairs, Alta., have taken over the harness business of John Luft.

* * *

Watrous, Sask.

Robins Hardware Co., won second prize in a contest in connection with a local sports day.

* * *

Jerry Nelson who has been manager of the P. Lund Lumber yards and hardware store at Chin, Alta., for some time has resigned his position and left recently for Minneapolis. He is being succeeded by George Farley.

* * *

STRIKING PAINT ADS.

Kingston, Ont.—McKelvey & Birch Ltd., have a very striking advertisement in the local newspapers this week, in which paint is featured. The advertisement is short and to the point. It reads as follows:

"Follow nature's example. Paint is to the house as bark is to a tree. Nature never makes mistakes. She knows that her handiwork in order to retain its beauty and its usefulness, must have protection against the elements. By saving the surface you save all."

"GET TOGETHER" CLUB ENJOYS SOCIAL EVENING.

Montreal.—

The "Get-To-Gether Club," composed of employees of The Sherwin-Williams Co., Ltd., The Canada Paint Co., The Martin-Senour Co., Carter White Lead Co., and the International Varnish Co., carried out a most enjoyable programme of sports and dancing at the Cartierville Canoe Club this week.

Water sports, including swimming races, canoe races, a tilting match in canoes, a spectacular burlesque "arrest" of a "much wanted man" in a boat and a duck race. Land sports included basket-ball, running races and tennis. W. S. Fallis, vice-president and managing director, Sherwin-Williams Co., Ltd., presented prizes to the winners of the various events. Dancing in the club house up to a late hour ended a very enjoyable evening's entertainment.

* * *

QUEBEC R.M.A. JULY 12 AND 13

Montreal.—The annual convention of the Quebec Provincial Board, the Retail Merchant's Association of Canada, Incorporated, will be held in Montreal on July 12th and 13th, with headquarters at the Place Viger Hotel.

Through some of the executive members of the Dominion Board being unable to attend on the dates set aside in June, the postponement was necessary to allow these members to attend and address the delegates at the different sessions. While the program is also necessarily delayed, the proceedings and entertainments will assure of a very instructive and beneficial two days' visit to Montreal for the attending delegates and members. Invitations have been sent to the president and secretary of The Dominion Board, the Prime Minister of Quebec and other Ministers. Addresses will also be delivered by manufacturers and wholesalers represented.

NEW LINES FOR G. S. WHITAKER.

F. Longdon & Co. (Canada) Ltd., 145 Wellington St., W. Toronto, for whom G. S. Whitaker & Co., 117 Wellington St. W., are Canadian-selling representatives, are now making elastic sporting goods such as elastic anklets, knee-caps, knee-pads, wristlets, jockstrops, etc. Catalogues can be procurred on request. G. S. Whitaker & Co. are also appointed Canadian selling representatives of the United Chair Seat and Novelty Co., Brooklyn, N.Y., who are now offering to the trade their Standard Fibre Chair Seat.

PROTECTION AGAINST SPURIOUS CARTAGE AGENTS SECURING POSSESSION OF FREIGHT.

The introduction of some system where by the carriers' cartage teamsters could be identified so as to protect the interests of the shipping public and preclude freight being secured by false representation, especially in the larger centres, has heretofore not been advanced seriously as the necessity for such had not been made apparent. Recent developments have indicated, however, that the necessity for such a system is no longer potential but actual, according to a C. M. A. bulletin.

Information in regard to several instances has recently come to attention where carters have called at business houses, ostensibly representing a railway cartage company to whom a previous request had been sent to collect freight, and receipted for freight and obtained possession, but investigation of subsequent information from the consignees that same had not been received has developed that such freight was never delivered at the railway's freight shed and that the receipt they held bore a fictitious signature.

With a view to overcoming these conditions and enable the shippers to detect such fraud, the Dominion Transport Company Ltd., and the Canadian Cartage and Storage Company Ltd., have established a practice of issuing time tickets to each one of their carters. These tickets are issued daily and bear the teamster's number and the date, and before commencing work, the teamster subscribes his signature on same. Merchants should demand the production of this Time Ticket in instances where there is any cause for doubt as to the identity of the teamster, and compare the signature which it bears with that appearing on the bill of lading. Confirmation may also be had by consulting the inside of this ticket which will indicate the name of the firm from whom the carter is to lift such shipment, this information being entered by the cartage company's despatching office from orders given by shippers.

In order to co-operate with the cartage companies, it is also recommended that when signing the driver's receipt for inward shipments, the name of the company or firm in full, be shown, in addition to the signature or initials of the receiver.

Continued from page 51.

of the salesman.

Of course there is point to the idea of sales approach, in spite of the amusing lengths of standardization to which some specialists have attempted to carry it. Approach is of prime importance, of crucial importance, when the salesman goes out and seeks customers.

But surely among the seven deadening sins of salesmanship, Deceit leads all the rest. And I would be inclined to list Ignorance of the Goods as second, with the others following in this order: Discourtesy, Carelessness, Illiteracy, Cocksureness, Garrulity.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

IN support of recent contentions that pre-war prices may gradually be returned on basic hardware this week, sees another budget of substantial reductions on a number of steel and other products, this tendency being undoubtedly a reflection of the unsettled condition of the steel industry and the fact that production is now below consumption, due to large stocks held by manufacturers. Wire, wire nails, stove pipe wire, cut nails, fence staples both bright and galvanized, coppered split clinch rivets, double-pointed tacks and bright and coppered staples are the lines figuring in the revisions to lower prices, new lists having been issued on the two latter lines.

Other products, showing more or less substantial reductions include enamelware, tinware, etc., certain fibre ware such as pails and wash tubs; axle and cup greases; some blacksmith's and lumbermen's tools, including hot and cold chisels, choppers, mauls and wedges, several lines of wrenches, belt punches, pipe vises, roofing nails, one line of spring butts, lead traps and bends. The ingot metal market is dull with easier tones evident, and a one cent decline in tin.

It is noteworthy that the only increases occur in the paint markets, dry red lead being quoted higher along with linseed oil. Turpentine has fluctuated considerably, and the expected decline of eight cents per gallon is shown. A fair volume of trade is recorded with the orders for spring and summer lines, practically completed and the movement of fall goods gradually getting under way.

Montreal Markets

MONTREAL, June 16.—The trend of the hardware market is downward again this week; the feature being lower prices on the different kinds of wires. Oiled and annealed wire is now selling at $4.65 base; and cut hay-wire, hay bale pies, and stove-pipe wire are also among the kinds that are lower. Fence staples, both bright and galvanized, will now cost less. The bright staples are selling at $5.00, and the galvanized at $6.00 per keg. Quotations on fibre ware, made by E. B. Eddy Company Limited, show a reduction of approximately 10 per cent.A mong the smaller shelf goods, Bolmer Spring Butts show a reduction of 10 per cent., and some lines of tools, including hot and cold chisel, choppers, mauls and wedges have new prices. The ingot metal market is now very dull with slightly easier prices on most metals.

Hardware jobbers report an active week, notwithstanding the falling off on many spring lines. No changes are recorded on such staple commodities as iron and steel bars, sheets, and pipe-fittings.

STOVE PIPE WIRE REDUCED.

Montreal.

Stove pipe wire has been reduced 50 cents per 100 lbs., and No. 18 is now quoted at $9.00; No. 19, $9.50.

ROOFING NAILS DOWN 50 CENTS.

Montreal.

The American felt roofing nails are now quoted at $10.50 per keg, and $12.50 in less quantities; a reduction of 50 cents per 100 lbs. being made.

WIRE BASE REDUCED

Montreal.

The base price on oiled and annealed wire has been lowered to $4.64, and following are the new selling prices on the best selling gauges; No. 13, $4.65; No. 14, $4.75; No. 15, $4.85 per 100 pounds.

CUT HAY WIRE AND BALE TIES DOWN.

Montreal.

Cut hay wire and bale ties have new lower prices as follow; No. 12, $5.65; No. 33, $5.80; No. 4, $6.05; No. 15, $6.30.

QUOTATIONS ON IRON AND STEEL UNCHANGED.

Montreal.

Prices and conditions on bar iron and steel are unchanged, quotations being maintained at former levels and sales continuing light, although a slight improvement is noted in the past week or tow. Following are present prices;

IRON AND STEEL BARS

Common bar iron, 100 lbs.	$3.70
Refined iron	5.20
Iron finished machinery steel	3.75
Mild steel	3.70
Band steel	3.70
Single reeled machinery steel	5.75
Spring steel	5.00
Sleighshoe steel	3.70
Tire steel	3.90
Toe calk steel	4.60
Harrow tooth steel	3.85
Mining tool steel, per lb.	0.23
Black Diamond tool and cast steel	0.23

NOTE.—Refined iron is approximately $1.50 per 100 lbs. over base, but fluctuates owing to unsettled market.

Band steel in scroll bdles., 50c per 100 lbs. extra.

Flats, iron and steel, 3-16 and thinner, 50c per 100 lbs. extra.

FENCE STAPLES REDUCED.

Montreal.

Wire fence staples, both galvanized and bright,have been reduced 25 cents a keg. Galvanized are quoted at $6.00, bright at $5.00, with $1.00 per 100 lbs. added for broken quantities.

WIRE NAILS HOLD UNCHANGED.

Montreal.

Wire nails are holding unchanged, notwithstanding many lines of wires are reduced in price. Wholesalers report sales are fair and are keeping up favourably after the usual Spring demand. Cut nails are also unchanged at $5.10 base.

BAR SOLDERS SLIGHTLY REDUCED.

Montreal.

Bar solders of all grades are reduced one-half cent this week. While lead products as a whole have held very firm in recent weeks, the easier tone of tin on the primary markets is already reflected on solders. Following are the present net prices on all lines;

Solder, guaranteed, lb.	0.28½
Do., strictly, lb.	0.26½
Do., commercial lb.	0.23½
Do., wiping, lb.	0.24½
Do., wire, lb.	0.37½
Zinc sheets, casks	0.13
Do., broken lots	0.13½

BOMNER SPRING BUTTS REDUCED.

Montreal.

A 10 per cent. reduction has been made in prices of the Bomner spring butts. This applies to butts for heavy doors and floor hinges.

NEW PRICES ON FIBRE PAILS AND TUBS.

Montreal.

Through new prices being issued by the E. B. Eddy Co., Ltd., fibre tubs and pails are reduced approximately 10 per cent.

SOME BLACKSMITHS' TOOLS HAVE LOWER PRICES.

Montreal.

The following new net prices are announced on lines of blacksmiths' and lumbermens' tools;

Hot and Cold chisels	0 45 lb.
Blacksmiths' tools	0 45 lb.
Wood choppers mauls	23 50 cwt.
Truckee wedges	17 50 cwt.

QUOTATIONS ON SHEETS UNCHANGED.

Montreal.

With buying in sheets and plates still reported light, quotations are held unchanged with the range that has been given for several weeks still holding as follows:

PLATES—		
10 gauge	$5.25	6.25
12 gauge	5.30	6.30
14 gauge	5.45	6.45
16 gauge	5.55	6.55
BLACK SHEETS—		
14 gauge	$5.45	6.45
16 gauge	5.50	6.55
18-20 gauge	6.15	7.15
22-24 gauge	6.25	7.25
26 gauge	6.35	7.35
28 gauge	6.50	7.50

Sheets 36 in. wide, 10c per 100 lbs. extra.

GALVANIZED SHEETS—		
U.S. Standard—		
10¾ oz.	$8.75	9.75
28 gauge	8.25	9.25
26 gauge	8.00	9.00
22 to 24 gauge	7.85	8.85
20 gauge	7.65	8.65
18 gauge	7.65	8.65
16 gauge	7.50	8.50
14 gauge	7.50	8.50
12 gauge	7.50	8.50
	Queen Head	Fleur-de-Lis
English Standard—		
28 gauge	$10.00	9.25
26 gauge	9.75	9.00
24 gauge	9.15	8.60
22 gauge	8.80	8.15
18 and 20 gauge	8.10	8.00

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal

INGOT METALS DULL AND SLIGHTLY EASIER

Montreal.

There is very little buying in the ingot metal markets at present with prices generally on a somewhat lower basis. This condition is expected to hold for a little now, considering the season of the year.

TIN.—Tin is very quiet with little movement either in London or New York. It is hoped, the expected settlement of the coal strike will create a certain demand, but no great improvement is looked for. Local price 37½ cents.

COPPER.—New York and London both remain quiet and with no pressure to sell, the market is fairly steady. The sharp decline in Sterling exchange has, however, stopped export buying for the present, and prices are quoted at 18 cts. for electro, and 16¾ cts. for casting.

SPELTER.—During the past week spelter touched the lowest price in East St. Louis, for over ten years and the market is certainly on a very low level. While the decline can hardly go much further, there is no present sign of an advance. It is now quoted locally at 7¾ cents.

LEAD.—This metal continues to decline in the United States and London is also somewhat lower. The recent flurry has died away and local prices are on a lower basis at 6½ cents.

ANTIMONY.— Antimony remains quiet and although prices are very low there is no sign of improvement. Little advance is looked for until more of the surplus stocks of war material is used up. Chinese is quoted at 7½ cents, high grade English at 8 ½ cents.

ALUMINUM.—There is no change in aluminum to report, either in prices or conditions. It remains very dull on the market at 33 cents.

Toronto Markets

TORONTO, June 16—Many revisions have been made on hardware prices and lower quotations are still the order. The reductions this week are chiefly evident on steel products, among the lines being reduced being cut nails, coppered rivets, stove pipe wire and fence staples. Revised list prices to lower levels are issued on double-pointed tacks, and also bright and coppered staples. Fibre ware prices also register a decline, and the wire base quotation shows a reduction of 35 cents. In conjunction with the decrease on other wire products, wire nails are also reduced. Lower axle and cup grease prices, complete this week's list of revisions.

It is noticeable that there have been no price increases announced during the past seven days. Quotations on other primary markets remain unchanged with the exception of ingot metals, where the exchange flunctuation is reflected in easier tones. A very fair volume of trade is reported in general hardware commodities, but wholesalers state that the demand in spring and summer lines has now practically been completed, and that the movement for fall goods is not yet under way.

ENAMELWARE ETC. REDUCED

Toronto.

Important reductions in the prices on enamelled ware, japanned, tin, granite, and many similar wares, is announced by the manufacturers. The extent of the decline varies between 20 and 25 per cent on the average reduction noted on the different lines, and is generally claimed as one of the most comparatively extensive and far-reaching price changes that has been made effective during recent months.

The discounts on these wares have been changed all through the list on a fairly generous scale, and with dealers' stocks reported as low, or with very little surplus supplies on hand, the reductions are generally expected to result in stimulating business on these lines. Following is the list of revised discounts:

WARES, ETC.
Britannic, plus 33 1-3%
Scotch Grey Ware, 45 1-5%
Colonial, 25%
Imperial Ware, 25%
Pearl, 25%
Premier, list
Canada Ware, list
Crescent, 45/5%
Diamond, list
White Ware, 40%
Japanned Ware, plus 10%
Japd. Ware, White, plus 20%
Plain and Japanned Sprinklers, plus 10%
Stamped Ware, plain, 50%
Stamped Ware, retinned, 40/10%
Factory Milk Cans, plus 40%
Milk Can Trimmings, plus 60%
Sheet Iron Ware, plus 33 1-3%
Pieced Ware, ordinary, plus 40%
Pieced Tinware, C. B., plus 50%
Fry Pans, Acme, 25%
Fry Pans, Quick Meal, plus 20%
Spiders, steel, plus 20%
Fire Shovels, japanned, plus 30%
Steel Sinks, galvanized, plus 20%
Steel Sinks, painted, plus 20%
Light Galvanized Pail and Tubs, plus 20%
Heavy Galv. Pails and Tubs, plus 20%
Garbage Pails, plus 20%
Jap. Coal Hods, plus 45%
Galv. Coal Hods, plus 45%
Paper Lined Boards, 30%
Wool-lined Boards, 15%
Copper Boilers, 10%
Copper Tea Kettles, plus 10%
Copper Tea and Coffee Pots, plus 10%
Stove and other Pipe, plus 40%
Stove Pipe Elbows, black and galv., plus 12 ½%
Stove Pipe Thimbles, 40/10%
Nickel plated Ware, list, plus 10%
Embossed Ware, list
F. O. B. Montreal, Toronto, London.

FIBRE WARE PRICES REVISED.

Toronto.

Some reductions have been noted in the current quotations on fibre ware. Star pails have been lowered to $5.50 per dozen, and quotations on fibre wash tubs are now as follows:

NO. 20—	Per doz.
1 to 6	$ 2.20
7	2.60
8	2.60
9	2.60
10	3.60
11	3.60
12	3.60

NO. 10—	Per doz.
1 to 6	$ 1.60
7	2.00
8	2.00
9	2.00
10	2.50
11	2.50
12	2.50

MAY BE REDUCTION ON HARVEST TOOLS AND AXES.

Toronto.

It is reported that certain price reductions are anticipated on harvest tools and axes, and should probably become effective during the next two months.

WIRE $4.65 BASE.

Toronto.

Wire and wire products now show lower quotations. This decline follows on reductions in these lines on the primary steel markets, where some evidence has been noted of a tendency among the mills to cut prices. Whether this decline heralds the near approach of lower price levels for finished steel products generally, is difficult for local dealers to predict, as basic prices on bar iron and steel as yet remain unchanged. The new wire quotation is $4.65, this covering the base on bright, annealed, oiled, and soft drawn.

STOVE PIPE WIRE PRICES SHOW LOWER REVISION.

Toronto.

Stove pipe wire is included among the wire products registering price declines this week. The new quotations on No. 18 stove pipe wire is $9.00 per cwt., and No. 19 has been lowered to $9.50 for 100 lbs. This is a reduction of 50 cents on previous prices for these quantities.

FENCE STAPLE PRICES LOWER

Toronto.

Reductions in the prices on bright and galvanized fence staples are among the lower quotations noted this week. The revised prices are:—bright, $5.00 per 100 lbs., and galv., $6.00 per 100 lb. keg. The previous prevailing range was $5.25 and $6.25.

WIRE NAILS REDUCED.

Toronto.

Following the decline of wire and wire products on the primary steel markets, a reduction in the price of wire nails is announced. The current decrease, lowers the prevailing base quotation to $4.55.

AXLE GREASE PRICES LOWER

Toronto.

New prices on a lower scale have been announced on Mica axle grease and Arctic cup grease. The revised quotations are as follows:

Mica axle grease, in barrels, $6.80 per 100 lbs.: in cases of 48, one-lb. tins, $7.10: in cases containing 24 three-lb. tins, $9.55.

Arctic cup grease, No. 2, $7.40 per 100 lbs: cases of 36 one-lb tins, $6.15: cases containing twelve 5's, $8.45.

Above quotations on both Arctic and Mica less 15 per cent.

WASTE QUOTATIONS STEADY

Toronto.

The reductions announced last week on both white and colored cotton wastes are being generally maintained. No further price revisions have been reported, and dealers state that few changes, if any, are now expected. Market conditions are reported fair, with some signs of an optimistic tone developing.

FAIR DEMAND FOR LEAD.

Toronto.

It is reported that the current demand for lead products is maintaining firm prices on the local market. Fluctuations in pig lead on the primary markets, have been reflected through an easier tone, but quotations generally are being maintained at previous levels. A reaction in future strength is looked for in some quarters. Following are the prevailing prices:

LEAD AND ZINC GOODS.

Lead pipe, list, per lb	0 12½
Lead waste pipe, list, per lb	0 13½
Do., over 8in., list, per lb	0 14½
Lead pipe is subject to a discount of	10%
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs., sq. ft. in rolls, lb.	0 09½
Cut Sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, per lb	0 36½
Do., strictly, lb.	0 26
Do., commercial, lb.	0 23
Do., guaranteed, lb.	0 29
Do., wiping, lb.	0 23
Zinc sheets, per lb.	0 16

REVISED QUOTATIONS HOLD ON BRASS AND COPPER.

Toronto.

The revisions announced last week in prices on copper and brass tubing and sheets are still being maintained. No further price change has resulted, and the market conditions remain unaltered, it being too early to note whether the declines will result in stimulating marked activity. Following are the current revised quotations:

BRASS

Sheets, base, per lb	$ 0.27
Rods, base, per pound	0.27
Tubing, base, per lb.	0.34

COPPER

Rods, base, per pound	0.32
Soft sheets, plain, 16-oz. and heavier, lb.	0.32
Do., plain tinned 16-oz. and heavier, lb.	0.40
Do., polished and tinned 16-oz. and heavier lb.	0.45
Tubing	0.37

RANGE BOILER QUOTATIONS REMAIN AT LOWER LEVEL.

Toronto.

No further readjustment has as yet been announced in either prices or conditions on range boilers. Local quotations are still remaining at the lower levels recently developed, and although it is generally expected that a revised list will be issued in the near future, yet present conditions indicate that the tendency to cut prices is still prevalent in some quarters. A quotation for the 35-gallon size range boiler has been added to the current list, as follows:

RANGE BOILERS

	Standard	Ex-Heavy
30 gallon	$ 9.00	$ 11.50
35 gallon	9.50	13.80
40 gallon	13.80	16.50
52 gallon	20.40	25.20
66 gallon	28.80	34.80
82 gallon	36.00	47.40
100 gallon	45.60	56.40
120 gallon	55.20	64.80
144 gallon	78.00	93.00

SEASONABLE DEMAND FOR EAVESTROUGH AND PIPING.

Toronto.

A brisk seasonable demand is still in evidence for conductor pipe, eavestrough and conductor elbows. Dealers report these products as moving out satisfactorily with the summer building activity having stimulated trade in these lines. Quotations are unchanged, and it is stated in some quarters that little price revision can be looked for until the end of the present season. Following are current prices:

TROUGH (Eave)

O. G., Square Bead and half round. Size in girth:

Per 100 ft.		Per 100 ft.	
8-in.	$ 15.90	15-in.	$ 28.80
10-in.	17.70	18-in.	36.50
12-in.	21.20		

Less 60 per cent.

PIPE (Conductor)

Plain, round or corrugated.

	Per 100 ft. in 10 ft. lengths.
2 in., in 10-ft. lengths, list	$ 18.40
3 in., in 10-ft. lengths, list	22.30
4 in., in 10-ft. lengths, list	29.60
5 in., in 10-ft. lengths, list	40.00
6 in., in 10-ft. lengths, list	49.00

Less 60 per cent.

CONDUCTOR ELBOWS—

2 inch, list	$ 5.25
3 inch, list	6.00
4 inch, list	10.50
5 inch, list	24.00
6 inch, list	29.00

Less 55 per cent.

COMPRESSION REVISIONS HOLD.

Toronto.

Standard compression goods, valves, and brass goods of all kinds remain at previous price levels, no revisions in quotations having been announced this week. Some reports indicate a very slight increase in the current demand, but whether this points to a future market improvement, or is of a temporary nature, dealers are reluctant to predict. The following prices, including recent revisions, are unchanged:

Compression work, standard	37%
Fuller work, standard	30%
Bath cocks, compression	29%
Do., Fuller	25%
Flatway stop and waste cocks, standard	40%
Roundaway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	5%
J. M. T.	20%
J. M. T. C.	25%
J. M. T. Gate Valves	15%
Gate or straightway	16–10%
Jenkins Globe	10–10%
Radiator valves, standard	23%
Do., removable disc	38%

BASIN COCKS

No. 1 and 1, Fuller pattern	30%
Quick opening No. 3633	37%
Emco. J. D. Valves	20%
Emco Check Valves	20%
Webber Gate Valves	15%

ROPE AND CORDAGE STEADY.

Toronto.

Although a slight increase has been recorded in rope and cordage markets, the total business during the month of May is smaller in comparison with the amount recorded in May of last year. A gradual movement towards an improved volume of business is looked for. Prices have been maintained without change, and collections are reported fairly good.

Adverse conditions abroad, including the British coal strike and the United States merchant marine strike have affected the foreign fibre markets. Improvement in this direction would reflect a firmer tone in manilla and the trade generally.

Cotton cordage conditions are being well maintained, and prices are unchanged.

TUBE BUSINESS DULL.

Toronto.

Conditions in the boiler tube market are unsettled. The amount of current business is reported as far below expectations, and some dealers are of the opinion that price reductions would fail to stimulate demand. No revision in prevailing quotations has been announced. The incoming trade is not sufficient to support the present low rate of operation, and orders are stated to be such that price concessions would be unusual. Unchanged quotations follow:

BOILER TUBES—	Seamless	Lapweld
1 inch	$ 26.00	
1¼ inch	27.25	
1½ inch	26.25	
1¾ inch	29.75	$ 25.00
2 inch	29.25	22.00
2¼ inch	33.00	25.00
2½ inch	41.75	27.00
3 inch	49.25	35.00
3½ inch	63.50	40.00
4 inch	85.00	50.25

FAIR DEMAND FOR CORRUGATED.

Toronto.

The demand for corrugated sheets has improved during the past few weeks, and dealers now report a seasonable movement in progress. The recent lowering of prices, although resulting in some increase of business, has not produced the marked activity which was looked for in some quarters. Conservative dealers however, are generally of the opinion that prices will not stimulate the demand to any great extent, and that seasonable orders will continue throughout the season as current requirements are needed. Unchanged list prices follow:

CORRUGATED SHEETS

	Per 100 sq. Ft.
No. 28 gauge	$ 8.50
No. 26 gauge	19.25
No. 24 gauge	13.00
No. 22 gauge	16.00
No. 20 gauge	28.00
No. 18 gauge	4.00

Less 7½ per cent.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

PIPE QUOTATIONS STEADY.

Toronto.

The movement in wrought iron and steel pipe, is reported as still below expectations. Little improvement in conditions has been noted, but a firmer tone is looked for in some quarters due to the fact that present production of piping is very small. Prices are unchanged, list No. 51 still being maintained.

STEADY MARKET IN PIPE FITTINGS.

Toronto.

The various grades of pipe fittings have recorded very little change in either prices or conditions. The market in these products remains steady, with sales generally more numerous, although small. A sorting movement is evident, with stocks of all size now fairly complete. The following quotations are holding:

Cast iron fittings	20%
Plugs, cast iron	27½%
Do., solid	10%
Do., countersunk	net
Bushings	30%
Unions, ¼-in. to 2-in.	40%
Do., ⅛ in., 2½ to 4 in.	35%
Flanged Unions	20%
Dart Unions, blk., ¼ to 2 in.	29%
Do., ⅛ in., 2½ to 4 in.	14%
Do., galvd. add to black.	30%
Nipples, klb. and galvd., ⅛ to 4 in., close and short	40%
Do., 4½ in. and larger	30%
Do., 4½ in. and larger	40%
Do., long, ⅛ in. to 4 in.	50%
Do., running thread	20%
Couplings, 4 in. and under	20%

MALLEABLE FITTINGS

	Black	Galvan.
Class A	0.60	075
Class B	0.24	0.34
Class C	0.15	0.24

GASOLINE, COAL OIL, ETC. REDUCED IN PRICE.

Declines in the crude oil markets have resulted in current reductions on all grades of refined and coal oils, and also on gasoline prices. This is the third decrease noted on these products during the past two months, and the recent trend of this market is fully in keeping with the general downward tendency of the majority of price announcements.

Gasoline prices this week have been lowered another two cents per gallon, while the extent of the present decline on coal oil and paraffine amounts to 2½ cents. Reductions in gasoline quotations should be of particular interest to the hardware trade at this time of the year, in view of the seasonable motorist activity, and the large proportion of retail merchants handling gasoline.

Coal oil price adjustments were not unexpected in some quarters, as the demand has been slackening. On the other hand, gasoline sales have recorded an active demand, and the current revisions reflect the market tone. Local stocks are reported as fairly heavy, and refiners and distributors of oil express the opinion that the present market outlook contains a certain possibility of further price declines in the future.

SHEET BUSINESS LIGHT.

Toronto.

Very little improvement has been noted in sheets and plates. Buying is still light, and orders are of the small variety. A slight increase in inquiries is reported however, and some dealers are looking for sheet activity because of this. Current local prices remain unchanged as follows.

PLATES

10 gauge	from $ 5.00 to $	6.00
12 gauge	5.05	6.05
14 gauge	5.10	6.10
16 gauge	5.20	6.20

BLACK SHEETS

14 gauge	5.10 to	6.10
16 gauge	5.20	6.20
18 -20 gauge	5.75	6.75
22-24 gauge	5.80	6.80
26 gauge	5.85	6.85
28 gauge	6.00	7.00

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 36 in. wide.

GALVANIZED SHEETS
Premier and Apollo

10¾ oz.	8.40 to	9.40
U. S. 28	8.00	9.00
U. S. 26	7.90	8.90
22 and 24	7.75	8.75
18 and 20	7.60	8.60
16	7.45	8.45
12 and 14	7.40	8.40

An extra 40c per 100 lbs. is charged for Keystone brand copper bearing sheets.

An extra is now charged on galvanized sheets. 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

SMALL BUYING EVIDENT IN IRON AND STEEL.

Toronto....

Buyers in bar iron and steel are still awaiting developments in this industry, and the opinion prevails in some quarters that steel prices will be lowered in the not far distant future. The manner and extent of such an expected decline, and the period of adjustment, are interesting points in the trade at present. Rumors of anticipated price cutting between the independent mills and the Steel Corporation, have not been extensively credited, but it is noted that the amount of current business offers little incentive to cut prices. A mild revival in steel demand, aided by price concessions, is looked forward to by some dealers. The early summer months however, generally constitute the dull period in this industry, and under present conditions, current quotations are being well maintained locally, pending future development on the primary markets.

STEEL AND IRON

Mild steel, 3-16 in.		$ 4.50
Do., ¼ in. and heavier		4.00
Bar iron, 3-16 in.		4.50
Do., ¼ in. and heavier		3.75
Angle base		4.00
Horseshoe iron		4.10

Sleigh shoe steel	4.10	4.50
Norway iron		15.00
Tee caulk iron	5.40	6.40
Hoop steel		6.00

SCRAP MARKETS DEPRESSED.

Toronto.

The scrap markets have continued in a slowed up position, and the general situation has been very quiet. With even less business obtaining than has been evident since the beginning of the current depression, there is little interest shown in scrap. Very few changes have been recorded, the lower quotations noted in last week's report still remaining in effect. The reductions have not brought any more buyers into the markets, as yet. Following are local nominal prices for fair-sized quantities:

WASTE MATERIALS

No. 2 busheling		—	$ 13.00
Heavy melting steel, Gross ton	$ 13.50	—	14.50
R. Rd. wrought iron, No. 1 gr. ton	11.00	—	12.00
Scrap pipe, gr. ton	7.00	—	8.00
Stove plate, net ton	15.00	—	16.00
No. 1 machinery cast net ton	22.50	—	23.50
Heavy lead	4.50	—	5.00
Tea lead	2.25	—	2.75
Red brass		—	10.00
Yellow brass	6.50	—	7.50
Light brass	4.00	—	4.50
Heavy copper	10.00	—	11.00
Scrap zinc	3.50	—	4.00
Old rubbers, boots and shoes	2.75	—	3.25
Lumbermen's rubber boots	1.75	—	2.25
Auto tires	0.50	—	1.00
Solid tires	0.75	—	1.25

EXCHANGE DECLINE AFFECTS INGOT METAL MARKET.

Toronto.

As the exchange flunctuations continue, the ingot metal markets remain somewhat uncertain. Price changes are few, a decrease of 1 cent having been noted in tin. General conditions are recorded as follows:

COPPER.—The recent break in exchange rates has been again reflected in the copper market, and foreign purchases

are reported as anything but bright. As the foreign demand was the responsible feature for the development of a firmer tone in copper conditions, the current price quotations show an easier range. Few new buyers are in evidence at this time, and the presence of surplus quantities of scrap copper, is reflected in the local market. Quotations remain unchanged at 18 cents.

TIN.—The recent drop in tin prices was a reflection of the exchange rate decline, combined with the significant effect of the British coal strike. As this situation shows signs of improvement, a more optimistic sentiment has developed in current tin markets, and a price recovery is looked for in some quarters. Local quotations however, are at present a further decline, the price of 37 cents being the average nominal quotation.

LEAD.—Lower prices on the primary lead markets have failed to stimulate a resumption in trading, and current orders show no increase over prevailing levels, when quotations were higher. Consumers in the southern markets are said to be experiencing difficulty in disposing of their products, which accounts for low offers being practically ignored. Quotations have shown no further change, and the current price locally, remains at $6.50.

SPELTER.—Present prices of spelter are described as very low, in view of current costs of operation. The decline in quotations has tended to shake the confidence of intending buyers, and in some quarters the belief is expressed that speculative interests might appear in the primary markets. The price of $7.25 still prevails locally.

ANTIMONY.—More inquiries for antimony have been evident on the markets, but current quotations are unchanged. The local price is still ranging from 8 to 10 cents.

ALUMINUM.—This market is devoid of any new feature and prices continue to hold at previous levels. The current quotation is unchanged at 30 cents.

REVISION IN TACK LIST.

The following revised list prices are now effective on double-pointed tacks. The new trade discount of 70 and 15 per cent recently announced, remains unchanged.

DOUBLE POINTED TACKS (IN DOZENS)
(75 to each Paper)

	3	9	10	11	12	14
Blued or Coppered	1.20	1.20	1.30	1.40	1.60	1.85
Tinned	1.80	1.80	1.95	2.10	2.40	2.80

Discount, 70–15 per cent.

DOUBLED POINTED TACKS (IN 100 LB. KEGS)

	9	10	11	12	14
List	30.00	28.50	26.00	25.00	24.00

Discount, 35 per cent.

NET PACKING EXTRAS

25 and 50lb. boxes	$1.00 per 100 lbs.
10 lb. boxes	1.50 " " "
1 lb. papers	2.00 " " "

An additional net extra of $2.00 per 100 lbs. is added for less than 100 lbs. of one size in one pound papers.

F.O.B. Hamilton, Toronto, London and Montreal with freight equalized on these points.

NEW LIST ON STAPLES.

Toronto.

New list prices have been issued, covering bright and coppered staples. Following are the revised quotations, which are subject to a discount of 35 per cent.

BRIGHT AND COPPERED STAPLES (IN 100 LB. KEGS)

Size	Bed	Blind	Electrician	Broom
⅜	$ 36.00	41.00	44.00	
½	23.00	36.00	32.50	
⅝	29.00	25.00	27.50	27.50
⅝	29.00			
¾	26.00	33.50	26.50	26.50

Discount, 35 per cent.

NET PACKING EXTRA

25 and 50 lbs. boxes	$1.00 per 100 lbs.
10 lb. boxes	1.50 "
1 lb. papers	2.00 "

An additional net extra of $2.00 per 100 lbs. is added for less than 100 lbs. of one size in one pound papers.

F.O.B. Toronto, Hamilton and Montreal with freight equalized on these points.

F.O.B. Halifax—no freight equalization.

For Winnipeg and West—F.O.B. Mill with freight allowance of 10c per 100 lbs.

COPPERED RIVETS LOWER

Toronto.

Coppered split clinch rivets have been reduced in price, and the revised quotations are as follows: put up in packets containing 50 assorted from 4-16 to 8-16 inches, 30 cents per carton on 12 packets.

Toronto.

CUT NAILS REDUCED.

A reduction has been announced in the current price of cut nails, and the new prevailing quotation is $5.45 per keg base.

London Markets

LONDON, June 16.—Decreases in the quotations on oiled and annealed wire, wire nails, and fence staples, are the features of the hardware markets this week. Prices on stove pipe wire and cut nails are also slightly lower. The easier tone, noted in the turpentine situation last week has resulted in a decline of eight cents per gallon.

The majority of other products remain unchanged. Collections are reported fair, and good seasonable business has been enjoyed by local merchants during the past week. While there is no marked rush, yet the current demand is steady, and the average volume of trade is satisfactory.

TURPENTINE PRICES DECLINE.

London, Ont.

Following the easier tone noted on turpentine in last week's market reports, a reduction of eight cents per gallon has been announced. This brings the current quotation for one barrel lots down to $1.07 per gallon. The demand is reported good, and following are the revised prices.

1 barrel	1.07
2 to 4 barrel	1.06
5 gallons	1.22

FENCE STAPLE QUOTATIONS SHOW LOWER RANGE.

London, Ont.

New prices on fence staples, both bright and galvanized, are noted in this week's market revisions. Prices are now 25 cents per 100 lbs. lower than the previous prevailing quotations. New prices are: bright, in 100 lb. kegs, $5.00 per cwt.; in 25 lb. boxes, $6.00 per cwt.; galvanized, in 100 lb. kegs, $6.00 per cwt., in 25 lb. boxes, $7.00 per cwt.

FIRM TONE IN LINSEED OIL MARKET.

London, Ont.

Linseed oil prices are being well maintained at the recent increased quotations, and the current demand is good. A firm market tone continues, and the prevailing prices follow:

1 to 2 barrels	.97	1.00
3 to 5 barrels	.96	.99
6 to 8 barrels	.94	.97

LOWER REVISION ON STOVE PIPE WIRE PRICES.

London, Ont.

Reductions are noted in the current price on stove pipe wire, the new prices being as follows: No. 18, $9.00 per 100 lbs; and No. 19, $9.50.

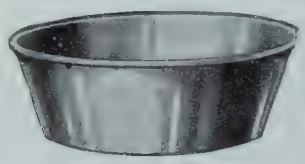
WIRE NAIL QUOTATIONS LOWER.

London, Ont.

Wire nails are included among the products registering price declines this week. The revised quotation is 10 cents per keg lower, the new base price now being $4.55, London, with carload freight allowed to Walkerville and Windsor.

London, Ont.

A good demand for white lead in oil continues on local markets. The increased strength of linseed oil has been reflected in a firm tone on white lead in oil, but current prices are unchanged.

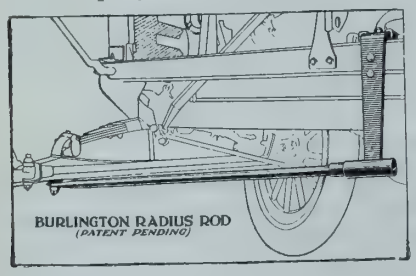


New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

S. M. P. "LUMINO WARE."

The Sheet Metal Products Co., of Canada, Limited, have announced their advent into the manufacture of aluminum cooking utensils. The registered trade name for the S. M. P. lines in this new field is "Lumino Ware." A number of kitchen utensils are ready for the market and new lines will be added from time to time.



Among the special features mentioned by the manufacturers are the hollow retinned handles which always remain cool. The interior finish of the aluminum

pots and pans is natural, the way the metal comes from the rolling mills, and thus the hard surface is retained and the article will not stain. The cover-knobs are made in a style which will not slip easily from the fingers. Each piece is inspected after every operation to prevent flaws. New designs will be added to this S. M. P. line from time to time.

BURLINGTON RADIUS RODS.

Designed primarily for use on Ford cars or trucks, the Burlington Radius Rod, manufactured by the Burlington Motor Truck Company, of Burlington, Wisconsin;

is supported with a novel guarantee by the makers. Among the special features claimed for this radius rod are that the wheels cannot lock with the application of this attachment, and that steering is improved. Canadian representatives for the manufacturers are Robinson & McNeil, 5A Willow Ave., Toronto, Ont.

TO MAKE AUGER BITS, ETC., IN CANADA.

A new Canadian firm is now in the market manufacturing the "Richmond" brand of auger bits, machine bits, screw drivers, wrenches, pliers and cold chisels. The Richmond Wire & Iron Co., Ltd., with head office at Deseronto, Ont., has been formed, and will manufacture the above lines of tools and state they will be able to make deliveries, with the exception of pliers, within the next 30 days. Pliers will not be marketed until a little later date.

PARAMOUNT TENNIS BALLS.

The new Reach "Paramount" tennis ball is now on the market, and some marked advantages are claimed for it by the manufacturers. The uniformity of the walls in Paramount construction, and

the even density where the seams join, are two of the major points. The elimination of the interior plug, and the patented two-piece construction are other features of this tennis ball. The objective in production is to have uniformity of size, weight and resilience throughout, no matter how the ball may be played. The Canadian factory of the A. J. Reach Company is at Brantford, Ont.

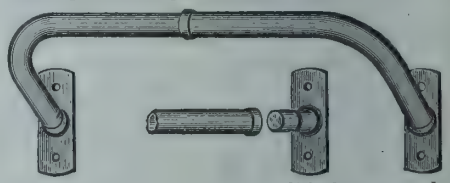
LIGHTNING BRUSH CLEANER.

To satisfactorily clean a paint brush in one minute, is the unique claim made by the Stewart-Skinner Company, for their new Lightning paint brush cleaning machine. This device is designed to cleanse paint bristles quickly and thoroughly, and the makers further claim that brushes can be taken out of the strongest colors, cleaned in the machine, and almost immediately afterward used in snowy white without carrying the faintest trace of color.

This new method of cleaning paint brushes is calculated to save a large percentage of the time previously spent in this manner. Preventing the formation of a heal and thereby considerably lengthening the life of the brush, is another feature. The use of brush soaking fluid is eliminated; and varnish brushes can also be satisfactorily cleansed through this method.

The new machine is being manufactured and placed on the market by the Stewart-Skinner Company, 50 Green street, Worcester, Mass. Canadian selling agencies and dealers are being organized by this concern.

"GILLETTE" SAFETY RAZORS.



As announced to the trade on April 15, by the Gillette Safety Razor Co., and adjustment policy had been established whereby a rebate would be given on all razors in the hands of the retailers, and the old type safety razor could be sold at a reduced price, the merchant still retaining his profit. In so doing, the old type automatically dropped to the retail price of $3.50, with twelve Gillette blades.

The line is now further extended by adding lower priced razors; offering to the trade a $3.00, $2.50 and $1.00 cased safety razor, each embodying the old type article.

The old type pocket edition with six blades now retails at $3.00; the "Gillette Pioneer," leatherette covered case with six blades, $2.50; and the "Gillette Brownie" with three blades, $1.00.

CURVED END BRASS ROD.

A hand-buffed brass curved rod, is the latest product of the Newell Manufacturing Company Ltd., of Prescott, Ont., a firm specializing in household goods of

the following nature;—solid brass rods' extension curtain rods, poles, pole brackets, and pole ends, brass hooks, combination double rods, and also nickle-plated bathroom fixtures. The special features of the new curved end rod are the solid post rivetted to the plate, and the device for locking the tube to the post, as shown in the illustration. The makers further point out the hand-buffed finish on both posts and tubes. The rod has an extension capacity of from 30 to 50 inches.

"RID-JID" IRONING TABLE.

It is announced by the manufacturer that the Rid-Jid folding ironing table is now being made in Canada. As illustrated

herewith, the Rid-Jid, is an ironing table with open end, and special claims are made by the producers for its stability and strength. It is being manufactured by the Rid-Jid Company of Canada, Ingersoll, Ont., and the light weight and convenient folding capacities of this ironing board are other features accentuated by the makers.

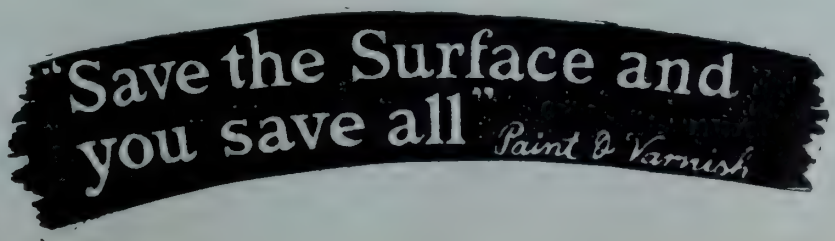
Save the Surface Story

It is shown in an article appearing elsewhere in this issue on the subject of trade-marks or trade names, that those names which signify something of the advantage from the use of the article so marked, are the most effective . In reviewing the various trade marks or names in use in connection with the hardware trade, one of the names which stands out prominently as answering to this description is that which forms the basis of the paint campaign being conducted in Canada, viz.: "Save the Surface and You Save All."

It is doubtful if any more vivid expression of the true value of paint could be given than is embraced in these words. The statement cannot be classed exactly as a trade mark, because it is not used on any article in particular, it is more of a trade name as applied to a campaign, but which is included in the general category being dealt with.

No one can read this trade name without getting a conception of what it has reference to, and without it conveying to their minds the fact that paint is valuable for preserving the surface of anything. The name has a broad application in that its surface-saving qualities are no confined to any particular article. Another important impression given by this name is the fact that the preservation of the whole article is dependent upon the saving of the surface. These facts give the statement a wide appeal.

Meaning Quickly Realized.



Customers of the retail hardware merchant's paint department will be quick to realize the meaning of this saying if it is featured prominently. The statement is one which will either explain itself or it will arouse sufficient interest to bring enquiries from customers. A big idea is involved and the merchant can link up his efforts with that idea, to good advantage.

When the underlying idea of "Save the surface and you save all" has been explained to the customer, the merchant can link up his effort with trade marked paints, varnishes, etc., in the same manner. Each trade mark or trade name means something, and it is in the merchant's interests to see that the name is brought to the attention of his customers, that they are acquainted with its meaning, the quality it represents, and what standard of service in general, is behind the name. These are all features of the "Save the Surface" slogan and they are also prominent features of the trade marked brands so that the interests of the two may be interlocked to some extent.

Especially under present conditions when paint prices have undergone substantial reduction is it incumbent upon the merchant to push the better grades of paint rather than the lines little known. Better satisfaction results to all through the adoption of a definite standard throughout all lines of distribution to the ultimate consumer. There are few merchants who do not apreciate the advantage of selling highest quality paints, and during the past year or two, Hardware and Metal has carried many articles showing that the tendency among hardware merchants has been to push the sale of the best quality lines, chiefly those which have become more or less standardized through the adoption of a trade mark, and by reason of the fact that the manufacturers have supported that trade mark consistently with a high quality product.

Shows up Folly of Neglect.

"Save the Surface and you save all" is a slogan particularly applicable at the present time, due to the fact that many people were inclined to neglect needed painting in recent years owing to pressure of other interests or to the high cost of paint. The need is therefore imperative to-day and such a slogan should help greatly to bring prospective customers to a realization of what they are losing through neglect. In addition to conveying a vivid impression to the mind, it is an easy name to remember and therefore has other advantages as a trade name. The customer will easily recall it to mind and have little difficulty remembering that it is a warning not to neglect the use of paint.

Weekly Paint Markets

MONTREAL

MONTREAL, June 16,.—The paint markets this week are featured with a 3 cent advance in quotations on linseed oil. The flax market has continued strong all week and an advance in the quotation on oil was not surprising. Turpentine is at present unchanged at $1.10 per gallon in one barrel lots, while the tendency is somewhat easier than it has been in previous weeks. White lead in oil and putty are also unchanged. In case of the white lead, while it remains fairly firm owing to the demand at present, the strength of a few weeks ago is hardly maintained due to a slight slackening of pig lead on the primary market. Shellac prices show no change from the advance of last week, and continue fairly firm. No change of importance is noted on the window glass market other than quotations from Belgium are slightly advanced in the past week.

Paint manufacturers report the demand for their products is being well maintained, with no price changes made in any of the lines.

Linseed Oil Advances

Montreal.

Linseed Oil prices advanced another 3 cents per gallon this week, bringing the quotation to 92 cents for raw in 1 barrel lots, and 94½ cents for boiled. The flax market continued strong all week, notwithstanding that slight fluctuations occurred. But these were soon overcome and higher prices than formerly were again quoted. The local demand for oil is being well kept up, and while this is maintained, little changes are looked for in quotations, but if any changes are made they will in all probability be to slightly higher levels. Following are the present quotations:

LINSEED OIL—	Raw	Boiled
1 to 2 barrels	0.92	0.94½
3 to 4 barrels	0.90	0.92½

Broken lots, add 10c gal.

Turpentine Prices Held

Montreal.

Prices on turpentine remain unchanged at $1.10 per gallon in one barrel lots. The tendency is somewhat easier than in the past recent weeks, but with the demand continuing as it now is, any revisions made in quotations are not expected to be heavy. Local stocks in some quarters have been depleted this week, but these will be replenished in the next few days. Present quotations are the following.

TURPENTINE—	Per Imp. Gal.
1 barrel lots	$ 1.10
2 to 4 barrel lots	1.08
Broken lots	1.20

Shellac Prices Hold

Montreal.

Shellac quotations this week are held at the recent advance, with gum shellac remaining very firm. The local demand for this product is fair and up to expectations for this season of the year. Following are the prevailing prices:

Orange shellac, in barrels, $4.00; in one gal. jugs, $4.30; white, in barrels, or 5 gal. jugs, $4.40; in one gal. jugs, $4.80.

Putty Prices are Steady

Montreal.

With linseed oil very firm, a reflection is noted on putty prices, causing a firm undertone. This is undoubtedly the strengthening factor, as the demand is—as expected,—only fair at this season. Present prices are as follows:

Standard Putty—	5 ton	1 ton	ton
Bulk barrels, 800 lbs.	$ 5.00	$ 5.25	$ 5.60
Bulk drums, 100 lbs.	6.00	6.25	6.60
Do., or tins, loose, 25 lbs.	6.25	6.50	6.85
Drums or tins, cased, 25 lbs.	7.00	7.25	7.60
1 lb. tins	9.75	10.00	10.35

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices.

White Lead Still Firm

Montreal.

White lead in oil is unchanged in price and continues fairly firm. While linseed oil remains with a strong tendency it will have a strengthening effect on this lead product; but it is noticeable that pig lead has ceased to show the gains that had previously been made, and is now quoted at declined figures on the primary markets. However with the demand holding well, as it is at present, little or no change is likely in quotations on lead in oil.

No Change in Window Glass

Montreal.

No change of importance has been recorded in the local glass situation during the past week. Sales are at a low ebb, but this might be expected at this season and up until the Fall demand. Prices are held unchanged with the same variance noted in past weeks. The Belgian market is reported as being a little improved, with quotations now slightly advanced over prices obtainable from this source during the past few weeks.

TORONTO

TORONTO, June 16—An increase in the current quotations on dry red lead, and a decline in the prevailing price of turpentine, are the combined features of the paint markets this week. Dry lead is higher 2 cents per lb, and this range reflects the recent increased strength of the primary markets. A marked falling off in the demand, coupled with the arrival of fresh supplies, resulted in a general easier market tone on turpentine, and lower price levels.

An increase in flax seed prices is reflected by a very strong tone in linseed oil markets. A range has developed on prices among local dealers however, with the average quotation remaining unchanged.

Dry Red Lead Increased

Toronto.

Following the increased strength registered in the primary lead markets, higher quotations now prevail on dry red lead. The current demand stimulated a firmer tone, and the revised quotations are 12 cents per. inch higher than formerly.

LEAD (RED DRY)—	per 100 lbs.
Genuine 560 lb. casks	$13.00
Genuine 100 lb. casks	14.00
Less quantities	15.00

Turpentine Prices Decline

Toronto.

Following the easier tone noted in the turpentine market last week, a reduction in price on all quantities has now been announced. The extent of the decline is 8 cents per gallon, and the arrival of fresh shipments has relieved current stocks. The southern markets also report an easier tone, with prices slightly reduced. The demand has fallen off considerably during the past few weeks, and the price fnctuations were expected in some quarters as soon as this condition became noticeably apparent. The movement is generally slower at this season of the year. Following are the revised quotations:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	$ 1.07
2 to 4 barrel lots	1.06
5 gallon lots	1.22

Brush Demand Slackening

Toronto.

The demand for paint brushes which has been a singular feature of the spring trade, has fallen off a little during the past week or so. Dealers attribute this to the fact that the current needs are now practically completed. Seasonable sales are still fair however, and prices remain unchanged at previous levels.

Range in Oil Quotations

Toronto.

The linseed oil market remains very firm, and although nominally quotations are unchanged, yet a range in prices is noted in some quarters. The recent increase to 97 cents for raw and $1.00 per gallon for boiled on 1 to 2 barrel lots, is still the average price prevailing at

Hillcrest Pure White Lead

Every Iron Sold Boosts Your Business

This is smooth, wonderfully-ground white lead of an almost dazzling whiteness. The clear smoothness can only be fully appreciated by seeing it and trying it. This is a real asset to the paint and varnish department of your store. Hillcrest Paint Products

If interested, tear out this page and place with letters to be answered.

present. Slightly higher quotations have been reported however, and likewise a lower figure has been noted. The continued strength in the flax seed market, is calculated by some to be reflected in future prices on linseed oil, and a levelling of quotations is looked for due to market conditions, which are reported as still on a gradual upward trend. Prevailing prices follow:

LINSEED OIL—		Raw Boiled
1 to 2 barrels, per gal.	$0.97	$ 1.00
3 to 5 barrels, per gal.	0.96	0.99
6 to 9 barrels, per gal.	.94	0.97

Less barrels, add 15 cents per gal.

Firm Price Tendency on White Lead

Toronto.

Local quotations on white lead in oil remain very firm, and while no price increases have been announced, the linseed oil situation has served to strengthen current quotations. The fluctuations in lead on the primary metal markets have failed to influence quotations on white lead in oil. The prevailing demand continues good, and under present conditions the following prices are generally expected to be well maintained:

White lead in oil $14.95 per 100 lbs. in ton lots; and $15.30 per 100 lbs. in smaller quantities.

General Markets

Continued from page 59.

London, Ont.

The revised discounts on shovels and spades announced in last week's market report, are still effective locally, and dealers report a slight increase in sales corresponding with the reduced prices. The discount is now 45 per cent off list.

London, Ont.

Reductions in the current price on oiled and annealed wire are noted among the market changes this week. The new base price is $4.65.

London, Ont.

Garden and harvest tools are included in the seasonable lines at present registering a fair demand. No change in quotation has, as yet, been announced, the current price remaining at list, less 50 and 10 per cent.

London, Ont.

Rope sales continue to show a slight increase, and the general market tone has improved, following on the higher quotations recently announced. These increases are still holding, and current prices remain unchanged.

London, Ont.

A revision has been noted in the current price on cut nails, and slightly lower quotations are now effective. The new base price is $5.45 f. o. b., London.

London, Ont.

A seasonable demand is reported by local dealers for fly swatters. Sales are fairly numerous, and the current prices are maintained as follows:

Dunlop,	$ 1.20	per doz.
Peerless	$ 1.00	" "
Canada	$ 1.00	" "

London, Ont.

With the advent of warmer weather, dealers report a noticeable improvement in the current demand for refrigerators. Prices on these lines remain unchanged.

London, Ont.

Sprinkling cans are noted among hardware lines enjoying a seasonable demand at present. Quotations are still holding as follows:

SPRINKLING CANS Size	Per doz.	Japanned	Galvanized
1 qt.		$ 4.27	
3 qt.		6.00	
6 qt.		7.53	12.80
10 qt.		9.47	14.40
14 qt.		10.80	17.60
16 qt.			22.40

Winnipeg Markets

Winnipeg.

Prices have been marked down on Westcott wrenches, and these are now quoted at the following figures:

WESTCOTT WRENCHES—	Per doz.
No. 76	$ 11.00
No. 78	12.50
No. 80	15.00
No. 82	22.50
No. 84	30.00

Winnipeg.

Included among the premier price reductions announced this week are quotations on genuine Crescent wrenches, and the following are the new current prices:

GENUINE CRESCENT WRENCHES—	Per doz.
4 in.	$ 10.15
6 in.	10.15
8 in.	12.50
10 in.	15.60
12 in.	19.50
15 in.	24.95
18 in.	35.10

Winnipeg.

Included among the price reductions announced this week are quotations on lead traps and bends. These are now shown at 10 per cent off list.

Lead pipe	0.12½
Lead waste	0.13½
Note.—Lead pipe is subject to a discount of 10%	
Couplings Lead traps and bends	10% off
Lead, wool, lb.	0.13½

Do., 3 to 3½ lbs. sq. ft., lb.	0.10¾
Do., 4 to 8 lbs.	0.10

Cut sheets ¼c lb. extra and cut sheets to size ¾c lb. extra.

Winnipeg.

Prices on Smoky City soot destroyer have been reduced, and this product, now selling at $7.20 per case, and $2.40 per dozen.

Winnipeg.

Red lead quotations have been revised, and the current price has been lowered to 20 cents per lb.

Winnipeg.

Included among the principal price declines noted this week are Armstrong pipe vises. Following are the new revised quotations:

No. 0,	$ 4.20
No. 1,	4.90
No. 2,	7.50
No. 3,	11.00

Winnipeg.

Prices are lowered this week on belt or saddlers punches, and following are the prevailing quotations:

BELT AND SADDLERS PUNCHES— No. 10	Per doz.
1 to 6	$ 1.60
7	2.00
8	2.00
9	2.50
10	2.50
11	2.50
12	2.50

Winnipeg.

Corresponding with the reductions in numerous lines of wrenches announced this week, prices on the Always Ready wrenches are noted as lower and the following are the new quotations:

ALWAYS READY WRENCHES—	
Nickel Plated	
No. 1	$ 4.40
No. 2	6.08
No. 2½	9.45
No. 3	14.40
Black	
No. 101	$ 4.14
No. 102	5.67

Winnipeg.

Among the most important price reductions noted on the current week's markets are quotations on spades and shovels The revision was announced the latter end of last week, and following are the new prevailing prices:

O.P.W.

Says Ottawa Pete:

Our Paints Will
"Save the surface and you save all" Paint & Varnish

What is a Customer?

"He ain't the man who comes into your store just once, buys some paint and goes his way. He's a prospect—legitimate game for anyone—until he has elected you his paint dealer and trades with you regularly.

"There's just two things that makes customers out of prospects: following 'em up and selling 'em good goods.

"I guess I can count on you to do the followin' up and you can count on the folk at Ottawa for good paints and varnishes.

"O. P. W. Paints and Varnishes are the lines that make friends. You can offer them at a fair and square price and count on 'em till the cows come home. Every drop in every can is the same—always fresh and always uniform, because it is made according to exact formulas. And everything that goes into O. P. W. has stood the test of actual use for years and years. Every job on which O. P. W. is used is a boost and an ad. for you.

"Just a farewell tip: Sort up on O. P. W. and get after the householders. They're the biggest cinch you've got—no purchasing agent or other official between you and your prospective customer—no subject interests a man quite as much as his own home—all the family rooting for you—all the pressure on your side!

"Good Luck!"

"Words of Honor"

Among the sturdy old business pioneers of Canada who laid the foundations of this country's commercial prosperity, it was pretty well understood that a trade-mark was "a word of honor" as to the quality of their products.

There have been some radical departures from this once accepted belief. The trade-marks of to-day have not the same "face value" as they had in 1858, when Jamieson's first produced paints.

While this is a matter for regret, there is certain cause for pride in the fact that a few of the old marks which were recognized as "words of honor" have still the same hold on public confidence —Crown & Anchor. Island City and Rainbow Brands.

As a further means of identification and protection for purchasers of these established favorites, the general house mark, "Jamieson's Products," shown opposite, is being used in conjunction with them. It has won immediate acceptance by paint users throughout Canada, as a further, easily recognizable pledge given by the manufacturer as a guarantee of honesty and quality.

That is why so many dealers find pride and profit in handling Jamieson's Products—Paints and Varnishes which have won a nation-wide acceptance because their purity and goodness are protected and assured by a real "word of honor" trade-mark.

Wakyte Special

No 3

No. 0

Chemical Closets For Campers

Wakyte "Special" is the cheapest that can be made without using poor material and workmanship. The body is corrugated and finished in dark green auto enamel; seat is mahogany finish; vent is at the back, near the top; inner receptacle is finished in black enamel. Chemical Closets are the next best thing to a water works system.

Wayte Powder Chemical

Wakyte No 3. This is a medium priced closet of 20½ inches in length; 14 inches in width, and 17 inches in height. The body and inner receptacle are both stamped by special dies into corrugations. This not only improves the appearance but adds 100% to the strength and durability. A well-liked popular seller and priced to suit a very large proportion of the people.

Wakyte No O Competitive Closet. Merchants who are forced to meet competition may require this closet. It is equal to any competitive closet on the market and will enable the merchant to meet competition. It is not corrugated, and cannot be compared with the standard lines in quality or finish. This is about the same size as the "Special," body finished in dark green auto enamel.

Wakyte Powder Chemical is recommended. It not only contains all the disinfecting properties of Liquid Chemical, but in addition, may be shipped under any weather conditions without damage. Conveniently packed in tins, twelve to the case. Wakyte Liquid Chemical is put up in one-gallon cans, packed six and twelve to the case. This is a valuable item to the dealer and lasting trade is easily built on these secondary sales.

Your Grandfather Used"

—An Open Hand
Of a Fundamental Policy

Now, today, the policy of making each barrel of oil as though our whole reputation depended on that one barrel, is just as rigidly adhered to as in the beginning. Livingston Service makes the famous "Blue Barrel" easily available from Vancouver to Halifax, and "Livingston Brand" on the barrel is your assurance of the quality within.

System In Selling Paint Oils

No System—Lots of Waste and a Very Dangerous Fire Trap.

Haphazard methods in selling paint oils are dangerous and usually a losing proposition for the dealer.

There is one thing absolutely necessary to systematic and profitable handling of paint oils. That is modern storage equipment.

The Bowser Way—Pumps are on floor above. Systematic, Clean, Safe, and Saving.

Bowser Paint Oil Storage Systems

are to the paint business what bookkeeping machines are to accounting—an economic necessity. They store the oils without loss from leakage or evaporation; give accurate measure, keep the oil room clean, make the labor of handling a small item.

If you are not using Bowser Storage Systems you are missing an opportunity to profit in your paint oil business.

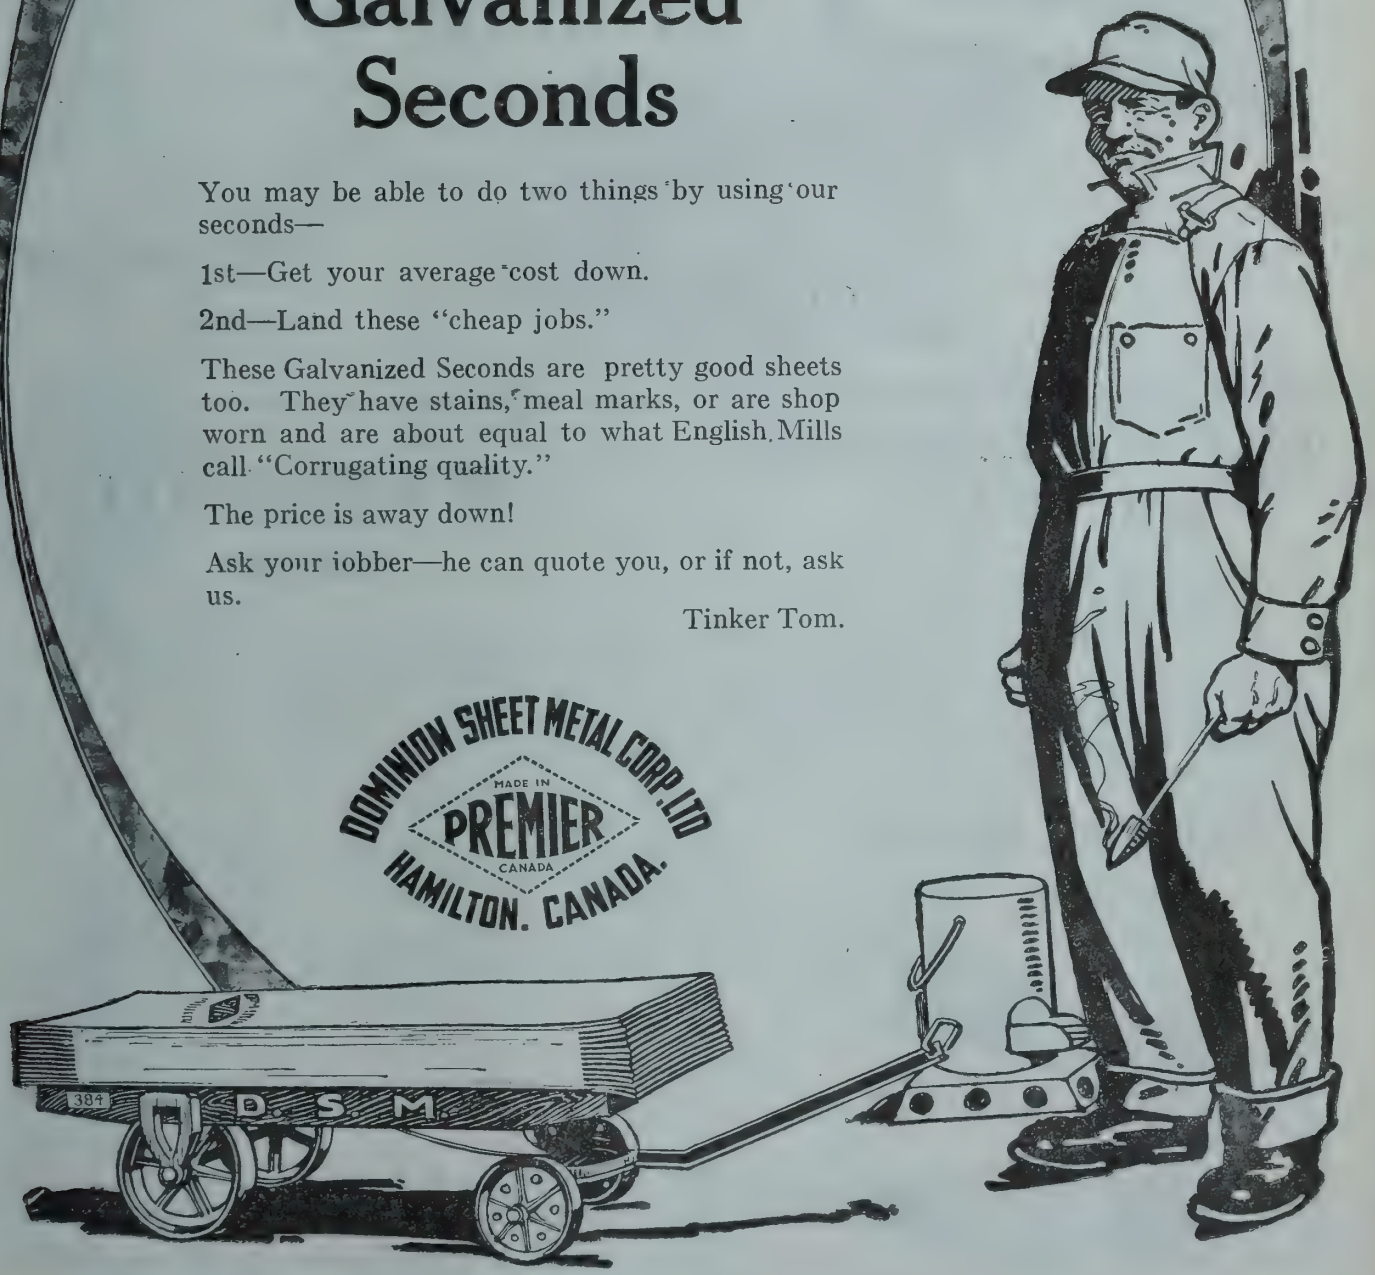
Tinker Tom Talk No 317

Galvanized Seconds

You may be able to do two things by using our seconds—

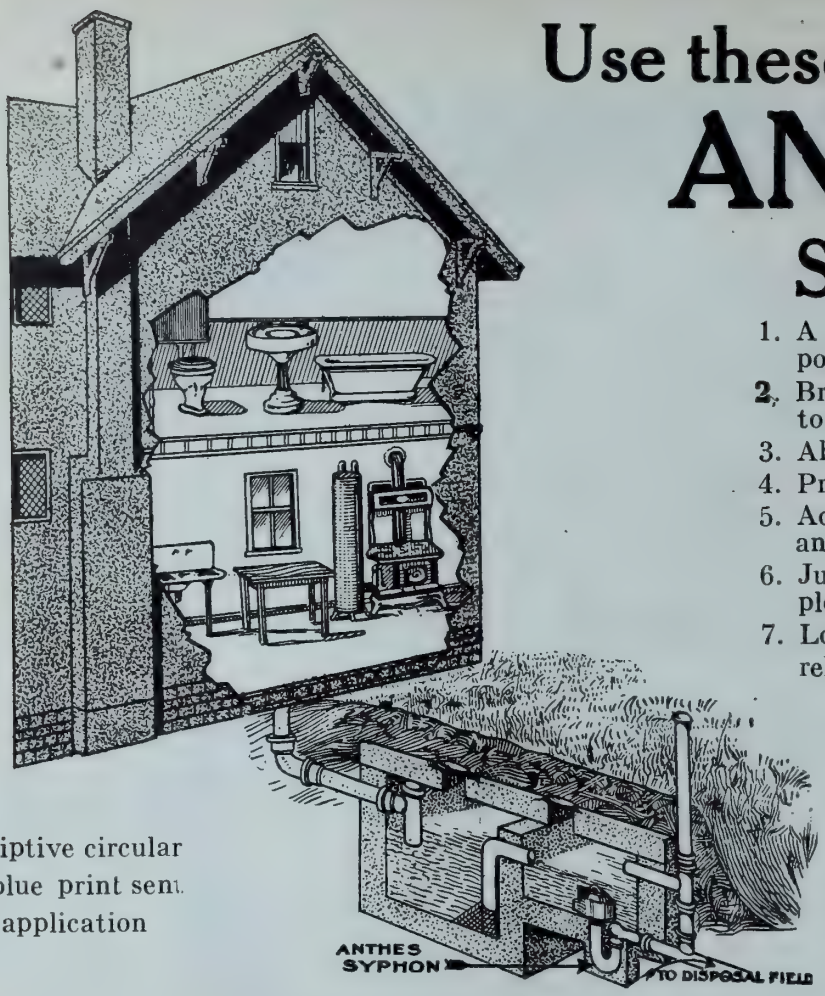
1st—Get your average cost down.

2nd—Land these "cheap jobs."



These Galvanized Seconds are pretty good sheets too. They have stains, meal marks, or are shop worn and are about equal to what English Mills call "Corrugating quality."

The price is away down!



Ask your jobber—he can quote you, or if not, ask us.

Tinker Tom.

WHAT MAKES BEAUTY AND GRACE?

Speaking fundamentally, a thing appeals to our sense of beauty and gracefulness because it has the balance and lines that we see in every day nature. Nearly all trees, flowers, etc., are nicely balanced, one side with the other and one end with the other. The establishment of balance and equilibrium is in fact what nature is eternally striving to accomplish. Is it any wonder therefore, that the window and interior displays that appeal to people are those that are nicely balanced as a whole, and contain well balanced individual pieces such as you find in

The Big Hit of the Year

The Columbia Bell Ringer is making bells ring everywhere.

In Private Homes,
Apartment Houses,
Factories,
Stores,
Offices,

wherever door bells, annunciators, private telephones, burglar alarms and servants signal bell systems are used, the Columbia Bell Ringer provides the power that makes bells ring out loud and clear.

This handy two-cell power bell ringer with only two binding posts is the simplest, handiest and most convenient bell ringer you can sell.

The cheery attractive label takes the Bell Ringer out of the ordinary dry cell class and makes it a splendid display feature for your window or counter. It retails at an attractive price and the profit to you is satisfactory too.

Thor

the name that's more than a name. It stands for efficient service.

In the early days of trade marks and trade names there was a tendency to label for the sake of the appearance, but this is a thing of the past. The name "Thor" on an Electric Washing or Ironing machine today, as always, stands for an efficient service,—stands for 100% value to the dealer and his customer.

The "Thor" agency is a valuable asset in any town or locality served by electricity.

TRADE MARK

THE skill and care, and pride in craftsmanship which find expression in Brown & Sharpe Products make the trade-mark above a mark on which the mechanic relies—a mark he seeks.

To the dealer it means protection and that tools sold with this trade-mark will return satisfactory service to the user. He knows that they will build good-will and make satisfied customers for his store. There is a sense of security in selling something which will add to his prestige and good reputation.

Miss Simplicity of Canada

Quick Sales - - - Good Profits

PUT Miss Simplicity in your store and you will realize both quick sales and good profit. An electric washer makes an irresistible appeal to the housewife, but this is intensified almost to the point of instant sales when the very moderate price of Miss Simplicity is known.

Miss Simplicity is Canadian-made throughout and built of the finest materials obtainable. Mechanically perfect, yet very simple in operation, it is an instant avorite. Costs very little to operate and washes clothes, laces and even the daintiest of fabrics, perfectly and without injury.

Miss Simplicity gives you an excellent opportunity to capitalize on the popular demand for electric washers. You can make money fast with Miss Simplicity because each sale brings you a good profit and because quick sales increase your turnover. We give a liberal guarantee with every machine and will assist you with your advertising.

Send to-day for our dealer offer. We know it will interest you, as it has so many others.

Let the Engine Turn the Grindstone

CLEVELAND TRADE MARK GRINDSTONES

Sell power grindstones and let the engine do the work. It only needs the starting of the engine and in a short time all tools are ready for work.

Don't sell cheap grindstones—talk quality and grit—mounted in a well-built frame so it will do the work properly and stand up for maximum instead of minimum amount of work.

Our HARVEST KING POWER GRINDSTONE gives extra good service.

THE CLEVELAND STONE CO. - CLEVELAND, OHIO

The Roof that beautifies the community

Homes and buildings roofed with Brantford Asphalt Slates lend distinction to the neighborhood. The red and green slates are in Nature's own colors, unfadeable, and harmonize perfectly with the surroundings. You will add attractiveness and value to your home by using

SIX ROOF COSTS

1—INITIAL COSTS OF MATERIALS—Brantford Asphalt Slates are sometimes higher in initial cost for the material.

2—NAILS REQUIRED — Brantford Asphalt Slates require ONLY 648 nails to a square. Brantford Asphalt Slab Slates require ONLY 450 nails.

3—COST OF LAYING—Brantford Asphalt Slab Slates are four on one strip—require only one operation in handling, one operation in spacing—Individual slates are 8x12¾ inches—Cut easily, fit easily, fit on angles and bend over round surfaces. You save 30 to 50 per cent. in laying.

4—NO PAINT OR STAIN REQUIRED—The surface of Brantford Asphalt Slates is in nature's permanent colors, green and red, unfadeable, always attractive—requiring no stain to produce artistic effects, no liquid coats to make them fire-resistant.

5—SAVING OF INSURANCE—Brantford Asphalt Slates are classed as non-combustible by fire insurance Companies—a direct saving of from 10 to 20 per cent. on premiums is effected. In certain localities fire regulations demand asbestos paper under some roof materials, but Brantford Asphalt Slates are fire-resistant and are immune from special regulations.

6—COST OF REPAIRS—From the day they are laid Brantford Asphalt Slate roofs show almost 100 per cent. of the original roof untouched. Brantford Asphalt Slates do not curl, split, crack or rot. Complete protection and permanent protection are built into Brantford Asphalt Slate Roofs.

Brantford Asphalt Slates

Roofing with Brantford Asphalt Slates, individual, slab (four in one) or Winthrop tapered, provide a roof covering that lasts for years without repairs or renewals.

Highest quality felt, best grades of asphalt for saturation and coating, and the encrusting of the upper surface with slate—every operation and all materials conform to Brantford Roofing standards.

Put the Best Roofing on YOUR HOME.

Distributed under Brantford Roofing Trade Marks, through Brantford Roofing Dealers. Stock carried, information furnished, service rendered by our dealer in your district.

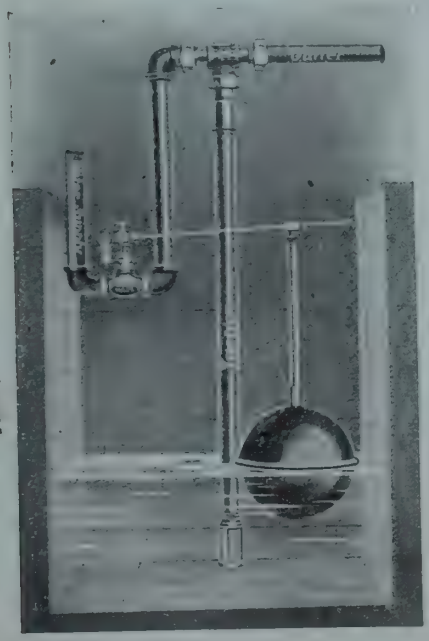
THE MORRISON LINE

Well-known Goods that sell and satisfy



Automatic Cellar Drainer

Winter, spring or rainy weather, the Morrison Automatic Cellar Drainer is always on the job preventing damage or deterioration of goods in damp cellars. It quickly pays for itself in the value of goods saved. It's a much more than satisfactory article for your own use in the store-cellar, or for resale. This efficient, automatic cellar drainer can be relied on for service all the time.

The Morrison operates entirely automatically at 10 lbs. or higher, water pressure. Simple—nothing to get out of order.

Stack Gas Water Heater

This efficient device, for quickly supplying hot water as needed, is rich in convincing selling points, that close sales quickly without wasting the merchant's time. The Stack will heat 5 gallons of water 3 minutes quicker than the average heater; raise the temperature of 5 gallons of water 28 degrees higher in 10 minutes; and heat three gallons more in 10 minutes. The net-work of small, quickly heated, copper circulating tubes, that expose a large quantity of water to the heat at one time, make the Stack 15% more efficient.

Your Customers Require the "New Idea"

WHY?

Because it gives more heat and uses less fuel. Costs less for repairs and operates easily and satisfactorily.

A New Idea will last a lifetime.

You Should Sell the "New Idea"

WHY?

Because the New Idea has a Dominion wide reputation for dependability and economy.

Boosting the "New Idea" insures more profits, more business more prestige, more satisfied customers.

The "New Idea" Warm Air Furnace is Fully Guaranteed!

The New Idea contains more heating surface than any other furnace. The large roomy ash pit prevents the ashes from banking up and burning out the grates. The Duplex grate—which is guarnteed for five years, is the strongest, most reliable grate in existence. There are other features too, which combine to make the "New Idea" Warm Air Furnace, a perfect heating unit. Write us at once for particulars of our attractive proposition to dealers. New Stove Catalogue just off the press, which we will gladly mail upon request.

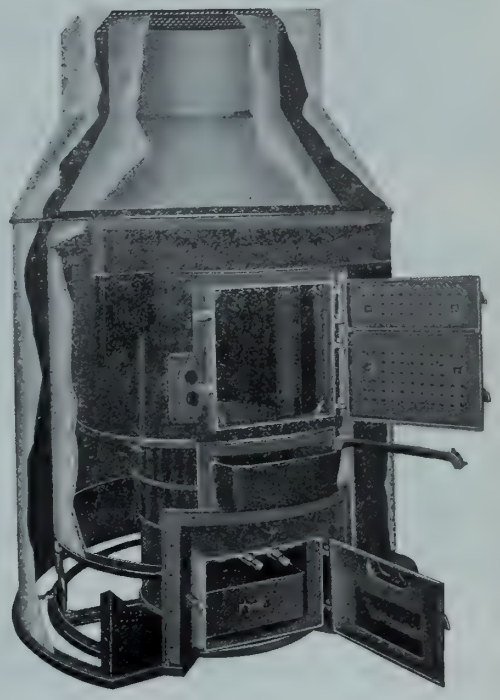
Three Special Reasons Why You Should Order Your FREEZERS Now

(1) We can ship more promptly now than when the big demand is on.

(2) Transportation is better now.



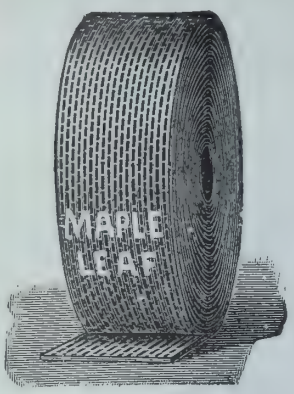
(3) Hot weather is sure to come. So will the rush for Freezers, all along the line, from user to dealer,—to jobber,—to us. But we cannot supply every demand promptly the last minute. Be wise in time, get your stock now while the getting is good. Be ready to supply your customers the moment they are in a humor to buy. If you hesitate now you may lose later. We venture to guess that your stock is low, so there is every good business reason why you should prepare in time. Place your order with your jobber now—you cannot lose.

North Bros. Mfg. Co.
PHILADELPHIA - PA.

PIPE and PIPELESS FURNACES

The insistent demand by the consumer for the PIPELESS FURNACE and the undeniable fact that in certain types of houses and when correctly installed it has given remarkable results, opens up a rich field of possibilities for the ready acceptance of the "Happy Thought Pipeless Furnace." Linked together with the "Happy Thought" Ranges, its name carries with it the positive guarantee of complete satisfaction. It produces a favorable impression, carries conviction and sells easier. Its standard construction of sturdy materials give assurance of life-time service.

The wonderful record of service given by our regular type of Furnace completes a line of Warm Air Furnaces that creates and stimulates business for the progressive dealer. These Furnaces include the Reliance, Garnet and Leader.



We also have the powerful Leader Combination warm air and hot water Furnace—a heating plant for special heating requirements.

Our new Bungalow Furnace is now being offered. Your knowledge of modern requirements will satisfy you that this Furnace will fill a real need. Of medium size and somewhat lighter build, it is specially adaptable for the Bungalow or Cottage.

On a moderate outlay a thoroughly up-to-date heating plant can be installed.

We are prepared to furnish you with specified data on any of these lines. Write us.

You make the first sale — then the Barrett Specialties bring in the customers and sell themselves

Big nation-wide advertising and a reputation for dependable products have made the name "Barrett" a tremendous selling force. It's like a magnet drawing trade into your store. And when a customer buys the famous Barrett Specialties, he'll find them so far ahead of competitive brands that he'll be sure to tell his friends about them—and come back for more himself.

Our records show that the popularity of these high-grade Barrett Specialties is increasing by leaps and bounds. Lay in a sufficient supply of them—and *your* sales will soon show profits piling up at a rate that will do your heart good.

There is Creonoid, the ever popular fly-oil, lice-destroyer and cow-spray, which makes the farmers' profits greater by ridding livestock and poultry of troublesome flies and lice.

There is Everjet Elastic Carbon Paint—a glossy-black, durable paint, which prevents rust on all outdoor metal work, and prevents corrosion in metal exposed to the action of steam, acids and alkalies. A proven protective paint for every purpose.

And Plastic Elastigum—a "plastic cement of a hundred uses." It repairs leaks in roofs and flashings, re-lines gutters, stuffs cornices—and does a multitude of other things. It is water proof plastic, and extremely durable.

Old prepared and "rubber" roofs can be made as good as new with Everlastic Liquid Roofing Cement. Easy to apply and dries quickly, closing up the small holes, making the roof waterproof and weather-proof.

Carbosota is a liquid creosote oil used for the preservative treatment of structural timber, by means of Open Tank process or surface treatments. It offers a practical means of reducing losses from wood decay and may be employed by anyone.

The Most Helpful Equipment In Business

To-day modern business is transacted with the aid of numerous equipment, counters and display windows and cash registers.

We can hardly get along without them—each has its saving in speeding up of daily sales, and yearly turnovers.

But now you add to other equipment, perhaps the most important of all—Hardware and Metal is the equipment for sending you new business ideas.

Properly applied ideas increase the hum of the adding machine. Business ideas quicken the ring of the cash register. Business ideas speed up sales and increase turnover. The ideas you will secure from Hardware and Metal cover practically every one of your important business problems.

Ideas on selling, advertising, managing, financing, buying. Ideas on credits, collections, letter-writing, training salesmen, personal efficiency. Information regarding market conditions. Ideas on stock keeping, inventory, accounting, records and a hundred and one other business suggestions and methods.

Surely from such a productive source of ideas there will come many ideas of real dollars and cents value to you.

Carefully Selected
Lines of Saleable Goods

Thousands of lines of hardware, and kindred goods, are offered on the Canadian market. To select your stock directly from these would take an amount of time your business couldn't afford. It would be a heavy task to interview all the manufacturers' salesmen and make your selections, beside the ever present difficulty of determining the right lines that the public is going to buy. There are problems of buying in quantities large enough to convenience the manufacturer, and of warehousing the stock when bought. All these services are performed for you by a reliable jobber. May we do it for you?

Star W-X Shock Absorber FOR FORD CARS

Star W-X Shock Absorber for Ford Cars. Simple and easy to attach without extra tools; merely put in place of the removed shackles. Rigid against end or fore-and-aft movement, but offers no interference with regular Ford spring mountings.

Gives a greater flexibility of action from normal to full load because of changing fulcrum of levers. This, together with two high-grade compression springs at each corner of the car, insures easy riding and prevents breakage.

Prices within reach of every Ford owner, and the device is easily installed by owner.

A Bronze Pump with One Moving Part

When discussing Water Systems, do not put the Westco down as an ordinary system, for that is just what it *is not.*

Ordinary systems have a cumbrous tank, and a multitude of moving, wearing parts.

The Westco System has no tank, no gear, no valve, no belt.

To give double assurance of its efficiency and durability the

Westco *Tankless Water System*

is equipped with

AN ALL BRONZE PUMP NEW WESTCO TWO-POLE PRESSURE SWITCH

The system is entirely automatic and runs smoothly and noiselessly. And as it *has only one moving part* it rarely gets out of order.

The Westco Tankless Water System is being handled by dealers all over the North American continent.

It is admitted to be the best selling outfit on the market.

Write us for information regarding Dealer Co-operative Plan, or, when in Toronto, call in and see us.

The Lightning Paint Brush Cleaner

Cleans a Brush in a Minute.

(Patent Pending)

THE LIGHTNING PAINT BRUSH CLEANER is the only paint brush cleaning machine ever placed on the market. It cleans so quickly and thoroughly that brushes can be taken from the strongest colors and almost immediately used in snowy white without carrying the faintest trace of color.

It saves 95% of brush cleaning time. It prevents the formation of a heal and thereby lengthens the life of the brush 30%. It saves 100% of brush soaking fluid. It reduces the brush investment from 25% to 50%. It is the only method of thoroughly cleaning varnish brushes.

This means a tremendous annual saving to manufacturers and contracting painters, an amount equalling many times the cost of the machine.

We need dealers and agents throughout the United States and Canada. It's an interesting proposition. Write

DAYTON

International Business Machines — SPEED ACCURACY ECONOMY

The scale that counts and computes

An Investment for lighter work and larger profits in the hardware trade

EXCLUSIVE FEATURES.

No hardware merchant can afford to be without the help of the Dayton hardware scales exclusive features. Here are two:
WIRE RACK—gives extra platform accommodation for weighing coils of rope, wire, rubber hose.
COUNTING SCOOP—invaluable at stock taking time, enabling you to compute in a moment the number of small articles in any given bulk.

BEFORE you close up your store tonight—give this extra thought to your day's receipts:

How much of the money you have taken in over your counters belong to you?

Cast your eye over your bills payable and expense list: payments for stock,—clerks, taxes, repairs, insurance—and the dozen other items.

How much will remain of the money that has just passed through your cash registers?

The amount you have left will be the SOLE REWARD for the thought and energy you are putting into your business. Upon this fag-end of your receipts depends ,possibly, the comfort and welfare of your family.

This fag-end of your receipts,—this margin of PROFIT—was never in a position so precarious as in this day of quickening competition.

That is why the alert hardware merchant is studying this problem: How can I increase the net returns from my business, with a narrower profit margin?

To such a merchant we suggest this thought: Don't waste energy and time trying to do what a machine will do better.

The Dayton Hardware Scale will weigh your goods and compute your prices instantaneously and with hairsbreadth precision.

The Dayton Hardware Scale will rid your business of the multiplied careless, inaccurate weighings which are the most murderous destroyers of profits.

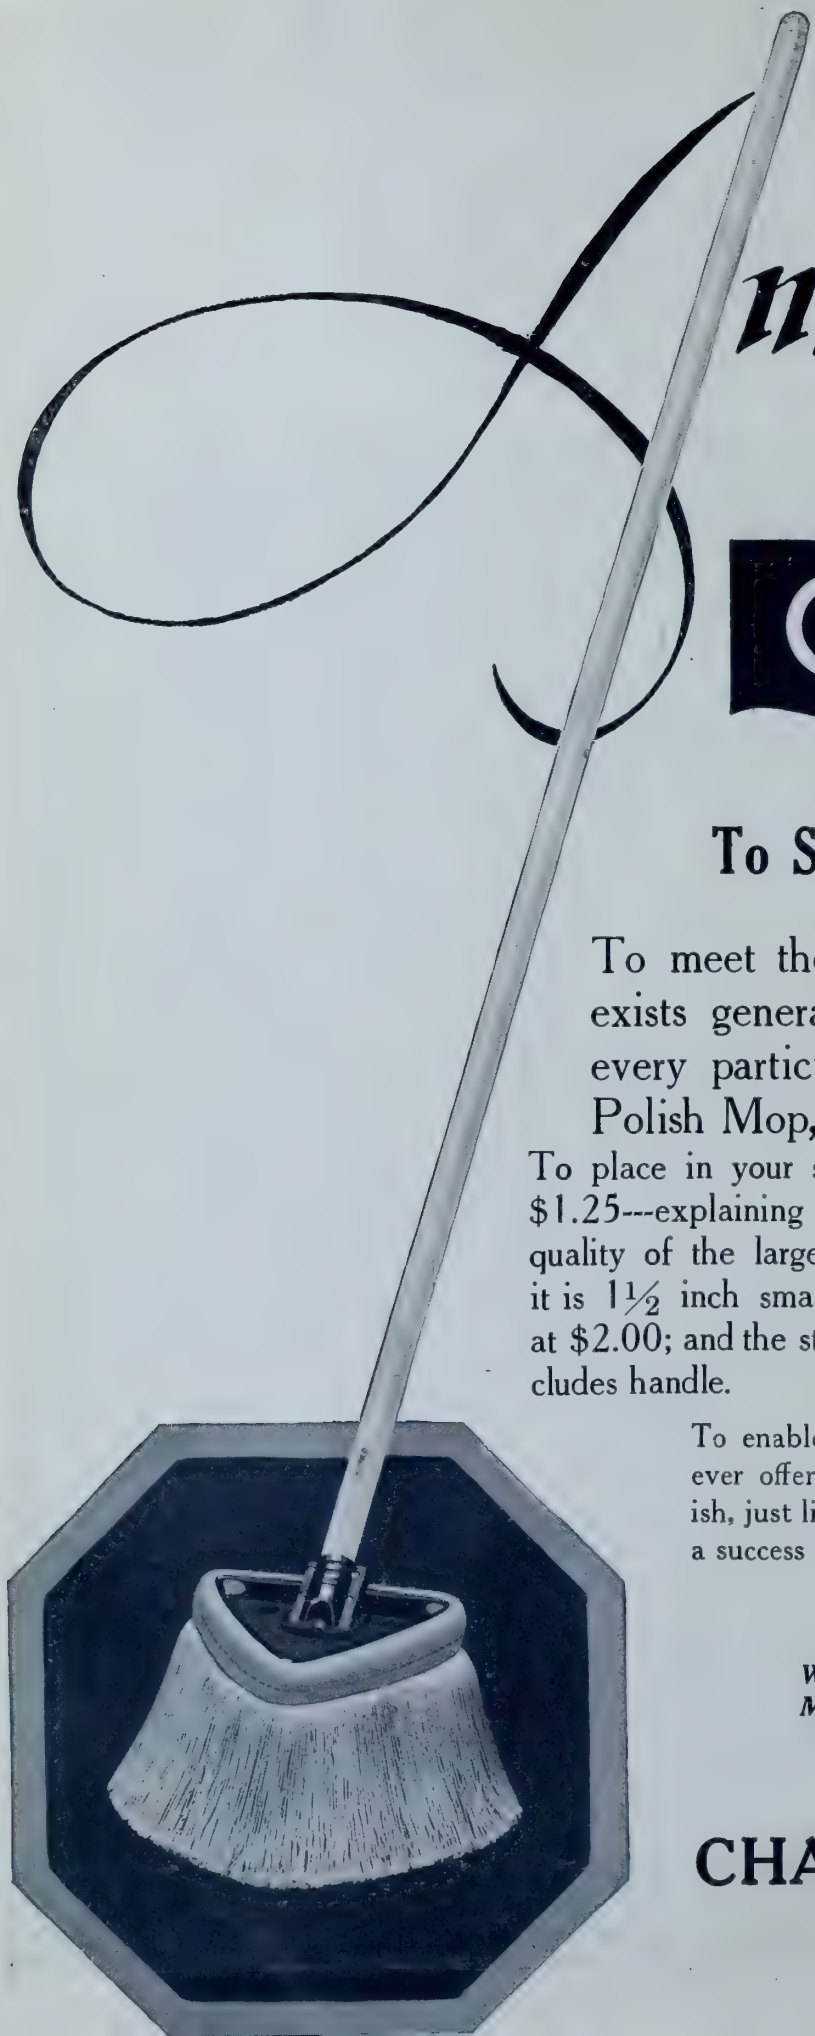
Vol. XXXIII. No. 26. THE MACLEAN PUBLISHING COMPANY, LIMITED PUBLICATION OFFICE: TORONTO, CANADA JUNE 25, 1921



OUR NEW IRON

DESIGNED TO MEET THE PARTICULAR NEED OF THE PRACTICAL PAINTER.

THIS iron has a cover that fits securely but can be removed and replaced quickly and easily. The sides are straight and the handle is flush with the top, making it easy to stack and store. The bail cannot come off as it is attached to the wire rim, which gives strength and rigidity to the can. Altogether, this iron makes a perfectly balanced paint pot, possessing,

Great Strength, Utility and Security.

Announcing No. 15

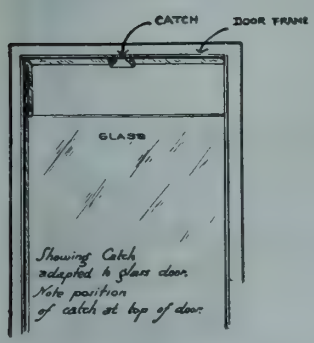
O-Cedar Polish Mop

To Sell at, Complete, $1.25

To meet the demand---which we believe exists generally---for a Mop as good in every particular as the regular O-Cedar Polish Mop, but somewhat lower in price.

To place in your store a "Polish" Mop you can sell at $1.25---explaining to your customers that it has all the quality of the larger one---the only difference being that it is 1½ inch smaller diameter than the Mop you sell at $2.00; and the steel centre is not japanned. Price includes handle.

To enable you to say "Here's the best Mop value ever offered in Canada---treated with O-Cedar Polish, just like the large Mop that has proved so great a success as a floor polisher."



We are now ready to ship this new Mop---order through your jobber.

CHANNELL LIMITED

'RICE LEWIS' NEWS

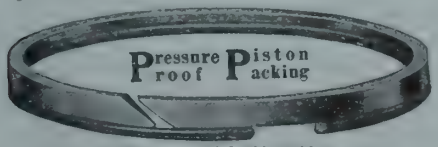
AUTO ACCESSORIES

to take the knock, the rattle, the glare out of the old car ---and some of the new ones.

The early summer finds the rattles and knocks that have developed during the first few weeks of use of the new spring car, Old cars are beginning to balk on the hills. Headlights are beginning to show their inefficiency and need replacing. Now is the time to go after the replacement business.

VICTORY AUTO DOOR CATCH

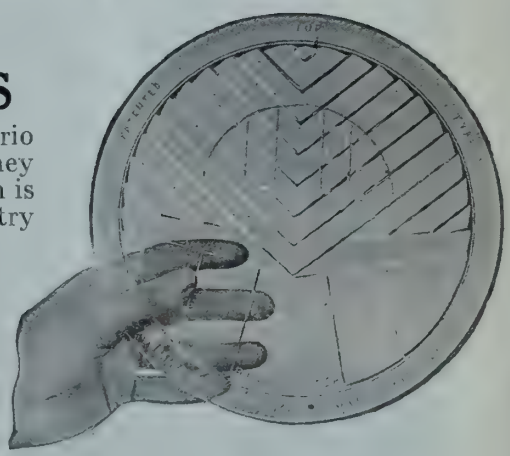
This is a brand new line that fills a much appreciated need. It takes the rattle out of any auto door or sedan window. It even may be used on house windows with splendid effect. Easy applied, always efficient. Sells at $1 per pair retail.



Pat. Mar. 2, 1915. Feb. 29. 1916

Pressure Proof Rings

Are a permanent cure at low cost for poor compression, over-oiling and all kindred motor trouble; save money on gasoline and oil—give much more power—prevent carbon.



We carry "three part" and "junior" styles in all sizes.

Patented Feb. 29. 1916

SHALER ROADLIGHTERS

Not only conform with the Ontario laws in preventing glare, but they give maximum road light, which is even more essential in country driving. The "Shaler" Roadlighter shows the road through fog or dust most efficiently. We also sell the Sills Rite-Lite Lens—the de luxe automobile driving light.

Other Lines

We carry a good range of such lines as :—Jacks; Tire Covers (plain, black and white beaded, all sizes); Tire Chains; Hotshot Batteries; "Hercules," Giant and Junior Spark Plugs; Two and Three Cylinder Pumps; Compound, Triple and Single; Norwesco and Johnson's Auto Products; O'Cedar Polish and Liquid Veneer; Pyrene Fire Extinguishers; Auto Lamps, all sizes; Goggle Sets, etc., etc.

Be Prepared for the Preserving Season

Funnels.

Fruit Jar Fillers.

Imperial Measures.

Lipped Preserving Kettles.

Last year a big number of Canadian hardware merchants were caught napping. They laid in a small stock of enameled-ware to meet the preserving season demand.

A week after the demand commenced they were cleaned right out. Then we were swamped with wires, night-letters, telephone calls and hurry-up orders for all kinds of enameled-ware preserving articles. It was a busy time for our packing and shipping departments, but they were equal to the occasion.

How about THIS season? It will be here very soon. Are you prepared, or will YOU be caught napping?

Be on the safe side. Order now. Our enameled-ware lines are now selling at lower prices than a year ago.

Now is the time for a useful window display of enameled-ware Preserving Kettles, Fruit Jar Fillers, Imperial Measures, Funnels, Spoons, Ladles, Skimmers, Cullenders, Fruit Presses, etc.

These Charts Sell Imperial Polarine---

Dealers who sell Imperial Polarine Motor Oils according to our Chart of Recommendations are in line for bigger and ever increasing business. By using these charts you can capitalize on every dollar we have spent to make our recommendations scientific and absolutely reliable.

Display the Imperial Charts of Recommendations prominently. Sell every customer the correct grade of Imperial Polarine Motor Oils for his type of truck, tractor or automobile. He gets better and longer service from his motor equipment—you secure his permanent trade in oils and all other lines you handle.

There is a great demand for Imperial Polarine Motor Oils. They are known from one end of the Dominion to the other. Every dealer serves an unlimited market—every sale nets him a good profit. See the Imperial Oil salesman to-day regarding our profitable dealer agreement.

If you're not displaying the Imperial Charts of Recommendations, write in to-day for the one you require, or for both if you can use them. A letter to 56 Church Street, Toronto, will bring the Charts, also a copy of our interesting new booklet, "Automotive Lubrication."

Crank-case cleaning service is a money-maker and a business-getter for dealers. Advertise your store by displaying the Imperial Polarine Crank-Case Service display poster. Free electros are also available to dealers for strong local campaigns. See the Imperial Oil salesman.

A receipt printed and issued by a National Cash Register →

The register prints a record of the sale on the receipt. The star shows it was a cash sale. "A" is the clerk's initial. The amount is $1.00. It was the first sale on June 15, 1921. The register also prints an advertisement of the merchant's store on the front and back of the receipt.

Benefits the customer :

The plainly printed figures of the amount on the receipt show that she has not been overcharged. She likes to buy in a store of this kind.

Helps the clerk :

It proves that he registered the right amount. The added and printed records inside the register give the clerk credit for the sale.

Protects the Merchant :

He knows that to get the proper amount printed on the receipt, correct added and printed records must be made inside the register.

A National Cash Register is the only machine that prints and issues this kind of a receipt.

We make cash registers for every line of business

LANE'S UNIQUE TOOLS

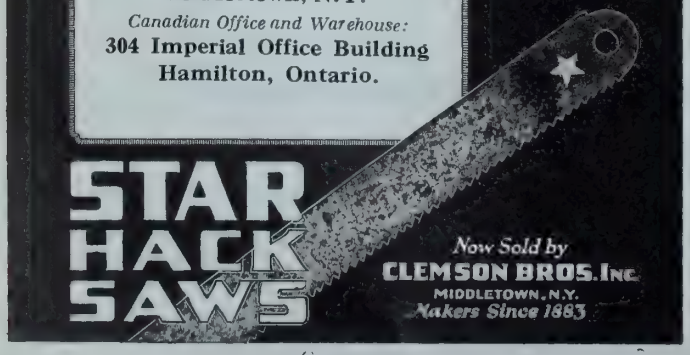
The Unique Angle Socket Wrench Set

Style "K" Set

Lane's Style "K" Angle Socket Wrench Set, consists of a right angle, hexagon key 8 in. long, and six round, cold rolled, hardened steel sockets, with broached hexagon openings. Size of socket openings: ½", 9/16", ⅝", also 11/16", ¾", and ⅞". Packed in Brown Karatol Case, weight 20 ozs.

This little wrench sells splendidly because every man of mechanical intelligence appreciates its exceptional value for removing stubborn cap-screws and hexagon nuts. It is made entirely of steel, has powerful leverage, and, like all "Unique" Tools, is guaranteed against wear and breakage. It is built for speed, and never slips, or "chews up" screws or nuts.

Manufactured by



WILL B. LANE UNIQUE TOOL CO.

170 W. Randolph St., Chicago, Ill.

Most of your customers want Star Hack Saws — why not concentrate on the leader, and speed up your profits?

Star Saws in the famous green box are now sold by Clemson Bros., Inc., who have made them since 1883. Don't get side-tracked — insist on Star Saws.

CLEMSON BROS., Inc.
Middletown, N.Y.
Canadian Office and Warehouse:
304 Imperial Office Building
Hamilton, Ontario.

Guaranteed---What More?

D-B CARBON REMOVER

Is guaranteed to remove carbon in 30 minutes—without removing the cylinder head. The process pulverizes the carbon and ejects it through the exhaust.

To prove our absolute confidence in D-B CARBON REMOVER, we let your customers try it without expense—you give it to them—if it proves unsatisfactory they return the can to you. We, in turn, will pay you the **retail value** of every can returned for this season.

This is guaranteeing the quality of our product!

AUTO JACK says: A can of D-B is never returned.

Barrett Roofings, Cements Industrial Paints etc.

Start these money-making cements to work for you today—

Don't sit back, waiting for the building boom, and let live, *immediate profits* slip right through your fingers. All around you are roofs—hundreds of 'em—in pressing need of patching and repairs. Don't miss this trick—don't pass up the profits in this roof-repair business.

Tell folks in your community how easy it is to renew their old roofs with Barrett Roof Repair Materials. Let 'em know your store is headquarters for these famous roof-repair materials. Go after this business hard, and then—watch the profits roll in.

Plastic Elastigum

A tough, elastic, waterproof, acid-proof cement with the consistency of thick molasses. There are so many uses for this ever-ready patching cement that it is known generally as "The Waterproof Cement with a Hundred Uses."

It is extremely easy to apply with trowel or putty-knife to any surface, wet or dry. It expands and contracts with surfaces of all kinds, whether metal, stone, concrete, wood, glass, glazed brick or terra cotta. Among its many uses, it is particularly useful—for flashing work of all kinds; for waterproofing gutters; for damp-proofing parapet and fire walls above flashings, for stopping leaks in roofs, around chimneys, skylights, etc.

Liquid Elastigum

A high-grade cement in liquid form, unequalled for recoating old and worn felt, metal, and "rubber" roofings. It actually gives new life to old roofs by forming a tough, weatherproof coating over the entire surface.

It not only seals cracks and small holes against moisture, but it is of sufficient body to level small hollows, and reinforce weak spots.

Liquid Elastigum is composed of non-volatile oils combined with asbestos fibre. It is applied very easily with brush or squeegee, and because of its fibrous nature, spreads in a thicker layer than ordinary roof paint.

Liquid Elastigum is also very economical, one gallon covering from 100 to 250 square feet, depending upon the surface to be painted. Even after years of service it is still tough and elastic.

Dependable Products that bring Big Profits

By carrying and recommending Barrett Plastic Elastigum and Barrett Liquid Elastigum you'll not only swell the total on your sales sheet, but you'll create genuine customer good-will by furnishing tested products that are sure to give satisfaction.

North Star Batteries

Last Longer Cost Less

North Star batteries are so carefully and perfectly made as to ensure more power and longer life than ordinary batteries. They will stand unused for a considerable period without noticea e deterioration and can always be relied on for wuick hot sparks. We guarantee this and will replace, without asking questions, any that do not give more power and last longer than other batteries.

North Star multiples are especially made and demanded wherever heavy duty ignition is required. Made in various sizes; packed in strong containers with handle, easy to connect, and absolutely waterproof.

North Star batteries offer superior service to the user and more profit to the dealer—both are good reasons why you should stock them.

Of Special Interest To

Quebec Hardwaremen

So pronounced has been our reception in Ontario, Manitoba, Saskatchewan and Alberta that we have extended our operations to the Province of Quebec and are duly licensed.

The hardware and implement dealers of this Province may therefore now enjoy the privilege of reducing their fire insurance costs exactly 50 per cent.

It is common knowledge that for the past 13 years our hardware companies have provided 100 per cent protection at 50 per cent the stock companies cost.

We charge the regular board rate and return the dividend of 50 per cent at the expiration of the policy. Policy does not have to be renewed to obtain the dividend.

Our Quebec manager is Mr. Alfred Brunelle, Room 35 Maisonneuve Building, No. 97 St. Jacques Street, Montreal. Write Mr. Brunelle direct (French or English) for quick service and immediate binders.

Official fire insurance connection for Ontario Retail Hardware Association.

Endorsed by Manitoba Retail Merchants' Association.

Financial Reference—Bank of Montreal—Montreal or Winnipeg.
(Please address the Bank through YOUR banker)

Our Provincial Managers are experienced fire insurance men and are most willing to give you the benefit of their advice upon request.

Your jobber stocks them.

AutoStrop Safety Razor Co., Limited
Toronto, Canada

When you require a roof, the measurement will be in squares (100 square feet). A basis for analysis of the costs of Brantford Asphalt Slates is given below:

1 **INITIAL COSTS OF MATERIALS**—Brantford Asphalt Slates are sometimes higher in initial cost for the material.

2 **NAILS REQUIRED**—Brantford Asphalt Slates require ONLY 684 nails to lay a square. Brantford Slab Slates require ONLY 450 nails.

3 **COST OF LAYING**—Brantford Asphalt Slab Slates are four on one strip—require only one operation in handling, one operation in spacing—Individual slates are 8 x 12¾ inches—Cut easily, fit easily, fit on angles and bend over round surfaces. You save 30 to 50 per cent. in laying.

4 **NO PAINT OR STAIN REQUIRED**—The surface of Brantford Asphalt Slates is in nature's permanent colors, green and red, unfadeable, always attractive,—requiring no stain to produce artistic effects, no liquid coats to make them fire-resistant.

5 **SAVING OF INSURANCE**—Brantford Asphalt Slates are classed as non-combustible by fire insurance Companies—a direct saving of from 10 to 20 per cent. on premiums is effected. In certain localities fire regulations demand asbestos paper under some roof materials, but Brantford Asphalt Slates are fire-resistant and are immune from special regulations.

6 **COST OF REPAIRS**—From the day they are laid Brantford Asphalt Slate roofs show almost 100 per cent. of the original. roof untouched. Brantford Asphalt Slates do not curl, split, crack or rot. Complete protection and permanent protection are built into Brantford Asphalt Slate Roofs.

Compare these roof costs with those of any other roofing material) it is your money you are spending and you want vaule for it—then buy

Brantford
Asphalt Slates

Distributed under Brantford Roofing Trade Marks, through Brantford Roofing Dealers. Stock carried, information furnished, service rendered by our dealer in your district.

Arrowhead Saws

Vanadium Steel

How you sell saws depends partly on your salesmanship. You can sell a poor saw but once; to sell saws successfully and build yourself a permanent business you must sell good saws. To give good saws distinction and individuality they must have the desirable selling points of superior saws.

Arrowhead saws have those points; the hang, set, temper and finish are right, and they sell right. Arrowhead saws attract, sell and satisfy your customers. Their satisfactory performance in service creates confidence in your store, and in your other lines of goods.

T. F. Shurly Company, Limited

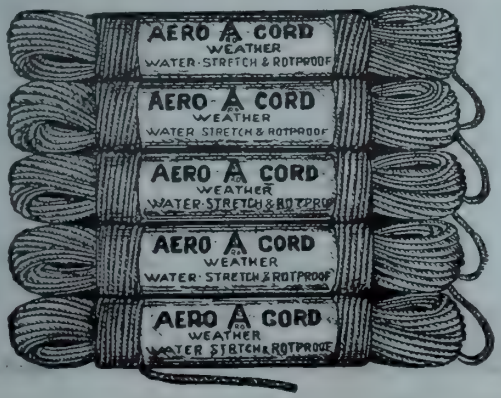
The Newest and Latest Maxwell Washer

AS ITS NAME implies, this washer cleanses the clothes by the vacuum process—the simplest and most natural method known. It makes instant appeal to every housewife entering your store.

Maxwell



Vacuum Washer

Note that the location of the gears is UNDER the tub. The washer cannot tip over when the cover is open, for there are no heavy gears above tub to make it top heavy. Automatically-cut gears ensure an exceptionally smooth, quiet running machine.

All wooden parts are beautifully finished in natural wood and metal parts painted in aluminum bronze. Its appearance attracts immediate attention. A single demonstration effects many sales, for every satisfied user sells others.

Write for descriptive folder and prices.

TO-DAY

Write your specifications for Dominion Ammunition

Hardware merchants, you can protect yourselves against disappointing your regular ammunition customers by specifying your requirements now. You will sell a lot of Dominion Ammunition this Fall—if you have it when your customers want it.

A survey of the sales possibilities for Dominion Ammunition shows that no less than the normal Fall demand is probable. Closed seasons are the only dull times the sportsman knows.

We have the materials; we know the orders will come—but we must have your specifications before we can manufacture more than a certain percentage of Canada's requirements.

By specifying your requirements now—no matter how small or for what delivery date—you will be sure of the stock you need to satisfy your customers and avoid disappointment.

New Merchandising Vogue May Stay

Lower Costs on Builders' Hardware This Week Expected to Help Construction in Fall—Continued Price Reductions Raise Interesting Points as to Merchandising Policy for the Future—Will Frequent Orders in Small Quantities be Permanent Basis for Future?

IF lower costs on building materials and labor will accelerate construction in Canada, lines relative to the hardware trade are certainly lending assistance this week, two very important commodities having been adjusted to lower levels. Prices on all tarred felts, dry and tarred sheathings show a decline of from 10 to 15 per cent. While this can hardly be stated as an outstanding feature, considering the market tendencies of many hardware commodities to-day, dealers throughout the country will undoubtedly welcome the advice.

In the opening months of the year, most products of the roofing manufacturer registered a price decline in sympathy with costs of raw materials. Production costs, particularly as regards labor, were taken into consideration at that time inasmuch as a higher standard of efficiency had been reached, but no reduction in wages was forthcoming. Forecasts as to the future trend of prices were that if changes were made, they would not be of a radical nature. Such has been the case up to the present; there has been a quite gradual decrease in prices of most products, with reductions slight, culminating with the present reduction, which, it is thought should encourage building as far as building papers are concerned.

Builders' Hardware Declines

Accompanying the above reductions, comes the announcement from manufacturers of builders' hardware, that their lines of brass, bronze, iron and steel hardware have undergone a reduction, ranging from 10 to 20 per cent. While lines of a cheaper nature are not included, the decrease is quite general for the higher priced lines. These price cuts cover locks, door sets, and some lines of butts, in brass, bronze and steel. Other lines in porcelain and jet knobs are not yet affected.

It is reported that present stocks in the various lines are fairly heavy, and that although current business is far from disappointing, the total volume of sales is falling short of expectation in certain quarters. Calculations for this season were based upon an extensive building revival, and the short-coming evident in the amount of new construction, both prospective and under way, are stated to have contributed in a considerable manner towards conditions now existing in these trades.

Whether such price reductions have arrived too late to materially affect this situation, or not, is problematical. It is pointed out, however, that with the new lower quotations now prevailing on these products, stimulated activity for the fall season is generally looked for, and dealers further state that prospects tend towards a brighter tone prevailing in future sales.

Recent price revisions recorded on compression goods, are also of interest in connection with the general tendency to reduce the cost of certain building materials. Increased discounts on eavestrough and conductor pipe were noted during May, and an increase in the current volume of sales has since been evident in these products. Similar reductions in corrugated sheet prices a few weeks ago stimulated the movement in this line also. Many other changes to a lower price basis have recently been apparent affecting builders' hardware.

May Stimulate Activity

These and other recent price declines should bring about renewed trade activity, according to the opinion expressed by one of the leading eastern manufacturers when interviewed by Hardware and Metal, he also making the prediction that the more frequent replacement order by retailers has come to stay, and that the future will see improved co-operation between the manufacturing plant, or wholesale house, and the retail store.

"For some time past the idea has developed, among the public as well as throughout the trade, that the peak of high prices has not only been reached, but passed. Consequently, this brought about a feeling that reductions would be the order of the day, and that price declines could be looked for with more or less certainty", he stated.

"Whether this opinion was right or wrong, matters not. The primary reason to consider is, that we have been witnessing a gradual lowering of prices, especially during the current year, and it is not the unnatural expectation of many that the future will show further price reductions.

"How this will stimulate business is accounted for in this manner. As prices continued to range higher, purchases began to decrease in volume. In conjunction with the rumor of anticipated price revisions, merchants' orders were noticeably smaller and more or less frequent. This is the condition which exists to-day in the majority of lines. But in turn, the manufacturers have also been forced to purchase in lesser quantities, until small replacement orders have become usual and expected. Everyone has seemed to be holding off, pending price developments.

May Shed Hesitation

"With price adjustments on a reduced scale fast becoming evident, buyers of all grades can be looked for to shed their hesitation and make certain purchases, even if they are not as large as in former days, and in some cases covering immediate requirements only. The chief thing is that the buyers' confidence should be restored, and confidence is a vital factor.

"The period of trade adjustment through which we are passing is also likely to bring about a revised method of buying on the part of the retail merchant. Business conditions have forced quicker turnover, and smaller and more frequent purchases make this possible. Specialty sales, new and up-to-date methods of salesmanship, and the closer co-operation of manufacturers, and wholesalers with the retail trade, tend toward an increased volume of local trade, and the merchant can then afford to work on a closer profit margin.

Smaller Orders in Future

"We therefore look for sorting-up orders and smaller shipments in the future, for merchants generally have learned the lesson of the past few years and realize the advantages in this method of buying and in taking their cash discounts. Retail stocks will not be so heavy, not only because the current demand may be somewhat lighter, but also for the reason that the merchants will be striving for quicker turnover.

"Manufacturers who aim to build up a sound business reputation have adopted this policy with their customers. Of course there always is a certain class of manufacturers who will load up any merchant whenever the chance presents itself, but their percentage is getting smaller. Tactics of this description do not pay permanent dividends, for the good-will of the trade is a recognized factor in modern scientific business."

Effective Combinations in Display

Customers Dissatisfied With Purchase at Local Hardware Store Frequently Shun that Store in Future but not so with Departmental Stores—Garden Accessories and Paints Prove good Combination Prior to warm Week-Ends in Early Summer.

ANother hardware firm to prove the value of selling high grade paint is the Mathewson Hardware Ltd., Toronto. This firm has built up an active business in paints in a more or less business district, drawing custom from the residential district surrounding the business section.

Discussing various factors in paint selling, Mr. Mathewson stated to Hardware and Metal that in his trade he has found that a cheap grade of paint does not pay. He makes the point that even if a departmental store sells a low grade paint at a low price and it does not come up to the customer's expectation, the customer will still continue to deal with that departmental store for various requirements, but not so with the hardware store. As Mr. Mathewson states, once a customer has been disappointed in his or her purchase at the hardware store they frequently shun that store in future with the idea that the merchant is himself to blame for their purchase of cheap goods and thinking that if he would "put one over" them on that article he would do it on others.

This is an unfortunate condition for the retail hardware merchant, as occasionally unavoidable mistakes will be made and result in disappointment to the customer in the purchase, but, as Mr. Mathewson points out, it is therefore all the more necessary for the merchant to be constantly vigilant to see that his customers get what they require and that they are educated to the value of high class materials.

Seasonable Lines Featured Together.

In connection with Spring paint selling this firm makes frequent window displays, usually in conjunction with some other seasonable line such as is shown herewith. In addition, advantage was taken of a recent opportunity to link up with the special efforts of the representative of a certain paint company who canvassed the district adjacent to the Mathewson store and demonstrated to housewives, right in their homes, the value of paint and varnish as a preservative and a beautifier. This representative had color cards and other literature to press home his arguments, and he found that those called upon were only too glad to seek his advice as to how to go about fixing up woodwork, furniture, stoves, pipes, floors, etc. In many cases these various articles were badly in need of a coat of paint or varnish but had been neglected through oversight. Bringing the matter to the attention of those called upon and being there where it required little effort to be shown how to apply the needed preservative, this representative secured considerable business. A sample of furniture polish was left with each prospect.

Mr. Mathewson reports that many new customers have been won for the store through this effort, and this means a help to the sale not only of paints and varnishes, but of other lines which these customers will constantly be requiring from the hardware store. Mr. Mathewson has found that once a prospect has been introduced to the inside of a certain store, providing they secure courteous attention and are satisfied as to price and quality of goods purchased, it will not be nearly so difficult a job to get that purchaser back to the store on subsequent occasions.

Brings New Customers.

Another result of this special effort was the bringing to the store of customers from a radius formerly looked upon as outside the logical field of business for this store. This further shows the value of individual effort on the prospects at their homes, and is a point to which the hardware merchant can give attention with profit. Recent cartoons have been appearing in some papers comparing the merchant who sits in his store and waits for business to come to him, with the one who gets out and hustles. Recent years have been such as to bring a share of business to the former merchant, but things have changed and it is only the latter merchant who is getting anywhere a normal amount of business. The experience of the Mathewson Hardware Co. proves the force of this statement and also shows that the merchant can greatly help a return to normal trading conditions who goes out to his customers if they will not come to him.

This firm reports paint trade developing well this season, with lower prices helping considerably to speed the turnover. Considerable shelf room is devoted to the paint display in this store. Mr. Mathewson drew the attention of the representative of Hardware and Metal to the shelves which, about 4 p.m. presented a very ragged appearance, these shelves having been filled completely in the morning of the same day.

PUBLISHING UNDER STRIKE CONDITIONS.

Since the issue of June 4, Hardware and Metal has been published under strike conditions, the printers and allied trades having made demands for less hours and an increase in wages which this and other publishing firms considered impossible and entirely foreign to the present tendency toward lower prices and decreased costs. We would therefore ask the temporary indulgence of our readers, if this issue is a little late. Complete service on news, trade features, market reports etc., is being continued as usual and plans are being perfected whereby regular date of publication is expected to be resumed very shortly, irrepective of those on strike.

Paints and garden accessories provide a good combination for sales just prior to warm week-ends early in the summer, according to the experience of Mathewson Hardware Ltd. Toronto. Hence the two lines are featured simultaneously as shown herewith and they get a good share of attention during this season. In the paint display, there is a sample of a board partly covered with paint. This reveals the surface saving and preservative qualities of paint. Brushes are also prominently featured throughout. In the garden accessory window are seen seeds and planting tools, sprinklers, lawn mowers, poultry netting, rakes, shovels, shears etc.

Paint for Repair Work.

While new building is being done to some extent in the district in which this store is located, Mr. Mathewson stated that this had helped sales of builders' hardware to some extent, but had had little effect on paint trade. Practically all the paint being sold is for repair work on properties.

Mr. Mathewson believes in setting a good example himself and has recently had all the shelving and wall display drawers painted. These are done in grey and blue and with samples of various lines of shelf hardware affixed to the exteriors of the drawers it presents a very neat appearance. Realizing the value of displaying brushes to best advantage, this firm contemplates removing the brush stock from the drawers in which they have been classified according to price, and arranging them in a glass display case in the paint section where they will receive the attention of paint purchasers.

It will be noted that a display of garden tools and accessories is shown in the other window. These two lines have been found to go well together and especially just prior to a week-end, great activity results from such displays, and from the advertisements used in the local newspaper.

Turpentine and Linseed Oil Feature Markets

BOTH turpentine and linseed oil continue to feature the price changes occurring in the paint markets.

Linseed oil quotations have been firming up for several weeks, the flax seed situation being one of the principal contributory factors. In addition to the increase of 10 cents per bushel in the tax provided by the United States Emergency tariff on imports of Canadian seed, current crop reports indicate that less flax seed will be harvested this season than was available last year. Due to the recent increase in the cost of seed, the linseed oil market is now very firm. It is reported that these conditions contain the possibility of future price increases, but much depends upon the prevailing demand. Under the conditions outlined, and with a firm demand for linseed oil continuing, quotations might stiffen considerably. But should the current movement in oil slacken to any marked extent, then any such decline in business offers the inclination to shade prices a little, and chiefly, at least, to offset further increases.

Dealers generally quote business as good under present circumstances, but state that it is too early to offer predictions as to the future market activity although the tendency in linseed oil prices is at present on a steady upward trend, based upon flax seed and prevailing market conditions.

Turpentine Price Fluctuates.

Following price increases extending over a period of several weeks, turpentine quotations have now fluctuated with a drop of eight cents per gallon. The recent rapid rise in prices is stated to have been carried to extravagant dimensions, and reaction was looked for in several quarters. The market tone has been reported easier during the last two weeks, and the arrival of fresh supplies has relieved the pressure on local stocks.

Foreign buying, which created a firmer demand, coupled with the manipulation on southern markets of reserve stocks of old season's spirits, are presumably the chief causes for recent price variations. Current stocks were depleted, due to dealers being adverse to purchase heavily on the rising market, and while this condition has now been relieved, little surplus supplies are evident. The principle of small replacement orders is prevalent throughout the trade, even the larger buyers reported as only ordering between 25 and 50 per cent. of normal supply for the current season.

Sask. R.M.A. Draws Record Crowd

Eighth Annual Meeting of the Association Is Marked by Much Enthusiasm, and Timely, Interesting Addresses—One Hundred Per Cent of the Merchants in Saskatchewan Have Weathered the Storm of Business Depression—The President's Address

By Staff Correspondent

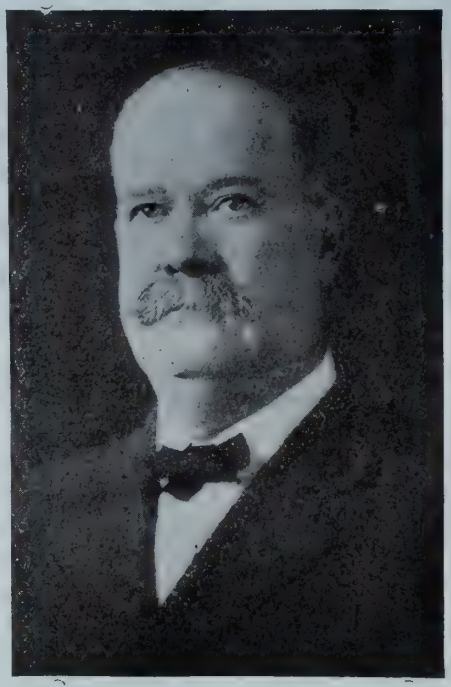
SASKATOON, June 20.—The eighth annual convention of the Saskatchewan Provincial Branch of the Retail Merchants' Association of Canada was called to order at 10 o'clock, Tuesday, June 14, in the Byers-Butler Hall, Saskatoon.

S. D. McMicken, Provincial President, was in the chair, and in excellent form. The delegates at the morning session exceeded in numbers any convention record to date, and they continued to roll in all day from the furthermost corners of the great Province of Saskatchewan. Many more arrived for the trade section meetings which occupied the whole of Wednesday, June 15th.

The Mayor's Welcome.

His Worship, the Mayor of Saskatoon, Dr. A. MacG. Young, tendered a most hearty welcome to the visitors, which was further amplified by Harley Henry, president of the Saskatoon Chamber of Commerce. G. Garfield Wray, boot and shoe merchant of Regina, replied to the kindly addresses of welcome.

In his address of welcome, Mayor Young showed a remarkable degree of familiarity with merchandising. He made an expert analysis of past and present market conditions, mentioning that the merchants were not alone when they faced a "buyer's" market, as the municipalities found they were in the identical position when they stepped out to sell their debentures.



"Considering the troublous time we have been through," said his worship, "Saskatchewan municipalities have made a surprisingly good showing, although in two or three instances municipalities had defaulted in their bonds. This merely should give a lesson to all merchants, many of whom are also municipal officers, to play the safe game in municipal finance as they did in their own business. and I urge you," said the doctor, "to accept such municipal office as the electors will give you. You owe a duty to the country to accept the highest responsibility of citizenship."

Sask. Merchants Weather Storm.

Mr. Henry mentioned that in Saskatchewan almost 100 per cent. of the merchants had managed to weather the storm, and by the look of the crops, there would be smooth water ahead for them. "The watch and wait policy has been played now as far as it pays to do it. The new watchword for you merchants and for us all to 'go get 'em' "

The President's Remarks.

The president's address was a modest one. Mr. McMicken stated that he knew that the secretary had covered

S. D. McMICKEN
of Moose Jaw, who presided at all the meetings of the Saskatchewan R. M. A. convention.

everything pertaining to Saskatchewan and the Dominion President, J. A. Banfield, would report Dominion progress. Therefore he contented himself with a few remarks from brief notes.

Mr. McMicken suffered a most severe loss by fire in Moose Jaw within recent weeks and he has a gang of thirty workmen building him a new store, "and there's only one thing on earth that could have pried me away from superintending that work," said the president, "and that is the work of the R. M. A." Mr. McMicken mentioned that nine executive sessions had been held, two sessions with the Government, one with the wholesale grocers, and one with the Board of Commerce. He spoke most enthusiastically about the spirit of fairness with which the wholesale grocers joined the organized retailers towards settling various contentious points, also the increasing disposition on the part of the Government of Saskatchewan to lend a sympathetic and attentive ear to any suggestions from the Retail Merchants' Association. The president states that an effort is being made to bring the retailers in the four Western Provinces and the Wholesale Grocers' Guild covering the same territory into closer harmony. Great progress along these lines has been made.

Secretary's Report.

The secretary's report certainly proves that the past year was a history-maker in the annals of Saskatchewan Association work.

The secretary, F. E. Raymond, received a most flattering ovation when he took the floor.

"In connection with the matter of making the work of the association more widely known it is my hope during the coming year to be able to arrange for meetings at different points throughout the province, to which merchants from the adjoining towns would be invited, these meetings to be addressed by different members of the executive, and such other speakers as we are able to provide for, from time to time," said the secretary of the Saskatchewan R. M. A. in his report to the annual convention.

"As in the case of the Luxury Tax the provincial office has had a vast amount of work to do in furnishing information regarding the application of the Sales Tax and in acting as a third party in the settlement of disputes between our members and some supply houses, who through a misunderstanding of the regulations had assessed the tax in error, or had perhaps charged an excessive amount. We have also been the means of adjusting to the entire satisfaction of all concerned a number of disputes which some of our members have had with the department at Ottawa, regarding the application of the Sales Tax.

Meetings of the Year.

During the year eight provincial executive meetings have been held. On June 11th, the day following the close of our convention, the executive proceeded to Regina for the purpose among other things of meeting the Government ministers.

Discontinue Branch Offices

Another important step taken at this meeting was the decision to discontinue the district branch movement and to close the offices at Assiniboia and Kerrobert.

This form of organization had been closely watched up to this time and everything possible was done to make it the success that we had hoped for, but we were doomed to disappointment.

Our gross loss in the operation of the Assiniboia branch was $2,464.89.

In the case of Kerrobert which branch was started in January, 1920, our gross loss was $2,347.48. It was estimated that for the coming year the cost of carrying on this work would in the case of each branch amount to approximately $4,500.00, which would mean 180 district members paying a fee of $25. As we had been carrying on in the Assiniboia district since June, 1919, and as our membership at the time the branch was closed was only 70, we could not see much hope of realizing the necessary amount. I feel convinced that if it had been possible to make this plan of organization a success, the two men we had employed would have done so.

Wholesalers Meet Retailers.

Another meeting of very considerable importance to the grocery trade not only of this province, but of all three prairie provinces at least, was held in the Board of Trade Rooms, Regina, on April 12th. Upon this occasion a committee representing the retail grocers, together with the remaining members of the provincial executive, met the representatives of the wholesale grocery houses operating in Saskatchewan.

This meeting was important both from the standpoint of results obtained and the fact that it was a step in the direction of closer co-operation between these two classes of business. A copy of the minutes of this meeting has been sent to the provincial secretaries for the Provinces of Manitoba and Alberta with a request that steps be taken to secure the endorsement of the wholesale houses there, although this is presumed to have already been given effect by the fact that the resolutions passed at Regina were endorsed by a meeting of the Prairie Provinces Wholesale Grocers' Association held in Winnipeg a week or two later. Another meeting to which all wholesale grocers selling in Saskatchewan have been invited regardless as to whether or not they have a house located here, has been arranged for in connection with this convention.

New Fire Insurance Organization.

One other important move made during the year was the arrangement entered into with the Northwestern Mutual Fire Association of Seattle, Washington, which company absorbed our own company, the Retail Merchants' Mutual Fire Insurance Company on December 1st, 1920. Under this arrangement all policies in force with the Retail Merchants' Mutual Fire Insurance Company were re-insured in the Northwestern Mutual from that date. On this business, as well as upon all new business written since, the Northwestern, through the Retail Merchants' Underwriters Agency, a purely Canadian institution, have allowed a dividend for the first 2 months of 35 per cent. and since that time 40 per cent. of the earned premium.

Praise For Organizers.

A large amount of credit is due to our two organizers, Mr. G. W. Anderson and Mr. W. L. McQuarrie for the efficient manner in which they carried on their work, which resulted in an increased membership, in spite of depressed conditions and an increased fee. Our membership at the close of 1919 was 1944 and at the close of 1920 it stood at 2,157, an increase of 213 for the year. Meetings were held in a large number of towns throughout their respective territories with good results and in a number of cases active local organizations have been formed, which give promise of good results to the local merchants.

VISIT GOVERNMENT FARM.

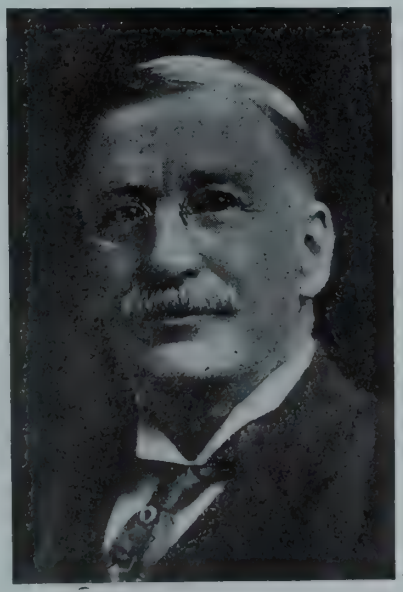
Following the luncheon hour, the delegates were guests of the local merchants and the United Commercial Travellers' Association in a delightful motor drive around the "miracle city." The Dominion Government Forestry Farm was visited, where Mr. McLean, the officer in charge, explained the Government's plan of assisting in the forestration of Saskatchewan and the beautifying of rural homes. Then the University of Saskatchewan was visited and an address was listened to in the new physics lecture room. The various departments of the University work were thrown on the screen and the delegates were instructed on the methods by which they could assist the Government to conquer field and garden pests and increase the prosperity of their neighborhood. Next the party visited the great plant of the "Quaker Oats" and "Quaker Flour Mills." Every process and operation was explained by well-informed guides..

"A New Line of Endeavor"

Following the drive, an excellent address was given by Dean Rutherford of the University of Saskatchewan on "A new line of endeavor for the Retail Merchant." Briefly Prof. Rutherford's address followed the past periods of Saskatchewan history, when Mr. McKay, at the Indian Head Experimental Station many years ago first introduced the present prairie summer fallow procedure to conserve moisture and ensure crops. As the grass roots and fibre of the soil were thus destroyed, the land was unbound and commenced to drift and blow. To-day the necessity is to grow binding crops of sweet clover, brome grass, and western rye which further means stock, not wheat. He urged the retailers to help their customers to sense the new stage that this prairie is now entering and get down to sure and profitable mixed farming instead of continuing to gamble on wheat, with lean years, extended credits and failure.

"A Great Victory for the Retailer"

J. A. Banfield, Dominion President of R. M. A., in Addressing the Saskatchewan Branch at Its Annual Meeting, Says that the Government Is Now Beginning to Recognize the Retailer—Some Things the Association Has Yet to Do



By Staff Correspondent

SASKATOON, June 20.—J. A. Banfield, the Dominion president, in addressing the meeting, traced briefly the history of the R. M. A. to date. What it had accomplished, what it was still fighting for, and the need for greater membership and keener interest.

"All legislation is of vital interest to the retailer," said the president. "Not a bill is put through the house that does not indirectly, and most often directly affect the retailer. No matter what the government does, it affects the consumer, and the retailer is the one immediately in contact with the public, so must bear the displeasure and suspicion, if any one must."

Recognizing the Retailer

At the same time Mr. Banfield pointed out that the Government is beginning to recognize the retailer as a factor to be reckoned with, and always one body that stands for anything fair and square. It is always in favor of anything that, as the president expressed it, "teeters," not all down on one end. The retailers are now called into conference by the government on matters concerning them. "The last budget," said the speaker, "is the retailer's budget. It agrees with the recommendation that we made to the government. It is fair, equitable, and efficient.

"J. A. BANFIELD"

President of the Dominion R. M. A., addressed the retail merchants of Saskatchewan at their annual convention on the work the Dominion Association is accomplishing.

When the retailers were called into conference along with the wholesalers, and manufacturers, we got the cold shoulder from the latter," said Mr. Banfield. "I met one manufacturer, who, when I asked him if he was going to the conference, smiled and said, No." Why, said he, we got a circular a month ago outlining what the manufacturers had decided to do. Notwithstanding which," smiled Mr. Banfield, "the retail counsel prevailed."

A VICTORY FOR THE ASSOCIATION.

"When the retailers said that the tax should be collected at the fountain head —and it was so decreed—that was a great victory for your association," said Mr. Banfield, "and after it was all over, Sir Henry Drayton thanked the association for the help it had given."

He commended the Ottawa merchants most highly, saying, "Whenever it has been necessary to have a delegation of merchants go at short notice before any body at Ottawa, the Ottawa merchants have responded most magnificently. We could have all we needed on 15 minutes' notice. They never spare themselves when association affairs can profit by their effort."

Mr. Banfield remarked that those white haired boys, those paragons of virtue whom the Board of Commerce

had occasionally uncovered; those who sold for cost plus on the rising market, or who through inefficiency had never managed to make a profit, where are they now?—down and out—on Bradstreets and Dunns' bankrupt list. They perished "unwept, unhonored, and unsung." The president touched on the turnover tax, saying that the government never had made provision for the retailer passing-on the tax, as was the case with the wholesaler and manufacturer. "How would you collect a turnover tax on a Greek restaurant, where the proprietor's hip pocket is his bank?" demanded the president.

Things Yet To Be Done

Among the things yet to be done Mr. Banfield mentioned an efficacious "fraudulent advertising act," one that would make the manager co-responsible with the proprietor for misrepresentation. The present act has been found weak in this respect. The trading stamp act is also in need of extension to include guessing contests, certificates and rebates. "The latter are a continuous uncertain outstanding liability," said the speaker. "Gambling is rampant. Three card monte and the like should be repressible by law."

The onus of responsibility in the case of adulteration, as of maple products should also be taken off the tradesman. All such produce as hay in bales, etc., should where practicable, bear the name of the producer. A department for scientific research should be authorized and organized at once. The subject of foreign purchases was touched upon.

Mr. McMicken humorously cited a recent case he had observed where an attractive card distributed by a manufacturer bearing the legend, "Buy in Canada," also bore the small note "Printed in Albany."

Parcel post rates also came in for the attention of the Dominion President. "It is a disgrace that letters must bear a portion of the expense of carrying the packages of your mail order competitor," said he. "Each department should stand on its own feet. It is unjust that any parcels should be carried in the post office at less than the actual cost of giving that service."

Pleads for Greater Membership

In pleading for greater membership the speaker said, "Don't under-estimate the value of the smallest dealer. You know that he who is not for you is against you. In a petition, the man with only a peanut stand, may cancel your vote—even though your business is in the hundreds of thousands. Get them all in with you. Every member get a member."

Swift Current Man Heads Sask. R.M.A.

Final day's session of the Sask. R. M. A. convention is marked by interesting discussion, passing of resolutions and the election of new officers—the new Bankruptcy Law is explained by Professor Arthur Moxon.

By Staff Correspondent

THE FINAL day's meetings of the convention were marked by addresses on the income tax, the bankruptcy act and a debate on merits of a cash business versus a credit business. A number of resolutions were passed, as well as new officers elected for the ensuing year. The convention will be held in Regina next year.

Income Tax Returns

Bert R. Masecar, official auditor of the Saskatchewan Board, stated that the questions in regard to the same, mostly centered round the difficulty of writing stock in a falling market. Profits, it was explained, were only cash profits. Whatever they put through their books as their turnover, they had got to treat as their sales. Amusing illustrations of the ways of the income tax authorities were given by the president, who had waited a whole year for a reply to a letter and then was fined $1,800 for not making his return, reduced to $10, all because he had not the information he was largely due to the intelligent efforts sought after.

New Bankruptcy Law

Professor Arthur Moxon gave an address on the bankruptcy law of Canada. The new act, he said, was "made in Winnipeg" and was probably one of the most admirably drawn pieces of legislation that had emanated from the Canadian parliament since Confederation. It was something lawyers tried to get for a number of years, and it of wholesalers and traders of Western Canada they had now their excellent legislation on the statute books. It was honestly and fairly designed to give to the commercial community exactly what the community wanted, not what the lawyers wanted. If statute was not satisfactory and did not do its work it was not because the lawyers interfered, but it was because the facts of business and the facts of human nature were too complicated to at once allow them to draft an act that would be humanly perfect.

Affects Status

The statute was going to be of very considerable importance to the wholesalers and retailers in the course of the next ten years, Prof. Moxon said. It was drawn fairly lucidly and carefully for a statute and would be in the hands of every intelligent merchant in the community, so that when the necessity came for doing the simple things required of the act, making claims in the assets of other people, etc., would show him just what his rights were without any necessity of referring to a solicitor or going to a solicitor and proving his claim. The act made a very important departure in their whole system of treating insolvency. He showed how the law affected the status of the individual. The man who had a receiving order of bankruptcy made against him involuntarily lost to a certain extent the status of an ordinary individual.

The Resolutions

Among the resolutions was one to instruct the secretary to supply Ottawa with a copy of the convention deliberations, for filing in the archives, and publishing if they thought desirable.

An attempt to add the chairmen of the trade sections to the Provincial Board was opposed by Mr. Morton, president of the Regina section.

A resolution, fathered by the Drug Section, complimented the government on the new narcotics act, stating that they realize that it is not aimed at the legitimate drug trades, but against pedlars, and pledges the drug trade to assist in every way to keep the spirit of the law and assist in its enforcement. (The Pharmaceutical Association in Saskatchewan has already obtained twenty-two convictions for infractions of the liquor act and are determined to maintain the high character of the profession.) A suggestion was attached to the resolution asking the Dominion Secretary to lend his assistance toward having the Government supply uniform forms for the entering of the data required by the act.

An effort was made to have piano salesmen excluded from the Hawkers' and Pedlars' Act, so that they would not be compelled to pay $100 Provincial license fee to travel around selling pianos. One speaker in favor of the exemption stated that the cost of breaking in and experimenting with green salesmen would be prohibitive and the license is non-transferable. A speaker against any exemption said that the travelling piano salesmen took business out of each district and brought nothing to the district, and that all reputable piano dealers already had local agents who contributed to the communities, etc. The resolution was defeated.

The omnipresent resolution favoring "Made in Canada" goods (in the abstract) was duly moved, seconded and passed unanimously. It would be a hardy soul, indeed who would rise to his feet and vote "nay." The discomforting thought is that in spite of such resolutions our people continue to pile up the adverse trade balance, having quite decided that having spoken patronizingly of the article of Canadian manufacture, it is then in order to patronize the foreign manufacturer.

Officers Elected

The new officers are:

President Jack Wood, men's furnishings, Swift Current, Sask.; First Vice-President, T. H. Masterson, Chevrolet dealer, Regina, Sask.; Second Vice-President, G. Garfield Wray, shoe merchant, Regina, Sask.; Treasurer, S. E. Fawcett, hardware and sporting goods dealer, Saskatoon; Honorable Secretary, Ralph Miller, men's furnishings, Prince Albert, Sask. Honorable Secretary, Ralph. Miller, men's furnishings, Prince Albert, Sask.; Permanent Secretary, F. E. Raymond, Saskatoon.

The whole convention was a tribute to the good work done by the Saskatchewan Board Staff, the trade section meetings entailing an enormous amount of work and organization ability. Mr. Raymond had able assistance from his assistant, H. J. Beveridge; H. T. Pizzey, secretary of the Implement and Auto Sections; F. L. Phillips, collection department; F. E. Bellow, accountant; Miss E. Evans, insurance; R. B. Evans, publicity; Charles Woodman, traffic, and the two genial organizers, W. L. McQuarrie, who serves the North, and George W. Anderson, who serves the merchants in the South half of Saskatchewan.

Want Better Margin on Oil

Hardware Merchant Delegates to Convention of Saskatchewan Board—R.M.A. Object to Oil Companies Selling Direct to Farmers at Two Cents Per Gall. Less Than to Retailers—Want Better Terms on Lubricating Oils and Greases.

SASKATOON, Sask.—The system under which the 8th annual convention of the Saskatchewan Board Retail Merchant's Association held their convention proved to be most satisfactory to everybody.

While the hardware merchants are intensely sympathetic to the other branches of retail trade, they could not be expected to take the same keen interest in the details of their troubles that they do in their own. So after Tuesday's enthusiastic joint session, the hardware dealers' section met in the Meighan, McCrum show room in Saskatoon for a strictly hardware discussion.

Endorse Explosives Legislation.

Geo. Morrison of Moose Jaw, presided, and the meeting got down to cases at once. This time it was cases of ammunition, and all the delegates expressed themselves as well pleased with the new explosives regulations which permit the sale of firearms to foreigners on a permit from the police. Permit also of the storage of ammunition in an ordinary store, as before the war.

Leonard Paul, Western Manager, Brandram-Henderson, Ltd., addressed the retail hardware men on the paint-up, clean-up, and "Save the Surface" campaign, explaining the national movement towards the encouragement of beautification and preservation through the medium of paint. The dealers were urged to cash in to the fullest extent with the big movement. To link up with the big advertisements and to borrow prestige from the big ones creating it. The speaker particularly mentioned Edmonton for the signal success that had attended the co-operative work of manufacturers, wholesalers and dealers in that market. He urged the dealer in every town in Saskatchewan to lend the same support to achieve the same success.

Selling Oil to Farmers.

Representatives of the various oil companies were invited to attend this session, and they were on hand. The dealers frankly stated why they considered that there should be a two cent spread between the price charged the dealer for gasoline and the price at which the refiners are selling direct to the farmers.

A. R. Smith, while stating that the sales policy of the Saskatchewan branches was dictated from Toronto, ventured the opinion that they considered that by granting the farmer more favorable prices, the oil companies were helping to develop this great Canada of ours, the granary of the world, etc., etc.

A. A. Willard, speaking for the British American Oil Company, corroborated, and also explained that the scarcity and cost of supplying drums was the reason why the dealers were required to pay cash for gasoline, etc. The great thing, opined Mr. Willard, was to get farmers into the country, and there should be no discrimination against the farmer at this time. He did, however, suggest a committee to go into the matter of margins, with the head offices of the oil companies.

Not Worth the Trouble.

During the discussion the equity of the flat charge for gasoline and oil all over the province, regardless of cost of freight haul, was questioned. Several hardware dealers expressed the opinion that the handling of gasoline and coal oil was not worth their trouble.

The question of a better margin on gasoline was left over for the present, but the question of obtaining better terms from the oil companies on lubricating oils and greases is going to be pushed for action.

Active Fall Campaign for "Save the Surface"

Extensive Campaign Planned for Fall Months. Spring Trade Well up to Expectations.

THE seasonable Spring demand for paints, paint specialties and varnishes is said to have been well up to expectations of the paint manufacturers; April, May, and up to the middle of the present month having proved a very active period in the industry.

While some of the volume of business may be accounted for by the curtailment of buying on the part of dealers in the earlier months, the general impression is that the "Save the Surface" Campaign, by educating the public and the merchants in the value of the use of paint and varnish, is an important factor in bringing about this activity. Outside points, as well as the larger buying centres, are said to be coming under the influence of the campaign, and are taking advantage of the selling opportunities it encourages.

A meeting of the Committee has been held for a preliminary consideration of the Fall campaign, and it was decided to conduct this with the same activity and enthusiasm that has been given to the Spring painting season.

The finances are said to be in excellent condition to permit of this, and still further co-operation on the part of the hardware and paint dealers generally is looked forward to by the Committee. With this co-operation it is felt the effect of this national co-operative advertising will be felt by everyone interested in the business, to say nothing of the satisfaction felt by the consumer who realizes the truth of the message being conveyed.

WESTERN NOTES.

Whyte and Orr's hardware store at Daysland, Alberta, has been greatly improved during the past week with a coat of paint.

The W. E. Lord Co., Red Deer, Alberta, are making extensive improvements to their main store so that increased accommodation will be provided for the hardware and other departments. The firm is also enlarging its warehouse for hardware. This warehouse will be extended and made 25 feet by 25 feet, one storey high. The foundation will be of concrete while the walls will be made of brick. The interior of the building will be greatly improved and a fine show room provided.

The hardware store of Messrs. Fyffe and Park, Swift Current, Sask., was badly damaged by fire recently. The loss is estimated at $20,000 according to the report and is covered by insurance. The fire is supposed to have been caused by defective wiring.

WEAKENING STEEL MARKET.

THE weakness of the steel market is likely to be accentuated by the fact that a hang-over from the war of some 300,000 tons of finished steel, chiefly plates and shapes, is to be put on the market by the U. S. shipping board. It is also interesting to note that adding to the material coming on the market from consumers is the return of the United States of considerable quantities of steel, small tools, hardware and building equipment. These supplies were sold two years ago at a job lot price by the U. S. to the Government of France, with little thought given to the possibility of their return. Prices are now much below those prevailing on most of this material, in the case of tools being about one-third below the domestic price. The mills are still operating at a small percentage of capacity and meanwhile the process of cleaning up all accumulated rolled products is going on. It is expected that shortly there will be the greatest scarcity of steel stocks that has been experienced for some years.

BRITISH LETTER RATE TO CANADA

THE British letter rate to Canada has been doubled, being now 4c. instead of 2c. There was a proposal to increase the postal rates on business and trade and technical newspapers sent to Canada, but the Government after looking into the matter decided not to do so and when the announcement to that effect was made in the British House of Commons on June 9th it was, according to cables appearing in Canadian newspapers, greeted with tremendous applause. The Postmaster-General pointed out that even the leading daily newspapers in Great Britain opposed any increase even of rates and technical and trade newspapers because **it would hamper British spirit and enterprise overseas as compared with the United States and Germany and would retard the recovery of British export trade.**

Sir Geo. Foster said that the British Trade Commission, of which he was a member had found, chiefly on the evidence submitted to them in Australia, that the reason German manufacturers had secured such a powerful and increasing hold on the Australian market was their persistency in salesmanship. Sir George did not get the whole story, or, if he did, he failed to apply it. That salesmanship was spoken and written. The way for German salesmen was prepared in advance. Their advertising in the business newspapers—printed in English sometimes—preceded their salesmen for two or three years and it came to the desks of their customers weekly or monthly to supplement the calls of their salesmen—to work for them while their salesmen were not there. Germans were much better and more persistent advertisers than British in the Canadian field before the war.

STEERING A NARROW COURSE.

THERE is little doubt but that the present retail policy of curtailing stocks is one to be followed under present circumstances, but while following this plan, the merchant should not overlook the fact that there is the other possibility by adhering too strictly to it, namely, that of losing possible business by being unable to give customers satisfactory service. Restricting the selection of goods, has been found by some merchants to definitely reduce the volume of turnover for the reason given, and when this condition is reflected throughout all retail stores, it is bound to have substantial proportions as regards its effect upon general business.

The solution is not only a question of maintaining stocks, but of keeping in close touch with wholesalers and manufacturers so that supplies can be secured readily, and so that helpful suggestions from customers can be conveyed to these branches of trade. Without a fairly complete range of goods, the customer's desire for selection and comparison is not only curtailed, but the retailer's natural ability for selling is hindered. A narrow course must therefore be followed to secure the advantages and evade the evils of the policy laid down.

GOOD FROM EVIL.

THE policy adopted of late by retail merchants, namely, that of buying in smaller quantities but more frequently, in order to avoid the pitfalls of having large stocks on hand in a declining market, has brought to light some new angles on retail merchandising, and there are those who think that many of the good points of this system of buying might well be incorporated as part of the permanent buying policy of retail merchants. Quicker turnover has been forced upon merchants by present conditions. After years of active selling at good prices, the merchants found that a negligent tendency had crept into his system and that the shelves were in some cases cluttered up with much dead stock, bought without due consideration of local requirements. Under the new plan this wastefulnesss has ceased and every piece of stock is bought with an eye to quickly turning it over in order to curtail overhead charges against each sale and so give the customer the best possible price. Here lies one of the chief advantages of the present condition: it has taught th merchant that he must return to an efficient basis of merchandising. Specialty sales, new methods of salesmanship and closer co-operation with the manufacturer and wholesaler are factors which have developed under the present condition.

The general result of all this adjustment, taking into consideration the advantages enumerated, may possibly lead in future to smaller orders placed more frequently, and an increasing number of sorting up orders.

Working on a closer basis, due to decreased costs, retailers will be able to give the best prices to customers and so encourage a larger volume of business.

It is noteworthy that while there are some wholesalers and manufacturers who still follow the policy of loading up the retailer wherever possible, that the wholesalers and manufacturers who are establishing a sound business reputation with the retail trade to-day are those who are encouraging the merchants to adopt the policy outlined and who are co-operating with the retailer to the greatest possible extent, having in mind the fact that retail conditions practically govern conditions in their own branches of trade.

If the recent trade condition has shown the value of such co-operation and re-introduced more efficient methods then some of its evil effects may have brought their rewards.

Events in the Trade

BUSINESS CHANGES

Toronto.—Cooke & Boulton, paint and varnish manufacturers have been succeeded by Geo. Cooke Co.

BUSINESS CHANGES

Blyth, Ont.—Colin Fingland has purchased the hardware business of Wm. Moore & Son.

BUSINESS CHANGES.

Galt, Ont.—The hardware business conducted by Alex. McKenzie has been purchased by John C. Bell and James T. Bell, who will take immediate possession and trade under the name of Bell Brothers. John C. Bell comes here from Milton, where he has been in business as a hardware merchant for the past six years, and his brother "Jim" is known locally having been a salesman in one of the Galt hardware stores.

NEW FIRMS

Hamilton, Ont.—Percy Price has commenced business with an up-to-date store at 85 Kenilworth Ave.

(PERSONAL)

J. A. Brownlee of London, Ont., who has been seriously ill with an attack of heart trouble is making good progress toward recovery although he is still confined to the house.

Thomas H. Purdom Jr., of the Purdom Hardware, London, is receiving congratulations on the arrival of a daughter.

"Tom" Jones, President of the Cowan Hardware Co., who has been seriously ill in St. Josephs Hospital at London is making good progress toward recovery and was removed to his home this week. While at a banquet of the Kiwanis Club, Mr. Jones was stricken with paralysis, which affected his left side.

W. A. McLaren, hardware merchant at Hensall, Ont., attended the annual I.O.O.F. convention in Brantford as representative of Hensall Lodge.

OBITUARY.

Webster J. Virtue, for fifteen years, traveller for Sheet Metal Products Co., Toronto, throughout the province of Ontario, died at Bowmanville, Ont. at the age of 42 years.

After a long illness, the death occurred in Montreal of Augustus Converse, youngest son of the late John A. Converse, a founder of the cordage industry in Canada. The firm of John A. Converse Cordage Company was well known in the earlier days, and absorbed by the Consumers' Cordage Company in 1890. The late Mr. Converse, after completing his studies, entered the services of his father, upon whose retirement, he carried on the business until 1855. He then retired, his work being taken up by his son, W. B. Converse, who still remains a director of the Consumers' Cordage Company, Inspector St., Montreal.

OBITUARY

The death of George Beatty President of Beatty Bros. Ltd., Fergus, Ont. is announced. Mr. Beatty was born on a farm in Albany Township, 30 miles from Toronto, in the year 1846. He came to Fergus in the spring of the year 1874,

LATE GEORGE BEATTY

President Beatty Bros., Fergus, Ont., whose death is announced.

47 years ago and with his brother Mathew, who was a farmer, founded the manufacturing firm of Beatty Bros.

Mr. Geo. Beatty was a machinist, pattern-maker and inventor. He continued the business alone after 1886 in which year his brother Mathew died, until the year 1901 when he was joind by his sons W. G. Beatty and M. J. Beatty.

Mr. Beatty was interested in every department of the firm and until almost the week of his death took an active part in the sales, credit and financial departments, as well as in the various manufacturing interests of the business. His all-round experience, extraordinary ability and buoyant optimism have been of inestimable value in the development of the firm of Beatty Bros. Limited.

(OBITUARY)

A. A. Welsh passed away at his home in Gananoque this week. Mr. Welsh will be remembered by dealers throughout Western Ontario as representing Caverhill-Learmont Co., Montreal some years ago.

IDEAL ALUMINUM PRODUCTS CO. OPEN QUEBEC OFFICE.

Quebec.—Offices of the Ideal Aluminum Products Limited have now been opened in Montreal. J. De Lisle has been appointed Provincial Manager, and the new branch office is located at No. 16 St. James Street, Montreal.

NEW FIRM FOR HAMILTON, ONT.

The Canadian Horse Shoe Company, Ltd.., has received Dominion Charter and has established a plant at Hamilton, Ont. This firm represents the Canadian interests of the United States Horse Shoe Co., Erie, Pa., and will manufacture horse shoes in its own rolling mill at the above city, later extending its range of products. The company will be under Canadian direction, and while all the officers have not as yet been appointed, R. C. Melroy is one of those connected with the new firm.

LONDON HARDWARE ASSOCIATION MEETING.

London Ont.—At the regular meeting of the London Retail Hardware Dealers Association arrangements were completed for holding the big annual picnic at Port Stanley on August 7. As in former years the hardware merchants will travel to the lakeside in their own special hydro radial train and it is expected that about 1000 people will be in attendance. One of the finest, of the many fine programs arranged by the hardwaremen is being figured out and there will be something for everyone. General regret was expressed at the meeting over the serious illness of President Thomas Jones and J. A. Brownlee.

WESTERN ONTARIO NOTES.

J. A. Brownlee, hardware merchant at London, Ont., was this week awarded the roofing and sheet metal work for new $50,000 garage for the Car Owners Garage Co.

George Sills, hardware merchant at Seaforth, Ont. is now occupying his new store at the corner of Market and Main Sts., and has a much larger display space than in his former premises.

The Peter Smith Heater Company of Detroit has located a Canadian branch factory in the Walker Power Building at Walkerville, Ont., and has under consideration ,erecting a factory of its own later. The firm manufactures small heaters for street cars and other purposes.

J. R. Thompson has opened a shop in the Conklin Block, at Kinsgville, Ont., and will carry on a general sheet metal business and look after furnace repairs.

WHITE MOP WRINGER CO. OF CANADA OPENS IN PARIS, ONT.

The White Mop Wringer Co. of Canada is now making White Mop Wringers in its own factory at Paris, Ontario, meanwhile maintaining its office at Fultonville, N.Y.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

NUMEROUS outstanding revisions with a far-reaching effect on current hardware markets are noted in the price changes recorded this week. Sharp declines are shown on tarred roofings, felts and sheathings, and other price reductions of particular interest to the hardware and building trades alike are the new prices on certain lines of builders' hardware, including locks, door sets and butts, in brass, bronze and steel. The extent of this reduction is approximately 10 per cent. Other important changes cover black and galvanized, while bar iron is also lowered. These new prices follow the downward trend of quotations in steel mill circles. Axe prices are reduced on practically all qualities, and is in keeping with the lower range noted on many finished steel products. Reduced quotations are also recorded on cut and side lace leather, while agricultural wrenches, sheet zinc and solder are included in the lengthy list of price revisions. A further decline is shown in prices on gasoline, coal oil and paraffine, while due to accumulating stocks and little demand, scrap metal prices are now considerably lower. A weak tone is again evident in the ingot markets, with both copper and spelter being reduced. The tendency to downward price ranges is becoming more pronounced, and no increases are announced this week. The trading in spring lines has lessened, but summer activities are now at hand, with business in seasonable lines more satisfactory. Orders continue small and cover immediate requirements only. Because of this fact, collections now come forward more freely.

Montreal Markets

MONTREAL, June 23.—Featuring the hardware market this week are two very important price changes on lines affecting building trades, namely: builders' hardware, felts and sheathings. Makers of builders' hardware have announced a reduction of from 10 to 20 per cent. on their different lines of brass, bronze and plated hardware, while felts and sheathings are lowered appreciably, some grades more than others. Tarred roofing, two and three ply, also has lower quotations. Axes will now sell $1.00 per dozen less in practically all qualities, while lace leather, both cut and side, have new lower prices. Agricultural wrenches are reduced about 7 1-2 per cent.

In the heavier staple lines, sheets, both black and galvanized, show a slight reduction, but other lines such as iron and steel, corrugated sheets, pipes and fittings, are unchanged. Jobbing houses report that summer trading is now at hand, the spring activities having lessened considerably in the last two weeks, but state that business is quite satisfactory for the present season.

Builders' Hardware Reduced

Montreal.

Announcement is made by different leading manufacturers of builders' hardware that a reduction has been made on practically all their lines of brass, bronze and steel hardware, including locks, lock sets, butts, etc. Cheaper lines such as porcelain and jet knobs are not affected.

Lace Leather Reduced

Montreal.

New lower prices are quoted on both cut and side lace leather. Cut laces will cost $1.85 per pound, side, $1.60.

Axe Prices Reduced

Montreal.

Of interest to bookings for Fall delivery on axes comes the announcement of a reduction of $1.00 per dozen on practically all qualities of unhandled, with the exception of boys' axes.

Agricultural Wrenches Lower

Montreal.

The new prices on agricultural wrenches show a reduction of approximately 7½ per cent. on all sizes.

Tarred Roofing Prices Lowered

Montreal.

Tarred roofing in 2 and 3-ply is lowered in price, along with other lines of tarred felt. Two ply now sells for $1.93, three ply for $2.30 per roll.

Felts and Sheathings Decline

Montreal.

All grades of felts and sheathings, both dry and tarred are under decreased prices from this week. Reductions amount from 10 cents per roll of 400 feet, to $1.00 on the heavy white sheathing. Carpet felt is reduced 50 cents per 100 lbs. and is now selling at $6.00. Following are the new prices:

PAPER

	Per 400-ft. Roll. Montreal
Dry Fibre, No. 1 Anch	$ 1.35
Dry Fibre, No. 2 Anch	.85
Dry Fibre, No. 2 Elephant	.85
Tarred Fibre, No. 1 Anchor	1.45
Tarred Fibre, No. 2 Anchor	1.10
Elephant Brand, tarred, No. 2	1.10
Surprise Fibre	.95
Stag Sheathing	.95
Cyclone, dry	1.35
Cyclone, tarred	1.45
Empress Dry Sheathing	1.45
Joliette Sheathing	.85
Joliette tarred	1.10
[illegible]	Per 100 lbs.
Monarch Sheathing, white	5.75
Monarch Sheathing, gray	4.75
Straw Sheathing, heavy, dry	4.05
Red Star Brand Heavy Tarred Straw	4.25
Imp. White Sheathing	5.75
Imp. Gray Sheathing	4.75
Scythe Brand Dry Straw	4.05
Carpet Felt	6.00
Tarred Felt 7.10 and 16 oz.	4.85

Boiler Tubes Unchanged

Montreal.

No change is reported either in prices or sales of boiler tubes. Quotations remain at former figures, with the movement at present slow, confined to replacement work.

Zinc Sheet Prices Lowered

Montreal.

Zinc sheets offer the change in quotations on lead products, these now being quoted at 11½ cents in casks, and 12 cents in broken quantities. These reductions are said to be in sympathy with the recent weakness of the basic metal on the primary markets. Other lead products, while holding, now have a little weaker tendency than in previous weeks, due to the same cause. Local prices are the following:

Lead pipe	0 12½
Lead waste	0 13½
Note.—Lead pipe is subject to a discount of	10%
Couplings Lead traps and bends	10% off
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 11
Do., 3 to 3½ lbs. sq. ft. lb.	0 10¾
Do., 4 to 8 lbs.	0 10
Cut sheets ¼c. lb. extra and cut sheets to size, ¾c. lb. extra.	
Solder, guaranteed, lb	0 28½
Do., strickly, lb.	0 26½
Do., commercial, lb.	0 23½
Do., wiping, lb.	0 24¼
Do., wire, lb.	0 37½
Zinc sheets, casks	0 11½
Do., broken lots	0 12

Gasoline and Coal Oil Drop

Montreal.

Effective June 20th, prices on gasoline and coal oil were lowered 2 cents

per gallon. Quotations now ruling are 34 for motor grade gasoline, 39 for higher grade; coal oil 19½ cents.

Pipe Fittings Unchanged

Montreal.

Quotations on the different pipe fittings are unchanged, with the sales reported a little more brisk than in the past few weeks. Dealers are buying only in a sorting way, however, as orders are for small quantities.

Range Boilers Still at Lowered List

Montreal.

While it was expected that prices quoted a few quoted a few weeks ago on range boilers would be increased to higher levels in the near future, no change has been made up to the present. Resulting from a series of price-cutting, the new prices were issued in the hope of stabilizing the market, manufacturers claiming at the time they could not sell at present prices and retain a profit, and in all probability they would be raised the following week. Boilers, however, can still be bought at the following prices:

RANGE BOILERS—	Standard	Ex. Heavy
30 gallon	$ 8 75	$ 11 25
35 gallon	11 25	.....
40 gallon	13 50	16 00
52 gallon	20 00	.....
66 gallon	28 00	.....
82 gallon	35 00	.....
100 gallon	45 00	.....
120 gallon	54 00	.....

Slight Decrease in Prices On Sheets and Plates

Montreal.

A small decline in quotations on black and galvanized sheets has been made in sympathy with slightly lower levels being reached at the U. S. mills. While another series of price-cutting is hardly the state of affairs throughout the different fields, the smaller Independents reduced their prices to a slightly lower basis to obtain business and it is now reported the larger interests have fallen in line. This is not expected to continue, as manufacturers have learned that reduced prices do not stimulate business under present conditions, and the general opinion is that a revival in trade will have to come about before any great improvement is made. The demand locally is still backward, sales being of a small order for repair or replacement work. Following are present quotations still showing a range:

BLACK SHEETS—	
10 gauge	$ 5 00 to $6 00
12 gauge	5 05 to 6 05
14 gauge	5 35 to 6 35
16 gauge	5 45 to 6 45
18-20 gauge	5 80 to 6 80
22-24 gauge	5 85 to 6 85
26 gauge	6 00 to 7 00
28 gauge	6 10 to 7 10

Sheets 36 in. wide, 20c per 100 lbs. extra.

GALVANIZED SHEETS—	
U. S. Standard—	
10¾ oz.	8 00 to 9 00
28 gauge	7 50 to 8 50
26 gauge	7 25 to 8 25
22 and 24 gauge	7 00 to 8 00
20 gauge	6 75 to 7 75
18 gauge	6 75 to 7 75
16 gauge	6 75 to 7 75

ENGLISH STANDARD—	Queen's Head	Fleur-de-lis
28 gauge	$ 10 00	$ 9 25
26 gauge	9 75	9 00
24 gauge	9 15	8 60
22 gauge	8 80	8 15
18 and 20 gauge	8 10	8 00

Note.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken bundles. These quotations are nominal.

Iron and Steel Unchanged.

Montreal.

No change is made on bar iron and steel, and little change is expected while the present slackness in demand is prevailing. Prices from the U. S. mills have shown a slight reduction, but this has had no reflection locally as yet, and is not thought sufficient by local merchants to have the resulting lower prices. Local prices remain unchanged.

Quiet Markets in Ingots.

Montreal.

Ingot metal markets are still much depressed, with business more or less at a standstill. Present indications do not offer many signs of an improvement in the near future. Tin and copper continue to ease on English and American markets, while spelter and lead have steadied a little.

Toronto Markets

TORONTO, June 23.—Among the important price reductions noted in the current market reports is another decline of 2 cents per gallon on gasoline. This constitutes a pertinent item for many retail hardware merchants. Quotations on coal oil also decreased 2 1-2 cents per gallon, and paraffine prices are proportionately lower. Various grades of roofings, sheathing and felts, show price reductions averaging from 8 to 10 per cent., while axe quotations are also reduced to the extent of $1.00 per dozen base. Black and galvanized sheets have followed the downward tendency.

Some lines of inside and front door sets have lower prices, and reductions are looked for on cotton twines. Bar iron shows a reduction, with an increase reported in steel inquiries. Solder prices are lowered on all grades, wire solder being reduced 2 1-2 cents per lb. Range boiler quotations are still unsteady, with the 30-gallon size standard boiler now being nominally quoted at $8.75. Some further revisions on a lower price level are shown on radiator and gate valves. Sharp declines are also noted on scrap metal prices, while the weaker tone is again evident in the ingot metal markets.

Solder Prices Lowered

Toronto.

Recent fluctuations on the primary markets have resulted in an easier tone on lead products. The advance recorded a few weeks ago on solder prices has now been lowered through reductions noted this week. Wire solder shows the largest decline with 2½ cents per lb. and the price revisions on other grades vary from 1 to 2 cents. Following are the new quotations:

LEAD AND ZINC GOODS	
Lead pipe, list, per lb.	0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 8 in., list, per lb.	0 14½
Lead pipe is subject to a discount of	10%
Lead traps and bends	10%
Lead sheets, 4 to 6 lbs. sq. ft. in rolls, lb.	0 09½
Cut sheets, ½c. to ¾c. lb. extra and cut sheets to size 1c. lb. extra.	
Solder, wire, per lb.	0 33
Do., strictly, lb.	0 25
Do., commercial, lb.	0 22
Do., guaranteed, lb.	0 27
Do., wiping, lb.	0 21½
Zinc sheets, per lb.	0 13

Range Boiler Quotations Still Unsteady

Toronto.

No new understanding has yet been announced with regard to prices on range boilers, and the recent reductions are still holding. The local price for the 30-gallon standard boiler is now quoted at $8.75, and the quotations on the 35-gallon size are $9.50 and $13.80. The claim is still in evidence that present price levels are below actual value, and some future readjustment is looked for in certain quarters. Orders, however, are being taken at the following nominal prices:

RANGE BOILERS	Standard	Ex-Heavy
30 gallon	$ 8 75	$ 11 50
35 gallon	9 50	13 80
40 gallon	13 80	16 50
52 gallon	20 40	25 20
66 gallon	28 80	34 80
82 gallon	36 00	47 40
100 gallon	45 60	56 40
120 gallon	55 20	64 80
144 gallon	78 00	93 00

Valve Discount Revisions

Toronto.

Some further revisions are noted this week in the prevailing discounts on radiator and gate valves. The price reductions resulting from these changes, conform to the recent lower quotations recorded on other lines of compression work. Sales in these products are reported as just fair, and not up to expectations. The apparent decline in large construction operations which were contemplated and looked forward to this spring is attributed by some dealers as lessening a seasonable brick movement. The erection of small buildings, however, offers the opportunity for numerous small orders. Following are prevailing prices:

Compression work, standard	37%
Fuller work, standard	30%
Bath cocks, compression	29%
Do. Fuller	25%
Flatway stop and waste cocks, standard	40%
Roundaway stop and waste cocks, standard	34%
Brass steam cocks, standard	10%
Globe, angle and check valves, standard	5%
J. M. T.	20%
J. M. T. C	25%
J. M. T. Gate Valves	15%
Gate or straightway	16 10%
Jenkins Globe	10 10%
Radiator valves, standard	30%
Do., removable disc.	12%
BASIN COCKS	
No. 1 and 1. Fuller pattern	30%
Quick opening No. 3633	37%
Emco J. D. Valves	20%
Emco Check Valves	20%
Webber Gate Valves	20%

Eavestrough and Conductor Pipe Move Well

Toronto.

Manufacturers and distributors of conductor pipe, eavestrough and conductor elbows report a brisk movement in these products. Building activity on houses and numerous small structures, combined with seasonable weather conditions, have presented more opportunities for current sales. The prevailing quotations remain at the revised discounts recently announced.

Weaker Tendency on Copper and Brass

Toronto.

Large quantities of scrap copper and brass are reported to have flooded the current markets, and with very little outlet at present for this surplus, a corresponding depression in these metals is being experienced. Copper and brass tubing, sheets and rods, reflect this weaker tendency, and the recent lowered prices on these products are still being quoted.

Activity Reported in Corrugated Sheets

Toronto.

Activity is evident in corrugated sheets, and a fair seasonable movement is reported. Sales are of the small variety, but are more numerous. No change has been recorded in prices on corrugated, but dealers state that conditions have improved during recent weeks, and a more satisfactory tone now prevails.

Stove Orders Only Fair

Toronto.

Manufacturers report that ranges, cook stoves, and heaters of all kinds are moving fairly well. It is stated that the current demand cannot compare with the volume of sales recorded last year, but up to the present just correspond very well with the 1919 orders. Now that many new stove catalogues and descriptive booklets have been distributed to the trade, improved activity in this line is looked for during the next few weeks.

Fair Sales in Pipe Fittings

Toronto.

The recently recorded increase in the volume of sales in pipe fittings has now registered a slight falling off, according to reports received this week. It is stated that the movement is still fair, however, with current prices remaining unchanged.

Boiler Tube Sales Light

Toronto.

The revisions on prices of boiler tubes, which were looked for in some quarters, have failed to materialize up to the present. Current quotations are holding, but any developments are reported as being dependent upon future reduction in mill costs. Conditions remain unchanged, with the following prices in effect:

BOILER TUBES	Seamless	Lapweld
1 inch	$ 26 00	$.....
1¼ inch	27 25	.....
1½ inch	26 25	.....
1¾ inch	29 75	25 00
2 inch	29 25	22 00
2¼ inch	33 00	25 00
2½ inch	41 75	27 00
3 inch	49 25	35 00
3½ inch	63 50	40 00
4 inch	85 00	50 25

Pipe Outlook Improves

Toronto.

Some increase in the number of inquiries, combined with a firmer tone reported in foreign markets, has resulted in improving the current outlook for pipe. Local sales continue of a restricted nature, but increased building is looked for to create a more satisfactory tone in this market. Prices at present are being maintained at List No. 51.

Limited Market For Sheets and Plates

Toronto.

Following the general downward tendency of prices on sheets and plates in steel mill circles, local quotations on these products are also on a lower level. The large majority of the orders being handled, remain principally of the small variety, and the current market is limited. A considerable range is recorded in prices on certain gauges, but the following prices are generally quoted for fairly large purchases:

PLATES

10 gauge	$ 5 00 to $5 50
12 gauge	5 05 to 5 55
14 gauge	5 10 to 5 60
16 gauge	5 20 to 5 70

BLACK SHEETS

14 gauge	5 10 to 5 60
16 gauge	5 20 to 5 70
18-20 gauge	5 30 to 5 80
22-24 gauge	5 35 to 5 85
26 gauge	5 40 to 5 90
28 gauge	5 50 to 6 00

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 36 in. wide.

GALVANIZED SHEETS
Premier and Apollo

10¾ oz.	$ 7 90 $8 40
U. S. 28	7 50 8 00
U. S. 26	7 20 7 70
22 and 24	7 05 7 55
18 and 20	6 90 7 40
16	6 75 7 30
12 and 14	6 60 7 20

An extra 40c per 100 lbs. is charged for Keystone brand copper bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is from 20c to 30c per 100 pounds. Other gauges show no change for different widths.

Prices shown are full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Soil Pipe Sales Only Fair

Toronto.

Prices on soil pipe and fittings remain nominally unchanged. The movement in these products has recently registered some slight improvement, but sales are still reported slow, and not up to expectation for this season of the year.

Weaker Tone Evident In Ingot Metals

Toronto.

Announcement that the looked-for settlement in the British coal strike failed to materialize, made the current outlook unfavorable for metal demand on the outside markets. Prospects for increased domestic consumption are anything but promising at this time, it being reported that the situation abroad has a decided influence on both American and Canadian markets. A weaker tone is evident in ingot metals, and now that conditions are apparently headed towards a further decline, consumers are more inclined to refrain from the present markets. A decrease is noted of ½ cent on copper quotations, the price of 17½ now prevailing. Tin is quoted at 37 cents, and spelter has also dropped, the price of $7.00 now being general.

Gasoline Prices Lower

Toronto.

Gasoline prices recorded a further drop of two cents per gallon this week. The prevailing price is now 33 cents, and local sales are reported in a fairly steady volume. Crude oil prices have been slashed again, and this has been reflected on the general markets.

The current reduction is the third price decline recorded on gasoline during the last two months, but gasoline business has failed to show any real marked improvement, regardless of these recent cuts. It is reported that the touring element is not buying as heavily as was generally anticipated, with the result that in spite of favorable weather conditions, the consumption on the road this year is below expectations.

Distributors' stocks are stated as fairly large, but the possibility of gasoline shipments arriving from European centres, has a tendency to weaken the local markets. In view of some wage cutting in the producing areas, combined with the recent substantial drop in crude oil quotations, the opinion is expressed by keen observers of the situation that gasoline prices are subject to further declines in the future. Reductions have been expected in certain quarters and the present tendency is being watched with keen interest by the trade, in view of prevailing circumstances.

Coal Oil Quotations Down

Toronto.

A decrease of 2½ cents per gallon has been announced on current prices of coal oils. Royalite is now quoted at 18½ cents per gallon, and Palacine is priced at 21½ cents.

Roofing, Felts and Sheathings Show Price Reductions

Toronto.

Roofing felts and tarred paper and sheathing register reductions on a number of lines this week. The average decrease is between 8 and 10 per cent. on previous quotations covering the various grades of roofing materials showing a lower range.

Manufacturers report that present stocks are fairly heavy and that prevailing market conditions are forcing the liquidation of these stocks. It was further pointed out that raw material costs have been fairly well maintained, and that current price declines in roofings have resulted from the marked tendency to lower quotations on the majority of hardware commodities.

Distributors of these products state that present business is fair, and keeping well up to expectations for this period of the year. Prospects for an improvement in the fall season are reported bright, and with the new lower prices, stimulated activity is generally looked for. Following is a list showing the current revisions:

PAPER	Per 400-ft. roll Toronto
Dry Fibre, No. 1 Anch	$ 1 35
Do., No. 2 Anch	0 85
Do., No. 2 Elephant	0 95
Tarred Fibre, No. 1 Anchor	1 45

Axe Quotations Reduced

Toronto.

As forecasted in the report quoted in a recent issue of Hardware & Metal, a reduction in the prices on axes has now been announced. The extent of the current decline is $1.00 per dozen base.

Sharp Declines in Scrap Metal Prices

Toronto.

There have been sharp declines noted in the scrap metal price list. The market generally continues very dull, and prevailing conditions are reported as disappointing. Heavy melting steel shows a considerable decrease, and cast iron grades have been equally stagnant with price cuts noted on stove plate and on No. 1 cast. Lead scrap is easier with a lower range recorded, and other reductions are also noted on yellow brass and scrap pipe. The following revised prices are the average nominal quotations for fairly large quantities:

WASTE MATERIALS—		
No. 2 busheling	$	$11 00
Heavy melting steel, gross ton	11 00	12 00
R. Rd. wrought iron, No. 1, gr. ton	11 00	12 00
Scrap pipe, gr. ton	6 00	7 00
Stove plate, net ton	12 00	13 00
No. 1 machinery cast, net ton	17 00	18 00
Heavy, lead	4 25	4 50
Tea lead	2 25	2 50
Red brass		9 00
Yellow brass	6 00	7 00
Light brass	4 00	4 50
Heavy Copper	10 00	11 00
Scrap zinc	3 50	4 00
Old rubbers, boots and shoes	2 50	3 00
Lumberman's rubber boots	1 50	2 00
Auto tires	0 50	1 00
Solid tires	0 75	1 25

Paraffine Price Reduced

Toronto.

In keeping with the declines announced in the prices of gasoline and coal oil, Diamond paraffine is also lowered. The extent of the reduction is 2½ cents, and the new price is now 22½ cents per gallon.

Lower Quotations Looked For on Cotton Twines

Toronto.

Local prices on cotton twines are quoted as unsteady. Some lower revisions are anticipated in certain quarters, but no definite price adjustment has yet been made. A prediction that lower prices will prevail next week is also noted. The present tendency in this market is weaker.

The volume of sales in binder twine is now reported more satisfactory. Manufacturers and distributors state that rope and twines for harvest requirements are moving well, with prospects for fair seasonable business in these products.

Rope and cordage prices are generally well maintained at the advances recently reported. Sales are reported as keeping up to expectations for this season of the year.

Door Set Prices Lower

Toronto.

Reductions to the extent of approximately 10 per cent. are announced this week on the easier-priced lines of inside and front door sets.

Bar Iron Shows Reduction: More Steel Inquiries

Toronto.

The reduction of bar iron from $4.25 to $4.10, and some further seasonable inquiries, are the features of the steel market this week. The best period in inquiries is reported for some time past, but what proportion of business will result is difficult to estimate. The view is expressed in some quarters that these are merely intended to test out the current market tone, and the prevailing buying prices. Based on this general surface improvement, however, prospects are considered as a little brighter than they were a month or two ago, for it is stated as encouraging to receive inquiries in this volume after the recent months of steel depression.

On the other hand, the past week's business is described as another brief spurt, with a reaction expected as soon as current demands have been filled. Mill conditions are still very much varied. The average steel and iron quotations are noticeably a shade lower, but it is practically conceded that better prices could be secured on large orders, if there was a generous volume of business apparent. Every order can be said to be receiving treatment on its individual merits, with the basic quotations for small purchases, which still predominate. No marked development in steel business is anticipated for several weeks. Current prices are as follows:

STEEL AND IRON		
Mild Steel, 3-16 in.	$	4 10
Do. ¼ in. and heavier		3 75
Bar iron, 3-16 in.		4 10
Do., ¼in. and heavier		3 75
Angle base		4 00
Horseshoe iron		4 10
Tire Steel	$ 4 70	5 95
Band Steel 5-8 to 4 in.		4 50
Spring steel	10 75	12 75
Crucible cast sheet steel	30 00	35 00
Mining drill steel		23 00
Cast tool steel		20 00
Sleigh shoe steel	4 10	4 50
Norway iron		15 00
Toe caulk iron	5 40	6 40
Hoop steel		5 00

London Markets

LONDON, June 23.—Important price reductions noted this week cover enamelware, tinware, galvanized ware, nickel-plated ware, sheet iron ware and similar lines. The extent of the decrease is fairly substantial, varying from 20 to 25 per cent. Some grades of building paper, No. 2, plain and tarred fibre, also show reduced quotations, and new lower prices are noted on wrenches and alarm clocks.

Moderately good seasonable business continues. Various lines of summer goods are selling well, and many local merchants expect a very light carry over from this season's stocks. Collections are reported good.

Ware Prices Reduced.

London, Ont.

Substantial reductions are announced this week on many lines of enamelware, galvanized ware and other similar lines. Following are the new revised quotations:

ENAMELWARE	
White	40% off list
Canada	Net list
Imperial	25% off list
Scotch Grey	45% off list
TINWARE	
Stamped Plain	50% off list
Stamped Retinued	50-10% off list
Pieced, list plus	40%
Galvanized, list plus	20%
Sheet Iron, list plus	33 1-3 %

Alarm Clocks Reduced

London, Ont.

A slight reduction in the current prices on alarm clocks has been recorded this week. The extent of the decrease is approximately 5 per cent. New revised prices are as follows:

ALARM CLOCKS	
Big Ben, each	$ 3 75
Baby Ben, each	3 75
Lookout, each	2 05
Sleenmetre, each	2 25
Good Morning, Each	1 90

Wrench Prices Lower

London, Ont.

New lower prices have been announced this week on agricultural wrenches, and following are the revised quotations:

AGRICULTURAL WRENCHES	
Size 6 in., per dozen	$ 8 25
Size 8 in., per dozen	9 00
Size 10 in., per dozen	10 50
Size 12 in., per dozen	13 50
Size 15 in., per dozen	18 00

Building Papers Reduced.

London, Ont.

Reductions are now recorded on No. 2 plain and tarred fibre building papers. The new prices are: Plain paper D2, 85 cents per roll; tarred paper E2 $1.10 per roll.

Cotter Pin Prices Now Slightly Higher

London, Ont.

A new price showing a slightly higher range is now quoted on Campbell's assorted cotter pins. The revised quotation is $2.25 per dozen boxes.

Dry Arsenate of Lead

London, Ont.

Dry arsenate of lead is selling well at present, according to current reports. Prices are maintained as follows:

DRY ARSENATE OF LEAD	
½ lb. pkgs., per lb.	$ 0 46
1 lb. pkgs., per lb.,	0 44
5 lb. pkgs., per lb.	0 42
10 lb. pkgs., per lb.,	0 39
25 lb. drums, per lb.,	0 36
50 lb. drums, per lb.	0 34
100 lb. drums, per lb.,	0 32

Coaster Wagons Popular.

London, Ont.

Coaster wagons and auto wheel coasters are now selling well. Current prices are unchanged, and following are the prevailing quotations:

AUTO WHEEL COASTERS	
No. 00—Doz. List	$ 75 00
No. 01—Doz. List	116 00
No. 1—Doz. list	133 00
No. 2—Doz. List	145 00
No. 3—Doz. List	160 00
No. 4—Doz. List	182 00

Less 35-10%.

Weekly Paint Markets

MONTREAL

MONTREAL, June 23.—Turpentine showing an easier tendency, affords the only change in paint markets this week, quotations now being $1.05 in one barrel lots. Linseed oil is steady and unchanged, the flax market still showing slight fluctuations, but with little marked tendency either upward or downward at present. Shellac still has its firm undertone, but no change has been made locally in quotations. White lead in oil and putty are reported with strength although somewhat unsettled. Paints and varnishes are still moving in good quantity with no price changes made in any of the lines.

Turpentine Prices Easier

Montreal.

With a slight falling off of demand both in foreign and domestic markets, an easier tone is reported on turpentine and quotations locally are lowered 5 cents per gallon bringing the price down to $1.05 in one barrel lots. The months of July and August usually prove quiet months for turpentine, the Spring spurt ending usually in the month of June, and with the demand smaller in the summer months little improvement is expected. On the other hand changes of a drastic nature to lower prices are hardly expected, but the market is looked for to show slight fluctuations. Following are the present quotations:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	1 05
2 to 4 barrel lots	1 03
Broken lots	1 15

Linseed Oil Prices Hold

Montreal.

Linseed oil is holding at quotations of last week, namely 92 cents and 94 1-2 cents in one barrel lots, with the flax market continuing firm and still showing slight fluctuations. Price increases on oil of a few cents per gallon were anticipated in some quarters throughout the week but the close found them unchanged. The local demand is being well maintained although usually at the close of the present month a slight falling off is noticed. Dealers' stocks being low is a factor said to be stimulating sales at present. Unchanged prices for this week follow:

LINSEED OIL—	Raw	Boiled
1 to 2 barrels	0 92	0 94½
3 to 4 barrels	0 90	0 92½

Broken lots, add 10c. gal.

No Change in Shellac

Montreal.

No change is made in prices on either orange or white shellac, with the market tendencies remaining fairly firm. Stocks are fairly low for this season and manufacturers have had to recently buy on the present market of gum shellac, thus causing prices generally to stiffen, with a range in quotations noticeable among the different sources. Present quotations are as follows:

Orange shellac, in barrels, $4.00; in one gal. jugs, $4.30; white, in barrels, or 5 gal. jugs, $4.40; in one gal. jugs, $4.80.

White Lead Unchanged

Montreal.

White lead in oil prices are unchanged at $14.00 in five ton lots, $14.50 in one ton lots and $14.85 in less quantities. A somewhat unsettled feeling again exists in white lead in oil with the result that slightly lower prices are quoted for quantity buying. With pig lead and linseed oil at the present level, and the demand for lead being well maintained, the undertone might be stated as firm. However, from a selling point of view the market can hardly be said to be staple.

Putty Quiet But Steady

Montreal.

A steady market continues on putty, with the demand seasonably light. This is expected, however, as the summer months usually prove a quiet period for this product and little increased activity is looked for until the fall demand commences. Following are the unchanged prices:

Bulk barrels, 800 lbs.	$5.00	$5.25	$5.60
Bulk barrels, 800 lbs.	5 00	5 25	5 60
Bulk drums, 100 lbs.	6 00	6 25	6 60
Do., or tins, loose, 25 lbs.	6 25	6 50	6 85
Drums or tins cased 25 lbs.	7 00	7 25	7 60
1 lb. tins	9 75	10 00	10 35

Pure Linseed Oil Putty, $1.50 per 100 lbs., advance over above prices.

Paint Sales Good

Montreal.

With the end of the present month, the movement of paint, specialties and varnishes usually slackens; the demand falling off with the approach of hot weather. However, paint manufacturers report that sales are being well kept up this year, principally due no doubt to low dealers' stocks. Manufacturers have been kept very busy this season and if the paint buying on the part of merchants is continued well into July the method that they adopted in buying in small quantities and as the demand required, will prove beneficial to dealers and manufacturers alike. No price changes have been made in any of the lines.

TORONTO

TORONTO, June 23.—An easier tone in the turpentine situation with another decrease of 5 cents per gallon, is the feature of the weekly paint markets. This is the second reduction in the price of turpentine recorded in as many weeks.

Linseed oil prices are held at the recent advances, but some fluctuations have been noted in the price of flax seed. A firm recovery is looked for however, and a fair demand coupled with the absence of any surplus supplies, are quoted as the chief reasons for maintaining the current local quotations on linseed oil.

The glass situation is practically unchanged, with prices remaining steady and little new interest in prevailing conditions. Paint sales are still reported exceptionally brisk, with some manufacturers stating that the volume of business recorded last year is likely to be eclipsed.

Scarcity for shipment of shellac and shellac gum on the United States market, is quoted as developing the present strong undertone in current shellac conditions. No further revision of prices is recorded, however, the local quotations continuing to show a range.

Putty prices remain unchanged, with the tone of linseed oil holding the putty market considerably firmer than usual for this season of the year. The strong tendency in white lead has also been maintained, and the higher range on linseed is reflected in white lead in oil.

Turpentine Price Lower

Toronto.

The market for turpentine is again in an unsettled state. A further reduction has been announced this week, which brings the local price for one barrel lots down to $1.02 per gallon. This is 5 cents lower than the quotation last week, and registers the second decline noted during recent days, making a total decrease in the price on turpentine of 13 cents per gallon.

A weakened tendency is reported from southern markets, where stocks are now ample, due to the falling off in the foreign demand. It is pointed out that British interests are usually heavy purchases of turpentine, and recent shipments in this direction from the primary markets have shown a decided falling off, due to the adverse business conditions created by the prolonged English coal strike. Other reports indicate also that speculative activity in Europe has been curtailed, chiefly owing to the continental financial situation.

Coupled with the smaller consumption of turpentine abroad, production for the current year has been fairly large, especially crops in France and in the United States. While the domestic demand recently registered a decided spurt, this failed to last for any length of time. and the strong market tone soon faded. Now that immediate

Double Paint Business in Two Years

Complete and Well Assorted Stock Located at Store Entrance—Following up Paint Prospects—Farmers Quickly See Preservative Value of Paint.

THE fact that his paint sales have almost doubled in a couple of years in spite of the fact that he is located in a town of 4,500 and has seven competitors, leads J. C. Keyser, of the firm of Rutherford and Keyser, at Simcoe, Ontario, to believe that he is pursuing business bringing methods.

One cannot enter the store without discovering that the firm carries a stock of paints and varnishes of considerable size. The entire left hand side up at the front as one opens the door is filled with cans of paints. Right inside the door is an attractive display table containing paint literature and a showing of small cans and paint literature. Every couple of weeks during the seasons for painting, window displays are arranged. These are varied to include auto finishes as well as the materials required for homes, barns and other work.

Mailing List Helps.

"We have a mailing list on which there are more than 400 names" said Mr. Keyser to Hardware and Metal "and what is more important we keep it up-to-date and follow up all prospects closely. This has brought excellent results."

Keeping the paint department right up at the front of the store, Mr. Keyser believes, has been a big factor also in increasing his sales. People come to know involuntarily through seeing the paint so prominently displayed that whenever they want anything in that line they can get it at Rutherford & Keysers. The fact that they have seen the paint there sticks in their minds and comes to them when they think of buying. Of course this is only one feature of the matter. Good service in the way of helpful hints on the best paints required for their work, and timely information about the best ways of using the paints is another factor in building up good will.

Sells to Farmers

Simcoe is the centre of one of the most prosperous farming communities to be found in Western Ontario. In the district are scores of prosperous farmers who obtain ready money for various products which they ship in large quantities. In the district also are many growers of fruit and vegetables which they send into the Simcoe canning factory and turn over for cash. These people have nice homes and they believe in keeping them nice. Many of them own autos and they believe also in keeping them looking trim. In supplying these wants Keyser & Rutherford find good business and good profits and it is a source of satisfaction to them to see their trade in this and other departments expanding each year.

Appeals Strongly

A selling point that appeals strongly and quickly to most farmers is the damage and heavy loss that will result if buildings are not protected. In many cases the farmer has had ample evidence of the effects of neglecting woodwork and it is an easy matter to show him that such losses directly affect his pocket. This is a sensitive part, an especially sensitive part, with most farmers. They are as anxious to save money as anybody else, more anxious in most cases, and when it is shown to them clearly that painting means a real saving they buy. The farmers are nearly always in need of one or more brushes and by bringing up this matter and keeping the brushes out where they may be seen readily the firm sells a large number. If left to themselves many customers would choose the wrong brush for the work and Rutherford & Keyser find that it is good business to give information as to the best brushes to use.

The Brush Department

Making an Attractive Brush Display

Importance of Preventing Brush Stock From Appearing Shop-Worn—Making a Display Board—Replacing Samples so as to Give Display a Constant Snappy Appearance.

AMONG the different methods of displaying samples of paint and wall brushes, perhaps one of the most effrctive, where space does not permit using a display stand capable of carryng the full stock is, the display board, when all samples are wired or nailed to a painted or varnished panel or a wide board. The display may be neatly arranged as to sizes in round, oval and flat, also according to prices. With these placed near the paint department or hinged between shelving, easy access to the line of brushes carried is gained, and the sale of which in many cases accompanies a paint sale can be made with few extra steps.

There are other ways in which the public can be shown the stock of brushes carried, but whatever method is employed, care should be taken not to allow display or sample brushes to appear "shop worn" or become unsaleable through hanging all season on the board. More particularly does this apply to the better grade of brushes or the painters' tools. When the painter enters the store and asks for a brush, he is looking for a tool that is of first quality, and one that will stand almost perpetual using and does not want to be troubled with the bristles continually loosening and showing on the painted surface. He may be given one from stock, but what becomes of the sample? It has taken on an appearance that is not inviting to him and cannot be guarantteed that bristle will not come out, because it has been exposed too long. Eventually it is placed in the drawers at the end of the season or sold at a reduced figure.

Replace Samples.

To overcome this, sell the sample at regular periods, every three or four weeks. Thus also allowing your sample board to have a new and snappy appearance. Accomplish this by having a small hole bored through the brush handle and suspended on a steel pin driven into the board or panel. The price and number tag will always remain if gum label is glued directly under, so that all that is necessary is the drilling of new brush and it is unlikely, the painter or amateur will offer an objection to receiving a brush with a small hole in the handle.

Substituting will also prove profitable at the commemcement of next season in the early spring months, when samples have again to be shown. Rather than having the previous years display brush as an eye-sore, you can pick at random any brush in the box, they are all new and any one may be used.

Money-Saver for the Brush Department.

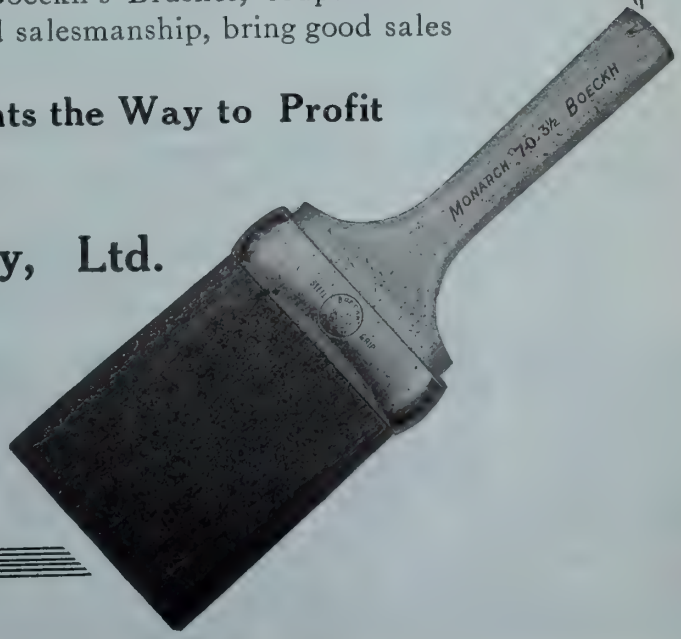
To the merchant who carries a stock of twenty-five different kinds of flat wall, oval, flat varnish and round, ash types, also from eight to ten varieties of kalsomine brushes, the estimated cost of his samples is in the neighbourhood of thirty-five or forty dollars. These figures or a good percentage of them ,are quite an item when having to be deducted from the net profits of the season's brush sales, caused by the depreciation of samples that are continually on display. Thus, while brushes are considered a very staple and profitable line to the hardware store, it might be much more so, if leakages such as this are avoided.

WESTERN NOTES

H. Manders of Melford, Sask., has accepted a position as manager of the Retlaw branch of the McGregor Hardware Company, Ltd.

L. A. Lee, who was traveller in the Peace River district for Wood Vallance and Adams, has accepted a position as manager of the McGregor Hardware Co. Ltd., at Travers, Alta.

W. D. Elias of Medicine Hat, has taken over the management of the new branch of the McGregor Hardware Co. Ltd., at Vauxhall.



BOECKH'S BRUSHES ARE RUBBER SET

And further strengthened by the powerful grip of well-made ferrules. The bristles cannot come out of Boeckh's Brushes. The bristles are the finest of selected boar bristles, carefully sorted and skilfully set, to make a perfect brush. Boeckh's Brushes are reliable, dependable,

And Fully Guaranteed

There is no risk for the merchant in handling Boeckh's Brushes. He is supported by the co-operation of the whole Boeckh organization. Good, striking displays of Boeckh's Brushes, coupled with the hardware merchant's ability and salesmanship, bring good sales and profitable repeat business.

Continued from poge 50

requirements are filled, prices have reacted towards easier levels, and this situation is reflected locally with prevailing lower quotations. Following are the current revisions:

TURPENTINE—	Per Imp. Gal.
1 barrel lots	$ 1 02
2 to 4 barrel lots	1 01
5 gallon lots	1 17

Paint Sales Brisk

Toronto.

Paint sales have shown a definite increase over last year's records, and are now more numerous than generally expected. Painting activity is in full swing. Manufacturers report that retail stocks are moving well, and replacement orders, representing immediate requirements, continue to keep distributors of paint products extremely busy.

Present conditions in the paint markets indicate that the end of the current season should see merchants' stocks in paints and varnishes at a very low ebb. There is a feeling reported among the trade that prices on the products have not reflected as great a decrease as has been apparent in the cost of the raw materials. In other words, further reductions are looked for in proportion to declines in production costs, and according to replacement values. This situation is indicated as one of the chief reasons for the surprisingly low stocks of paint products in th hands of retail merchants.

Manufacturers and distributors of paint and varnish, however, discredit such rumors, and state that current quotations on these lines should be well maintained throughout the season. They point out that the price lowering at the end of last year was followed by further declines early this spring, which brought paint prices down to a lower level than that evident in many other lines. It is claimed that paint, when compared with current reductions on other commodities, shows a greater proportionate decrease.

Construction activities, principally home building, show an increase for the month of May over the returns for April, and while this condition is evident, the prevailing volume of sales is expected to continue in a free movement of ready-mixed colors and finishes during the next few months.

Firm Tone in Shellac

Toronto.

The present strong undertone in the shellac situation is reported to have been caused through the scarcity for shipment of shellac and shellac gums on the United States markets. A brisk demand is apparent, and the increased price of gum, which has been reflected in recent higher quotations on shellac, have so far failed to restrict buyers.

The spurt of activity which enlivens the shellac market is stated as likely to again develop a quieter tone as soon as shortage of supplies is relieved, according to the opinion of local dealers. No predictions could be secured as to whether price adjustments would probably follow, but any future settlement is expected to be on slightly higher levels than those which prevailed during the early spring. A range is still noted in local current quotations, which remain unchanged as follows:

SHELLAC—	Pure White	Pure Orange
In bbls., per gal.	$ 4 25—4 50	$3 65—4 25
Gal. jugs, per gal.	4 75—5 00	4 15—4 75

Oil Prices Hold But Flax Seed Fluctuates

Toronto.

The flax seed market has shown a slight reaction from the strong tone apparent during recent weeks. According to reports from crushers, a decline was noted in the price of seed. Whether this tendency will weaken the current linseed oil prices, cannot be immediately determined, for the market is still admittedly of a bullish nature. An early price recovery on flax seed is reported due, the fluctuation being only of a temporary nature; and local distributors of linseed oil state that the prevailing oil quctations are expected to hold at the advance recently recorded.

Outside markets, however, have noted an easier level in linseed oil quotations, and it is reported that continued brisk sales have tended to maitain local prices, which follow:

LINSEED OIL—	Raw	Boiled
1 to 2 barrels, per gal.	$ 0 97	$1 00
3 to 5 barrels, per gal.	0 96	0 99
6 to 9 barrels, per gal.	0 94	0 97

Less barrels, add 15 cents per gal.

Glass Situation Steady

Toronto.

An easier tone is noted in the Belgian franc, this rate reclining with the recent fluctuations recorded in European exchanges. This situation, however, has not been extensive enough to affect the local replacement cost of glass, according to statements of manufacturers and distributors of both plate and window glass.

With the volume of sales still recorded as limited, there is practically no change noted in prevailing quotations. Some price declines are anticipated in the United States markets on common window glass, but local merchants point out that reductions in American glass would be principally for the purpose of meeting other manufacturers, and such changes should have practically no effect on the Canadian market, as current prices here are already on a lower level.

General Markets continued from page 49

Winnipeg Markets

Wire Prices Lowered

Winnipeg.

Price reductions have been announced this week on annealed and bright market wire. The revised quotations follow:

ANNEALED WIRE	
9 to 9	$ 5 65

½ bbls., per 100 lbs.	8 20
Barrels, per 100 lbs.	7 60

Stove Pipe Wire Lower

Winnipeg.

The price of stove pipe wire has been reduced this week, and the prevailing quotations are: No. 18, $9.30; No. 19, $9.80.

Soldering Coppers Reduced

Winnipeg.

Prices on soldering coppers have now been revised on a lower basis. Following are the new prevailing quotations:

SOLDERING COPPERS	
1 pound, per lb.	$ 0 51½
1½ lb., per lb.	0 47½
2 lb., per lb.	0 44
2½ lb., per lb.	0 43
3 lb., per lb.	0 41
3½ lb., per lb.	0 41
4 lbs. and over, per lb.	0 40

Rosin Quotation Revised

Winnipeg.

Quotations on rosin have now been reduced, and this product is now selling at 12 cents per lb. in barrel lots, and 13 cents per lb. in less quantities.

Reductions Shown on Range Boiler Prices

Winnipeg.

Prices on range boilers have been reduced again this week, and the following are the new revised quotations:

RANGE BOILERS Galvanized	
30 gallons	$ 10 00
35 gallons	13 25
40 gallons	16 25
52 gallons	23 50
66 gallons	32 75
82 gallons	40 00
100 gallons	50 00
120 gallons	60 00

Linseed Oil Steady

Winnipeg.

Current quotations on linseed oil are still holding at the increased prices announced last week. The average prices are $1.15 per gallon for raw, and $1.18 for boiled.

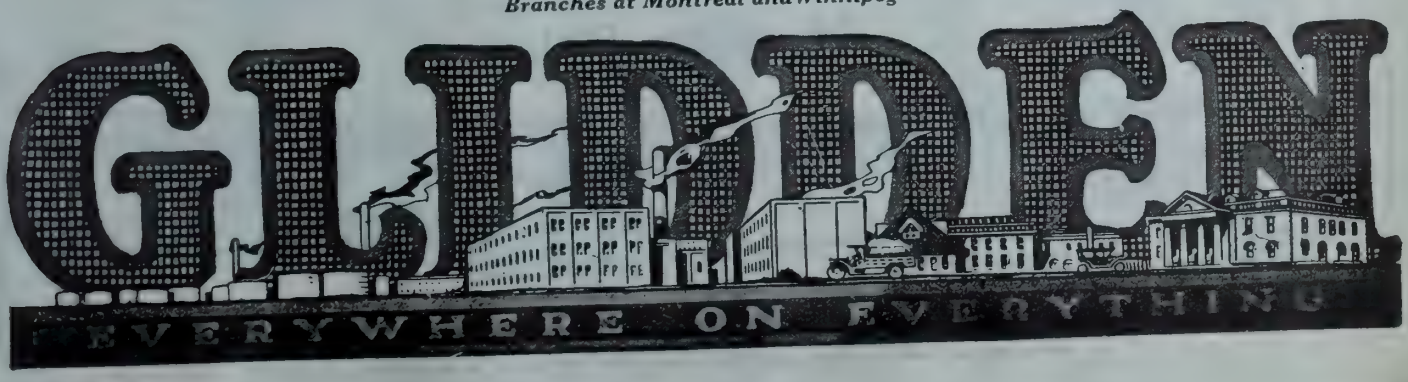
Turpentine Price Holds

Winnipeg.

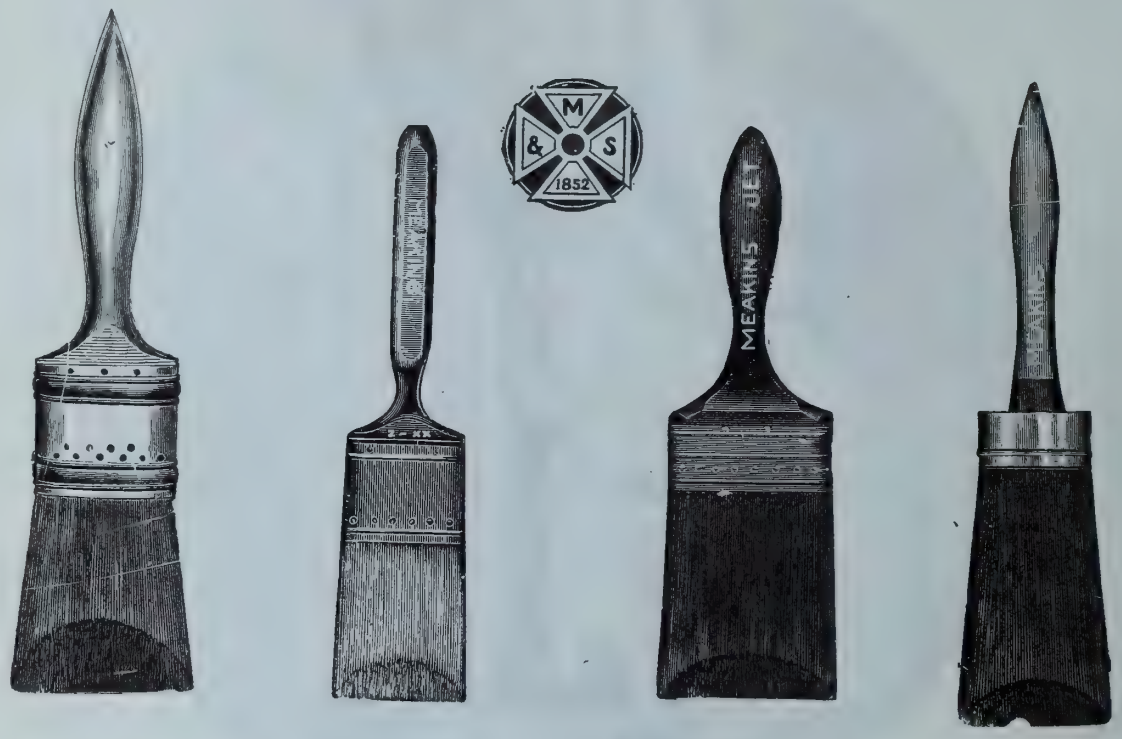
No change has been recorded in the price on turpentine. Some revisions on a lower basis were looked for in certain quarters, but the present price of $1.20 per gallon in barrel lots, has been maintained.

Get the Painter Business

Painter business is steady business. It represents volume—and volume means profit.



It's worth going after.



And worth holding, so go after it with Glidden products and Glidden quality will hold it.

Glidden is a reputable name throughout the Dominion. It is a synonym for good varnish. It is now known as a safe name for paints, enamels and every other kind of material the painter needs.

If you're really in earnest about the paint question we have a proposition that will prove of interest to you. Write for prices and plan.

RECOGNIZED STANDARD—SELL WELL

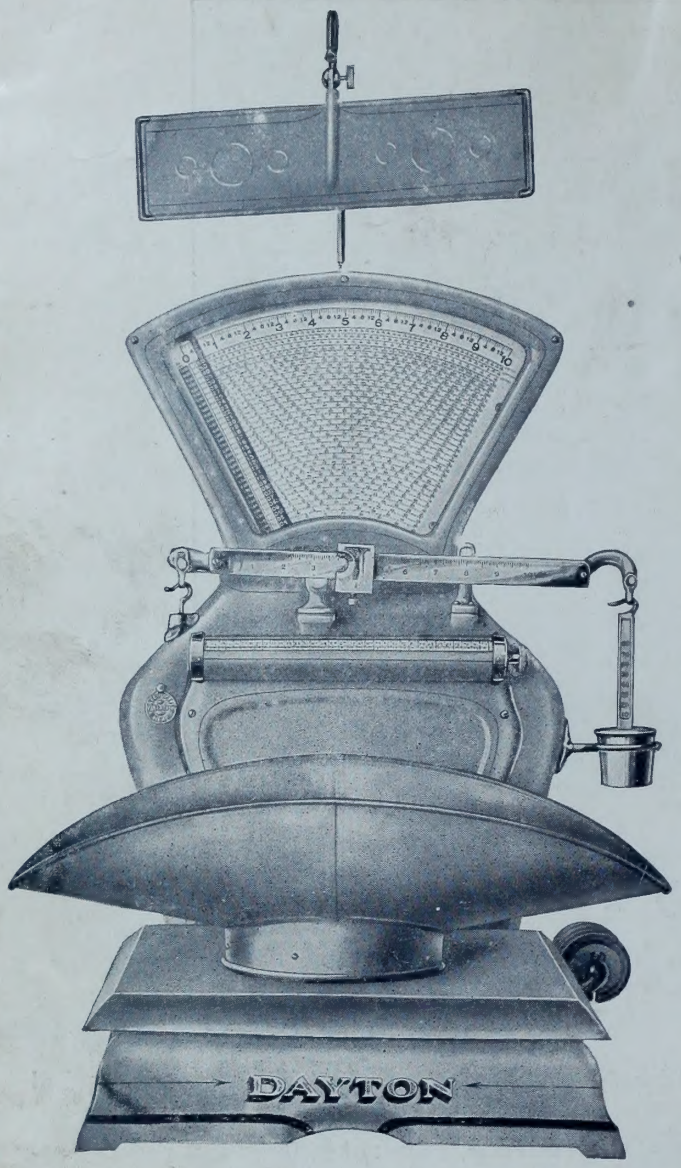
THE LUFKIN RULE CO. OF CANADA, LTD.
WINDSOR, ONT.

A Continuous Sheet of Flat-Drawn Glass Running Night and Day

Look carefully at this illustration. It is worthy of special study, for it represents the beginning of a new standard of quality for sheet glass in Canada.

The operator in the illustration is removing from a Libbey-Owens machine, a sheet of perfectly flat, perfectly annealed glass, glass that is the same thickness throughout, (no thick or thin ends) glass which will break on the cut, saving you waste and annoyance, and adding to your profits, glass without a blemish of any kind!

Cylinder made glass, the kind you know and are now selling, is never flat, but always has a bowed or bellied surface, it is full of blemishes, cannot be depended upon to break on the cut, is brittle and uneven in texture.



Every sheet of Libbey-Owens will back up our guarantee it is made flat, and a 200 foot annealing oven gives it the kind of temper that will save you from losing your own in the future.

And this fine glass is being made for YOU in our new and magnificent factory in Hamilton, Ontario. You will find the Libbey-Owens process fully described in our illustrated booklet, entitled "The Story of Libbey-Owens Flat Drawn Glass." Send at once for your copy. It will show you the way out of ALL your glass troubles, and give you the reasons why the glass end of your business will in future be a pleasure instead of a continual disappointment.

"There is NO Flat-Drawn Glass but Libbey-Owens"

Canadian Libbey-Owens Sheet Glass Co., Limited, Hamilton, Ontario.

LIBBEY FLAT DRAWN GLASS OWENS
MADE IN CANADA

"It splits the line without a shade of error!"

Says a Dayton user:

"I believe in a convenient computing scale for each department of my business, to assure customers quick service.

"The indicator signals when the clerk is getting near the weight wanted and he is able to split the line without a shade of error."

In less than two years the Dayton Hardware Scale has made itself an **INDISPENSABLE** part of the equipment of the progressive Canadian hardware merchant.

Hardware stores which a year ago were trying it out in tentative fashion now tell us: "If there is anything better than ONE Dayton, it is TWO or THREE Daytons!"

Hardware merchants have been quick to grasp the lesson learned by the grocers of Canada: Do not try to make one Dayton do the work of two. Daytons placed at convenient points in the store speed up service and eliminate delays which are irritating to the customer.

The clerk with a Dayton price chart before him always "splits the line," with ease and without a moment's delay, giving weights that are accurate to the fraction of a cent.

EXCLUSIVE FEATURES

We'll be glad to explain to you any of the Dayton's numerous exclusive features. The counting scoop, which counts bolts, nuts, screws and other small articles is a marvel of accuracy. See also the wire rack, which enables you to weigh coils of wire, rope, hose, etc., with ease and speed.

SPEED UP YOUR SERVICE WITH MORE DAYTONS.
